

Senators Anderson, Warren, Ananich, Young, Hopgood, Johnson, Gregory and Whitmer offered the following resolution:

Senate Resolution No. 61.

A resolution to express the sense of this legislative body that the state of Michigan should continue its efforts to reduce the high rates of teen pregnancies.

Whereas, More than 300,000 teenagers become pregnant each year in the United States; and

Whereas, The pregnancy rate for Michigan females aged 15-19 years old in 2008 was 51.1 per 1,000, and the birth rate for Michigan females aged 15-19 years old in 2006 was 30.1 per 1,000, resulting in 12,322 babies. This birth rate marked a 4 percent increase from 2005; and

Whereas, Despite progress over the last decade, 3 in 10 teenagers in the United States become pregnant, the highest teen pregnancy rate among comparable countries. After 14 straight years of decline, the national teen birth rate rose by 5 percent between 2005 and 2007; and

Whereas, Latina and African-American teen girls are more likely than not to become pregnant before the age of 20, and Native American teens have a birth rate more than double that of non-Hispanic white teens; and

Whereas, Teen pregnancy is closely linked to a number of critical social issues, such as poverty, educational attainment, involvement in the criminal justice and child welfare systems, and more. Teen childbearing is estimated to cost taxpayers in this country \$9.1 billion each year, most of which is due to costs associated with negative social and health outcomes for the children of teen parents; and

Whereas, A child is 9 times more likely to grow up in poverty if he or she is born to unmarried teen parents who have not yet completed high school. Less than half of mothers who have a child before they turn age 18 ever graduate from high school, and less than 2 percent of mothers who have children before age 18 have a college degree by age 30. Children of teen mothers are more likely to be born prematurely and at low birth weight. Children of teen parents are twice as likely to suffer abuse and neglect than would occur if their mothers had delayed childbearing; and

Whereas, Fully 73 percent of adults and a plurality of teens wish that teens were getting more information about both abstinence and contraception; now, therefore, be it

Resolved by the Senate, That the members of this body believe that the state of Michigan should continue its efforts to reduce the high rates of teen pregnancies and births and raise awareness about the importance of this critical issue, promote parent-child communication, and invest in programs that have been proven to reduce teen pregnancy.
