Sec. 2. It is hereby declared to be the purposes of this act and of the Michigan strategic fund created by this act to help diversify the economy of this state, to promote economic stability and growth, to develop and expand existing and alternative sources of energy and the conservation of energy, to assist business enterprise in obtaining additional sources of financing to aid this state in achieving the goal of long-term economic growth and full employment, to meet the growing competition for business enterprises, to preserve existing jobs, to create new jobs, to reduce the cost of business and production, to foster export activity, to alleviate and prevent unemployment through the retention, promotion, and development of agriculture and agricultural facilities, forestry and forestry facilities, commerce and commercial facilities, export markets and export activities, industry and industrial buildings and facilities, including the sites for these, and agricultural, forestry, commercial, and industrial machinery and equipment, water and air pollution control equipment, and solid waste disposal facilities with respect thereto or for use by individuals for private sector employment, to make loans to the Special Purpose FWC Settlement Entity, which will in turn use the loan proceeds only to pay the expenses, costs, and fees associated with the Special Purpose FWC Settlement Entity, to reimburse this state for its initial \$5,000,000.00 payment to the FWC Qualified Settlement Fund, and to pay to the FWC Qualified Settlement Fund the settlement amount agreed to by this state in the settlement agreement and related preliminary approval orders, any amendments to those orders, or the subsequent final approval orders that will be entered by the court in the consolidated cases known as *In re Flint Water Cases*, No. 5:16-cv-10444-JEL-MKM (ED Mich), so as to assist in alleviating health issues of Michigan citizens and to ensure continued state fiscal stability and credit

worthiness, and to otherwise assist in the achievement of the solution to the problems and objectives described in section 1.

Sec. 4. As used in this act:

(a) "Board" means the board of directors of the Michigan strategic fund, except where the context clearly requires a different definition.

(b) "Economic development project" means an endeavor related to industrial, commercial, or agricultural enterprise. Economic development project includes, but is not limited to, a theme or recreation park; agricultural or forestry production, harvesting, storage, or processing facilities or equipment; port facilities; and the use of equipment or facilities designed to produce energy from renewable resources. Economic development project does not include that portion of an endeavor devoted to the sale of goods at retail, except that, as used in relation to the fund insuring a transaction entered into by a depository institution, and as used in relation to a loan by the fund to a minority owned business, an economic development project may include that portion of an endeavor devoted to the sale of goods at retail. Economic development project does not include that portion of an endeavor devoted to housing or a program or activity authorized under chapter 8A.

(c) "Financial institution" means a state or nationally chartered bank or a state or federally chartered savings and loan association, savings bank, or credit union whose deposits are insured by an agency of the United States government and that maintains a principal office or branch office in this state under the laws of this state or the United States.

(d) "Fund" means the Michigan strategic fund created under section 5, except where the context clearly requires a different definition.

(e) "FWC Qualified Settlement Fund" means the FWC Qualified Settlement Fund described in the settlement agreement approved by the court in *In re Flint Water Cases*, No. 5:16-cv-10444-JEL-MKM (ED Mich).

(f) "Green chemistry" means chemistry and chemical engineering to design chemical products or processes that reduce or eliminate the use or generation of hazardous substances, while producing high-quality products through safe and efficient manufacturing processes. Green chemistry is guided by the following 12 principles:

(i) Prevent waste: Design chemical syntheses to prevent waste, leaving no waste to treat or clean up.

(ii) Design safer chemicals and products: Design chemical products to be fully effective, yet have little or no toxicity.

(iii) Design less hazardous chemical syntheses: Design syntheses to use and generate substances with little or no toxicity to humans and the environment.

(iv) Use renewable feedstocks: Use raw materials and feedstocks that are renewable rather than depleting. Renewable feedstocks are often made from agricultural products or are the wastes of other processes; depleting feedstocks are made from fossil fuels, including petroleum, natural gas, or coal, or are mined.

(v) Use catalysts, not stoichiometric reagents: Minimize waste by using catalytic reactions. Catalysts are used in small amounts and can carry out a single reaction many times. They are preferable to stoichiometric reagents, which are used in excess and work only once.

(vi) Avoid chemical derivatives: Avoid using blocking or protecting groups or any temporary modifications if possible. Derivatives use additional reagents and generate waste.

(vii) Maximize atom economy: Design syntheses so that the final product contains the maximum proportion of the starting materials. There should be few, if any, wasted atoms.

(viii) Use safer solvents and reaction conditions: Avoid using solvents, separation agents, or other auxiliary chemicals. If these chemicals are necessary, use innocuous chemicals.

(ix) Increase energy efficiency: Run chemical reactions at ambient temperature and pressure whenever possible.

(x) Design chemicals and products to degrade after use: Design chemical products to break down to innocuous substances after use so that they do not accumulate in the environment.

(xi) Analyze in real-time to prevent pollution: Include in-process real-time monitoring and control during syntheses to minimize or eliminate the formation of by-products.

(xii) Minimize the potential for accidents: Design chemicals and their forms, including solid, liquid, or gas, to minimize the potential for chemical accidents, including explosions, fires, and releases to the environment.

(g) "Michigan economic development corporation" or "MEDC" means the Michigan economic development corporation, the public body corporate created under section 28 of article VII of the state constitution of 1963 and the urban cooperation act of 1967, 1967 (Ex Sess) PA 7, MCL 124.501 to 124.512, by a contractual interlocal agreement effective April 5, 1999, and subsequently amended, between local participating economic development corporations formed under the economic development corporations act, 1974 PA 338, MCL 125.1601 to 125.1636,

(14) The issuance of bonds and notes under this act is subject to the agency financing reporting act, 2002 PA 470, MCL 129.171 to 129.177.

(15) For the purpose of more effectively managing its debt service, the fund may enter into an interest rate exchange or swap, hedge, or similar agreement with respect to its bonds or notes on the terms and payable from the sources and with the security, if any, as determined by the board by resolution.
