Senate Bill 891 (as reported without amendment)
Sponsor: Senator Loren Bennett
Committee: Natural Resources and Environmental Affairs

CONTENT

The bill would amend the Natural Resources and Environmental Protection Act to require a multisource commercial hazardous waste disposal well to maintain on site a treatment facility and a storage facility that obtained a construction permit and an operating license as required by the Act.

“Multisource commercial hazardous waste disposal well”, as defined in House Bill 5650, would mean a disposal well that received hazardous waste that was generated by more than one person. It would not include a disposal well that received hazardous waste from a subsidiary of the person who owned or operated the multisource commercial hazardous waste disposal well.

The Senate bill is tie-barred to House Bill 5650, which would amend the Act to require a person to obtain a construction permit for an on-site treatment facility and storage facility before drilling a multisource commercial hazardous waste disposal well or converting a well to a multisource commercial hazardous waste disposal well.

Proposed MCL 324.11118a

Legislative Analyst: L. Burghardt

FISCAL IMPACT

The bill would have an indeterminate fiscal impact on State and local government, depending upon the number and complexity of multisource commercial hazardous waste disposal wells.

Requiring businesses to obtain a construction permit could generate an indeterminate amount of revenue to the State, depending upon the complexity of the permit requests. The State would incur costs associated with permit review, including meetings of the Site Review Board.

Date Completed: 3-13-96
