

Reps. Casperson, Nitz, Booher, Hansen, Shaffer, Stahl, Steil, Emmons, Wenke, Ball, Huizenga, Moore, Farhat, Proos, Jones, Vander Veen, Marleau, Schuitmaker, Hummel, Walker, Mayes and Sheltrown offered the following resolution:

**House Resolution No. 105.**

A resolution to encourage the Michigan Department of Agriculture and the Michigan Department of Environmental Quality to continue participating in the Michigan Agriculture Environmental Assurance Program and encourage the maximum participation of Michigan farmers.

Whereas, The Michigan Agriculture Environmental Assurance Program (MAEAP) is a voluntary, proactive pollution prevention program for Michigan farmers established as a result of the 1998 Pollution Prevention Strategy developed jointly by the Michigan Department of Agriculture (MDA) and the Michigan Department of Environmental Quality (DEQ). MAEAP is currently represented by a partnership of over 30 federal, state, academic, conservation, and agricultural agencies and organizations dedicated to the economic success of Michigan agriculture and to environmental stewardship; and

Whereas, MAEAP is nationally recognized for its innovative alternative approach to agricultural environmental regulation and is used as a model for partnership-based pollution prevention programs. MAEAP was selected by the Council of State Governments as a regional finalist as one of the most innovative programs among all 50 states; and

Whereas, MAEAP encompasses three systems-livestock, farmstead, and cropping-designed to help farmers evaluate the environmental risks of their operation. Farmers develop and implement economically feasible, effective, and environmentally sound pollution prevention practices; and

Whereas, Through participation in MAEAP, more and more Michigan farmers are learning how to identify and prevent pollution on their farms. Over 3,000 farmers have completed the Phase I educational component of MAEAP and over 100 farmers have completed one or all three of the system verifications. Participation in MAEAP positions farmers to participate in other pollution prevention programs at the state and federal levels; now therefore, be it

Resolved by the House of Representatives, That we encourage the MDA and the DEQ to continue participating in MAEAP and encourage the maximum participation of Michigan farmers; and be it further

Resolved, That copies of this resolution be transmitted to the Michigan Department of Agriculture and the Michigan Department of Environmental Quality.
