AUTHORIZED EMERG. VEHICLES

**House Bill 5829 with committee
amendment
First Analysis (11-20-96)**

**Sponsor: Rep. James McNutt
Committee: Transportation**

THE APPARENT PROBLEM:

At present, the Michigan Vehicle Code permits certain vehicles to operate as emergency vehicles as long as they meet the definition of an "authorized emergency vehicle" under the act. This term refers to fire department vehicles, police vehicles, ambulances, and other privately owned vehicles used by volunteer or paid fire fighters or volunteer ambulance drivers which have been authorized to operate as emergency vehicles by the Department of State Police. Apparently, however, in authorizing a vehicle to operate in this way, the department generally contacts a local emergency medical service agency or some other local authority in the process of determining whether a vehicle--based on who owns it and how he or she plans to use it--should qualify as an emergency vehicle. (This is important because authorized emergency vehicles may use special emergency flashers and operate at high speeds or in other ways required under emergency conditions.) Because the department finds the current process to be inefficient and time-consuming, it has requested legislation that would transfer responsibility for authorizing emergency vehicles to certain local officials. In addition, language has been requested that would permit vehicles owned and operated by federally recognized nonprofit charitable organizations that were to be used exclusively for assisting during emergencies to qualify as emergency vehicles for purposes of using red flashers during emergency calls.

THE CONTENT OF THE BILL:

Under the Michigan Vehicle Code, the Department of State Police determines which vehicles qualify as "authorized emergency vehicles" for purposes of being able to use emergency flashers and operate under emergency conditions (i.e., high-speed situations). The bill would eliminate the role of the Department of State Police in authorizing what constitutes an authorized emergency vehicle and, instead, specifies that such a vehicle would mean either of the following:

* Vehicles of the fire department, police vehicles, ambulances, or privately owned motor vehicles of volunteer or paid fire fighters, or of members of

emergency medical service agencies that were licensed by the Department of Community Health if authorized by the county and/or local emergency medical service agency director or the person designated with such authority;

* For purposes of qualifying to use red flashers on the top of a vehicle during an emergency, a vehicle owned and operated by a federally recognized nonprofit charitable organization that was used exclusively for assistance during that emergency.

MCL 257.2 and 257.698

FISCAL IMPLICATIONS:

The Department of State Police says the bill would result in minimal cost savings both for the state and for local governments as it would save them costs of postage and paperwork necessary under the current procedure followed to have a vehicle authorized as an emergency vehicle. (11-19-96)

ARGUMENTS:

For:

The bill would transfer responsibility for authorizing a vehicle to operate as an emergency vehicle from the Department of State Police to the county and/or local emergency medical service agency director or another such person who had been designated with this authority. According to a spokeswoman for the department, these local officials are currently consulted by the department in the process of authorizing vehicles to qualify as emergency vehicles. This communication process, however, is time-consuming and requires costly paperwork and postage. Since the department already relies on the judgment of local officials to make its decision, it only makes sense to statutorily transfer this authority to them.

For:

The bill would allow vehicles owned and operated by federally recognized nonprofit charitable organizations

House Bill 5829 (11-20-96)

that were used exclusively for assisting during emergencies to qualify as emergency vehicles. This would enable vehicles used by, for example, the American Red Cross during emergency situations to operate as emergency vehicles with red flashers under such circumstances.

POSITIONS:

The Department of State Police supports the bill. (11-19-96)
