Senate Bill 274 (Substitute S-1 as reported)
Sponsor: Senator Marty Knollenberg
Committee: Health Policy

CONTENT

The bill would amend the Public Health Code to do the following:

- Allow a pharmacist to partially fill in increments a prescription for a Schedule 2 controlled substance under certain circumstances (described below).
- Limit the amount and supply of opioids a prescriber could prescribe for a patient who was being treated for acute pain, beginning July 1, 2018.
- Require a pharmacy to ensure that each individual who filled a prescription at the pharmacy was informed that he or she was eligible to receive an opioid antagonist.

A pharmacist could partially fill a prescription for a Schedule 2 controlled substance in increments if one of the following applied:

- The pharmacist was unable to supply the full quantity prescribed or the patient requested a smaller quantity than what was prescribed, in which case the prescription would have to be filled within 30 days after the date it was issued.
- The prescription was filled upon the oral prescription of a practitioner, in which case the prescription would have to be filled within 72 hours after the first partial filling.
- The prescription was for a terminally ill patient, in which case the prescription would have to be filled within 60 days after the date in which it was issued.

MCL 333.7333 et al.

Legislative Analyst: Stephen Jackson

FISCAL IMPACT

The bill would have no fiscal impact on State or local government.
