## Senate Bill 118

**Sponsor:** Sen. Mike Green  
**Senate Committee:** Finance  
**House Committee:** Tax Policy

**Complete to 5-24-11**

## A SUMMARY OF SENATE BILL 118 AS PASSED BY THE SENATE

Generally speaking, the General Sales Tax requires businesses to remit sales taxes they collect on the 20th of each month. However, the act allows a "materialperson" to file on a quarterly basis, with collections due on April 20th, July 20th, October 20th, and January 20th for the calendar quarter ending the previous month.

A material person is currently defined in the act as a person who is primarily engaged in the sale of lumber and building materials used for the improvement of real property to owners, contractors, subcontractors, repairpersons, and consumers and who is authorized to file a construction lien under the Construction Lien Act. Senate Bill 118 provides that a materialperson would also include **a person who sells precast concrete products**.

## FISCAL IMPACT:

The bill would have minimal fiscal impact state revenue.

## BACKGROUND INFORMATION:

### Sales Tax Treatment of Materialpersons

When sales of materials used for construction are made on a credit basis, the seller typically receive the payment three to four months after the sale. Requiring these firms to file returns on a monthly basis has the potential to create considerable cash flow problems. Public Act 453 of 1998 amended the General Sales Tax Act to alleviate this problem by permitting a materialperson to file returns on a quarterly basis.

Sellers of precast concrete products reportedly also make most sales on a credit basis and may face the same financial constraints when required to make monthly returns. Following enactment of Public Act 453 at least one seller of precast concrete products began submitting quarterly sales returns. However, the Department of Treasury, in the course of its regular audits, discovered that the firm, by not also selling lumber products, did not meet the definition of "materialperson" under the General Sales Tax Act, and wasn't eligible to make quarterly payments.

### **Precast Concrete Products**

While not defined in the bill, precast concrete products are used in the construction of commercial and residential buildings and improve the appearance or usefulness of the physical site around a building, and include such products as steps, basement and above-grade walls, foundation systems, basement entries, floor and roof slabs, architectural wall panels, furniture, landscape retaining walls, modular paving products, modular housing units, air conditioning pads, ornamental products, parking bumpers and curbs, signs, storm shelters, safe rooms, bank vaults, and automated teller machine vaults.

Similar bills have been introduced in previous sessions, including House Bill 4105 in the 2009-10 session, House Bill 4067 in the 2007-08 session, and House Bill 5770 in the 2005-06 session

Based on information provided in prior sessions, more than a dozen Michigan businesses sell precast concrete products.
