

Reps. Schuitmaker, Shaffer, Proos and Nitz offered the following resolution:

**House Resolution No. 295.**

A resolution to urge the Michigan Department of Agriculture and the United States Department of Agriculture to provide indemnification to producers who need to destroy crops and to increase inspections of products in order to prevent the spread of downy mildew, and to provide crop insurance for cucumbers and other cucurbitaceae crops.

Whereas, Agriculture is the second largest industry in Michigan. Michigan's agriculture and food industry generates billions of dollars in economic activity annually and employs more than 727,000 people; and

Whereas, Michigan is the number one producer of pickling cucumbers in the country and a leading producer of fresh cucumbers, squash, and pumpkins. In 2004, the value of these crops was nearly \$95 million; and

Whereas, Downy mildew is a serious plant disease infecting cucumbers, squash, pumpkins, and melons. In 2005, Michigan lost 40 percent of its pickling cucumber crop to downy mildew. Statewide costs to prevent downy mildew from infecting healthy crops can exceed \$5 million for Michigan's growers of pickling cucumbers alone; and

Whereas, There are current outbreaks of downy mildew in southeast Michigan, Ohio, Indiana, and Ontario. Ontario has experienced a particularly severe outbreak. Infected products imported from Ontario could spread downy mildew to other regions of Michigan; and

Whereas, Downy mildew is truly a state, national, and international problem that should be addressed by all levels of government; and

Whereas, The United States Department of Agriculture's Risk Management Agency has refused to offer Michigan farmers crop insurance for cucumbers and other cucurbitaceae crops; and

Whereas, One strategy to prevent the spread of downy mildew is to till up infected crops and spray fields with fungicide. A single infected field can release thousands of fungal spores into the wind, potentially infecting other Michigan farms as well as farms in Ohio, Illinois, Indiana, and Ontario. However, farmers may be reluctant to take timely action for the good of the entire farming industry at a significant individual loss; now, therefore, be it

Resolved by the House of Representatives, That we urge the Michigan Department of Agriculture and the United States Department of Agriculture to provide indemnification to producers who need to destroy crops and to increase inspections of products in order to prevent the spread of downy mildew; and be it further

Resolved, That we urge the United States Department of Agriculture's Risk Management Agency to make crop insurance available to Michigan farmers for cucumbers and other cucurbitaceae crops; and be it further

Resolved, That copies of this resolution be transmitted to the Governor, the Director of the Michigan Department of Agriculture, the Michigan Commission of Agriculture, the President of the United States, the Secretary of the United States Department of Agriculture, and the members of the Michigan congressional delegation.
