## SUMMARY:

Senate Bill 809 would amend the Health Care False Claim Act to exempt certain acts from being considered violations of the prohibition against kickbacks and bribes.

Section 4 of the act provides that a person who solicits, offers, pays, or receives a kickback or bribe in connection with furnishing goods or services for which payment is or may be made in whole or in part by a health care corporation or health care insurer, or who receives a rebate of a fee or charge for referring an individual to another person for the furnishing of health care benefits, is guilty of a felony punishable by imprisonment for up to four years, a fine of up to \$50,000, or both.

Section 4a provides that the prohibition in section 4 does not apply to a rebate or discount from a drug manufacturer or from a company that licenses or distributes the drugs of a drug manufacturer to a consumer for the consumer's use of a drug manufactured or licensed or distributed by the drug manufacturer or company. The prohibition also does not apply to a monetary payment from a drug manufacturer to a consumer, the consumer's health professional, or a vendor that has a contract with the drug manufacturer, for a health care service that the prescribing information of a qualified drug requires or recommends for initiating drug therapy.

The bill would amend the exception in section 4a to apply when the drugs are for the benefit of a consumer and to apply to the *administration of a drug* (in addition to use of a drug), including for consumer cost-sharing requirements for the administration or drug.

*Administration*, as used in that instance, would mean injection, infusion, or similar means of application.

MCL 752.1004

## FISCAL IMPACT:

The bill would not have an appreciable fiscal impact on any unit of state or local government.
