## A SUMMARY OF HOUSE BILLS 4649 & 4650 AS REPORTED FROM COMMITTEE 3-26-09

The bills would amend the Michigan Low Income Heating Assistance and Shut-off Protection Act in the following ways.

Section 7 of this act currently requires the Department of Human Services (DHS) to make available to *public utilities regulated by the Public Service Commission* information about applicants for, and recipients of, public assistance, subject to state and federal laws and rules on confidentiality. Such information must only be disclosed if necessary and must only be used by the regulated utility to administer a program created by statute or PSC order that is intended to assist applicants for, or recipients of, public assistance in defraying their energy costs.

Among other things, House Bill 4649 would allow the DHS to make this information available to "energy providers." The term "energy providers" is not defined in either bill, but presumably would include electric and natural gas companies whether or not they are regulated by the PSC. For example, this would allow information to be shared with municipal electric utilities which are not regulated by the PSC. (MCL 400.1207)

House Bill 4650 would add a new Section 7a to require DHS to operate an electronic payment process with participating "*energy providers*" no later than April 1, 2010 (or at a time considered possible by the department) to pay the energy bills of low income customers subject to shutoff. To the extent considered appropriate, the department would enter into agreements with "*energy providers*" in which the providers agree to permit the DHS to make direct payments to them on behalf of eligible recipients. The agreement would authorize the "*energy provider*" to provide customer information to DHS. DHS would determine eligible recipients, program requirements, benefit levels, and funding levels. (MCL 400.1207a)

[Note: As noted above, the term "energy providers" is not defined in the bills. Under current Section 5(3), "*provider utility*" means an investor-owned natural gas or electric utility company that provides residential heating utility service to an assisted household.

For other energy providers, the maximum level of benefit provided to their customers will be the same regardless of the type of fuel used by the program participant." The bill does not change the current definition of "*provider utility*."]
