Senate Bill 555 (Substitute S-1 as reported)
Sponsor: Senator Randy Richardville
Committee: Energy Policy and Public Utilities

CONTENT

The bill would amend the Michigan Low Income Heating Assistance and Shut-Off Protection Act to require the Department of Human Services (DHS) to operate an electronic payment process with participating energy providers to provide for the payment of low income customer energy bills that were subject to shut-off. The DHS would have to operate this process by April 1, 2010, or at a time it considered possible.

Also, as the DHS considered appropriate, it would have to enter into agreements with energy providers in which they would agree to permit the Department to make direct payments to the providers on behalf of an eligible recipient. An agreement would have to authorize the energy provider to give customer information to the DHS.

The DHS would have to determine the eligible recipients, program requirements, benefit levels, and funding levels.

Proposed MCL 400.1207a

Legislative Analyst: Julie Cassidy

FISCAL IMPACT

The State of Michigan assumes a base Federal grant through the Low Income Home Energy Assistance Program (LIHEAP) of about \$116.5 million. This grant is used for the Michigan home heating credit, weatherization assistance, and emergency shut-off prevention for low income residents. The bill would require the Department of Human Services to create an electronic payment process with energy providers for emergency shut-off prevention payments through LIHEAP. Since LIHEAP is a capped program funded through Federal grants, there would not be a GF/GP impact associated with the operation of this program. The Department could incur some increased cost associated with information technology changes to facilitate automatic payments to energy providers.
