TDD: (517) 373-0543

House Bill 5087 (as passed by the House)
Sponsor: Representative Marc Shulman
House Committee: Family and Children Services
Senate Committee: Education

Date Completed: 3-18-04

CONTENT

The bill would amend the Revised School Code to permit students in public or nonpublic schools to possess and use an epinephrine auto-injector or epinephrine inhaler to treat anaphylaxis at school, on school-sponsored transportation, and at school-sponsored events. (Anaphylaxis is a severe allergic reaction to insect bites, foods, medications, or other substances.)

Currently, a student may possess and use a metered dose inhaler or dry powder inhaler to treat or prevent asthmatic symptoms, if the student has written approval from his or her physician and, if the student is a minor, from his or her parent or legal guardian. A school district may request a student's parent or guardian to provide an extra inhaler to designated school personnel for use in an emergency. A principal who is aware that a pupil possesses an inhaler must notify each of the student's teachers of that fact. Under the bill, these provisions also would apply to epinephrine auto-injectors and inhalers.

MCL 380.1179
