(3) The owner or operator of a designated facility shall not store liquid industrial by-product for longer than 1 year unless the by-product is being stored for purposes of reclamation and not less than 75% of the cumulative amount, by weight or volume, of each type of by-product that is stored on site each calendar year is reclaimed or transferred to a different site for reclamation during that calendar year. The owner or operator of a designated facility shall maintain documentation that demonstrates compliance with this subsection.

(4) The owner or operator of a designated facility shall do all of the following:

(a) Retain all records required pursuant to this part for a period of at least 3 years and shall make those records readily available for review and inspection by the department or a peace officer. The retention period required by this subdivision is automatically extended during the course of any unresolved enforcement action regarding the regulated activity or as required by the department. Records required under this part may be retained in electronic format.

(b) Maintain a plan designed to respond to and minimize hazards to human health and the environment from unplanned releases of liquid industrial by-product to air, soil, and surface water.

(c) Document that all employees who have a responsibility to manage liquid industrial by-product are trained in the proper handling and emergency procedures appropriate for their job duties.

(5) Except as provided in subsection (6), a designated facility shall submit to the department by April 30 each year a report describing its activities for the previous calendar year. The department shall provide for a method of electronic reporting. The report, at a minimum, shall include the following information:

(a) The name and address of the facility.

(b) The calendar year covered by the report.

(c) The types and quantities of liquid industrial by-product accepted and a description of the manner in which the liquid industrial by-product was processed or managed.

(6) A designated facility is not subject to the reporting requirements of subsection (5) for a calendar year if, during that calendar year, the designated facility received liquid industrial by-products only from 1 generator and was owned, operated, or legally controlled by that generator.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 2001, Act 165, Imd. Eff. Nov. 7, 2001;—Am. 2007, Act 75, Imd. Eff. Sept. 30, 2007;—Am. 2008, Act 8, Imd. Eff. Feb. 20, 2008;—Am. 2011, Act 90, Imd. 324.12113 Treatment, storage, or disposal of liquid industrial by-product; requirements.

Sec. 12113. (1) Storage of liquid industrial by-product, whether at the location of generation, under the control of the transporter, or at the designated facility, shall be protected from weather, fire, physical damage, and vandals. All vehicles, containers, and tanks used to hold by-product shall be closed or covered, except when necessary to add or remove by-product, or otherwise managed in accordance with applicable state laws, to prevent the escape of by-product. The exterior of all vehicles, containers, and tanks used to hold by-product shall be kept free of by-product and its residue.

(2) Except as otherwise authorized pursuant to this section or other applicable statutes or rules or orders of the department, liquid industrial by-product shall be managed to prevent by-product from being discharged into the soil, surface water or groundwater, or a drain or sewer, or discharged in violation of part 55.

(3) A person shall treat, store, and dispose of liquid industrial by-product in accordance with all applicable statutes and rules and orders of the department.

(4) This part does not prohibit a publicly owned treatment works from accepting liquid industrial by-product from the premises of a person, and does not prohibit a person from engaging, employing, or

contracting with a publicly owned treatment works. However, a publicly owned treatment works that receives by-product by means of transportation is a designated facility and shall comply with section 12112.

(5) A person shall not treat, store, or dispose of liquid industrial by-product in a surface impoundment, unless the surface impoundment has a discharge or storage permit authorized under part 31 or, in the case of leachate, is authorized in a permit issued under part 115.

(6) Activities regulated under part 615 or the rules, orders, or instructions under that part or regulated under part C of title XIV of the public health service act, 42 USC 300h to 300h-8, or the regulations promulgated under that act, are exempt from the requirements of this section.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 2008, Act 8, Imd. Eff. Feb. 20, 2008;—Am. 2015, Act 224, Eff. Mar. 16, 2016.

Popular name: Act 451

Popular name: NREPA

324.12114 Violations; probable cause; powers of department or peace officer; court costs and other expenses; obtaining samples for purposes of enforcing or administering part.

Sec. 12114. (1) If the department or a peace officer has probable cause to believe that a person is violating this part, the department or a peace officer may search without a warrant a vehicle or equipment that is possessed, used, or operated by that person. The department or a peace officer may seize a vehicle, equipment, or other property used or operated in a manner or for a purpose in violation of this part. A vehicle, equipment, or other property used in violation of this part is subject to seizure and forfeiture as provided in chapter 47 of the revised judicature act of 1961, 1961 PA 236, MCL 600.4701 to 600.4709.

(2) The court may award court costs and other expenses of litigation including attorney fees to a party who successfully brings an action under this section.

(3) The department or a peace officer may enter at reasonable times any generator, transporter, or designated facility or other place where liquid industrial by-products are or have been generated, stored, treated, or disposed of, or transported from and may inspect the facility or other place and obtain samples of the by-products and samples of the containers or labeling of the by-products for the purposes of enforcing or administering this part.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1998, Act 140, Eff. Sept. 1, 1998;—Am. 2015, Act 224, Eff. Mar. 16, 2016.

Popular name: Act 451

Popular name: NREPA

324.12115 Civil action; damages; court costs and other expenses.

Sec. 12115. (1) The attorney general may commence a civil action against a person in a court of competent jurisdiction for appropriate relief, including injunctive relief for a violation of this part, or a registration or permit issued pursuant to this part. The court has jurisdiction to restrain the violation and to require compliance. In addition to any other relief granted under this section, the court may impose a civil fine of not more than $10,000.00 for each instance of violation and, if the violation is continuous, for each day of continued noncompliance. A fine collected under this subsection shall be deposited in the general fund.

(2) The attorney general or a person may bring a civil action in a court of competent jurisdiction to recover the full value of the damage done to the natural resources that are damaged or destroyed and the costs of surveillance and enforcement by the state as a result of a violation of this part. The damages and costs collected under this section shall be deposited in the general fund. However, if the damages result from the impairment or destruction of the fish, wildlife, or other natural resources of the state, the damages shall be deposited in the game and fish protection account of the Michigan conservation and recreation legacy fund provided in section 2010. The attorney general may, in addition, recover expenses incurred by the department to address and remedy a violation of this part that the department reasonably considered an imminent and substantial threat to the public health, safety, or welfare, or to the environment.

(3) The court may award court costs and other expenses of litigation including attorney fees to a party who successfully brings an action pursuant to this section or to a person who successfully defends against an action brought under this section that the court determines is frivolous.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 2004, Act 587, Eff. Dec. 23, 2006;—Am. 2015, Act 224, Eff. Mar. 16, 2016.

Compiler's note: Enacting section 2 of Act 587 of 2004 provides:

"Enacting section 2. This amendatory act does not take effect unless House Joint Resolution Z of the 92nd Legislature becomes a part of the state constitution of 1963 as provided in section 1 of article XII of the state constitution of 1963."

Popular name: Act 451

Popular name: NREPA

324.12116 Violations; penalties.

Sec. 12116. (1) A person that violates section 12105(c), 12107(2) or (3), 12109(4), or 12112(1)(b) is guilty of a misdemeanor punishable by imprisonment for not more than 30 days or a fine of not less than $200.00 and not more than $500.00, or both. A peace officer may issue an appearance ticket to a person who is in violation of section 12105(c), 12107(2) or (3), 12109(4), or 12112(1)(b).

(2) A person that knowingly makes or causes to be made a false statement or entry in a registration or permit application or a shipping document under this part is guilty of a felony punishable by imprisonment for not more than 2 years or a fine of not less than $2,500.00 or more than $10,000.00, or both.

(3) A person that violates this part or a registration or permit issued under this part, except as provided in subsections (1) and (2), is guilty of a misdemeanor punishable by imprisonment for not more than 6 months or a fine of not less than $1,000.00 or more than $2,500.00, or both.

(4) Each day that a violation continues constitutes a separate violation.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1998, Act 140, Eff. Sept. 1, 1998;—Am. 2015, Act 224, Eff. Mar. 16, 2016.

Popular name: Act 451

Popular name: NREPA

324.12117 Liquid industrial by-product transporter account.

Sec. 12117. (1) The liquid industrial by-product transporter account is created within the environmental pollution prevention fund, which is created in section 11130.

(2) The state treasurer may receive money or other assets from any source for deposit into the account. The state treasurer shall direct the investment of the account. The state treasurer shall credit to the account interest and earnings from account investments.

(3) Money remaining in the account at the close of the fiscal year shall not lapse to the general fund.

(4) The department shall expend money from the account, upon appropriation, for the implementation of this part. In addition, funds not expended from the account for the implementation of this part may be utilized for emergency response and cleanup activities related to liquid industrial by-product that are initiated by the department.

CHAPTER 4
POLLUTION PREVENTION

PART 141
POLLUTION PREVENTION POLICY

PART 143
WASTE MINIMIZATION

324.14301 Definitions.

Sec. 14301. As used in this part:

(a) "Department" means the department of environmental quality.

(b) "Environmental wastes" means all environmental pollutants, wastes, discharges, and emissions, regardless of how they are regulated and regardless of whether they are released to the general environment or the workplace environment.

(c) "Pollution prevention" means all of the following:

(*i*) "Source reduction" as defined in the pollution prevention act of 1990, subtitle G of title VI of the omnibus budget reconciliation act of 1990, Public Law 101-508, 42 U.S.C. 13101 to 13109.

(*ii*) "Pollution prevention" as described in the United States environmental protection agency's pollution prevention statement dated June 15, 1993.

(*iii*) Environmentally sound on-site or off-site reuse or recycling.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1998, Act 289, Imd. Eff. July 27, 1998.

Popular name: Act 451

Popular name: NREPA

324.14302 Pollution prevention; incorporation; purpose; personnel and support staff.

Sec. 14302. (1) The department shall incorporate pollution prevention goals within its regulatory and permit programs, including data collection and analysis to advance the concept and implementation of pollution prevention.

(2) The department shall employ personnel and provide support staff as are necessary to implement this part.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1998, Act 289, Imd. Eff. July 27, 1998.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Environmental Assistance Division to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

Popular name: Act 451

Popular name: NREPA

324.14303 Pollution prevention; duties of department; emphasis on in-plant pollution prevention and reduction of hazardous waste.

Sec. 14303. (1) The department shall do all of the following:

(a) Identify opportunities to encourage pollution prevention through the department's regulatory programs.

(b) Identify opportunities to encourage pollution prevention through the department's permit programs.

(c) Identify how pollution prevention efforts should be documented in environmental impact statements.

(d) Analyze and make recommendations on the value of imposing statewide goals or goals for particular environmental wastes, or both, for pollution prevention, minimum recycling standards, and environmental waste treatment standards.

(e) Publish an annual analysis of pollution prevention efforts and potentials in the state.

(2) In performing its responsibilities under subsection (1), the department shall place a particular emphasis on in-plant pollution prevention.

(3) Consistent with the congressional declaration in section 1003(b) of subtitle A of the solid waste disposal act, title II of Public Law 89-272, 42 U.S.C. 6902, that it is the national policy of the United States that, wherever feasible, hazardous waste is to be reduced or eliminated as expeditiously as possible, the department shall place a particular emphasis on the prevention of an environmental waste that is a hazardous waste as defined in section 11103.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1998, Act 289, Imd. Eff. July 27, 1998.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Environmental Assistance Division to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

Popular name: Act 451

Popular name: NREPA

324.14304 Transmitting certain information.

Sec. 14304. The department shall assure that relevant information received under section 313 of subtitle B of the emergency planning and community right-to-know act of 1986, title III of the superfund amendments and reauthorization act of 1986, Public Law 99-499, 42 U.S.C. 11023, is transmitted to the department.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1998, Act 289, Imd. Eff. July 27, 1998.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Environmental Assistance Division to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

Popular name: Act 451

Popular name: NREPA

324.14305 Repealed. 1998, Act 289, Imd. Eff. July 27, 1998.

Compiler's note: The repealed section pertained to providing information to waste reduction assistance service and department of commerce liaison.

Popular name: Act 451

Popular name: NREPA

324.14306 Annual report.

Sec. 14306. The department shall prepare and deliver, before January 1 of each year, a report detailing the efforts the department has undertaken during the previous fiscal year to implement this part. The annual report

shall be delivered to the legislature, the governor, and the chairpersons of the appropriations committees in the senate and the house of representatives for their use in evaluating future appropriations for the department to implement this part. The annual report may include the information generated pursuant to sections 14303 and 14304 and may recommend changes in policies and regulatory approaches that will encourage pollution prevention.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1998, Act 289, Imd. Eff. July 27, 1998.

Popular name: Act 451

Popular name: NREPA

PART 145
WASTE REDUCTION ASSISTANCE

324.14501 Definitions.

Sec. 14501. As used in this part:

(a) "Agricultural biomass" means residue and waste generated on a farm or by farm co-operative members from the production and processing of agricultural products, animal wastes, food processing wastes, or other materials as approved by the director.

(b) "Department" means the department of environmental quality.

(c) "Director" means the director of the department of environmental quality.

(d) "Eligible farmer or agricultural processor" means a person who processes agricultural products or a person who is engaged as an owner-operator of a farm in the production of agricultural goods as defined by section 35(1)(h) of the former single business tax act, 1975 PA 228, or by section 207(1)(d) of the Michigan business tax act, 2007 PA 36, MCL 208.1207.

(e) "Environmental wastes" means all environmental pollutants, wastes, discharges, and emissions, regardless of how they are regulated and regardless of whether they are released to the general environment or the workplace environment.

(f) "Pollution prevention" means all of the following:

(*i*) "Source reduction" as defined in 42 USC 13102.

(*ii*) "Pollution prevention" as described in the United States environmental protection agency's pollution prevention statement dated June 15, 1993.

(*iii*) Environmentally sound on-site or off-site reuse or recycling including, but not limited to, the use of agricultural biomass by qualified agricultural energy production systems.

(g) "Qualified agricultural energy production system" means the structures, equipment, and apparatus to be used to produce a gaseous fuel from the noncombustive decomposition of agricultural biomass and the apparatus and equipment used to generate electricity or heat from the gaseous fuel or store the gaseous fuel for future generation of electricity or heat. Qualified agricultural energy production system may include, but is not limited to, a methane digester, biomass gasification technology, or thermal depolymerization technology.

(h) "RETAP" means the retired engineers technical assistance program created in section 14511.

(i) "Retap fund" means the retired engineers technical assistance program fund created in section 14512.

(j) "Small business" means a business that is not dominant in its field as described in 13 CFR part 121 and meets both of the following requirements:

(*i*) Is independently owned or operated, by a person that employs 500 or fewer individuals.

(*ii*) Is a small business concern as defined in 15 USC 632.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1998, Act 289, Imd. Eff. July 27, 1998;—Am. 2004, Act 333, Imd. Eff. Sept. 23, 2004;—Am. 2006, Act 254, Imd. Eff. July 5, 2006;—Am. 2007, Act 174, Imd. Eff. Dec. 21, 2007.

Popular name: Act 451

Popular name: NREPA

324.14502 Reduction in amount of generated environmental waste; emphasis on pollution prevention; personnel; staff and services.

Sec. 14502. (1) The department shall inform, assist, educate, and provide funding, as provided in this part, to persons to facilitate a reduction in the amount of environmental waste generated in the state. The department shall place a particular emphasis on in-plant pollution prevention.

(2) The department shall employ personnel and provide staff and services as are necessary to implement this part.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1998, Act 289, Imd. Eff. July 27, 1998.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Environmental Assistance Division

to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

Popular name: Act 451

Popular name: NREPA

324.14503 Pollution prevention information clearinghouse; establishment; duties; contracts.

Sec. 14503. (1) The department shall establish a pollution prevention information clearinghouse which shall do all of the following:

(a) Upon request, provide specific pollution prevention information to any person.

(b) Publish information describing pollution prevention technologies.

(c) Distribute available publications pertaining to pollution prevention.

(d) Sponsor pollution prevention workshops targeted at specific industries.

(e) Participate in conferences and meetings of business organizations.

(f) Provide information and application forms as necessary to fulfill the department's responsibilities under sections 14505 and 14506.

(2) The department may contract to have any of the activities provided in subsection (1) performed by persons other than department personnel.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1998, Act 289, Imd. Eff. July 27, 1998.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Environmental Assistance Division to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

Popular name: Act 451

Popular name: NREPA

324.14504 Pollution prevention technical assistance.

Sec. 14504. The department shall provide and support technical assistance regarding pollution prevention to business and industry throughout the state and shall do all of the following:

(a) Provide instruction on self-conducted environmental waste audits pertaining to pollution prevention.

(b) Provide consultant referrals pertaining to pollution prevention.

(c) Provide on-site assistance to business and industry pertaining to pollution prevention.

(d) Provide other information and assistance that is considered appropriate by the department.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1998, Act 289, Imd. Eff. July 27, 1998.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Environmental Assistance Division to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

Popular name: Act 451

324.14505 Repealed. 1998, Act 289, Imd. Eff. July 27, 1998.

Compiler's note: The repealed section pertained to establishment of waste reduction grants program.

Popular name: Act 451

Popular name: NREPA

324.14506 Pollution prevention research grants program; establishment; distribution of information and applications for grants; form and contents of application; recipients of grants; considerations.

Sec. 14506. (1) The department shall establish a pollution prevention research grants program.

(2) Information and applications for grants under this section shall be distributed upon request through the department.

(3) An application for a grant under this section shall be on a form provided by the department and shall contain information required by the director.

(4) The director shall make grants to colleges and universities, nonprofit corporations, or industry associations or other persons for industry specific research projects pertaining to pollution prevention.

(5) The director, in making grants pursuant to this section, shall consider all of the following:

(a) The severity of the environmental waste problem being addressed.

(b) The extent that the technological development will reduce the volume or quantity or toxicity of environmental waste generated.

(c) The potential for the application of pollution prevention technology to other persons.

(d) The ability of the applicant to contribute matching funds.

(e) The percentage reduction of volume or quantity or toxicity of environmental waste that will be achieved.

(f) The likelihood of the applicant's project qualifying for other research grants or subsequent research grants from other sources.

(g) Whether the project is consistent with state law and policy.

(h) Additional criteria as the director considers appropriate.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1998, Act 289, Imd. Eff. July 27, 1998.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Environmental Assistance Division to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

324.14510 Annual report.

Sec. 14510. (1) The department shall prepare and deliver, before January 1 of each year, a report detailing the efforts the department, including RETAP, has undertaken during the previous fiscal year to implement this part. The annual report shall be delivered to the legislature, the governor, and the chairpersons of the appropriations committees in the senate and the house of representatives for their use in evaluating future appropriations for the service.

(2) By July 1, 1999, the department shall submit a report to the governor and legislature on the pollution prevention impacts of toxic materials accounting and toxics use reporting programs of other states and the federal government. The report shall evaluate the costs and benefits of such programs and shall recommend whether the state should implement such programs to foster pollution prevention.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1998, Act 289, Imd. Eff. July 27, 1998.

Popular name: Act 451

Popular name: NREPA

324.14511 Retired engineers technical assistance program; establishment; conduct; contract; priorities.

Sec. 14511. (1) The department shall establish a retired engineers technical assistance program. The RETAP shall provide assistance pursuant to section 14504. RETAP assistance shall be conducted by the retired engineers, scientists, and other qualified professionals participating in RETAP.

(2) The department may contract with public or private corporations to conduct 1 or more RETAP activities. Prior to entering into a contract under this subsection, the department shall submit the proposed contract to the legislature.

(3) The director may establish priorities for RETAP assistance based on the demand for RETAP assistance, the funds available for the assistance, and the needs of the applicants, taking into consideration the most effective use of the assistance.

History: Add. 1998, Act 289, Imd. Eff. July 27, 1998.

Compiler's note: For transfer of powers and duties of department of environmental quality under retired engineers technical assistance program from department of environmental quality to Michigan agency for energy, department of licensing and regulatory affairs, see E.R.O. No. 2015-3, compiled at MCL 460.21.

Popular name: Act 451

Popular name: NREPA

324.14512 Retired engineers technical assistance program fund; creation; disposition of funds; limitation; lapse; annual report; expenditure.

Sec. 14512. (1) The retired engineers technical assistance program fund is created within the state treasury.

(2) The state treasurer may receive money or other assets from any source for deposit into the RETAP fund. The state treasurer shall direct the investment of the RETAP fund. The state treasurer shall credit to the RETAP fund interest and earnings from fund investments.

(3) The total amount of money in the RETAP fund shall not exceed $10,000,000.00.

(4) To capitalize the RETAP fund, $700,000.00 from fees collected under section 11108 is appropriated and transferred from the general fund to the RETAP fund. If the RETAP fund is capitalized from a different source, $700,000.00 is appropriated and transferred from the RETAP fund back to the waste reduction fee fund.

(5) Money in the RETAP fund at the close of the fiscal year shall remain in the RETAP fund and shall not lapse to the general fund.

(6) The state treasurer shall annually report to the legislature on the amount of money in the RETAP fund.

(7) The department shall expend money from the RETAP fund, upon appropriation, to administer and operate the RETAP.

History: Add. 1998, Act 289, Imd. Eff. July 27, 1998.

Compiler's note: For transfer of powers and duties of department of environmental quality under retired engineers technical assistance program from department of environmental quality to Michigan agency for energy, department of licensing and regulatory affairs, see E.R.O. No. 2015-3, compiled at MCL 460.21.

Popular name: Act 451

Popular name: NREPA

324.14513 Small business pollution prevention assistance revolving loan fund; creation; disposition; lapse; expenditure; loan eligibility requirements; loan limitations; “fund” defined.

Sec. 14513. (1) The small business pollution prevention assistance revolving loan fund is created within the state treasury.

(2) The state treasurer may receive money or other assets from any source for deposit into the fund. The state treasurer shall direct the investment of the fund. The state treasurer shall credit to the fund interest and earnings from fund investments.

(3) Money in the fund at the close of the fiscal year shall remain in the fund and shall not lapse to the general fund.

(4) The department shall expend money from the fund, upon appropriation, to provide loans to small businesses to implement pollution prevention projects. For each loan issued under this section, the money shall be disbursed by the department to a lending institution that has entered into a loan participation agreement with the department.

(5) To be eligible for a loan from the fund for a qualified agricultural energy production system, an applicant shall meet all of the following requirements:

(a) The applicant shall be an eligible farmer or agricultural processor, or a for-profit farmer cooperative corporation organized under and operated in accordance with sections 98 to 109 of 1931 PA 327, MCL 450.98 to 450.109.

(b) The applicant shall be verified under the appropriate system of the Michigan agriculture environmental assurance program administered by the department of agriculture.

(c) Within a 3-year period immediately preceding the date the application was submitted, the applicant shall not have been found guilty of a criminal violation under this act.

(d) Within a 1-year period immediately preceding the date the application was submitted, the applicant shall not have been found responsible for a civil violation under this act that resulted in a civil fine of $10,000.00 or more.

(6) The amount of a loan from the fund shall not exceed $200,000.00. A small business shall not receive more than 1 loan in any 3-year period. Interest rates paid by the small business shall be set by the director, but shall not exceed 5%.

(7) As used in this section, "fund" means the small business pollution prevention assistance revolving loan fund created in subsection (1).

History: Add. 1998, Act 289, Imd. Eff. July 27, 1998;—Am. 2004, Act 334, Imd. Eff. Sept. 23, 2004;—Am. 2006, Act 254, Imd. Eff. July 5, 2006.

Popular name: NREPA

324.14514 Rules.

Sec. 14514. The department may promulgate rules to implement and administer this part.

History: Add. 2004, Act 333, Imd. Eff. Sept. 23, 2004.

Popular name: Act 451

Popular name: NREPA

PART 147
CHEMICAL SUBSTANCES

SUBPART 1
PERFLUOROALKYL AND POLYFLUOROALKYL SUBSTANCES

324.14701 Definitions.

Sec. 14701. As used in this subpart:

(a) "Department" means the department of environment, Great Lakes, and energy.

(b) "Fire chief" means that term as defined in section 1 of the fire prevention code, 1941 PA 207, MCL 29.1.

(c) "Organized fire department" means that term as defined in section 1 of the fire prevention code, 1941 PA 207, MCL 29.1.

(d) "PFAS" means a perfluoroalkyl or polyfluoroalkyl substance.

History: Add. 2020, Act 132, Imd. Eff. July 8, 2020.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Waste Management Division to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

Former MCL 324.14701, which pertained to definitions, was repealed by Act 446 of 2012, Imd. Eff. Dec. 27, 2012.

Popular name: Act 451

Popular name: NREPA

324.14702 Repealed. 2012, Act 446, Imd. Eff. Dec. 27, 2012.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Waste Management Division to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

The repealed section pertained to duties of department for administration and implementation of subpart.

Popular name: Act 451

Popular name: NREPA

324.14703 Incident report.

Sec. 14703. Immediately after the end of a fire or other incident at which an organized fire department uses firefighting foam containing intentionally added PFAS, the fire chief shall report the incident to the Michigan pollution emergency alert system.

History: Add. 2020, Act 132, Imd. Eff. July 8, 2020.

Compiler's note: Former MCL 324.14703, which pertained to determination by rule that certain compounds constitute sufficient danger to public health, safety, and welfare, was repealed by Act 446 of 2012, Imd. Eff. Dec. 27, 2012.

Popular name: Act 451

Popular name: NREPA

324.14704 Repealed. 2012, Act 446, Imd. Eff. Dec. 27, 2012.

Compiler's note: The repealed section pertained to disposal of certain solid or liquid wastes.

Popular name: Act 451

Popular name: NREPA

324.14705 Collection program for firefighting foam concentrate; guidelines; subject to appropriations.

Sec. 14705. The department shall establish a collection program for firefighting foam concentrate containing intentionally added PFAS and establish guidelines for the program. Under the program, the department shall accept the foam concentrate free of charge and properly dispose of the foam concentrate. The program is contingent on legislative appropriations to cover program costs.

History: Add. 2020, Act 132, Imd. Eff. July 8, 2020.

Compiler's note: Former MCL 324.14705, which pertained to violation of subpart as misdemeanor, was repealed by Act 446 of 2012, Imd. Eff. Dec. 27, 2012.

Popular name: Act 451

Popular name: NREPA

SUBPART 2

324.14721 Definitions; heading of subpart.

Sec. 14721. (1) As used in this subpart:

(a) "Department" means the department of environmental quality.

(b) "Octa-BDE" means octabromodiphenyl ether.

(c) "PBDE" means polybrominated diphenyl ether.

(d) "Penta-BDE" means pentabromodiphenyl ether.

(2) This subpart may be cited as the "Mary Beth Doyle PBDE act".

History: Add. 2004, Act 526, Imd. Eff. Jan. 3, 2005.

Popular name: Act 451

Popular name: NREPA

324.14722 Product or material containing penta-BDE; limitation; exceptions.

Sec. 14722. (1) Beginning June 1, 2006, a person shall not manufacture, process, or distribute a product or material that contains more than 1/10 of 1% of penta-BDE.

(2) This section does not apply to either of the following:

(a) Original equipment manufacturer replacement parts.

(b) The processing of recyclables containing penta-BDE in compliance with applicable federal, state, and local laws.

History: Add. 2004, Act 562, Imd. Eff. Jan. 3, 2005.

Popular name: Act 451

Popular name: NREPA

324.14723 Product or material containing octa-BDE; limitation; manufacturing, processing, or distributing; exception.

Sec. 14723. (1) Beginning June 1, 2006, a person shall not manufacture, process, or distribute a product or material that contains more than 1/10 of 1% of octa-BDE.

(2) This section does not apply to original equipment manufacturer replacement service parts or the processing of recyclables containing octa-BDE in compliance with applicable federal, state, and local laws.

History: Add. 2004, Act 526, Imd. Eff. Jan. 3, 2005.

Popular name: Act 451

Popular name: NREPA

324.14724 PBDE advisory committee; recommendations.

Sec. 14724. The department may establish a PBDE advisory committee to assist the department in determining the risk posed by the release of PBDEs, other than penta-BDE or octa-BDE, to human health and the environment. The department may use existing programs to monitor the presence of PBDEs in the state's environment to determine exposure and risk. If new scientific information gathered by the advisory committee indicates a significant risk to human health and the environment in the state, the advisory committee shall inform the department of risk or risks and, if the department concurs, the department shall advise the legislature of the risk. Nothing in this section shall preclude the department from issuing recommendations to the legislature independent of any actions of the advisory committee.

History: Add. 2004, Act 526, Imd. Eff. Jan. 3, 2005.

Compiler's note: For transfer of PBDE advisory committee to department of environmental quality by type III transfer, see E.R.O. No. 2009-11, compiled at MCL 324.99915.

Popular name: Act 451

Popular name: NREPA

324.14725 Violation as misdemeanor; penalty.

Sec. 14725. A person who violates this subpart is guilty of a misdemeanor punishable by a fine of not less than $2,500.00 or more than $25,000.00. Each day that a violation of this subpart continues shall be considered a separate violation.

History: Add. 2004, Act 562, Imd. Eff. Jan. 3, 2005.

Popular name: Act 451

Popular name: NREPA

324.14801 Definitions.

Sec. 14801. As used in this part:

(a) "Environmental audit" means a voluntary and internal evaluation conducted on or after the effective date of this part of 1 or more facilities or an activity at 1 or more facilities regulated under state, federal, regional, or local laws or ordinances, or of environmental management systems or processes related to the facilities or activity, or of a previously corrected specific instance of noncompliance, that is designed to identify historical or current noncompliance and prevent noncompliance or improve compliance with 1 or more of those laws, or to identify an environmental hazard, contamination, or other adverse environmental condition, or to improve an environmental management system or process. Once initiated, an audit shall be completed within a reasonable time, not to exceed 6 months, unless a written request for an extension is approved by the director on reasonable grounds.

(b) "Environmental audit report" means a document or a set of documents, each labeled at the time it is created "environmental audit report: privileged document" and created as a result of an environmental audit. An environmental audit report shall include supporting information. Supporting information may include field notes, records of observations, findings, opinions, suggestions, conclusions, drafts, memoranda, follow-up reports, drawings, photographs, computer generated or electronically recorded information, maps, charts, graphs, and surveys, if the supporting information or documents are created or prepared for the primary purpose and in the course of or as a result of an environmental audit. An environmental audit report may also include an implementation plan that addresses correcting past noncompliance, improving current compliance, improving an environmental management system, and preventing future noncompliance, as appropriate.

(c) "Privilege" means the privilege provided to an environmental audit report as provided in this part.

History: Add. 1996, Act 132, Imd. Eff. Mar. 18, 1996;—Am. 1997, Act 133, Imd. Eff. Nov. 14, 1997.

Popular name: Act 451

Popular name: NREPA

324.14802 Environmental audit and environmental audit report; conduct; creation; privilege and protection from disclosure; exception; testimony; admissibility as evidence.

Sec. 14802. (1) The owner or operator of a facility, or an employee or agent of the owner or operator on behalf of the owner or operator, at any time may conduct an environmental audit and may create an environmental audit report.

(2) Except as provided in subsection (3), an environmental audit report created pursuant to this part is privileged and protected from disclosure under this part.

(3) The privilege described in subsection (2) does not extend to any of the following regardless of whether or not they are included within an environmental audit report:

(a) Documents, communication, data, reports, or other information required to be collected, maintained, or made available or reported to a regulatory agency or any other person by statute, rule, ordinance, permit, order, consent agreement, or as otherwise provided by law.

(b) Information obtained by observation, sampling, or monitoring by any regulatory agency.

(c) Pretreatment monitoring results which a publicly owned treatment works or control authority requires any industrial user to report to a publicly owned treatment works or control authority, including, but not limited to, results establishing a violation of the industrial user's discharge permit or applicable local ordinance.

(d) Information legally obtained from a source independent of the environmental audit or from a person who did not obtain the information from the environmental audit.

(e) Machinery and equipment maintenance records.

(f) Information in instances where the privilege is asserted for a fraudulent purpose.

(g) Information in instances where the material shows evidence of noncompliance with state, federal, regional, or local environmental laws, permits, consent agreements, regulations, ordinances, or orders and the owner or operator failed to either take prompt corrective action or eliminate any violation of law identified during the environmental audit within a reasonable time, but not exceeding 3 years after discovery of the noncompliance or violation unless a longer period of time is set forth in a schedule of compliance in an order issued by the department of environmental quality, after notice in the department's calendar, and following the department's determination that acceptable progress is being made.

(4) Except as otherwise provided in this part, a person who conducts an environmental audit and a person to whom the environmental audit results are disclosed shall not be compelled to testify regarding any information obtained solely through the environmental audit which is a privileged portion of the

environmental audit report. Except as otherwise provided in this part, the privileged portions of an environmental audit report are not subject to discovery and are not admissible as evidence in any civil or administrative proceeding.

History: Add. 1996, Act 132, Imd. Eff. Mar. 18, 1996;—Am. 1997, Act 133, Imd. Eff. Nov. 14, 1997.

Popular name: Act 451

Popular name: NREPA

324.14803 Waiver of privilege.

Sec. 14803. (1) The privilege provided for in this part may be expressly waived by the person for whom the environmental audit report was prepared. The waiver applies only to the portion or portions of the environmental audit report that are specifically waived.

(2) Disclosure of an environmental audit report and information generated by the environmental audit by the person for whom the environmental audit report was prepared or by the person's employee or agent to any of the following does not waive the privilege provided for in this part:

(a) An employee of the person.

(b) A legal representative of the person.

(c) An agent of the person retained to address an issue or issues raised by the environmental audit.

(3) Disclosure of the environmental audit report or any information generated by the environmental audit under the following circumstances does not waive the privilege provided for in this part:

(a) A disclosure made under the terms of a confidentiality agreement between the person for whom the environmental audit report was prepared and a partner or potential partner, or a transferee or potential transferee of, or a lender or potential lender for, or a trustee of, the business or facility audited, or a disclosure made between a subsidiary and a parent corporation or between members of a partnership, joint venture, or other similarly related entities.

(b) A disclosure made under the terms of a confidentiality agreement between governmental officials and the person for whom the environmental audit report was prepared.

History: Add. 1996, Act 132, Imd. Eff. Mar. 18, 1996.

Popular name: Act 451

Popular name: NREPA

324.14804 Request for disclosure by state or local law enforcement authorities; objection; petition; in camera hearing; determination by court; disclosure pending appeal.

Sec. 14804. (1) A request by state or local law enforcement authorities for disclosure of an environmental audit report shall be made by a written request delivered by certified mail or a demand by lawful subpoena. Within 30 business days after receipt of a request for disclosure or subpoena, the person asserting the privilege may make a written objection to the disclosure of the environmental audit report on the basis that the environmental audit report is privileged. Upon receipt of such an objection, the state or local law enforcement authorities may file with the circuit court, and serve upon the person, a petition requesting an in camera hearing on whether the environmental audit report or portions of the environmental audit report are privileged or subject to disclosure. The motion shall be brought in camera and under seal. The circuit court has jurisdiction over a petition filed under this subsection requesting a hearing. Failure of the person asserting the privilege to make an objection to disclosure waives the privilege as to that person.

(2) Upon the filing of a petition for an in camera hearing under subsection (1), the person asserting the privilege in response to a request for disclosure or subpoena under this section shall provide a copy of the environmental audit report to the court and shall demonstrate in the in camera hearing all of the following:

(a) The year the environmental audit report was prepared.

(b) The identity of the person conducting the audit.

(c) The name of the audited facility or facilities.

(d) A brief description of the portion or portions of the environmental audit report for which privilege is claimed.

(3) Upon the filing of a petition for an in camera hearing under subsection (1), the court shall issue an order under seal scheduling, within 45 days after the filing of the petition, an in camera hearing to determine whether the environmental audit report or portions of the environmental audit report are privileged or subject to disclosure. The counsel for the state or local law enforcement agency seeking disclosure of the information contained in the environmental audit report and the counsel for the person asserting the privilege shall participate in the in camera hearing but shall not disclose the contents of the environmental audit report for which privilege is claimed unless the court so orders.

(4) The court, after in camera review, shall require disclosure of material for which privilege is asserted, if the court determines that either of the following exists:

(a) The privilege is asserted for a fraudulent purpose.

(b) Even if subject to the privilege, the material shows evidence of noncompliance with state, federal, regional, or local environmental laws, permits, consent agreements, regulations, ordinances, or orders and the owner or operator failed to either take prompt corrective action or eliminate any violation of law identified during the environmental audit within a reasonable time, but not exceeding 3 years after discovery of the noncompliance or violation unless a longer period of time is set forth in a schedule of compliance in an order issued by the department of environmental quality, after notice in the department's calendar, and following the department's determination that acceptable progress is being made.

(5) The court, after in camera review, shall require disclosure of material for which privilege is asserted if the court determines that the material is not subject to the privilege.

(6) If the court determines under this section that the material is not privileged, but the party asserting the privilege files an application for leave to appeal of this finding, the material, motions, and pleadings shall be disclosed unless the court specifically determines that all or a portion of such information shall be kept under seal during the pendency of the appeal.

History: Add. 1996, Act 132, Imd. Eff. Mar. 18, 1996;—Am. 1997, Act 133, Imd. Eff. Nov. 14, 1997.

Popular name: Act 451

Popular name: NREPA

324.14805 Criminal proceeding; applicability of privilege.

Sec. 14805. The privilege created by this part does not apply to criminal investigations or proceedings. Where an audit report is obtained, reviewed, or used in a criminal proceeding, the privilege created by this part applicable to administrative or civil proceedings is not waived or eliminated.

History: Add. 1996, Act 132, Imd. Eff. Mar. 18, 1996;—Am. 1997, Act 133, Imd. Eff. Nov. 14, 1997.

Popular name: Act 451

Popular name: NREPA

324.14806 Privilege; burden of proof; stipulation; disclosure of relevant portions of report.

Sec. 14806. (1) A person asserting the privilege under this part has the burden of proving a prima facie case as to the privilege. A person seeking disclosure of an environmental audit report has the burden of proving by a preponderance of the evidence that privilege does not exist under this part.

(2) The parties disputing the existence of the privilege may at any time stipulate to entry of an order directing that specific information contained in an environmental audit report is or is not subject to the privilege.

(3) Upon making a disclosure determination under section 14804 or 14805, the court may compel the disclosure only of those portions of an environmental audit report relevant to issues in dispute in the proceeding.

History: Add. 1996, Act 132, Imd. Eff. Mar. 18, 1996.

Popular name: Act 451

Popular name: NREPA

324.14807 Fraud as misdemeanor; penalty.

Sec. 14807. A person who uses this part to commit fraud is guilty of a misdemeanor punishable by a fine of not more than $25,000.00.

History: Add. 1996, Act 132, Imd. Eff. Mar. 18, 1996.

Popular name: Act 451

Popular name: NREPA

324.14808 Other privileges not limited.

Sec. 14808. This part does not limit, waive, or abrogate either of the following:

(a) The scope or nature of any statutory or common law privilege, including the work product doctrine and the attorney-client privilege.

(b) Any existing ability or authority to challenge privilege under Michigan law.

History: Add. 1996, Act 132, Imd. Eff. Mar. 18, 1996;—Am. 1997, Act 133, Imd. Eff. Nov. 14, 1997.

Popular name: Act 451

Popular name: NREPA

324.14809 Immunity from civil and criminal penalties and fines.

Sec. 14809. (1) A person is immune from any administrative or civil penalties and fines under this act and from criminal penalties and fines for negligent acts or omissions under this act related to a violation of article II and chapters 1 and 3 of article III and the rules promulgated under those articles if the person makes a voluntary disclosure to the appropriate state or local agency. However, the immunity provided for in this section does not apply to any criminal penalties and fines for gross negligence or to any criminal penalties and fines for violations of part 301, 303, 315, or 325 or section 3108 or 3115a. At the time that the disclosure is made to the state or local agency, the person making the voluntary disclosure under this section shall provide information showing that the conditions of subdivisions (a) to (d) are met, supporting his or her claim that the disclosure is voluntary. For the purposes of this section, a disclosure of information by a person under this section is voluntary if all of the following occur:

(a) The disclosure is made promptly after knowledge of the information disclosed is obtained by the person.

(b) The person making the disclosure initiates an appropriate and good-faith effort to achieve compliance, pursues compliance with due diligence, and promptly corrects the noncompliance or condition after discovery of the violation. If evidence shows the noncompliance is the failure to obtain a permit, appropriate and good-faith efforts to correct the noncompliance may be demonstrated by the submittal of a complete permit application within a reasonable time.

(c) The disclosure of the information arises out of an environmental audit.

(d) The environmental audit occurs before the person is made aware that he or she is under investigation by a regulatory agency for potential violations of this act.

(2) There is a rebuttable presumption that a disclosure made pursuant to and in full compliance with this section is voluntary. The presumption of voluntary disclosure under this section may be rebutted by presentation of an adequate showing to the administrative hearing officer or appropriate trier of fact that the disclosure did not satisfy the requirements for a voluntary disclosure under subsection (1). In any administrative or judicial proceeding pursuant to this subsection, the person claiming that a disclosure is voluntary shall provide the supporting information required in subsection (1) and a showing of the appropriate and good-faith effort to achieve compliance, shall pursue compliance with due diligence, and shall promptly correct the noncompliance in the period of time since the date of the disclosure. The state or local agency shall bear the burden of rebutting the presumption of voluntariness. Agency action determining that disclosure was not voluntary shall be considered final agency action subject to judicial review.

(3) Unless a final determination shows that a voluntary disclosure has not occurred, a notice of violation or cease and desist order shall not include any administrative or civil penalty or fine or any criminal penalty or fine for violations for which immunity is provided under this section.

(4) The elimination of administrative or civil penalties or fines or criminal penalties or fines under this section does not apply if the trier of fact finds any of the following:

(a) The person has knowingly committed a criminal act.

(b) The person has committed significant violations that constitute a pattern of continuous or repeated violations of environmental laws, rules, regulations, permit conditions, settlement agreements, or orders of consent or judicial orders and that were due to separate and distinct events giving rise to the violations, within the 3-year period prior to the date of the disclosure. For purposes of this subsection, a pattern of continuous or repeated violations may also be demonstrated by multiple settlement agreements related to substantially the same alleged violations concerning serious instances of noncompliance with environmental laws that occurred within the 3-year period immediately prior to the date of the voluntary disclosure. In determining whether a person has a pattern of continuous or repeated violations under this subsection, the trier of fact shall base the decision on the compliance history of the specific facility at issue.

(c) The violation has resulted in a substantial economic benefit which gives the violator a clear advantage over its business competitors.

(d) The instance of noncompliance resulted in serious harm or in imminent and substantial endangerment to human health or the environment.

(e) The violation is of the terms of an administrative or judicial order.

(5) In those cases where the conditions of a voluntary disclosure are not met but a good-faith effort was made to voluntarily disclose and resolve a violation detected in a voluntary environmental audit, the state and local environmental and law enforcement authorities shall consider the nature and extent of any good-faith effort in deciding the appropriate enforcement response and shall mitigate any civil penalties based on a showing that 1 or more of the conditions for voluntary disclosure have been met.

(6) The immunity provided by this section does not abrogate a person's responsibilities as provided by

applicable law to correct the violation, conduct necessary remediation, or pay damages.

(7) In order to receive immunity under this section, a facility conducting an environmental audit under this part shall give notice to the department of the fact that it is planning to commence the audit. The notice shall specify the facility or portion of the facility to be audited, the anticipated time the audit will begin, and the general scope of the audit. The notice may provide notification of more than 1 scheduled environmental audit at a time.

History: Add. 1996, Act 132, Imd. Eff. Mar. 18, 1996;—Am. 1997, Act 134, Imd. Eff. Nov. 14, 1997.

Popular name: Act 451

Popular name: NREPA

324.14809a Authority of other provisions not limited.

Sec. 14809a. Except for the immunity provided in section 14809, this part does not limit or affect the authority of any other provision of this act or any other provision of law.

History: Add. 1996, Act 132, Imd. Eff. Mar. 18, 1996.

Popular name: Act 451

Popular name: NREPA

324.14810 Data base.

Sec. 14810. (1) The department of environmental quality shall establish and maintain a data base of the voluntary disclosures made under this part. The data base shall include the number of voluntary disclosures made on an annual basis and shall summarize in general categories the types of violations and the time needed to achieve compliance. The department of environmental quality shall annually publish a report containing the information in this data base.

(2) Within 5 years after the effective date of this part, the department of environmental quality shall prepare and submit to the standing committees of the legislature with jurisdiction over issues pertaining to natural resources and the environment a report evaluating the effectiveness of this part and specifically detailing whether this part has been effective in encouraging the use of environmental audits and in identifying and correcting environmental problems and conditions.

History: Add. 1996, Act 132, Imd. Eff. Mar. 18, 1996.

CHAPTER 5
RECYCLING AND RELATED SUBJECTS

PART 161
PLASTIC PRODUCTS LABELING

324.16101 Definitions.

Sec. 16101. As used in this part:

(a) "Degradable" means capable of being broken down by biodegradation, photodegradation, or chemical degradation into component parts within 360 days under exposure to the elements.

(b) "Label" means a molded, imprinted, or raised symbol on or near the bottom of a plastic product.

(c) "Plastic" means any material made of polymeric organic compounds and additives that can be shaped by flow.

(d) "Plastic bottle" means a rigid plastic container with a capacity of 16 ounces or more that has a neck that is smaller than the body of the container.

(e) "Plastic product" means a plastic bottle and any other rigid plastic container.

(f) "Rigid plastic container" means any container composed predominantly of plastic resin and having a relatively inflexible finite shape or form that directly holds a substance or material and has a capacity of 8 ounces or more.

(g) "PETE" means polyethylene terephthalate.

(h) "HDPE" means high density polyethylene.

(i) "V" means vinyl.

(j) "LDPE" means low density polyethylene.

(k) "PP" means polypropylene.

(*l*) "PS" means polystyrene.

(m) "OTHER" means multilayer.

(n) "D" means degradable.

History: 1994, Act 451, Eff. Mar. 30, 1995.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Waste Management Division to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

Popular name: Act 451

Popular name: NREPA

324.16102 Plastic products; labeling with code; list of label codes; copies of list.

Sec. 16102. (1) All plastic products sold in this state shall be labeled with a code indicating the plastic resin used to produce the product. The code shall consist of a number placed within a triangle of arrows with letters placed below the triangle of arrows. The triangle shall be equilateral, formed by 3 arrows with the apex of each point of the triangle at the midpoint of each arrow, rounded with a short radius. The pointer or arrowhead of each arrow shall be at the midpoint of each side of the triangle with a short gap separating the pointer from the base of the adjacent arrow. The triangle, formed by the 3 arrows curved at their midpoints shall depict a clockwise path around the code number. The triangle of arrows shall be not less than 1/2 inch high or if the plastic product is designed so that a triangle or arrows of not less than 1/2 inch height cannot be added to the product, a smaller label may be used if the label can be easily read. The code shall appear on or near the bottom of the plastic product as follows:

(a) 1 PETE.
(b) 2 HDPE.
(c) 3 V.
(d) 4 LDPE.
(e) 5 PP.
(f) 6 PS.
(g) 7 OTHER.
(h) 8 D.

(2) The department shall maintain a list of the label codes provided in subsection (1) and shall provide a copy of that list to any person upon request.

PART 163
PLASTIC DEGRADABLE CONTAINERS

324.16301 Definitions.

Sec. 16301. As used in this part:

(a) "Containers" means glass, metal, or plastic bottles, cans, jars, or other receptacles that contain any substance.

(b) "Degradable" means capable of being broken down by biodegradation, photodegradation, or chemical degradation into component parts within 360 days under exposure to the elements.

History: 1994, Act 451, Eff. Mar. 30, 1995.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Waste Management Division to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled MCL 324.99901 of the Michigan Compiled Laws.

Popular name: Act 451

Popular name: NREPA

324.16302 Container holding devices constructed of plastic rings; design and registration of symbol; test data; vacuum-packed wrapping.

Sec. 16302. (1) A person shall not sell or offer for sale in this state containers connected to each other by a separate holding device that is constructed of plastic rings unless the device is degradable and bears a distinguishing symbol.

(2) A manufacturer of container holding devices that are constructed of plastic rings who sells or offers for sale or provides for the sale or offer for sale in this state of these devices shall design a distinguishing symbol indicating that the devices are degradable and shall register the distinguishing symbol with the department and provide the department with a sample of the device. The department may require test data that show that the device is degradable as required in this part.

(3) As used in this part, a separate holding device does not include a vacuum-packed wrapping that completely encases the containers that it connects.

Popular name: Act 451

Popular name: NREPA

324.16303 Violation as misdemeanor; penalty.

Sec. 16303. A person who violates this part is guilty of a misdemeanor punishable by a fine of $500.00 for each day this part is violated.

History: 1994, Act 451, Eff. Mar. 30, 1995.

Popular name: Act 451

Popular name: NREPA

PART 165
OFFICE PAPER RECOVERY

324.16501 Definitions.

Sec. 16501. As used in this part:

(a) "Accessible and available market" means that opportunities exist to sell wastepaper products that are collected pursuant to this part at rates and at locations that make it fiscally reasonable to collect that paper.

(b) "Recycled paper" means a paper product that contains not less than 50% wastepaper.

(c) "Wastepaper" means any discarded paper or corrugated paper board that is generated after the completion of the paper manufacturing process, and includes, but is not limited to, trimmings, printed paper, cutting and converting paper, newsprint, telephone books, catalogs, or other mixed postconsumer paper. Wastepaper does not include mill broke or other in-plant residual wastes.

History: 1994, Act 451, Eff. Mar. 30, 1995.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Waste Management Division to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled MCL 324.99903 of the Michigan Compiled Laws.

Popular name: Act 451

Popular name: NREPA

324.16502 Paper recycling system; establishment; purpose; scope; schedule; functions.

Sec. 16502. (1) The department shall establish and implement a paper recycling system to recycle wastepaper products that are recyclable and for which there is an accessible and available market. The recycling system shall include the recyclable wastepaper products generated in the offices and other facilities of state departments and state agencies, the offices and other facilities of the legislature, and the judicial offices and other facilities within this state. The department may work with other state departments and hire private contractors to establish or implement all or a portion of the recycling system under this part. The paper recycling system established by the department shall provide for the recycling of wastepaper in the offices and facilities that participate in that system, in accord with the following schedule:

(a) January 1, 1989 — 20% or more.

(b) January 1, 1990 — 25% or more.

(c) January 1, 1992	50% or more.
(d) January 1, 2000	85% or more.

(2) The paper recycling system established by the department shall provide for the expansion and improvement of any wastepaper recycling system that exists on March 30, 1989 and shall provide for all of the following:

(a) An aggressive program to locate and develop, if necessary, markets for recyclable wastepaper products.

(b) An education program to assure that employees who participate in the recycling system are knowledgeable about both of the following:

(*i*) The importance of recycling paper.

(*ii*) The components of the paper recycling system and how the system will impact each employee.

(c) The recovery of all wastepaper for which a market is available and accessible.

(d) The separation of the recyclable wastepaper by the generator in close proximity to the point at which the paper product enters the waste stream.

(e) A central collection system within each building or office of facility that is participating in the recycling system.

(f) The compiling of information and the preparation of an annual written report to be sent to the governor, the senate majority leader, the speaker of the house, and the chief justice of the supreme court, detailing the implementation and operation of the paper recycling system; the level of participation in the paper recycling system of offices, facilities, and agencies within each branch of government; the availability of markets for the wastepaper collected; recommendations on how the market for recycled paper can be stimulated; and recommendations regarding whether the system can be and should be expanded.

History: 1994, Act 451, Eff. Mar. 30, 1995.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Waste Management Division to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled MCL 324.99903 of the Michigan Compiled Laws.

Popular name: Act 451

Popular name: NREPA

324.16503 Proceeds of paper recycling system; disposition; use.

Sec. 16503. The proceeds of the paper recycling system shall be forwarded to the state treasurer and credited to the office services revolving fund created in section 269 of the management and budget act, Act No. 431 of the Public Acts of 1984, being section 18.1269 of the Michigan Compiled Laws, to be utilized by the department of management and budget to implement this part and to reimburse other state departments that incur expenses under this part.

History: 1994, Act 451, Eff. Mar. 30, 1995.

Popular name: Act 451

Popular name: NREPA

PART 167
USED OIL RECYCLING

324.16701 Definitions.

Sec. 16701. As used in this part:

(a) "Motor oil" means oil used as a lubricant in a motor vehicle.

(b) "Oil" means petroleum based oil.

(c) "Recycle" means to prepare used oil for reuse as a petroleum product by refining, rerefining, reclaiming, reprocessing, or other means to utilize used oil in a manner that substitutes for a petroleum product made from new oil, if the preparation or use is operationally safe, environmentally sound, and complies with the law, rules, and regulations of this state and the United States.

(d) "Used oil" means oil which through use, storage, or handling has become unsuitable for its original purpose due to the presence of impurities or loss of original properties.

History: 1994, Act 451, Eff. Mar. 30, 1995.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Waste Management Division to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled MCL 324.99901 of the Michigan Compiled Laws.

Popular name: Act 451

Popular name: NREPA

324.16702 Plan to promote recycling of motor oil; public education program.

Sec. 16702. The department shall implement a plan to promote the recycling of motor oil by the public and private sectors. The department shall conduct a public education program to inform the public and private sectors of the need for, and benefit of, collecting and recycling used oil in order to conserve resources and protect the natural resources of this state.

History: 1994, Act 451, Eff. Mar. 30, 1995.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Waste Management Division to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

Popular name: Act 451

Popular name: NREPA

324.16703 Plan to recycle motor oil; demonstration used oil recycling project; project plan; funding.

Sec. 16703. (1) The director of the department of management and budget shall formulate and implement a plan to recycle the motor oil used by the departments and agencies of this state.

(2) The department shall conduct a demonstration used oil recycling project that does all of the following:

(a) Provides for a system of used oil recycling tanks or barrels for use by the general public. The recycling tanks or barrels shall be located in designated state owned vehicle maintenance garages or other publicly owned structures that the department determines meet both of the following criteria:

(*i*) Are locations where used oil is generated from oil changes for state owned vehicles or vehicles operated under contracts with this state.

(*ii*) Are locations where oil recycling services are not otherwise available to the general public.

(b) Promotes public awareness of the availability to the general public of recycling tanks or barrels for used oil.

(3) The department shall establish a project plan for conducting the demonstration project provided for in subsection (2). The project plan shall include the number of locations, proposed sites, methods of public notice, security procedures, and model language for cooperative agreements with other state agencies for use of their facilities in the demonstration project.

(4) Funding necessary to implement this part may come from any lawful source, including appropriations, funds from private sources, and funds generated from the sale of general obligation bonds.

History: 1994, Act 451, Eff. Mar. 30, 1995.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Waste Management Division to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

Popular name: Act 451

Popular name: NREPA

324.16704 Disposal of used oil; designation of land as collection facility; placement in receptacle or container; applicability of subsection (1); disposal of used oil in municipal solid waste incinerator; violation as misdemeanor; penalty; enforcement actions; criteria used in designating collection facilities.

Sec. 16704. (1) A person shall not dispose of or cause the disposal of used oil by dumping used oil onto the ground; discharging, dumping, or depositing used oil into sewers, drainage systems, surface waters, groundwaters, or other waters of this state; except as provided in subsection (2), by incineration; as refuse; or onto any public or private land unless the land is designated by the state or an agency or political subdivision of the state as a collection facility for the disposal, dumping, or deposit of used oil and if the used oil is placed in a receptacle or container installed or located at the collection facility.

(2) Subsection (1) does not apply to the use of used oil in an incinerator or other heater that is operated for purposes of providing heat or energy, or as a rust preventive coating on farm or construction equipment.

(3) Notwithstanding subsection (2), beginning March 28, 1994, used oil shall not be disposed of in a municipal solid waste incinerator as defined in part 115.

(4) Beginning on July 1, 1991, a person who violates this section is guilty of a misdemeanor punishable by imprisonment for 90 days or a fine of not more than $1,000.00, or both. In place of a sentence provided in this subsection, the court may order that the defendant engage in court supervised recycling-related labor for a number of hours determined by the court, including, but not limited to, oil recycling. A violation of this section by a person, other than an individual, is punishable by a fine of not more than $2,500.00.

(5) This section does not prohibit enforcement actions under other state or federal laws applicable to an

activity described in this section.

(6) The department shall establish criteria to be used in designating collection facilities under subsection (1). In developing the criteria, the department shall encourage private and local collection facilities as an integral part of the department's efforts to establish a statewide network of collection facilities as required in section 16705(a).

History: 1994, Act 451, Eff. Mar. 30, 1995.

Popular name: Act 451

Popular name: NREPA

324.16705 Comprehensive plan.

Sec. 16705. In addition to the other powers and duties of the department under this part, by January 1, 1991, the department shall develop and submit to the legislature a comprehensive plan that does all of the following:

(a) Provides for a network of private, state, and local collection facilities on a statewide basis by July 1, 1991 to facilitate compliance with section 16704.

(b) Provides for a publicity program to assure that the public is aware of the requirements of section 16704, the location of collection facilities, and the penalties for violating section 16704.

(c) Provides 1 or more proposed funding mechanisms that the department considers feasible to assure that an operational collection facility network is available statewide by July 1, 1991.

History: 1994, Act 451, Eff. Mar. 30, 1995.

Popular name: Act 451

Popular name: NREPA

PART 169
SCRAP TIRES

324.16901 Definitions.

Sec. 16901. (1) As used in this part:

(a) "Abandoned scrap tires" means an accumulation of scrap tires on property where the property owner is not responsible in whole or in part for the accumulation of the scrap tires. For the purposes of this subdivision, an owner who purchased or willingly took possession of an existing scrap tire collection site shall be considered by the department to be responsible in whole or in part for the accumulation of the scrap tires.

(b) "Automotive recycler" means that term as defined in section 2a of the Michigan vehicle code, 1949 PA 300, MCL 257.2a.

(c) "Bond" means a performance bond from a surety company authorized to transact business in this state, a certificate of deposit, a cash bond, or an irrevocable letter of credit, in favor of the department.

(d) "Collection site" means, subject to subdivision (e), a site consisting of a parcel or adjacent parcels of real property where any of the following are accumulated:

(*i*) 500 or more scrap tires. This subparagraph does not apply if that property is owned or leased by and associated with the operations of a retailer or automotive recycler or a commercial contractor as described in subparagraph (*iv*).

(*ii*) 1,500 or more scrap tires if that property is owned or leased by and associated with the operations of a retailer that is not also an automotive recycler.

(*iii*) 2,500 or more scrap tires if that property is owned or leased by and associated with the operations of an automotive recycler.

(*iv*) More than 150 cubic yards of tire chips if that property is owned or leased by and associated with the operations of a commercial contractor that is authorized to use the tire chips as an aggregate replacement in a manner approved by a designation of inertness for scrap tires or is otherwise authorized for such use by the department under part 115.

(e) "Collection site" does not include a disposal area licensed under part 115, a community cleanup site, a racecourse, or a feed storage location.

(f) "Commodity" means crumb rubber, tire chips, a ring or slab cut from a tire for use as a weight, or a product die-cut or punched from a tire, or any other product that, as determined by the department based on the product's production cost and value, is not likely to result in an accumulation, at the site of production or use, that poses a threat to public health or the environment. A product is not a commodity unless it meets published national standards or specifications that the department determines are relevant to accomplishing the purposes of this part.

(g) "Commodity storage area" means 1 or more locations within a collection site where a commodity is

stored.

(h) "Community cleanup site" means a site owned by a local unit of government or nonprofit organization that has received a scrap tire cleanup grant under section 16908(2)(c) and uses this site for the purpose of collecting scrap tires from residents as part of a community cleanup day or resident drop off.

(i) "Crumb rubber" means rubber material derived from tires that is less than 1/8 inch by 1/8 inch in size and is free of steel and fiber.

(j) "Department" means the department of environmental quality.

(k) "End-user" means any of the following:

(*i*) A person who possesses a permit to burn tires under part 55.

(*ii*) The owner or operator of a landfill that is authorized under the landfill's operating license to use scrap tires.

(*iii*) A person who uses a commodity to make a product that is sold in the market.

(*iv*) A person who is authorized by this part to accumulate scrap tires, who acquires scrap tires, and who converts scrap tires into a product that is sold in the market or reused in a manner authorized by this part.

(*l*) "Farm" means that term as defined in section 2 of the Michigan right to farm act, 1981 PA 93, MCL 286.472.

(m) "Farm operation" means that term as defined in section 2 of the Michigan right to farm act, 1981 PA 93, MCL 286.472.

(n) "Feed storage location" means a location on a parcel or adjacent parcels of real property containing a farm operation where not more than 3,000 scrap tires are used to secure stored feed.

(o) "Fund" means the scrap tire regulatory fund created in section 16908.

(p) "Landfill" means a landfill as defined in section 11504 that is licensed under part 115.

(q) "Law enforcement officer" means any law enforcement officer who is trained and licensed or certified under the Michigan commission on law enforcement standards act, 1965 PA 203, MCL 28.601 to 28.615, or an officer appointed by the director of the department of state police under section 6d of 1935 PA 59, MCL 28.6d.

(r) "Outdoor" or "outdoors" means in a place other than a building or covered vehicle.

(s) "Portable shredding operation" means a person who operates scrap tire shredding equipment that produces a commodity or tire shreds and that can be moved from site to site.

(t) "Racecourse" means a commercially operated track for go-carts, off-road recreational vehicles, motorcycles, or other vehicles that uses scrap tires as bumpers along the track for safety purposes and that meets 1 or more of the following requirements:

(*i*) Uses not more than 3,000 scrap tires for bumpers.

(*ii*) Is operated on a temporary basis and, between races, stores the scrap tires at a collection site bonded under section 16903 and registered under section 16904.

(u) "Retailer" means a person who sells or offers for sale new, retreaded, or remanufactured tires to consumers in this state.

(v) "Retreader" means a person who retreads, recases, or recaps tire casings for reuse.

(w) "Scrap tire" means a tire that is no longer being used for its original intended purpose including, but not limited to, a used tire, a reusable tire casing, or portions of a tire. Scrap tire does not include a vehicle support stand.

(x) "Scrap tire hauler" means a person who transports more than 10 scrap tires at once in a vehicle on a public road or street. Scrap tire hauler does not include any of the following:

(*i*) A person, other than a commercial business, who transports that person's own tires to a location authorized in section 16902(1).

(*ii*) A member of a nonprofit service organization who is participating in a community service project and is transporting scrap tires to a location authorized in section 16902(1).

(*iii*) The owner of a farm who is transporting only scrap tires that originated from his or her farm operation, to a location authorized in section 16902(1), or that are intended for use in a feed storage location.

(*iv*) A solid waste hauler that is transporting solid waste to a disposal area licensed under part 115.

(*v*) A person who is transporting only a commodity.

(*vi*) A retreader who is transporting scrap tires for the purpose of retreading, recasing, or recapping and who has the documentation required in section 16906(5).

(y) "Scrap tire processor" means either of the following:

(*i*) A person who is authorized by this part to accumulate scrap tires and is engaged in the business of buying or otherwise acquiring scrap tires and reducing their volume by shredding or otherwise facilitating recycling or resource recovery techniques for scrap tires.

(*ii*) A portable shredding operation.

(z) "Solid waste hauler" means a solid waste hauler as defined in section 11506 who transports less than 25% by weight or volume of scrap tires along with other solid waste in any truckload to a disposal area licensed under part 115.

(aa) "Storage requirements" means the requirements of section 16903(1) and, if applicable, (2).

(bb) "Tire" means a continuous solid or pneumatic rubber covering encircling the wheel of a tractor or other farm machinery or of a vehicle.

(cc) "Tire chip" means a portion of a tire that is any of the following:

(*i*) Not more than 2 inches by 2 inches in size and meets requirements for size, metal content, and cleanliness as specified in an executed contract for delivery of the material by the scrap tire processor.

(*ii*) Not more than 3/8 inch by 3/8 inch in size and sufficiently free from steel to be used in the construction and modification of sports surfaces such as golf course turf, athletic field turf, athletic tracks, hiking surfaces, livestock show arena surfaces, and playgrounds.

(*iii*) To be used in a drain field approved under a district or county sanitary code.

(*iv*) To be used as ground cover or mulch, if, in aggregate, 95% of the material is equal to or less than 3/4 inch in size in any dimension and the material contains less than 1% by weight or volume of steel and fiber.

(*v*) Approved by the department for use at a landfill as daily cover or a leachate collection system protective layer or for access road construction within a lined cell.

(dd) "Tire shred" means a portion of a tire that is not a commodity.

(ee) "Tire storage area" means a location within a collection site where tires are accumulated.

(ff) "Vehicle" means a device in, upon, or by which a person or property is or may be transported or drawn upon a highway. Vehicle does not include a device that is exclusively moved by human power or used exclusively upon stationary rails or tracks or a mobile home as defined in section 2 of the mobile home commission act, 1987 PA 96, MCL 125.2302.

(gg) "Vehicle support stand" means equipment used to support a stationary vehicle consisting of an inflated tire and wheel that is attached to another wheel.

(2) A reference in this part to a number of scrap tires means either of the following, or an equivalent combination thereof:

(a) That number of whole tires or reusable tire casings.

(b) A quantity of a commodity or tire shreds equivalent in weight to that number of whole tires.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1995, Act 268, Imd. Eff. Jan. 8, 1996;—Am. 1997, Act 17, Imd. Eff. June 11, 1997;—Am. 2002, Act 496, Imd. Eff. July 3, 2002;—Am. 2006, Act 520, Imd. Eff. Dec. 29, 2006;—Am. 2014, Act 543, Imd. Eff. Jan. 15, 2015;—Am. 2016, Act 294, Eff. Jan. 2, 2017.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Waste Management Division to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

Popular name: Act 451

Popular name: NREPA

324.16902 Delivery of scrap tire; limitations; removal; scope of subsection (2); presumptions.

Sec. 16902. (1) A person shall deliver a scrap tire only to, and only with the consent of the owner or operator of, 1 of the following that is in compliance with this part:

(a) A collection site registered under section 16904.

(b) A location that has legally accumulated scrap tires below the regulatory threshold for qualifying as a collection site as specified in section 16901(d).

(c) A disposal area licensed under part 115.

(d) An end-user.

(e) A scrap tire processor.

(f) A retailer.

(2) A person shall not by contract, agreement, or otherwise arrange for the removal of scrap tires except with 1 of the following:

(a) A scrap tire hauler that is registered pursuant to section 16905 and that by contract, agreement, or otherwise is obligated to deliver the scrap tires to the destination as identified under section 16905(3)(c).

(b) If the scrap tires are a commodity, a person hauling only a commodity.

(c) If the scrap tires are tire casings, a retreader hauling only tire casings.

(d) A solid waste hauler.

(3) Subsection (2) does not do any of the following:

(a) Prohibit a person from transporting his or her scrap tires to a site authorized by subsection (1).

(b) Prohibit a member of a nonprofit service organization who is participating in a community service project from transporting scrap tires to a site authorized by subsection (1).

(c) Prohibit the owner of a farm from transporting scrap tires that originated from his or her farm operation to a site authorized by subsection (1).

(d) Prohibit a solid waste hauler from transporting solid waste to a disposal area licensed under part 115.

(4) The driver of a vehicle used to transport scrap tires is presumed to be responsible for any scrap tires transported, discarded, or disposed of from the vehicle in violation of this section.

(5) In a proceeding for a violation of this section committed using a vehicle, it is presumed that the registered owner of the vehicle at the time of the violation or, if the registered owner is not an individual, the registered owner's agent was the driver of the vehicle at the time of the violation. However, if the vehicle was leased at the time of the violation, it is presumed that the lessee or, if the lessee is not an individual, the lessee's agent was the driver of the vehicle at the time of the violation.

324.16902a Repealed. 2002, Act 496, Imd. Eff. July 3, 2002.

Compiler's note: The repealed section pertained to retailer disposal of scrap tires and maintenance of records.

Popular name: Act 451

Popular name: NREPA

324.16903 Accumulation of scrap tires outdoors by owner or operator of collection site; compliance; bond required; exception; drawing on bond; notice; order.

Sec. 16903. (1) A person who owns or operates a collection site where fewer than 2,500 scrap tires are accumulated outdoors shall comply with all of the following:

(a) Scrap tires shall be stored in the tire storage area identified on the scrap tire collection site registration application map and approved by the department.

(b) Only scrap tires shall be accumulated in the tire storage area.

(c) Subject to subdivision (f), the scrap tires shall be accumulated in piles no greater than 15 feet in height with horizontal dimensions no greater than 200 by 40 feet.

(d) Subject to subdivision (f), the scrap tires shall not be within 20 feet of the property line or within 60 feet of a building or structure.

(e) Subject to subdivision (f), there shall be a minimum separation of 30 feet between scrap tire piles. The open space between the piles shall at all times be free of rubbish, equipment, and other materials.

(f) Scrap tire piles shall be accessible to fire fighting equipment. If the requirement of this subdivision is met, the local fire department that serves the jurisdiction in which the collection site is located may grant a variance from the requirements of subdivision (c), (d), or (e). A variance under this subsection shall be in writing.

(g) Scrap tires shall be isolated from other stored materials that may create hazardous products if there is a fire, including, but not limited to, lead acid batteries, fuel tanks, solvent barrels, and pesticide containers.

(h) Except for scrap tires that are a commodity used to create a storage pad for, or a roadway for access to, other scrap tires that are also a commodity, scrap tires shall not be placed in the open spaces between tire piles or used to construct on-site roads.

(i) The owner or operator of the collection site shall allow the local fire department that serves the jurisdiction in which the collection site is located to inspect the collection site at any reasonable time.

(j) All persons employed to work at the collection site shall be trained in emergency response operations. The owner or operator of the collection site shall maintain training records and shall make these records available to the local fire department that serves the jurisdiction in which the collection site is located.

(2) A person who owns or operates a collection site where at least 2,500 but fewer than 100,000 scrap tires are accumulated outdoors shall comply with all of the following:

(a) All of the requirements of subsection (1).

(b) The tire storage area shall be completely enclosed with a fence that is at least 6 feet tall with lockable gates and that is designed to prevent easy access.

(c) An earthen berm not less than 5 feet in height shall completely enclose the tire storage area except to allow for necessary ingress and egress from roadways and buildings.

(d) The collection site shall contain sufficient drainage so that water does not pool or collect on the

property.

(e) The approach road to the tire storage area and on-site access roads to the tire storage area shall be of all-weather construction and maintained in good condition and free of debris and equipment so that it is passable at all times for fire fighting and other emergency vehicles. If the local fire department for the jurisdiction where the collection site is located submits to the department a written determination that the on-site access roads do not ensure that the site is accessible to emergency vehicles at all times during the year, the department of environmental quality shall consider the on-site access roads to be in violation of this requirement.

(f) Tire storage areas shall be mowed regularly or otherwise kept free of weeds, vegetation, and other growth at all times.

(g) An emergency procedures plan shall be prepared and displayed at the collection site. The plan shall include telephone numbers of the local fire and police departments. The plan shall be reviewed by the local fire department prior to being posted.

(h) Scrap tires shall not be accumulated in excess of 10,000 cubic yards of scrap tires per acre.

(3) A person who owns or operates a collection site where 100,000 or more scrap tires are accumulated outdoors shall comply with all of the requirements of subsections (1) and (2) and shall operate as a scrap tire processor.

(4) Except as otherwise provided in this subsection, subsection (6), and section 16903b, a person who owns a collection site shall maintain a bond in favor of the department. If the collection site registration application under section 16904 includes a written agreement between the owner and the operator of the collection site that requires the operator to maintain the bond and the department approves that requirement, then the operator shall maintain the bond. The bond shall be on a form approved by the department. If the operator is required to maintain the bond under this subsection but fails to do so, both the owner and operator are responsible for a violation of this subsection. The amount of the bond shall be not less than the sum of $25,000.00 per quarter acre, or fraction thereof, of outdoor tire storage area, and $2.00 per square foot of tire storage area in a building. However, for collection sites with fewer than 2,500 tires, the bond shall not exceed $2,500.00.

(5) A person who elects to use a certificate of deposit as a bond under subsection (4) shall receive any accrued interest on that certificate of deposit upon release of the bond by the department. If a person elects to post cash as a bond, interest shall accrue on that bond quarterly at the annual rate of 6%, except that the interest rate payable to the person who maintained the bond shall not exceed the rate of interest accrued on the state common cash fund for the quarter in which an accrual is determined. Interest shall be paid to the person who maintained the bond upon release of the bond by the department. Any interest greater than 6% shall be deposited into the fund.

(6) A bond is not required under subsection (4) for a commodity storage area that meets all of the following requirements:

(a) The commodity is stored in accordance with the requirements of subsection (1).

(b) Not less than 75% of the commodity, by weight or volume, that is stored at the collection site each calendar year is removed from the collection site to a market during that year, and the collection site owner or operator certifies compliance with this subdivision on a form approved by the department.

(c) The areas of the collection site that are used for storage of the commodity are not larger than a total of 1 acre and those areas are indicated on a survey by a registered professional engineer submitted to the department as part of the collection site registration.

(7) Subject to subsections (8) and (9), the department may utilize a bond required under subsection (4) for the costs of any of the following:

(a) Removing scrap tires from the collection site.

(b) Bringing the collection site into compliance with this part.

(c) Cleanup at the collection site.

(d) Fire suppression or other costs associated with responding to a fire or other emergency at a collection site, including reimbursement to any local unit of government that incurred those costs.

(8) The department may draw on the bond required under subsection (4) if any of the following apply:

(a) There is a fire or other emergency at the collection site.

(b) The collection site owner becomes insolvent.

(c) The owner or operator of the collection site violates this part and does not cause the removal of the scrap tires as ordered by the department or a court of competent jurisdiction.

(d) The owner or operator of the collection site fails to extend or renew the bond under its terms or establish alternate financial assurance under subsection (4) at least 30 days before the expiration date or cancellation date of the bond, unless the owner or operator is exempt from the requirement to obtain a bond

under section 16903b.

(9) At least 7 days before the department draws on the bond under subsection (8)(b) or (c), the department shall issue a notice or order alleging that the owner or operator of the collection site is insolvent or violated this part and shall provide an opportunity for an informal hearing. This subsection does not apply if the bond is drawn upon under subsection (8)(c) as a result of failure to cause the removal of scrap tires as ordered by a court.

324.16903b Bond; exemptions; noncompliance; notice; compliance with subsection (1).

Sec. 16903b. (1) Subject to subsection (2), the owner and operator of a collection site are exempt from the requirement to obtain a bond under section 16903(4) if all of the following requirements are met:

(a) The owner or operator of the collection site is a scrap tire processor.

(b) Not less than 75% of the scrap tires, by weight or volume, that are stored at the collection site each calendar year are recycled or used for resource recovery during that year.

(c) The collection site has been in compliance with storage requirements for at least 1 year.

(d) The owner or operator annually certifies compliance with the requirements of this subsection on a form approved by the department.

(2) If the department determines that the owner or operator of a collection site is not in compliance with subsection (1), the department shall deliver to the collection site owner or operator, or both, a notice of noncompliance. If, within 60 days after receipt of that notice, the owner or operator who received the notice does not bring the collection site into compliance with subsection (1), the owner or operator shall comply with section 16903(4). Once an owner or operator is required to obtain a bond under section 16903(4), the bond shall be maintained unless the owner or operator brings the collection site into compliance with subsection (1).

(3) If a scrap tire processor has maintained its collection site in compliance with subsection (1) for 5 years, the scrap tire processor may move its operation to a new collection site location and remains exempt from the requirement to maintain a bond under section 16903(4) as long as the scrap tire processor continues to comply with subsection (1).

324.16903c Maintenance limiting mosquito breeding; requirements; violation; penalty; payment default.

Sec. 16903c. (1) The owner or operator of a collection site shall ensure that tires at a collection site are maintained in a manner that limits the potential of mosquito breeding by complying with 1 or more of the following:

(a) The tires shall be covered by plastic sheets or other impermeable barriers to prevent the accumulation of precipitation.

(b) The tires shall be chemically treated to eliminate mosquito breeding.

(c) The tires shall be baled, shredded, or chipped into pieces no larger than 4 inches by 6 inches and stored in piles that allow complete water drainage.

(2) A person who violates this section is responsible for a state civil infraction and may be ordered to pay a civil fine of not more than $400.00, plus costs.

(3) A default in the payment of a civil fine or costs ordered under this section or an installment of the fine or costs may be remedied by any means authorized under the revised judicature act of 1961, 1961 PA 236, MCL 600.101 to 600.9947.

324.16904 Owner or operator of collection site or portable shredding operation; application for registration; form; documentation of bonding; compliance with storage requirements; fee.

Sec. 16904. (1) By January 31 of each year, the owner or operator of a collection site or portable shredding operation shall submit an application for registration to the department. If a person who owns or operates a collection site is also a portable shredding operation, the person may submit a single application covering both. The application shall be on a form provided by the department and shall contain the information required by the department. The application for registration of a collection site shall include all of the following:

(a) Documentation that the collection site is bonded for the registration period as required by section 16903(4), if applicable.

(b) The signature of the applicant and, if the applicant is not the owner of the real property, the signature of the owner.

(2) The department shall not register a collection site unless the collection site is in compliance with the storage requirements.

(3) A $200.00 registration fee shall accompany each annual application for registration under this section. The department shall deposit money collected under this subsection into the state treasury to be credited to the fund.

324.16905 Scrap tire hauler; registration; form; contents; presentment; display of number; maintenance, availability, and contents of record; disposal at other location prohibited; original record; copy; bond; use; conditions for drawing on; notice; order.

Sec. 16905. (1) By January 31 of each year, a scrap tire hauler shall submit an application for registration to the department. The application shall be on a form provided by the department and shall contain the information required by the department. The application shall include documentation that the scrap tire hauler is bonded as required by subsection (6) for the registration period.

(2) A scrap tire hauler when transporting scrap tires shall have in his or her possession a copy of the current unexpired scrap tire hauler registration and shall present it upon demand of the department or a law enforcement officer. The scrap tire hauler registration number issued by the department shall be visibly displayed on a motor vehicle transporting scrap tires, whether the scrap tires are transported in or on the motor vehicle or a trailer. The number shall be in block style numerals at least 2 inches high and located on the driver's side of the vehicle but not on a window. The color of the numerals shall contrast with the background

vehicle color.

(3) A scrap tire hauler shall maintain a record of each load or consolidated load of scrap tires he or she transports on forms approved by the department. The record shall be maintained for 3 years and shall be made available, upon request, to the department or to a law enforcement officer at reasonable hours. The record shall contain all of the following information:

(a) The name, address, telephone number, authorized signature, and registration number of the scrap tire hauler.

(b) The name, address, telephone number, and authorized signature of the person who contracts for the removal of the scrap tires.

(c) The name, address, telephone number, and, upon delivery, the authorized signature, as required under section 16906(3), of the owner or operator of the location described in section 16902(1) where the tires are to be delivered.

(d) The date of removal and the number of scrap tires being transported.

(4) A scrap tire hauler shall not dispose of scrap tires at a location other than the location identified under subsection (3)(c).

(5) The original record as required by subsection (3) shall be in the possession of the scrap tire hauler during the actual transportation of the scrap tires. A copy of the record provided for in subsection (3) shall be provided to the person who contracts for the removal of scrap tires at the time of removal of the tires from the originating location. A copy shall also be provided to the owner or operator of the location described in section 16902(1) to which the scrap tires are delivered at the time of delivery.

(6) A scrap tire hauler shall maintain a bond in favor of the department, unless the scrap tire hauler is owned and operated by a scrap tire processor in compliance with this part. The bond shall be on a form approved by the department. The amount of the bond shall be $10,000.00.

(7) A person who elects to use a certificate of deposit as a bond under subsection (6) shall receive any accrued interest on that certificate of deposit. If cash is posted as a bond, interest shall accrue on the bond quarterly, at the annual rate of 6%, except that the interest rate payable to the scrap tire hauler shall not exceed the rate of interest accrued on the state common cash fund for the quarter in which an accrual is determined. Interest shall be paid to the scrap tire hauler upon release of the bond by the department. Any interest greater than 6% shall be deposited into the fund.

(8) Subject to subsections (9) and (10), the department may utilize a bond required under subsection (6) for the costs of any of the following:

(a) Removing scrap tires accumulated by the scrap tire hauler.

(b) Removing scrap tires deposited at an illegal location by the scrap tire hauler.

(c) Bringing scrap tires accumulated or deposited by the scrap tire hauler into compliance with this part.

(d) Cleanup of scrap tires accumulated or deposited by the scrap tire hauler.

(e) Fire suppression or other costs associated with responding to a fire or other emergency involving the scrap tire hauler or a site where scrap tires have been accumulated or deposited by the scrap tire hauler, including reimbursement to any local unit of government that incurred those costs.

(9) The department may draw on the bond required under subsection (6) if any of the following apply:

(a) There is a fire or other emergency involving the scrap tire hauler or a site where scrap tires have been accumulated or deposited by the scrap tire hauler.

(b) The scrap tire hauler becomes insolvent.

(c) The scrap tire hauler violates this part and does not cause the removal of the tires as ordered by the department or a court of competent jurisdiction.

(d) The scrap tire hauler fails to extend or renew the bond under its terms or establish alternate financial assurance under subsection (6) at least 30 days before the expiration date or cancellation date of the bond.

(10) At least 7 days before the department draws on the bond under subsection (9)(b) or (c), the department shall issue a notice or order alleging that the scrap tire hauler is insolvent or violated this part and shall provide an opportunity for an informal hearing. This subsection does not apply if the bond is drawn upon under subsection (9)(c) as a result of failure to cause the removal of scrap tires as ordered by a court.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 2002, Act 496, Imd. Eff. July 3, 2002;—Am. 2006, Act 527, Imd. Eff. Dec. 29, 2006;—Am. 2014, Act 543, Imd. Eff. Jan. 15, 2015.

324.16906 Record.

Sec. 16906. (1) A person who by contract, agreement, or otherwise arranges for the removal of scrap tires from a property under his or her control, including an end-user, shall do all of the following:

(a) If a complete record is not obtained from the registered scrap tire hauler pursuant to section 16905(5) or from an owner, operator, or authorized agent of a location pursuant to subsection (3), promptly notify the department of the missing record or information.

(b) Maintain the records described in subdivision (a) at the site of removal for 3 years.

(c) Make the records available to the department or a law enforcement officer upon request during reasonable hours.

(2) A person who receives scrap tires, including an end-user, shall maintain a record of all scrap tires received. The record shall be maintained for 3 years and shall be made available upon request to the department or a law enforcement officer at reasonable hours. The record shall contain all of the information required of a scrap tire hauler in section 16905(3).

(3) Upon acceptance of scrap tires at a location authorized by section 16902(1), the owner, operator, or authorized agent of that location shall sign the record, indicating acceptance of the scrap tires, and provide a copy of the signed record to the person delivering the scrap tires. Within 30 days, the owner or operator of the location receiving the scrap tires shall forward a copy of the signed record to the person who by contract, agreement, or otherwise arranged for the removal of the scrap tires being delivered. If the number of scrap tires received by a location authorized by section 16902(1) differs from the number of scrap tires indicated on the record provided for in section 16905(3) by the person who by contract, agreement, or otherwise arranged for the removal of the scrap tires being delivered or by the scrap tire hauler, the owner or operator of the location receiving the scrap tires shall contact the person who arranged for removal of the scrap tires or the scrap tire hauler, or both, as necessary, and determine where any additional tires received by that location originated or where any missing tires not received by that location were taken.

(4) If a consumer purchases replacement tires at a retailer and retains the tires being replaced, the retailer shall obtain the signature of the consumer on an invoice, receipt, or other record acknowledging retention of the scrap tires unless the consumer refuses.

(5) A retreader shall maintain for 3 years, and make available upon request to the department or a law enforcement officer at reasonable hours, all records required to be carried or maintained with the retreader's tire casings including all of the following:

(a) A retread work order that includes the customer's name, date of transaction, retreader DOT identification number pursuant to 49 CFR part 574, order number, and details of casing information for the casing intended for processing. Work orders shall reflect the number of tires that are being transported and retreaded.

(b) A work order sales report that specifies the work process detail for the customer work order. This report shall be returned to the customer with the work order number and invoice.

(c) An invoice stating the sales transaction of the retread process that was completed for the customer.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 2002, Act 496, Imd. Eff. July 3, 2002;—Am. 2006, Act 529, Imd. Eff. Dec. 29, 2006;—Am. 2014, Act 543, Imd. Eff. Jan. 15, 2015.

324.16907 Report to legislature.

Sec. 16907. By January 1, 1996, the department shall report to the legislature on all of the following:

(a) The effectiveness of this part and whether the department recommends any changes in this part.

(b) The volume of tires that are being disposed of in landfills and whether the department recommends banning tires from landfills in the future.

(c) Whether a manifest system to track scrap tires would be useful in the enforcement of this part.

(d) Whether, under certain circumstances, the fund should be used for the cleanup of abandoned scrap tires on land owned by persons other than the state or a municipality or county.

(e) Whether sufficient collection sites are available for the disposal of scrap tires from private individuals.

History: 1994, Act 451, Eff. Mar. 30, 1995.

Popular name: Act 451

Popular name: NREPA

324.16908 Scrap tire regulatory fund; creation; investment; interest and earnings; department as administrator for auditing purposes; no reversion to general fund; use of money in fund; grants.

Sec. 16908. (1) The scrap tire regulatory fund is created in the state treasury. The fund shall receive money as provided by law and any gifts or contributions to the fund. The state treasurer shall direct the investment of

the fund. Interest and earnings of the fund shall be credited to the fund. The department shall be the administrator of the fund for auditing purposes. Money in the fund at the close of the fiscal year shall remain in the fund and shall not revert to the general fund.

(2) Subject to subsection (4), money in the fund shall be used, upon appropriation, for all of the following purposes:

(a) For administrative costs of the department associated with this part including the implementation and enforcement of this part. However, money shall not be expended under this subdivision for the employment of more than 11 full-time equated positions.

(b) For the administrative costs of the secretary of state associated with the collection of the tire disposal surcharge pursuant to section 806 of the Michigan vehicle code, 1949 PA 300, MCL 257.806.

(c) For the cleanup or collection of abandoned scrap tires and scrap tires at collection sites. The department shall give priority to funding activities under this subdivision at collection sites in which the scrap tires were accumulated before January 1, 1991 and to collection sites that pose an imminent threat to public health, safety, welfare, or the environment. For collection sites that have accumulated tires after January 1, 1991, a lien in favor of this state, up to the value of the cleanup grant amount and any increase in the value of the property as a result of the cleanup of the property with grant funds, shall be placed on the property that is affected by the removal of the tires as provided in section 16908b. Before making a grant under this subdivision, the department shall consider the extent to which the making of the grant would contribute to the achievement of a balanced distribution of grants under this subdivision throughout this state. If a grant is awarded under this subdivision for collecting scrap tires at a community cleanup site, the tires shall be removed from the community cleanup site by the time specified in the grant contract.

(d) For grants to reimburse the cost of purchasing scrap tires to support the development of increased markets for scrap tires. Only the cost of purchasing scrap tires from scrap tire processors in this state or other generators of scrap tires in this state is eligible for reimbursement under this subdivision.

(e) For grants of up to 50% of the cost of purchasing equipment, or research and development, to provide for a new or increased use for scrap tires.

(f) For costs associated with enforcement of this part, including grants to local law enforcement agencies.

(3) Applications for grants under subsection (2) shall be submitted on a form approved by the department and shall contain the information required by the department. The department shall publish criteria upon which the grants will be issued and shall make that information available to grant applicants.

(4) For the fiscal year ending September 30, 2020, only, $4,000,000.00 of the money in the scrap tire regulatory fund is transferred to and must be deposited into the general fund.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1995, Act 268, Imd. Eff. Jan. 8, 1996;—Am. 2002, Act 496, Imd. Eff. July 3, 2002;—Am. 2006, Act 524, Imd. Eff. Dec. 29, 2006;—Am. 2014, Act 543, Imd. Eff. Jan. 15, 2015;—Am. 2020, Act 201, Imd. Eff. Oct. 15, 2020.

Popular name: Act 451

Popular name: NREPA

324.16908b Unpaid cleanup costs; lien; filing of petition by attorney general; type of lien; duration; release.

Sec. 16908b. (1) All unpaid cleanup costs for scrap tires accumulated after January 1, 1991 that are incurred under section 16908(2)(c), including any staff costs, costs of surveillance and enforcement, and attorney costs or fees constitute a lien in favor of this state upon a collection site that has been the subject of cleanup activity by this state. A lien under this subsection has priority over all other liens and encumbrances except liens and encumbrances recorded before the date the lien under this subsection is recorded. A lien under this subsection arises when this state first incurs such cleanup costs at the collection site.

(2) If the attorney general determines that the lien provided in subsection (1) is insufficient to protect the interest of this state in recovering the cleanup costs at a collection site, the attorney general may file a petition in the circuit court for the county in which the property is located seeking either or both of the following:

(a) A lien upon the collection site subject to the scrap tire cleanup activity that takes priority over all other liens and encumbrances that are or have been recorded on the collection site.

(b) A lien upon real or personal property or rights to real or personal property other than the collection site, owned by the person who owns the collection site, having priority over all other liens and encumbrances recorded prior to the date the lien under this subsection is recorded. However, the following are not subject to the lien provided for in this subdivision:

(*i*) Assets of a qualified pension plan or individual retirement account under the internal revenue code.

(*ii*) Assets held expressly for the purpose of financing a dependent's college education.

(*iii*) Up to $500,000.00 in nonbusiness real or personal property or rights to real or personal property, except that not more than $25,000.00 of this amount may be cash or securities.

(3) A petition submitted pursuant to subsection (2) shall set forth with as much specificity as possible the type of lien sought, the property that would be affected, and the reasons the attorney general believes the lien is necessary. Upon receipt of a petition under subsection (2), the court shall promptly schedule a hearing to determine whether the petition should be granted. Notice of the hearing shall be provided to the attorney general, the property owner, and any persons holding liens or perfected security interests in the real property subject to the cleanup activity.

(4) In addition to the lien provided in subsections (1) and (2), if this state incurs costs for cleanup activity under section 16908(2)(c) that increase the market value of the real property that is the location of the cleanup activity, the increase in value caused by the state-funded cleanup activity, to the extent this state incurred unpaid cleanup costs, constitutes a lien in favor of the state upon the real property. This lien has priority over all other liens or encumbrances that are or have been recorded upon the property.

(5) A lien provided in subsection (1), (2), or (4) is perfected against real property when a notice of lien is filed by the department with the register of deeds in the county in which the real property is located. In addition, the department shall, at the time of the filing of the notice of lien, provide a copy of the notice of lien to the owner of that property by certified mail.

(6) A lien under this section continues until the liability for the cleanup costs is satisfied.

(7) Upon satisfaction of the liability secured by the lien, the department shall file a notice of release of lien in the same manner as provided in subsection (5).

324.16908c Intentional open burning of scrap tire prohibited.

Sec. 16908c. A person shall not intentionally engage in the open burning of a scrap tire.

History: Add. 2014, Act 543, Imd. Eff. Jan. 15, 2015.

324.16909 Violation as misdemeanor; penalties; separate violations; issuance of appearance ticket; section inapplicable to violation of MCL 324.16903c; false statement.

Sec. 16909. (1) A person who violates this part, if fewer than 50 scrap tires are involved, is guilty of a misdemeanor punishable by imprisonment for not more than 90 days or a fine of not less than $200.00 or more than $500.00, or both, for each violation.

(2) A person who violates this part, if 50 or more scrap tires are involved, is guilty of a misdemeanor punishable by imprisonment for not more than 180 days or a fine of not less than $500.00 or more than $10,000.00, or both, for each violation.

(3) A person convicted of a second or subsequent violation of this part is guilty of a misdemeanor punishable by imprisonment for not more than 1 year or a fine of not less than $1,000.00 or more than $25,000.00, or both, for each violation.

(4) In addition to any other penalty provided for in this section, the court may order a person who violates this part to perform not more than 100 hours of community service.

(5) For any violation of this part, each day that a violation continues constitutes a separate violation.

(6) A law enforcement officer may issue an appearance ticket as described and authorized by sections 9c to 9g of chapter IV of the code of criminal procedure, 1927 PA 175, MCL 764.9c to 764.9g, to a person who violates this part.

(7) This section does not apply to a violation of section 16903c.

(8) A person who knowingly makes or causes to be made a false statement or entry in a registration application, scrap tire transportation record, or grant application under this part is guilty of a misdemeanor punishable by imprisonment for not more than 1 year or a fine of not less than $2,500.00 or more than $10,000.00, or both.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 2002, Act 496, Imd. Eff. July 3, 2002;—Am. 2006, Act 520, Imd. Eff. Dec. 29, 2006;—Am. 2014, Act 543, Imd. Eff. Jan. 15, 2015.

324.16909a Investigation or inspection; warrantless search; seizure of vehicle or equipment; costs.

Sec. 16909a. (1) The department may enter at reasonable hours a tire retail establishment, vehicle owned or operated by a scrap tire hauler for the transport of scrap tires, or collection site or other place where scrap tires are or have been present, and may inspect the location or other place for the purposes of enforcing or administering this part. An investigation or inspection under this part shall comply with the United States constitution and the state constitution of 1963.

(2) If the department or a law enforcement officer has probable cause to believe that a person is violating this part, the department or a law enforcement officer may search without a warrant a vehicle or other transportation-related equipment that is possessed, used, or operated by that person.

(3) A vehicle, or other transportation-related equipment used in a criminal violation of this part is subject to seizure by a law enforcement officer and forfeiture in the same manner as provided in chapter 47 of the revised judicature act of 1961, 1961 PA 236, MCL 600.4701 to 600.4709.

(4) The court may award court costs and other expenses of litigation including attorney fees to a party who successfully brings an action for a violation of this section.

History: Add. 2006, Act 530, Imd. Eff. Dec. 29, 2006;—Am. 2014, Act 543, Imd. Eff. Jan. 15, 2015.

Popular name: Act 451

Popular name: NREPA

324.16911 Reports; appointment of scrap tire advisory committee.

Sec. 16911. (1) The department shall annually report to the standing committees of the senate and house of representatives with primary responsibility for issues pertaining to natural resources and the environment on the utilization of revenues of the fund.

(2) In 2006 and every third year thereafter, the department shall prepare a report on the effectiveness of this part in encouraging the reuse of scrap tires and ensuring the safe storage of scrap tires. The report shall include recommendations for such changes to this part, including any further description of the uses of money described in section 16908(2)(c), (d), and (e) as the department finds necessary and appropriate. The department shall submit the report to the standing committees of the senate and house of representatives with primary responsibility for issues pertaining to natural resources and the environment.

(3) The director of the department shall appoint a scrap tire advisory committee of individuals interested in the management of scrap tires to advise the department on the implementation of this part. In addition to such other issues as the department may request the committee to consider, the committee shall advise the department on the report required by subsection (2) and the relevance of a national standard or specification under section 16901(1)(f).

PART 171
BATTERY DISPOSAL

324.17101 Definitions.

Sec. 17101. As used in this part:

(a) "Alkaline manganese battery" means a dry cell battery containing manganese dioxide and zinc electrodes and an alkaline electrolyte.

(b) "Distributor" means a person who sells batteries to retailers in this state.

(c) "Lead acid battery" means a storage battery, that is used to start an internal combustion engine or as the

principal electrical power source for a vehicle, in which the electrodes are grids of lead containing lead oxides that change in composition during charging and discharging, and the electrolyte is dilute sulfuric acid.

(d) "Manufacturer" means a person who produces batteries for sale in this state.

(e) "Mercuric oxide battery" means a dry cell battery that delivers an essentially constant output voltage throughout its useful life by means of a chemical reaction between zinc and mercuric oxide.

(f) "Nickel cadmium battery" means a sealed storage battery that has a nickel anode, a cadmium cathode, and an alkaline electrolyte, that is widely used in cordless appliances.

(g) "Retailer" means a person who sells or offers to sell batteries to consumers within this state.

(h) "Solid waste disposal area" means a disposal area as defined in part 115.

(i) "Zinc carbon battery" means a dry cell battery containing manganese dioxide and zinc electrodes and an electrolyte consisting of ammonium chloride or a zinc chloride solution, or both.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1995, Act 124, Imd. Eff. June 30, 1995.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Waste Management Division to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

Popular name: Act 451

324.17102 Disposal of lead acid battery.

Sec. 17102. (1) A person other than a retailer, distributor, or manufacturer shall not dispose of a lead acid battery except by delivery to 1 of the following:

(a) A retailer.

(b) A distributor.

(c) A manufacturer.

(d) A collection, recycling, or smelting facility approved by the department.

(2) A retailer shall not dispose of used lead acid batteries except by delivery to 1 of the following:

(a) A distributor or his or her authorized agent.

(b) A collection, recycling, or smelting facility approved by the department.

(c) A manufacturer.

(3) A distributor shall dispose of lead acid batteries by delivery to a manufacturer or to a collection, recycling, or smelting facility approved by the department.

(4) A manufacturer shall dispose of lead acid batteries by delivery to a recycling or smelting facility approved by the department.

Popular name: Act 451

Popular name: NREPA

324.17103 Retailer of lead acid batteries; duties.

Sec. 17103. A retailer of lead acid batteries shall do all of the following:

(a) Accept, at or near the point at which lead acid batteries are offered for sale, in a quantity at least equal to the number of new lead acid batteries sold by the retailer, used lead acid batteries from customers, if offered by the customers.

(b) Post a written notice in a location that is readily visible to customers within the retail establishment that is at least 8-1/2 inches by 11 inches in size and contains the universal recycling symbol and contains essentially all of the following:

(*i*) Recycle your used lead acid batteries.

(*ii*) It is illegal to discard a lead acid battery except by delivery to a retailer, a distributor, a manufacturer, or a collection, recycling, or smelting facility approved by the department.

(*iii*) State law requires retailers to accept used lead acid batteries upon the purchase or within 30 calendar days of the purchase of a lead acid battery.

(c) The format, design, and wording of the notice described in this section shall be provided to retailers of lead acid batteries by the department.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1995, Act 124, Imd. Eff. June 30, 1995.

Popular name: Act 451

Popular name: NREPA

324.17104 Notices; failure to post; default in payment of civil fine.

Sec. 17104. (1) The department shall produce, print, and make available to retailers notices required by

section 17103.

(2) A retailer who fails to post a notice required by this part following warning by the department is subject to a civil fine of $25.00 per day of violation.

(3) A default in the payment of a civil fine ordered under this part may be remedied by any means authorized under the revised judicature act of 1961, Act No. 236 of the Public Acts of 1961, being sections 600.101 to 600.9947 of the Michigan Compiled Laws.

Popular name: Act 451

Popular name: NREPA

324.17105a Batteries containing intentionally introduced mercury; sales or offers prohibited.

Sec. 17105a. (1) Except for alkaline manganese button cell batteries that have a mercury content of 25 milligrams or less, a person shall not sell, offer for sale, or offer for promotional purposes an alkaline manganese battery manufactured on or after January 1, 1996 that contains intentionally introduced mercury.

(2) A person shall not sell, offer for sale, or offer for promotional purposes a zinc carbon battery manufactured on or after January 1, 1996 that contains intentionally introduced mercury.

History: Add. 1995, Act 124, Imd. Eff. June 30, 1995.

Popular name: Act 451

Popular name: NREPA

324.17105b Button cell mercuric oxide battery or mercuric oxide battery; sales or offers.

Sec. 17105b. (1) Beginning on January 1, 1996, a person shall not sell, offer for sale, or offer for promotional purposes a button cell mercuric oxide battery for use in this state.

(2) Beginning on January 1, 1996, a person shall not sell, offer for sale, or offer for promotional purposes a mercuric oxide battery for use in this state unless the manufacturer does all of the following:

(a) Identifies a collection site that has all required government approvals, to which a person may send used mercuric oxide batteries for recycling or proper disposal after mercury is recovered from the battery.

(b) Informs each of its purchasers of mercuric oxide batteries of the collection site identified under subdivision (a).

(c) Informs each of its purchasers of mercuric oxide batteries of a telephone number that the purchaser may call to get information about returning mercuric oxide batteries for recycling or proper disposal.

(3) Subsection (2) does not apply to mercuric oxide button cell batteries.

324.17107 Enforcement; violation as misdemeanor; penalties.

Sec. 17107. (1) The department shall enforce this part.

(2) A person other than a retailer, distributor, or manufacturer who knowingly disposes of lead acid batteries or mercuric oxide batteries in violation of this part is guilty of a misdemeanor punishable by a fine of not more than $25.00, plus the costs of prosecution. Each battery that is unlawfully disposed of is a separate violation.

(3) Except as otherwise provided in this part, a retailer, manufacturer, or distributor who violates this part is guilty of a misdemeanor punishable by imprisonment for not more than 60 days or a fine of not more than $1,000.00, or both, plus the costs of prosecution.

PART 172.
MERCURY-ADDED PRODUCTS

324.17201 Definitions.

Sec. 17201. As used in this part:

(a) "Appliance" means a refrigerator, dehumidifier, freezer, oven, range, microwave oven, washer, dryer, dishwasher, trash compactor, window room air conditioner, television, or computer. Appliance does not include a home heating or central air-conditioning system.

(b) "Manufacturer" means a person that produces, imports, or distributes mercury thermometers in this state.

(c) "Mercury fever thermometer" means a mercury thermometer used for measuring body temperature.

(d) "Mercury thermometer" means a product or component, other than a dry cell battery, of a product used for measuring temperature that contains mercury or a mercury compound intentionally added to the product or component. Mercury thermometer does not include a product or component of a product that is used as a replacement for an existing thermometer that measures temperature as part of a manufacturing process.

(e) "Thermostat" means a consumer product that uses a switch that contains mercury or a mercury compound to sense and control room temperature, including room temperature in residential, commercial, industrial, and other buildings, by communicating with heating, ventilating, or air-conditioning equipment. Thermostat does not include a product used to control temperature as part of a manufacturing device.

324.17202 Mercury thermometer; sale, offer for sale, or offer for promotional purposes.

Sec. 17202. (1) Except as provided in subsection (2), beginning on January 1, 2003, a person shall not sell, offer for sale, or offer for promotional purposes a mercury thermometer in this state or for use in this state. This subsection does not apply if the mercury thermometer is sold or offered for either of the following:

(a) A use for which a mercury thermometer is required by state or federal statute, regulation, or administrative rule.

(b) Pharmaceutical research purposes.

(2) Beginning on January 1, 2003, a person shall not sell, offer for sale, or offer for promotional purposes a mercury fever thermometer in this state or for use in this state, except by prescription. A manufacturer of mercury fever thermometers shall supply clear instructions on the careful handling of the thermometer to avoid breakage and proper cleanup should a breakage occur with each mercury fever thermometer sold by prescription.

324.17204 Sale of blood pressure device containing mercury; prohibitions; exceptions.

Sec. 17204. (1) Beginning January 1, 2008, a person shall not sell, offer for sale, or offer for promotional purposes in this state or for use in this state a blood pressure recording, measuring, or monitoring device that contains mercury or a mercury compound intentionally added to the device.

(2) Except as provided in subsection (3), beginning January 1, 2009, a person shall not use a device described in subsection (1) in this state.

(3) Subsection (2) does not apply to a blood pressure recording, measuring, or monitoring device that contains mercury or a mercury-added compound if all of the following requirements are met:

(a) The blood pressure recording, measuring, or monitoring device was purchased prior to the date of enactment of the amendatory act that added this section.

(b) The blood pressure recording, measuring, or monitoring device is used exclusively in a private residence or is used exclusively in a health care facility for the purpose of calibrating blood pressure recording, measuring, or monitoring devices that do not contain mercury or a mercury-added compound and is kept in a locked area within that health care facility that is inaccessible to the general public.

324.17206 Esophageal dilator, bougie tube, or gastrointestinal tube with mercury or mercury compound added; sale, offer for sale, or distribution prohibited; exceptions.

Sec. 17206. (1) Except as provided in subsection (2), beginning January 1, 2009, a person shall not sell, offer for sale, or distribute in this state an esophageal dilator, bougie tube, or gastrointestinal tube if mercury or a mercury compound was added to the product during its manufacture.

(2) This section does not apply to either of the following:

(a) A product the use of which is required by a federal statute or regulation.

(b) A product whose only mercury-containing component is a button cell battery.

History: Add. 2006, Act 494, Imd. Eff. Dec. 29, 2006.

Popular name: Act 451

Popular name: NREPA

PART 173
ELECTRONICS

324.17301 Definitions.

Sec. 17301. As used in this part:

(a) "Collector" means a person who receives covered electronic devices from consumers and arranges for the delivery of the covered electronic devices to a recycler.

(b) "Computer" means a desktop personal computer or laptop computer, a computer monitor, or beginning April 1, 2011, a printer. Computer does not include any of the following:

(*i*) A personal digital assistant device or mobile telephone.

(*ii*) A computer peripheral device, including a mouse or other similar pointing device, or a detachable or wireless keyboard.

(c) "Computer takeback program" means a program required under section 17305(c).

(d) "Consumer" means a person who used a covered electronic device primarily for personal or small business purposes in this state.

(e) "Covered computer" means a computer that was or will be used primarily for personal or small business purposes in this state. Covered computer does not include a device that is functionally or physically a part of, or connected to, or integrated within a larger piece of equipment or system designed and intended for use in an industrial, governmental, commercial, research and development, or medical setting, including, but not limited to, diagnostic, monitoring, or control products, medical products approved under the federal food, drug, and cosmetic act, 21 USC 301 to 399, equipment used for security, sensing, monitoring, antiterrorism, or emergency services purposes, or equipment designed and intended primarily for use by professional users.

(f) "Covered electronic device" means a covered computer or covered video display device.

(g) "Covered video display device" means a video display device that was or will be used primarily for personal or small business purposes in this state. Covered video display device does not include a device that is functionally or physically a part of, or connected to, or integrated within a larger piece of equipment or system designed and intended for transportation or use in an industrial, governmental, commercial, research and development, or medical setting, including, but not limited to, diagnostic, monitoring, or control products, medical products approved under the federal food, drug, and cosmetic act, 21 USC 301 to 399, equipment used for security, sensing, monitoring, antiterrorism, or emergency services purposes, or equipment designed and intended primarily for use by professional users.

(h) "Department" means the department of environmental quality.

(i) "Electronic device takeback program" or "takeback program" means a computer takeback program or a video display device takeback program.

(j) "Manufacturer", subject to subdivision (k), means any of the following:

(*i*) The person who owns the brand with which a covered computer is labeled.

(*ii*) The person who owns or is licensed to use the brand with which a covered video display device is labeled.

(*iii*) If the brand owner does not do business in the United States, the person on whose account a covered electronic device was imported into the United States.

(*iv*) A person who contractually assumes the responsibilities and obligations of a person described under subparagraph (*i*), (*ii*), or (*iii*).

(k) Manufacturer does not include a person unless the person manufactured, sold, or imported more than 50 covered computers in 2000 or any subsequent calendar year or more than 50 covered video display devices in the previous calendar year.

(*l*) "Printer" means a printer or a multifunction or "all-in-one" device that in addition to printing performs 1 or more other operations such as copying, scanning, or faxing, that is designed to be placed on a desk or other work surface, and that may use any of various print technologies, such as laser and LED (electrographic), ink jet, dot matrix, thermal, or digital sublimation. Printer does not include a floor-standing printer, a printer with an optional floor stand, a point of sale (POS) receipt printer, a household printer such as a calculator with printing capabilities or a label maker, or a non-stand-alone printer that is embedded into a product other than a covered computer.

(m) "Recycler" means a person who as a principal component of business operations acquires covered electronic devices and sorts and processes the covered electronic devices to facilitate recycling or resource recovery techniques. Recycler does not include a collector, hauler, or electronics shop.

(n) "Retailer" means a person that sells a covered electronic device to a consumer by any means, including transactions conducted through sales outlets, catalogs, mail order, or the internet, whether or not the person has a physical presence in this state.

(o) "Small business" means a business with 10 or fewer employees.

(p) "Video display device" means an electronic device with a viewable screen of 4 inches or larger that contains a tuner that locks on to a selected carrier frequency and is capable of receiving and displaying television or video programming via broadcast, cable, or satellite. Video display device includes, but is not limited to, a direct view or projection television whose display technology is based on cathode ray tube (CRT), plasma, liquid crystal (LCD), digital light processing (DLP), liquid crystal on silicon (LCOS), silicon crystal reflective display (SXRD), light emitting diode (LED), or similar technology.

(q) "Video display device takeback program" means a program required under section 17305(d).

History: Add. 2008, Act 394, Imd. Eff. Dec. 29, 2008.

Popular name: Act 451

Popular name: NREPA

324.17303 Sale or offer of sale of new covered electronic device; registration by manufacturer; expiration; contents; effectiveness; failure to comply with requirements or rules; notice of deficiency; denial or revocation of registration; hearing; validity; fee; deposit of revenues; list of registered manufacturers; maintenance of website; report.

Sec. 17303. (1) Within 30 days after the end of each state fiscal year, a manufacturer that sells or offers for sale to any person in this state a new covered electronic device shall register with the department on a form provided by the department. A registration expires 30 days after the end of the state fiscal year in which the registration is required to be filed. A manufacturer that has not already filed a registration under this part shall submit a registration within 10 business days after the manufacturer begins to sell or offer for sale new covered electronic devices in this state.

(2) A registration under subsection (1) must include all of the following:

(a) The manufacturer's name, address, and telephone number.

(b) Each brand name under which the manufacturer sells or offers for sale covered electronic devices in this state.

(c) Information about the manufacturer's electronic device takeback program, including all of the following:

(*i*) Information provided to consumers on how and where to return covered electronic devices labeled with the manufacturer's name or brand label.

(*ii*) The means by which information described in subparagraph (*i*) is disseminated to consumers, including the relevant website address if the internet is used.

(*iii*) Beginning with the first registration submitted after the implementation of the takeback program, a report on the implementation of the takeback program during the prior state fiscal year, including all of the following:

(A) The total weight of the covered electronic devices received by the takeback program from consumers during the prior state fiscal year.

(B) The processes and methods used to recycle or reuse the covered electronic devices received from consumers.

(C) The identity of any collector or recycler with whom the manufacturer contracts for the collection or recycling of covered electronic devices received from consumers. The identity of a recycler shall include the addresses of that recycler's recycling facilities in this state, if any. The identity of a collector or recycler reported under this subparagraph is exempt from disclosure under the freedom of information act, 1976 PA 442, MCL 15.231 to 15.246, and must not be disclosed by the department unless required by court order.

(3) A registration is effective on receipt by the department if the registration is administratively complete.

(4) If a manufacturer's registration does not meet the requirements of this section and any rules promulgated under this part, the department shall notify the manufacturer of the deficiency. If the manufacturer fails to correct the deficiency within 60 days after notice is sent by the department, the department may deny or revoke the manufacturer's registration, after providing an opportunity for a contested case hearing under the administrative procedures act of 1969, 1969 PA 306, MCL 24.201 to 24.328.

(5) A manufacturer of covered electronic devices shall update its registration within 10 business days after a change in the brands of covered electronic devices from that manufacturer sold or offered for sale in this state.

(6) Until October 1, 2027, a manufacturer's registration must be accompanied by an annual fee of $3,000.00. However, if the amount of money in the fund on December 31 of any year is greater than $600,000.00, the department shall not collect manufacturers' registration fees for the following state fiscal year.

(7) Revenue from manufacturers' registration fees collected under this section must be deposited in the electronic waste recycling fund created in section 17327.

(8) The department shall maintain on its website a list of registered manufacturers of computers and a list of registered manufacturers of video display devices and the website addresses at which they provide information on recycling covered electronic devices.

(9) Not later than October 1, 2011 and every 2 years after that date, the department shall submit a report to the secretary of the senate and to the clerk of the house of representatives that assesses the adequacy of the fees under this section and any departmental recommendation to modify those fees.

324.17305 Sale or offer of sale of new covered electronic device; manufacturer; requirements.

Sec. 17305. Beginning April 1, 2010, a manufacturer shall not sell or offer for sale to any person in this state a new covered electronic device, whether through sales outlets, catalogs, mail order, the internet, or any other means, unless all of the following requirements are met:

(a) The covered electronic device is labeled with the manufacturer's name or brand label, owned by or, in the case of a video display device, licensed for use by the manufacturer.

(b) The manufacturer's name appears on the applicable registration list maintained by the department under section 17303.

(c) If the covered electronic device is a covered computer, the manufacturer has a computer takeback program as described in section 17309.

(d) If the covered electronic device is a covered video display device, the manufacturer has a video display device takeback program as described in section 17311.

History: Add. 2008, Act 394, Imd. Eff. Dec. 29, 2008.

Popular name: Act 451

Popular name: NREPA

324.17307 Sale or offer of sale of new covered electronic device; retailer; appearance of manufacturer on registration list.

Sec. 17307. A retailer shall not sell or offer for sale to any person in this state a new covered electronic device from a manufacturer, purchased by the retailer on or after April 1, 2010 unless the manufacturer appears on the applicable registration list under section 17303.

History: Add. 2008, Act 394, Imd. Eff. Dec. 29, 2008.

Popular name: Act 451

Popular name: NREPA

324.17309 Computer takeback program.

Sec. 17309. (1) Beginning April 1, 2010, each manufacturer of covered computers shall implement a computer takeback program that meets all of the following criteria:

(a) The manufacturer of a covered computer that has reached the end of its useful life for the consumer or the manufacturer's designee accepts from the consumer the covered computer. This part shall not be construed to impair the obligation of a contract under which a person agrees to conduct a computer takeback program on behalf of a manufacturer.

(b) A consumer is not required to pay a separate fee when the consumer returns the covered computer to the manufacturer of that covered computer or the manufacturer's designee.

(c) The collection of covered computers is reasonably convenient and available to and otherwise designed to meet the needs of consumers in this state. Examples of collection methods that alone or combined meet the convenience requirements of this subdivision include systems for a consumer to return a covered computer by 1 or more of the following means:

(*i*) Mail or common carrier shipper.

(*ii*) Deposit at a local physical collection site that is kept open and staffed on a continuing basis.

(*iii*) Deposit during periodic local collection events.

(*iv*) Deposit with a retailer.

(d) The manufacturer of a covered computer provides a consumer information on how and where to return the covered computer, including, but not limited to, collection, recycling, and reuse information on the manufacturer's publicly available website. The manufacturer may also include collection, recycling, and reuse information in the packaging for or in other materials that accompany the manufacturer's covered computers when the covered computers are sold or provide that information via a toll-free telephone number.

(e) The manufacturer recycles or arranges for the recycling of any covered computers collected under subdivision (a).

(2) A manufacturer's computer takeback program is not required to accept more than 7 covered computers from a single consumer on a single day.

(3) A manufacturer may conduct a computer takeback program alone or in conjunction with other manufacturers. A manufacturer may arrange for the collection and recycling of covered computers by another person to fulfill the manufacturer's obligations under this section.

History: Add. 2008, Act 394, Imd. Eff. Dec. 29, 2008.

Popular name: Act 451

Popular name: NREPA

324.17311 Video display device takeback program.

Sec. 17311. (1) Beginning April 1, 2010, each manufacturer of covered video display devices shall implement a video display device takeback program that meets all of the following criteria:

(a) A manufacturer or the manufacturer's designee accepts from a consumer any covered video display device that has reached the end of its useful life for the consumer, regardless of the type or brand of covered video display device.

(b) A consumer is not required to pay a separate fee when the consumer returns a covered video display device through the takeback program of any manufacturer of any covered video display device.

(c) The requirements of section 17309(1)(c), as applied to covered video display devices.

(d) The manufacturer provides a consumer information on how and where to return a covered video display device, including, but not limited to, collection, recycling, and reuse information on the manufacturer's publicly available website. The manufacturer may also include collection, recycling, and reuse information in the packaging for or in other materials that accompany the manufacturer's covered video display devices when the covered video display devices are sold or provide that information via a toll-free telephone number.

(e) The manufacturer recycles or arranges for the recycling of any covered video display device collected under subdivision (a). As a nonbinding target, each manufacturer required to conduct a video display device takeback program should annually recycle 60% of the total weight of covered video display devices sold by the manufacturer in this state during the prior state fiscal year. Sales data under this subdivision are exempt from disclosure under the freedom of information act, 1976 PA 442, MCL 15.231 to 15.246, and shall not be disclosed by the department unless required by court order.

(2) A manufacturer's video display device takeback program is not required to accept more than 7 covered video display devices from a single consumer on a single day.

(3) A manufacturer may conduct a video display device takeback program alone or in conjunction with other manufacturers. A manufacturer may arrange for the collection and recycling of covered video display devices by another person to fulfill the manufacturer's obligations under this section.

324.17313 Electronic waste advisory council; creation; members; appointments; term; vacancy; removal; co-chairs; meeting; quorum; business conducted at public meeting; writings; compensation prohibited; report; dissolution.

Sec. 17313. (1) The electronic waste advisory council is created within the legislative branch of state government. The council shall consist of the following members:

(a) Four individuals appointed by the senate majority leader as follows:

(*i*) One individual representing covered video display device manufacturers.

(*ii*) One individual representing recyclers of covered computers or covered video display devices.

(*iii*) One individual representing a trade association of computer manufacturers and video display device manufacturers.

(*iv*) One individual who is a member of the senate.

(b) Four individuals appointed by the speaker of the house of representatives as follows:

(*i*) One individual representing covered computer manufacturers.

(*ii*) One individual representing retailers of covered computers or covered video display devices.

(*iii*) One individual representing an agency responsible for a countywide recycling program.

(*iv*) One individual who is a member of the house of representatives.

(c) Two individuals appointed by the governor as follows:

(*i*) One individual representing a statewide conservation organization.

(*ii*) One individual representing the department.

(2) The appointments to the council under subsection (1) shall be made not later than 30 days after the effective date of the amendatory act that added this section.

(3) A member of the council shall serve for the life of the council. If a vacancy occurs on the council, the vacancy shall be filled for the unexpired term in the same manner as the original appointment. The appointing official may remove a member of the council for incompetence, dereliction of duty, malfeasance, misfeasance, or nonfeasance in office, or any other good cause.

(4) The council member who is a member of the senate and the council member who is a member of the house of representatives shall serve as co-chairs of the council. The first meeting of the council shall be called by the co-chairs. At the first meeting, the council shall elect from among its members any other officers that it considers necessary or appropriate. After the first meeting, the council shall meet at least quarterly, or more frequently at the call of a co-chair or if requested by 2 or more members.

(5) A majority of the members of the council constitute a quorum for the transaction of business at a meeting of the council. A majority of the members present and serving are required for official action of the council.

(6) The business that the council may perform shall be conducted at a public meeting of the council held in compliance with the open meetings act, 1976 PA 267, MCL 15.261 to 15.275. A writing prepared, owned, used, in the possession of, or retained by the council in the performance of an official function is subject to the freedom of information act, 1976 PA 442, MCL 15.231 to 15.246.

(7) Members of the council shall serve without compensation. However, the member of the council representing the department shall serve without additional compensation.

(8) By April 1, 2012, the council shall submit a report to the governor, the department, and the standing committees of the legislature with jurisdiction over issues primarily pertaining to natural resources and the environment. The report shall evaluate the program under this part and make recommendations to improve the recycling of covered electronic devices. The report shall evaluate all of the following in light of the policies and objectives set forth in section 11514:

(a) Whether a manufacturer's market share should be used to determine the amount of video display devices required to be recycled annually by the manufacturer.

(b) Whether a manufacturer with a takeback program that recycles electronic waste at a higher rate than provided for in this part should be granted credits and, if so, the life of the credits, whether the credits would be transferable, and how the credit system should otherwise operate.

(c) Whether the nonbinding target for manufacturers recycling covered video display devices under section 17311 should be increased or decreased and whether the target should be made mandatory.

(d) What items should be included in a mandatory takeback program and, if new items are recommended, what the recycling rates should be for those new items.

(e) Whether and how a manufacturer should be sanctioned for failing to meet the requirements of this part.

(f) Whether funding for the administration of this part is appropriate or needs to be increased or decreased.

(g) Whether a program should be developed to recognize manufacturers that implement an expanded recycling program for additional products such as printers or recycles electronic waste at a higher rate than provided for in this part.

(h) Whether a system should be developed to collect covered electronic devices that are otherwise not collected by a manufacturer.

(i) Whether additional recycling data, such as the amount of covered electronic devices collected by collectors, should be collected and, if so, how.

(j) Whether a program should be developed and funding should be obtained for grants to expand recycling and recovery programs for covered electronic devices and to provide consumer education related to the programs.

(k) Whether a disposal ban for covered electronic devices is appropriate.

(9) The council is dissolved effective July 1, 2012.

324.17315 Recycling of covered electronic devices; manner; rules.

Sec. 17315. (1) Covered electronic devices collected under this part shall be recycled in a manner that complies with federal and state laws, including rules promulgated by the department, and local ordinances.

(2) Any rules promulgated by the department under section 17321 regulating the recycling of covered electronic devices collected under this part shall be consistent with both of the following:

(a) The United States environmental protection agency's "Plug-in to eCycling Guidelines for Materials Management", as in effect on the effective date of the amendatory act that added this section.

(b) The institute of scrap recycling industries, inc. publication "Electronics Recycling Operating Practices", dated April 25, 2006.

History: Add. 2008, Act 392, Imd. Eff. Dec. 29, 2008.

Popular name: Act 451

Popular name: NREPA

324.17317 Recycling of covered electronic devices; registration form; contents; report of total weight recycled previous state fiscal year; effectiveness of registration; notice of deficiency; fee; deposit of revenues; submission of false registration as violation; report.

Sec. 17317. (1) Within 30 days after the end of each state fiscal year, a person that engages in the business of recycling covered electronic devices shall register with the department on a form provided by the department. A registration expires 30 days after the end of the state fiscal year in which the registration is required to be filed. A recycler that has not already filed a registration under this part shall submit a registration within 10 business days after the recycler begins to recycle covered electronic devices.

(2) A registration under subsection (1) must include all of the following:

(a) The name, address, telephone number, and location of all recycling facilities that are under the direct control of the recycler, are located in this state, and may receive covered electronic devices.

(b) A certification by the recycler that the recycler substantially meets the requirements of section 17315.

(3) A recycler of covered electronic devices shall report the total weight of covered electronic devices recycled during the previous state fiscal year. The recycler shall keep a written log that records the weight of covered video display devices and the total weight of covered computers delivered to the recycler and identified as such on receipt. The total weight reported in the registration must be based on this log.

(4) A recycler's registration is effective on receipt by the department if the registration is administratively complete.

(5) If a recycler's registration does not meet the requirements of this section and any rules promulgated under this part, the department shall notify the recycler of the deficiency. If the recycler fails to correct the deficiency within 60 days after notice is sent by the department, the department may deny or revoke the recycler's registration, after providing an opportunity for a contested case hearing under the administrative procedures act of 1969, 1969 PA 306, MCL 24.201 to 24.328.

(6) Until October 1, 2027, a recycler's registration under subsection (1) must be accompanied by an annual fee of $2,000.00.

(7) Revenue from recyclers' registration fees collected under this section must be deposited in the electronic waste recycling fund created in section 17327.

(8) Submitting a false registration under subsection (1) is a violation of this part.

(9) Not later than October 1, 2011 and every 2 years after that date, the department shall submit a report to the secretary of the senate and to the clerk of the house of representatives that assesses the adequacy of the fees under this section and any departmental recommendation to modify those fees.

324.17319 Requirements.

Sec. 17319. A recycler shall comply with all of the following:

(a) Employ industry-accepted procedures substantially equivalent to those specified by the United States department of defense for the destruction or sanitization of data on hard drives and other data storage devices.

(b) Maintain a documented environmental, health, and safety management system that may be audited and is compliant with or equivalent to ISO 14001.

(c) Maintain records identifying all persons to whom the recycler provided electronic devices or materials derived from electronic devices for the purpose of conducting additional recycling and the weight and volume of material provided to each of those persons.

(d) Not use state or federal prison labor to process covered electronic devices or transact with a third party that uses or subcontracts for the use of prison labor.

324.17327 Electronic waste recycling fund; creation; deposit of money or assets; investment; money at close of fiscal year; administrator of fund; expenditures.

Sec. 17327. (1) The electronic waste recycling fund is created within the state treasury.

(2) The state treasurer may receive money or other assets from any source for deposit into the fund. The state treasurer shall direct the investment of the fund. The state treasurer shall credit to the fund interest and earnings from fund investments.

(3) Money in the fund at the close of the fiscal year shall remain in the fund and shall not lapse to the general fund.

(4) The department of environmental quality shall be the administrator of the fund for auditing purposes.

(5) Money from the fund shall be expended, upon appropriation, for the administrative expenses of the department in implementing this part.

History: Add. 2008, Act 394, Imd. Eff. Dec. 29, 2008.

Popular name: Act 451

Popular name: NREPA

324.17329 Violation; penalty; suspension or revocation of registration; deposit of fine in electronic waste recycling fund.

Sec. 17329. (1) A person who violates this part may be ordered to pay a civil fine of not more than $500.00 for the first violation or not more than $2,500.00 for a second or subsequent violation.

(2) A person who knowingly violates this part or who knowingly submits false information to the department under this part is guilty of a misdemeanor punishable by a fine of not more than $5,000.00. Each day on which a violation described in this subsection occurs represents a separate violation.

(3) After a contested case hearing, the department may suspend or revoke the registration of a recycler that violates this part a third or subsequent time. The department shall provide notice of the suspension or revocation on its website.

(4) A civil fine collected under this section shall be deposited in the electronic waste recycling fund created in section 17327.

PART 175
RECYCLING REPORTING

324.17501 Definitions.

Sec. 17501. As used in this part:

(a) "Commercial waste" means all types of solid waste generated by stores, offices, restaurants, warehouses, and other nonmanufacturing activities, but does not include household waste from single residences, hazardous waste, or industrial waste. Commercial waste includes solid waste from any of the following:

(*i*) Multiple residences.

(*ii*) Hotels and motels.

(*iii*) Bunkhouses.

(*iv*) Ranger stations.

(*v*) Campgrounds.

(*vi*) Picnic grounds.

(*vii*) Day-use recreation areas.

(b) "Department" means the department of environmental quality.

(c) "Household waste" means any solid waste that is derived from single residences, but does not include any of the following:

(*i*) Commercial waste.

(*ii*) Industrial waste.

(*iii*) Construction and demolition waste.

(d) "Recyclable materials" means that term as it is defined in section 11505.

(e) "Recycling" means an action or process, such as separation, sorting, baling, or shipping, applied to reportable recyclable materials for the purposes of reuse or conversion into raw materials or new products.

(f) "Recycling establishment" means an establishment engaged in recycling of, or brokering of, reportable recyclable materials. Recycling establishment does not include any of the following:

(*i*) An establishment that recycles fewer than 100 tons per year.

(*ii*) A retail establishment that bales cardboard packaging for off-site shipment.

(*iii*) A retail establishment that collects returnable beverage containers under 1976 IL 1, MCL 445.571 to 445.576, for transfer to a recycling establishment.

(*iv*) An end user of reportable recyclable materials such as a paper mill, steel mill, foundry, or die caster that converts the reportable recyclable materials into new products or raw materials for conversion into new products.

(*v*) A drop-off recycling location that sends all reportable recyclable materials to a recycling establishment registered under section 17502.

(*vi*) An establishment that ships reportable recyclable material to recycling establishments registered under section 17502 but that does not engage in any other recycling.

(g) "Reportable recyclable materials", subject to subdivision (h), means any of the following categories of recyclable materials that are separated from household waste or commercial waste, or from a combination of household waste and commercial waste, and that are delivered to a recycling establishment for recycling:

(*i*) Glass.

(*ii*) Paper and paper products.

(*iii*) Plastic and plastic products.

(*iv*) Ferrous metal, including white goods.

(*v*) Nonferrous metal.

(*vi*) Textiles.

(*vii*) Single stream recyclable materials that include any combination of the materials listed in subparagraphs (*i*) to (*vi*).

(h) "Reportable recyclable materials" does not include any of the following:

(*i*) Materials or products that contain iron, steel, or nonferrous metals and that are directed to or received by a person subject to the scrap metal regulatory act, 2008 PA 429, MCL 445.421 to 445.443, or by a reuser of these metals.

(*ii*) Materials generated from the shredding or dismantling of motor vehicles or parts of motor vehicles.

(*iii*) A beneficial use by-product, as defined in section 11502.

(*iv*) A covered electronic device reported under part 173.

History: Add. 2016, Act 55, Eff. June 27, 2016.

Popular name: Act 451

Popular name: NREPA

324.17502 Recycling establishment; registration; requirements.

Sec. 17502. A recycling establishment shall annually register with the department on a form provided by the department and containing the recycling establishment's name, location, postal mailing address, electronic mail address, and telephone number and the name of the recycling establishment's contact person. The recycling establishment shall register each year by July 1. However, a recycling establishment established after the effective date of this section and after June 1 but not after December 1 shall first register not later than 30 days after it is established.

History: Add. 2016, Act 55, Eff. June 27, 2016.

Popular name: Act 451

Popular name: NREPA

324.17503 Recycling establishment; report.

Sec. 17503. (1) A recycling establishment in this state shall report to the department the amount of each category of reportable recyclable material received by and the amount shipped from the recycling establishment. For each state fiscal year, the recycling establishment shall, at its option, submit either an annual report or 4 quarterly reports. All of the following apply:

(a) If the recycling establishment opts to submit an annual report covering the October 1 to September 30 state fiscal year, the report shall be submitted by the following November 15.

(b) If the recycling establishment opts to submit quarterly reports, the reports shall be submitted by the following dates:

(*i*) For the October 1 to December 31 quarter, by the following February 15.

(*ii*) For the January 1 to March 31 quarter, by the following May 15.

(*iii*) For the April 1 to June 30 quarter, by the following August 15.

(*iv*) For the July 1 to September 30 quarter, by the following November 15.

(c) A report shall specify quantities of reportable recyclable materials in tons. Quantities may be determined using a volume-to-weight conversion formula provided by the department.

(d) A report may provide only aggregate quantities for multiple recycling establishments if the report identifies each recycling establishment covered by the report.

(e) A report shall be submitted in the manner provided by the department.

(f) A report shall comply with any reporting guidelines established by the department to ensure that reportable recyclable materials are not counted more than once.

(g) A report is not required to cover recycling establishment activities occurring before October 1, 2016.

(2) A person that is not a recycling establishment may voluntarily submit reports under this section.

History: Add. 2016, Act 55, Eff. June 27, 2016.

Popular name: Act 451

Popular name: NREPA

324.17504 Information; confidentiality; exemption from disclosure.

Sec. 17504. (1) Except as provided in subsection (2), information contained in a report from a recycling establishment under this part is confidential, shall not be disclosed by the department, and is exempt from disclosure under the freedom of information act, 1976 PA 442, MCL 15.231 to 15.246.

(2) The department may aggregate data contained within reports submitted from recycling establishments under this part for the purpose of determining statewide quantities of reportable recyclable materials that were recycled. Subsection (1) does not apply to this aggregated data but does apply to information identifying a recycling establishment.

History: Add. 2016, Act 55, Eff. June 27, 2016.

Popular name: Act 451

Popular name: NREPA

324.17505 Website; posting; report to legislature.

Sec. 17505. (1) The department shall annually post on its website all of the following:

(a) The aggregated amount of reportable recyclable materials by category listed in section 17501(g) that were recycled during the preceding state fiscal year.

(b) The total aggregated amount of reportable recyclable materials that were recycled during the preceding state fiscal year.

(2) By January 31, 2018 and each year thereafter, the department, after consultation with interested parties, shall submit to the legislature a report on this part, including information posted under subsection (1) and any recommendations for amendments to this part.

History: Add. 2016, Act 55, Eff. June 27, 2016.

Popular name: Act 451

Popular name: NREPA

CHAPTER 6
ENVIRONMENTAL FUNDING

PART 191
CLEAN MICHIGAN FUND

324.19101 Meanings of words and phrases.

Sec. 19101. For purposes of this part, the words and phrases defined in sections 19102 and 19103 have the meanings ascribed to them in those sections.

History: 1994, Act 451, Eff. Mar. 30, 1995.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Waste Management Division to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

Popular name: Act 451

Popular name: NREPA

324.19102 Definitions; A to N.

Sec. 19102. (1) "Approved solid waste management plan" means a solid waste management plan submitted and approved under part 115.

(2) "Capital costs" means those allowable costs, as determined by the department, of constructing or equipping, or both, a solid waste transfer facility, a recycling project, or a composting project.

(3) "Composting project" means a project in which yard wastes, including leaves and grass clippings, are converted into humus through natural biological processes.

(4) "Disposal area" means disposal area as defined in part 115.

(5) "Fund" means the clean Michigan fund created in section 19104.

(6) "Municipality" means a county, city, village, township, or an agency of a county, city, village, or township; an authority or any other public body created by or pursuant to state law; or this state or an agency or department of this state.

(7) "Nonprofit private entity" means a private entity that carries out any lawful purpose or purposes not involving pecuniary profit or gain for its directors, officers, shareholders, or members.

History: 1994, Act 451, Eff. Mar. 30, 1995.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Waste Management Division to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

Popular name: Act 451

Popular name: NREPA

324.19103 Definitions; P to W.

Sec. 19103. (1) "Private entity" means an individual, trust, firm, joint stock company, corporation, or association that is not a local unit of government.

(2) "Recycling project" means a project in which materials that otherwise would become solid waste are collected, separated, or processed and returned for conversion into raw materials or products.

(3) "Resource recovery" means the processing or collecting of solid wastes so as to produce materials or energy that may be used in manufacturing, agriculture, heat production, or other productive processes or purposes designed to reuse materials or products or to conserve natural resources.

(4) "Site separated material" means glass, metals, wood, paper products, plastics, rubber, textiles, or any other material approved by the department that is separated from solid waste for conversion into raw materials or new products.

(5) "Solid waste" means solid waste as defined in part 115.

(6) "Solid waste transfer facility" means a solid waste transfer facility as defined in part 115.

(7) "Source separated material" means glass, metals, wood, paper products, plastics, rubber, textiles, or any other material approved by the department that is separated at the source of generation for conversion into raw material or new products.

(8) "Waste-to-energy" means a process that is specifically designed to recover energy through the combustion or volume reduction of solid waste.

History: 1994, Act 451, Eff. Mar. 30, 1995.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Waste Management Division to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

Popular name: Act 451

Popular name: NREPA

324.19104 Clean Michigan fund; creation; appropriations, gifts, and donations; expenditures.

Sec. 19104. The clean Michigan fund is created in the state treasury. The fund shall consist of appropriations from the general fund or any other fund, as provided by law, and any gifts and donations to the fund. The fund shall be expended only for the programs described in this part and for the staffing and administrative costs to the department of administering those programs.

History: 1994, Act 451, Eff. Mar. 30, 1995.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Waste Management Division to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

Popular name: Act 451

Popular name: NREPA

324.19105 Grants to counties for establishment of revolving loan fund; use of initial grant; percentage of grant utilized for administration of loan program; use of loans; establishment, duties, and membership of county loan board; conditions to making loan; annual audit; liability of county; maximum grant.

Sec. 19105. (1) The department may make a grant to a county having a population of less than 12,000 enabling the county to establish a revolving loan fund with money received from the department. The initial grant shall be used by the county to establish a revolving loan fund that shall be allocated and reallocated as provided in this section. Not more than 1% of a grant made pursuant to this section may be utilized by a county for the administration of the loan program.

(2) Grant money loaned by a county under this section shall be loaned to a private entity or nonprofit private entity only for purposes and programs that would be eligible to receive a grant under this part and may not be used for any other purpose, except administration costs.

(3) A county that receives a grant under this section shall establish a county loan board to review applications for loans submitted to the county and the board shall make recommendations to the county board of commissioners. The county loan board shall consist of a member to represent each of the following:

(a) The county.

(b) Nonprofit private entities and private entities engaged in resource recovery alternatives.

(c) Conservation or environmental organizations.

(d) The department.

(e) A member of the general public.

(4) Upon receipt of the recommendations of the county loan board, the county board of commissioners of a county that receives a grant under this section shall determine when a loan shall be made. The board of commissioners shall not make a loan unless both of the following conditions are met:

(a) The loan applicant is seeking a loan for a purpose or program that would be eligible to receive a grant under this part.

(b) The amount of the proposed loan is not more than $300,000.00.

(5) The county shall provide the department with an annual audit of the revolving loan fund using generally accepted accounting procedures.

(6) A county may be liable to the department for the full amount of a grant made pursuant to this section if at any time the county makes a loan in a manner or to an entity that is substantially out of compliance with this part.

(7) A grant to a county made under this section shall not exceed $300,000.00.

Popular name: Act 451

Popular name: NREPA

324.19106 Waste stream assessments.

Sec. 19106. (1) The department shall cause to be conducted a series of waste stream assessments in representative areas of the state. The assessments shall determine the characteristics of the waste stream and document seasonal fluctuations in the volume of waste.

(2) The department shall select a site for a waste stream assessment subject to the following prerequisites:

(a) The site is located in a county that has an approved solid waste management plan.

(b) The approved solid waste management plan for the county proposes some type of resource recovery.

(c) The site has not been the subject of an adequate waste stream assessment within the 5 years before the assessment authorized by this part is performed.

(3) The department shall consider the following in determining appropriate sites for inclusion in the waste stream assessment:

(a) The extent to which the owners of the disposal areas in the proposed study site will do the following:

(*i*) Provide an area on the site for scales and for composition studies.

(*ii*) Provide temporary shelter for work during inclement weather.

(*iii*) Enlist the cooperation of solid waste haulers.

(b) The likelihood that a resource recovery project or projects will be undertaken at the proposed site.

(c) The likelihood that the data resulting from the assessment of the proposed site will be usable or useful in evaluating the waste stream in other similar areas of the state.

(d) The extent to which selection of the site contributes to the achievement of a balanced distribution of assessments throughout the state.

(e) The availability of a scale at the proposed site.

(4) The department shall not expend more than 5% of the total amount in the fund in any state fiscal year on the assessments described in this section. The department shall not expend more than $50,000.00 for any single assessment conducted under this section.

History: 1994, Act 451, Eff. Mar. 30, 1995.

Popular name: Act 451

Popular name: NREPA

324.19107 Recycling and composting feasibility studies.

Sec. 19107. (1) The department shall cause to be conducted a series of recycling and composting feasibility studies. A study shall establish a basis upon which a decision to commit financial resources to a proposed recycling or composting project can be made. The department shall prescribe the elements to be included within a study.

(2) The department shall select a site for a recycling and composting feasibility study subject to the following prerequisites:

(a) The site is located in a county that has an approved solid waste management plan.

(b) The recycling or composting project proposed by the municipality is consistent with the approved solid waste management plan.

(3) The department shall consider the following factors in selecting a site for a recycling and composting feasibility study:

(a) The extent to which a municipality commits to proceeding with the project if the study determines that the project is feasible.

(b) The degree of demonstrated municipality, community group, or volunteer interest in undertaking a recycling or composting project.

(c) A demonstration that a recycling or composting project undertaken on the basis of the study would provide a necessary solid waste management alternative, given the status of existing disposal areas serving the location.

(d) The extent to which selection of the site contributes to the achievement of a balanced distribution of

studies throughout the state.

(e) The demonstrated capability of the municipality in which the site is located to work with adjacent municipalities on alternative resource recovery projects.

(4) The department shall not expend more than 5% of the total amount in the fund in any state fiscal year on the studies described in this section. The department shall not expend more than $30,000.00 for any single study conducted under this section.

History: 1994, Act 451, Eff. Mar. 30, 1995.

Popular name: Act 451

324.19108 Waste-to-energy feasibility studies.

Sec. 19108. (1) The department shall cause to be conducted a series of waste-to-energy feasibility studies. A study shall establish a basis upon which a decision to commit financial resources to a proposed waste-to-energy project can be made. The department shall prescribe the elements to be included in the study.

(2) The department shall select a site for a waste-to-energy feasibility study subject to the following prerequisites:

(a) The site is located in a county that has an approved solid waste management plan.

(b) The waste-to-energy project proposed is consistent with the approved solid waste management plan.

(3) The department shall consider the following factors in selecting a site for a waste-to-energy feasibility study:

(a) The extent to which the municipality proposing the project has done the following:

(*i*) Held meetings to discuss a waste-to-energy project.

(*ii*) Sought funding for studies of a waste-to-energy project.

(*iii*) Sought feasibility data on its own.

(b) The availability of letters of interest from potential energy markets.

(c) Whether a recycling feasibility study for the area to be served by the proposed waste-to-energy facility is available.

(d) Whether a waste-to-energy facility undertaken on the basis of the study would provide a necessary solid waste management alternative, given the status of existing disposal areas serving the location.

(e) The extent to which selection of the site contributes to the achievement of a balanced distribution of studies throughout the state.

(f) The demonstrated efforts of the municipality in which the site is located in working towards alternative resource recovery solutions to solid waste management problems, such as implementing recycling or composting programs in the area to be served.

(g) The demonstrated capability of the municipality in which the site is located to work with adjacent municipalities on alternative resource recovery projects.

(4) The department shall not expend more than 15% of the total amount in the fund in any state fiscal year for the studies described in this section. The department shall not expend more than $400,000.00 for any single study conducted under this section.

324.19109 Educational program with respect to resource recovery; resource recovery education grant program; authorized grants; factors in selecting recipients; limitations on expenditures.

Sec. 19109. (1) The department shall establish an educational program with respect to resource recovery to accomplish the following:

(a) To promote on a statewide basis the purchase of recycled products and materials.

(b) To develop promotional materials for distribution by municipalities in support of their resource recovery initiatives.

(2) The department shall establish a resource recovery education grant program. The program shall provide funding for the direct promotion of local resource recovery initiatives by municipalities, nonprofit private entities, and private entities. The department shall make the grants described in this subsection.

(3) The department shall not make a resource recovery education grant unless both of the following conditions are met:

(a) The proposed education project is conducted in a county that has an approved solid waste management

plan.

(b) A local resource recovery project is planned or under way and the proposed education project directly promotes the use of that project.

(4) The department shall consider the following factors in selecting recipients of resource recovery education grants:

(a) Whether the education program has measurable objectives.

(b) The extent of background research completed.

(c) The type and extent of follow-up or evaluation, or both, to be conducted.

(d) The level of commitment by local officials.

(e) The extent to which the recipient commits its own financial resources to the education project.

(f) The extent to which selection of the project contributes to the achievement of a balanced distribution of grants throughout the state.

(5) The department shall not expend more than 25% of the total amount in the trust fund in any state fiscal year on the educational program and the education grant program described in this section. The department shall not expend more than $50,000.00 for any single education grant made under this section.

324.19110 Solid waste transfer station grant program.

Sec. 19110. (1) The department shall establish a solid waste transfer station grant program. The program shall provide funding to municipalities, nonprofit private entities, and private entities for the cost of transfer station construction. The department shall make the grants described in this section.

(2) The department shall not make a solid waste transfer station grant unless both of the following conditions are met:

(a) The proposed transfer station is located in a county that has an approved solid waste management plan.

(b) The proposed solid waste transfer station is consistent with the approved solid waste management plans of all of the affected counties.

(3) The department shall consider the following factors in selecting recipients for solid waste transfer station grants:

(a) The potential for providing to the municipality resource recovery alternatives otherwise not available to the municipality without the proposed transfer station.

(b) The willingness of the municipality to form or participate in a joint solid waste management system with adjacent municipalities.

(c) The applicant demonstrates that the proposed transfer station replaces a sanitary landfill or open dump closed according to the standards contained in part 115.

(4) The department shall not dispense a solid waste transfer station grant unless all permits that are required by state law and that are specifically applicable to the nature of the proposed project have been obtained.

(5) The department shall not expend more than 25% of the total amount in the fund in any state fiscal year on the solid waste transfer station grant program. The department shall not expend more than $300,000.00 for any single transfer station grant made under this section.

324.19111 Recycling and composting capital grant program.

Sec. 19111. (1) The department shall establish a recycling and composting capital grant program. The program shall provide funding for the capital costs of recycling and composting programs undertaken by municipalities, nonprofit private entities, or private entities. The department shall make the grants described in this section.

(2) The department shall not make a recycling or composting capital grant unless all of the following conditions are met:

(a) The proposed recycling or composting project is located in a county that has an approved solid waste management plan.

(b) The proposed recycling or composting project is consistent with the approved solid waste management plan.

(c) The applicant provides either a feasibility study with positive results supportive of project initiation or

sufficient data justifying project expansion.

(d) The equipment obtained with the grant is used for source separated materials or site separated materials, or both.

(3) The department shall consider the following factors in selecting recipients for recycling and composting capital grants:

(a) The likelihood of project success as indicated by the feasibility study results.

(b) The availability of an appropriate site.

(c) A demonstration by the applicant that the materials to be collected or processed, or both, are not being recovered presently and would not be recovered without the proposed recycling or composting project.

(d) A demonstration by the applicant that the materials to be collected or processed, or both, will be absorbed in an existing market without displacing existing resource recovery operations or that the materials, by being collected or processed, or both, will create a new market.

(e) The business and accounting plans for the proposed recycling or composting project.

(f) The need for a new or expanded recycling or composting program in the area to be served, relative to the needs of other areas.

(g) The extent to which selection of the recycling or composting program contributes to the achievement of a balanced distribution of grants throughout the state.

(h) A demonstration by the applicant that land, buildings, personnel, support services, or funds have been committed to the recycling or composting project.

(i) The portion of the waste stream that is projected to be diverted from landfills, compared to the projected costs of the recycling or composting project.

(j) The immediacy of the reduction in waste resulting from the recycling or composting program.

(k) The potential of the recycling or composting project to be replicated in similar areas of the state.

(*l*) The availability of capacity at existing licensed landfills that serve the area to be served by the proposed recycling or composting program.

(m) The demonstrated municipality, community group, or volunteer interest in undertaking a recycling or composting project.

(n) The demonstrated capability of the applicant in working with adjacent municipalities on alternative resource recovery projects, such as development of a regional resource recovery organization, jointly sponsored resource recovery initiatives, or regional materials marketing strategies.

(4) The department shall not dispense a recycling or composting capital grant unless all the permits that are required by this part and otherwise required by state law and that are specifically applicable to the nature of the proposed project have been obtained.

(5) The department shall not expend more than 20% of the total amount in the fund in any state fiscal year on the recycling and composting capital grant program. The department shall not expend more than $500,000.00 for any single recycling or composting capital grant made under this section.

324.19112 Waste-to-energy capital grant program.

Sec. 19112. (1) The department shall establish a waste-to-energy capital grant program. The program shall provide funding for the capital costs of waste-to-energy programs undertaken by municipalities, nonprofit private entities, or private entities. The department shall make the grants described in this section.

(2) The department shall not make a waste-to-energy capital grant unless all of the following conditions are met:

(a) The proposed waste-to-energy project is located in a county that has an approved solid waste management plan.

(b) The proposed waste-to-energy project is consistent with the approved solid waste management plan.

(c) The applicant provides either a feasibility study with positive results supportive of project initiation or sufficient data justifying project expansion.

(3) The department shall consider the following factors in selecting recipients for waste-to-energy capital grants:

(a) The likelihood of project success as indicated by the feasibility study results.

(b) The availability of an appropriate site.

(c) A demonstration by the applicant that the materials to be collected or processed, or both, are not being recovered presently.

(d) The business and accounting plans for the proposed waste-to-energy project.

(e) The need for a new or expanded waste-to-energy program in the area to be served, relative to the needs of other areas.

(f) The extent to which selection of the waste-to-energy program contributes to the achievement of a balanced distribution of grants throughout the state.

(g) A demonstration by the applicant that land, buildings, personnel, support services, or funds have been committed to the waste-to-energy project.

(h) The portion of the waste stream that is projected to be diverted from landfills, compared to the projected costs of the waste-to-energy project.

(i) The potential of the waste-to-energy project to be replicated in similar areas of the state.

(4) The department shall not dispense a waste-to-energy capital grant unless all the permits that are required by this part and otherwise required by state law and that are specifically applicable to the nature of the proposed project have been obtained.

(5) The department shall not expend more than 30% of the total amount in the fund in any state fiscal year on the waste-to-energy capital grant program. The department shall not expend more than $2,000,000.00 for any single waste-to-energy grant made under this section.

324.19113 Recycling operational grant program.

Sec. 19113. (1) The department shall establish a recycling operational grant program. The program shall provide temporary operating subsidies to assist municipalities, nonprofit private entities, and private entities in recapturing the difference between the cost of collection, processing, and transportation and the revenues generated from the sale of the recovered materials. The department shall make the grants described in this section.

(2) The department shall not make a recycling operational grant unless all of the following conditions are met:

(a) The proposed recycling project is located in a county with an approved solid waste management plan.

(b) The proposed recycling project is consistent with the approved solid waste management plan.

(c) A positive feasibility study of the proposed recycling project, or sufficient data justifying project expansion, is available.

(d) The applicant agrees to match the grant on a dollar for dollar basis.

(e) The applicant agrees to continue support for the recycling project if the project is within 10% of previous disposal costs.

(f) The applicant agrees to provide the department with an annual operation report.

(g) The need for an operating subsidy is demonstrated.

(h) The grant is used for a project handling source separated material or site separated material, or both.

(3) The department shall consider the following factors in determining whether to make a recycling operational grant:

(a) The portion of the waste stream projected to be diverted from a landfill, compared to projected costs.

(b) A demonstration by the applicant that land, buildings, personnel, support services, or funds have been committed to the recycling project.

(c) The applicant's willingness to show others the program.

(d) The potential of the recycling project to be replicated in similar areas of the state.

(e) The extent to which selection of the project contributes to the achievement of a balanced distribution of grants throughout the state.

(f) The demonstrated municipality, community group, or volunteer interest in undertaking a recycling project.

(g) The demonstrated capability of the applicant in working with adjacent municipalities on alternative resource recovery projects, such as development of a regional resource recovery organization, jointly sponsored resource recovery initiatives, or regional materials marketing strategies.

(h) The availability of capacity at existing licensed landfills that serve the area to be served by the proposed recycling project.

(i) The existence of a plan for transferring financial responsibility for the program to another funding source.

(j) The existence of sources of capital funding for the project.

(4) The department shall not dispense a recycling operational grant unless all the permits that are required by this part and otherwise required by state law and that are specifically applicable to the nature of the

proposed project have been obtained.

(5) The department shall not expend more than 5% of the total amount in the fund in any state fiscal year for the recycling operational grant program. The department shall not expend more than $150,000.00 for any single recycling operational grant made under this section.

History: 1994, Act 451, Eff. Mar. 30, 1995.

324.19114 Composting operational grant program.

Sec. 19114. (1) The department shall establish a composting operational grant program. The program shall provide temporary operating subsidies to assist municipalities, nonprofit private entities, and private entities in undertaking composting projects. The department shall make the grants described in this section.

(2) The department shall not make a composting operational grant unless all of the following conditions are met:

(a) The proposed composting project is located in a county with an approved solid waste management plan.

(b) The proposed composting project is consistent with the approved solid waste management plan.

(c) A positive feasibility study of the proposed composting project, or sufficient data justifying project expansion, is available.

(d) The applicant agrees to match the grant on a dollar for dollar basis.

(e) The applicant agrees to provide the department with an annual operation report.

(3) The department shall consider the following factors in determining whether to make a composting operational grant:

(a) The portion of the waste stream projected to be diverted from a landfill, compared to projected costs.

(b) A demonstration by the applicant that land, buildings, personnel, support services, or funds have been committed to the composting project.

(c) The applicant's willingness to show others the program.

(d) The potential of the composting project to be replicated in similar areas of the state.

(e) The extent to which selection of the project contributes to the achievement of a balanced distribution of grants throughout the state.

(f) The demonstrated municipality, community group, or volunteer interest in undertaking a composting project.

(g) The demonstrated capability in working with adjacent municipalities on alternative resource recovery projects, such as development of a regional resource recovery organization, jointly sponsored resource recovery initiatives, or regional materials marketing strategies.

(h) The availability of capacity at existing licensed landfills that serve the area to be served by the proposed composting project.

(i) A plan for transferring financial responsibility for the program to another funding source has been developed.

(j) The sources of capital funding for the project.

(4) The department shall not dispense a composting operational grant unless all the permits that are required by this part and otherwise required by state law and that are specifically applicable to the nature of the proposed project have been obtained.

(5) The department shall not expend more than 5% of the total amount in the fund in any state fiscal year for the composting operational grant program. The department shall not expend more than $150,000.00 for any single composting operational grant made under this section.

324.19115 Household hazardous waste disposal grant program.

Sec. 19115. (1) The department shall establish a household hazardous waste disposal grant program. The program shall assist municipalities in projects that educate citizens as to methods of household hazardous waste reduction and disposal option, promote the safe handling of household hazardous waste, or dispose of household hazardous waste at a state or federally permitted or licensed hazardous waste treatment, storage, or disposal facility. The department shall make the grants described in this section.

(2) The department shall not make a household hazardous waste disposal grant unless all of the following conditions are met:

(a) The project is not funded under a federal program.

(b) The municipality commits to contributing 20% of the total project cost in cash or in-kind services, or both.

(c) The project is completed within 1 year after receipt of the grant.

(d) The project is consistent with this part and other state law and policy.

(3) The department shall not dispense a household hazardous waste disposal grant unless all the permits that are required by this part and otherwise required by state law and that are specifically applicable to the nature of the proposed project have been obtained.

(4) The department shall not expend more than 2% of the total amount in the fund in any state fiscal year for the household hazardous waste disposal grant program. The department shall not expend more than $15,000.00 for any single household hazardous waste disposal grant made under this section.

324.19116 Statewide market development research study; market development plan; market development grant program; selection of development projects; selecting recipients of market development grants; permits as condition to dispensing market development grant; limitation on expenditures.

Sec. 19116. (1) The department shall cause to be conducted a statewide market development research study to assess the current markets and the potential for and the means for expansion of markets for recycled materials in this state. The department shall not expend more than 2.5% of the total amount in the fund in any state fiscal year for the market development research study. In addition, the department shall establish a market development plan based on the market development research study. The plan shall identify the barriers in attracting or expanding industries that use recycled materials and determine the appropriate methods for eliminating those barriers. The department of commerce shall serve as project coordinator for the market development study funded and administered by the department pursuant to this section.

(2) The department shall establish a market development grant program. The program shall encourage expansion of the use of recycled materials and the development of innovative technologies to use recycled materials. The department shall make a grant under the program described in this section.

(3) The department shall select development projects subject to the following prerequisites:

(a) The project is beyond the research stage and a demonstration has indicated that it is technically feasible.

(b) The recipient of the grant is a municipality, nonprofit private entity, or private entity in this state.

(c) The project shall be performed in this state.

(4) The department shall consider the following factors in selecting recipients of market development grants:

(a) The contribution that would be made by the project toward the goal of increasing the use of recycled materials.

(b) The market's need for the development of the technology or equipment.

(c) The potential impact of the technology or equipment on the cost effectiveness of using recycled materials.

(d) The potential for development of new resource recovery markets and for the generation of positive economic impacts.

(e) The potential of the project for commercial application.

(f) The stage of the development of the technology or equipment proposed to be used in the project.

(g) The environmental, economic, and social benefits to the state of the development of the technology or equipment.

(h) The future sources of capital funding for the project.

(i) The extent to which the applicant has committed land, buildings, personnel, support services, or funds to the project.

(j) The potential of the project for developing multiple markets.

(5) The department shall not dispense a market development grant unless all the permits that are required by this part and otherwise required by state law and that are specifically applicable to the nature of the proposed project have been obtained.

(6) The department shall not expend more than 25% of the total amount in the fund in any state fiscal year for the market development grant program. The department shall not expend more than $500,000.00 for any single grant made under this program.

324.19117 Program to perform hydrogeological monitoring studies on open and closed sanitary landfills and open dumps owned by municipalities.

Sec. 19117. (1) The department shall establish a program to perform hydrogeological monitoring studies on open and closed sanitary landfills and open dumps owned by municipalities. The program shall determine the extent of groundwater contamination associated with the sanitary landfills and open dumps and the need for remedial actions on those sites. The department shall determine which landfills and dumps owned by municipalities are to be monitored. In determining the order in which the landfills and dumps owned by municipalities are to be monitored, the department shall consider the potential threat of human exposure to environmental contamination originating from the sanitary landfill or open dump and the likelihood that hazardous waste was accepted at the landfill or dump.

(2) The department shall not expend more than 10% of the total amount in the fund in any state fiscal year for the program to perform hydrogeological monitoring studies. The department shall not expend more than $50,000.00 for any single hydrogeological monitoring study performed under this section.

324.19118 Sanitary landfill and open dump closure or reclosure matching grant program.

Sec. 19118. (1) The department shall establish a sanitary landfill and open dump closure or reclosure matching grant program. The program shall provide up to 75% of the funding for the closure or reclosure of sanitary landfills and open dumps owned or operated by municipalities. In addition, the program shall provide up to 75% reimbursement for the closure of municipally owned sanitary landfills and open dumps or the reclosure of municipally owned sanitary landfills and open dumps that were closed after January 11, 1979, the effective date of former Act No. 641 of the Public Acts of 1978, according to the standards prescribed by that former act, which is currently part 115, but before December 4, 1986. The department shall make the grants described in this section.

(2) The department shall not make a closure or reclosure grant unless all of the following requirements are met:

(a) The sanitary landfill or open dump proposed for closure or reclosure is located in a county that has an approved solid waste management plan.

(b) The grant is for the closure of an operating sanitary landfill or open dump that is not operated according to the standards contained in part 115 and the rules promulgated under that part or the grant is for the reclosure of a closed sanitary landfill or dump that was not closed according to the standards contained in part 115 and the rules promulgated under that part.

(c) If the grant is reimbursement for the closure or reclosure of a landfill or dump, the closure or reclosure was made according to the standards of part 115 and the rules promulgated under that part.

(d) The grant shall be used only for a closure or reclosure that is a complete closure of an entire landfill or dump.

(e) The closure or reclosure will be accomplished completely within 1 year after receipt of the grant.

(3) The department shall consider the following factors in selecting recipients of closure or reclosure grants:

(a) The degree of effort demonstrated by the municipality in working toward alternative solutions to solid waste management problems.

(b) The degree of the potential threat of groundwater contamination.

(c) The likelihood that hazardous waste was accepted.

(d) The municipality's willingness to work with adjacent municipalities on alternative solutions.

(e) The municipality's commitment to refrain from operating unlicensed disposal areas in the future.

(4) The department shall not expend more than 25% of the total amount in the fund in any state fiscal year for the sanitary landfill and open dump closure or reclosure matching grant program. The department shall not expend more than $600,000.00 for any single grant made under this section.

Popular name: NREPA

324.19120 Administration of studies, assessments, and programs; application for inclusion in study or assessment or for grant; project summary.

Sec. 19120. (1) The department shall administer the studies, assessments, and programs described in this part according to the following:

(a) Within 60 days after enactment of the general appropriations bill for the department of natural resources for a state fiscal year, the department shall issue a request for applications for inclusion in any study or assessment to be conducted that year and for receipt of any grant available during that year.

(b) The department shall not accept any applications after 60 days from the issuance of a request for applications.

(c) Within 135 days after the advisory panel recommendations are made, the department shall complete its review of the application and recommendations and make its determinations.

(2) An application for inclusion in any study or assessment described in this part or for any grant available under this part shall be made on a form prescribed by the department. The department may require the applicant to provide any information reasonably necessary to allow the department to make the determinations required by this part.

(3) Each recipient of a grant and each participant in a study or assessment under this part shall complete and return a project summary on a form developed by the department by a date specified by the advisory panel. A recipient or participant who fails to submit a project summary as required by this section is not eligible to be a recipient or participant under this part for 5 years after the year for which the failure occurs.

(4) The project summary form developed by the department shall not exceed 1 page and shall include the following information:

(a) The name, address, and telephone number of the recipient or participant.

(b) The name of the project.

(c) The amount of money received.

(d) The county in which the project is located.

(e) A brief summary of the activities and accomplishments of the project.

(5) A completed project summary is available to the public under the freedom of information act, Act No. 442 of the Public Acts of 1976, being sections 15.231 to 15.246 of the Michigan Compiled Laws.

324.19121 Reports.

Sec. 19121. (1) Not later than March 31 of each year, the department shall report the following information regarding the projects financed under this part for that fiscal year to the governor, the standing committees of the senate and the house of representatives that primarily consider issues pertaining to the protection of natural resources and the environment, and the subcommittees of the house of representatives and the senate on appropriations for the department:

(a) The name, address, and telephone number of the recipient or participant.

(b) The nature of the project.

(c) The amount of money received.

(d) The county in which the project is located.

(2) Not later than September 30 of each year, the department shall submit to the governor and the legislature a report on the projects financed under this act during the previous fiscal year. The report shall consist of the project summaries described in section 19120, along with an introduction and conclusion.

324.19304 Submission of question to electors.

Sec. 19304. The question of borrowing a sum not to exceed $660,000,000.00 and the issuance of the general obligation bonds of the state for the purposes set forth in this part shall be submitted to a vote of the electors of the state qualified to vote on the question in accordance with section 15 of article IX of the state constitution of 1963, at the general election following September 9, 1988, the effective date of former Act No. 326 of the Public Acts of 1988. The question submitted to the electors shall be substantially as follows:

"Shall the state of Michigan borrow a sum not to exceed $660,000,000.00 and issue general obligation bonds of the state, pledging the full faith and credit of the state for the payment of principal and interest on the bonds, to finance environmental protection programs that would clean up sites of toxic and other environmental contamination and contribute to a regional Great Lakes protection fund, address solid waste problems, treat sewage and other water quality problems, and reuse industrial sites and preserve open space, the method of repayment of the bonds to be from the general fund of this state?

Yes.....

No..... .".

PART 195
ENVIRONMENTAL PROTECTION BOND IMPLEMENTATION

324.19501 Definitions.

Sec. 19501. As used in this part:

(a) "Bonds" means the bonds issued under part 193 or former Act No. 326 of the Public Acts of 1988.

(b) "Fund" means the environmental protection bond fund created in section 19506.

(c) "Local unit of government" means a county, city, village, or township, or an agency of a county, city, village, or township; an authority or any other public body created by or pursuant to state law; or this state or an agency or department of this state.

(d) "Private entity" means an individual, trust, firm, partnership, corporation, or association, whether profit or nonprofit, that is not a local unit of government.

History: Add. 1995, Act 60, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.19502 Legislative finding and declaration.

Sec. 19502. The legislature finds and declares that the environmental protection programs implemented under former Act No. 328 of the Public Acts of 1988 or this part are a public purpose and of paramount public concern in the interest of the health, safety, and general welfare of the citizens of this state.

History: Add. 1995, Act 60, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.19503 Bonds; requirements generally.

Sec. 19503. (1) The bonds issued under former Act No. 326 of the Public Acts of 1988 or part 193 shall be issued in 1 or more series, each series to be in a principal amount, to be dated, to have the maturities which may be either serial, term, or term and serial, to bear interest at a rate or rates, to be subject or not subject to prior redemption, and if subject to prior redemption with or without call premiums, to be payable at a place or places, to have or not have provisions for registration as to principal only or as to both principal and interest, to be in a form and to be executed in a manner as shall be determined by resolution to be adopted by the state administrative board and subject to or granting those covenants, directions, restrictions, or rights specified by resolution to be adopted by the state administrative board as necessary to insure the marketability, insurability, or tax exempt status. The state administrative board shall rotate the services of legal counsel when issuing bonds.

(2) The state administrative board may refund bonds issued under this part by the issuance of new bonds, whether or not the bonds to be refunded have matured or are subject to prior redemption. The state administrative board may issue bonds partly to refund bonds issued under this part and partly for any other purpose provided by this part. The principal amount of any refunding bonds issued pursuant to this section shall not be counted against the limitation on principal amount imposed by the vote of the people on November 8, 1988. Further, refunding bonds issued pursuant to this section shall not be subject to the restrictions of section 19507.

(3) The state administrative board may authorize and approve insurance contracts, agreements for lines of credit, letters of credit, commitments to purchase bonds, and any other transaction to provide security to assure timely payment or purchase of any bond issued under this part.

(4) The state administrative board may authorize the state treasurer, but only within limitations that are contained in the authorizing resolution of the board, to do 1 or more of the following:

(a) Sell and deliver and receive payment for the bonds.

(b) Deliver bonds partly to refund bonds and partly for other authorized purposes.

(c) Select which outstanding bonds will be refunded, if any, by the new issue of bonds.

(d) Buy bonds so issued at not more than their face value.

(e) Approve interest rates or methods for fixing interest rates, prices, discounts, maturities, principal amounts, purchase prices, purchase dates, remarketing dates, denominations, dates of issuance, interest payment dates, redemption rights at the option of the state or the owner, the place and time of delivery and payment, and other matters and procedures necessary to complete the authorized transactions.

(f) Execute, deliver, and pay the cost of remarketing agreements, insurance contracts, agreements for lines of credit, letters of credit, commitments to purchase bonds or notes, and any other transaction to provide security to assure timely payments or purchase of any bond issued under this part.

(5) The bonds shall be approved by the department of treasury before their issuance but are not otherwise subject to the municipal finance act, Act No. 202 of the Public Acts of 1943, being sections 131.1 to 139.3 of the Michigan Compiled Laws.

(6) The bonds or any series of the bonds shall be sold at such price and at a publicly advertised sale or a competitively negotiated sale as determined by the state administrative board. If bonds are issued at a competitively negotiated sale, the state administrative board shall use its best efforts to include firms based in this state in the sale of the bonds.

(7) Except as provided in subsection (8), the bonds shall be sold in accordance with the following schedule, beginning during the first year after December 1, 1988:

(a) Not more than 34% shall be sold during the first year.

(b) Not more than 33% shall be sold during the second year.

(c) Not more than 33% shall be sold during the third year.

(d) After the third year, any remaining bonds may be sold at the discretion of the state administrative board.

(8) The state administrative board may alter the schedule for issuance of the bonds provided in subsection (7) if either or both of the following occur:

(a) Amendments to the internal revenue code of 1986 would impair the tax-exempt status of the bonds.

(b) The legislature concurs in the declaration of a toxic substance emergency made by the governor pursuant to law.

324.19506 Environmental protection bond fund; creation; composition; restricted subaccounts.

Sec. 19506. (1) The environmental protection bond fund is created in the state treasury.

(2) The fund shall consist of all of the following:

(a) The proceeds of sales of general obligation bonds issued pursuant to former Act No. 326 of the Public Acts of 1988 or part 193 and any premium and accrued interest received on the delivery of the bonds.

(b) Any interest or earnings generated by the proceeds described in subdivision (a).

(c) Any repayment of principal and interest made under a loan program authorized in this part.

(d) Any federal funds received.

(3) The department of treasury may establish restricted subaccounts within the fund as necessary to administer the fund.

324.19507 Disposition and allocation of bond proceeds; investment of fund; allocation and disposition of interest and earnings; transfer of repayments of principal and interest; disposition of unencumbered balance.

Sec. 19507. (1) The total proceeds of all bonds issued under former Act No. 326 of the Public Acts of 1988 or part 193 shall be deposited into the fund and allocated as follows:

(a) Except as provided in section 19508(1)(a)(*ii*) and as otherwise provided in this act, not more than $425,000,000.00 shall be used to clean up sites of toxic and other environmental contamination.

(b) Not more than $150,000,000.00 shall be used for solid waste projects including, but not limited to, reducing, recycling, and properly disposing of solid waste. Money that is available under this subdivision but not appropriated and money that is appropriated under this subdivision that reverts to the fund shall be transferred to the cleanup and redevelopment fund created in section 20108.

(c) Not more than $60,000,000.00 shall be used to capitalize the state water pollution control revolving fund established pursuant to section 16a of the shared credit rating act, Act No. 227 of the Public Acts of 1985, being section 141.1066a of the Michigan Compiled Laws.

(d) Not more than $25,000,000.00 shall be used to fund this state's participation in a regional Great Lakes protection fund.

(2) The state treasurer shall direct the investment of the fund. Except as otherwise may be required by the resolution authorizing the issuance of the bonds in order to maintain the exclusion from gross income of the interest paid on the bonds or to comply with state or federal law, interest and earnings from investment of the proceeds of any bond issue shall be transferred to the cleanup and redevelopment fund created in section 20108, except for the fiscal years 1992-93 and 1993-94, when any such interest and earnings accrued in those, or prior fiscal years, shall be deposited in the state water pollution control revolving fund established pursuant to section 16a of Act No. 227 of the Public Acts of 1985.

(3) Except as otherwise may be required by the resolution authorizing the issuance of the bonds in order to maintain the exclusion from gross income of the interest paid on the bonds or to comply with state or federal law, all repayments of principal and interest earned under a loan program created with money under subsection (1)(b) shall be transferred to the cleanup and redevelopment fund created in section 20108.

(4) The unencumbered balance in the fund at the close of the fiscal year shall remain in the fund and shall not revert to the general fund.

History: Add. 1995, Act 60, Imd. Eff. May 24, 1995;—Am. 1996, Act 380, Imd. Eff. July 24, 1996.

Popular name: NREPA

324.19508 Use of money in fund allocated under MCL 324.19507; expenditures; recovery and retention of funds by eligible community; contents and submission of list of projects; appropriations; prioritizing and approving projects; "eligible community" defined.

Sec. 19508. (1) Except as provided in subsection (3), money in the fund that is allocated under section 19507 shall be used for the following purposes:

(a) Money in the fund that is allocated under section 19507(1)(a) shall be used for sites identified through parts 201 and 213, to be expended and recovered by the state in the same manner as provided in that part. Of the funds allocated under section 19507(1)(a), the following apply:

(*i*) Not more than $35,000,000.00 shall be used to clean up sites of environmental contamination that have been identified under former 1982 PA 307, part 201, or part 213; that meet either of the following:

(A) Until the effective date of the 2016 amendatory act that amended this section, will not be funded in the

next fiscal year and have been approved by the department as having measurable economic benefit.

(B) Beginning on the effective date of the 2016 amendatory act that amended this section, for projects meeting the criteria of sections 19608 to 19615.

(*ii*) Not more than $10,000,000.00 may be used to provide grants to eligible communities to investigate and determine whether property within an eligible community is a site of environmental contamination and, if so, to characterize the nature and extent of the contamination. A grant shall be issued under this subparagraph only if all of the following conditions are met:

(A) The characterization of the nature and extent of contamination includes an estimate of response activity costs in relation to the value of the property in an uncontaminated state and identifies future potential limitations on the use of the property based upon current environmental conditions.

(B) The property has demonstrable economic development potential. This provision does not require a specific development proposal to be identified.

(C) The property is located within an eligible community that has received less than $1,000,000.00 in total grants under this subparagraph. However, a grant that has resulted in measurable economic benefits shall not be included in the calculation of the $1,000,000.00.

(b) Money in the fund that is allocated for solid waste projects including, but not limited to, reducing, recycling, and properly disposing of solid waste shall be used to fund state projects, to provide grants and loans to local units of government, and to provide grants and loans to private entities for any of the programs identified in part 191, in the amounts appropriated pursuant to subsection (5). Not less than $17,500,000.00 of the money for solid waste projects shall be used to fund the following:

(*i*) To promote and expand markets for recycled materials.

(*ii*) To assist in the recycling of solid wastes, including, but not limited to, plastics, metals, tires, wood, and paper.

(*iii*) To promote research on resource recovery.

(*iv*) To study marketing options for products that use recycled materials.

(c) Money in the fund that is allocated to capitalize the state water pollution control revolving fund created in section 16a of the shared credit rating act, 1985 PA 227, MCL 141.1066a, shall be used as provided in part 53.

(d) Money in the fund that is allocated to fund this state's participation in a regional Great Lakes protection fund pursuant to part 331.

(2) If, by June 28, 1995, the department determines that money allocated under subsection (1)(a)(*ii*) is unlikely to be expended pursuant to that subparagraph, $5,000,000.00 of the money allocated pursuant to that subparagraph shall be expended pursuant to subsection (1)(a)(*i*).

(3) If money that is expended pursuant to subsection (1)(a)(*ii*) is recovered by an eligible community from a person who may be liable under part 201, through proceeds from the sale of the property, or through any other mechanism, and additional funds for environmental response activities on the property are not necessary, the eligible community may retain those funds for expenditure on projects that the department determines are eligible to receive funding under subsection (1)(a)(*ii*). An accounting of the recovered funds must be provided to the department within 30 days of receipt, and approval and expenditure of the recovered funds shall be in the same manner as funds awarded pursuant to subsection (1)(a)(*ii*). If funds are recovered and not spent on other projects pursuant to this subparagraph within 2 years after they are recovered by the eligible community, the eligible community shall forward the money collected to the state treasurer for deposit into the fund to be used pursuant to subsection (1)(a)(*ii*). When accounting for the use of recovered funds, eligible communities may itemize deductions for site preparation and other costs directly related to the reuse of a site funded under this section.

(4) Money provided in the fund may be used by the department of treasury to pay for the cost of issuing bonds under former 1988 PA 326 or part 193 and by the department to pay department costs as provided in this subsection. Not more than 6% of the total amount specified in section 19507(1)(a), (b), and (d) shall be available for appropriation to the department to pay department costs directly associated with the completion of a project described in section 19507(1)(a), (b), or (d), for which bonds are issued as provided under this part. Any department costs associated with a project described in section 19507(1)(c) for which bonds are issued under this part shall be paid as provided in the state statute implementing the state water pollution control revolving fund. Bond proceeds shall not be available to pay indirect, administrative overhead costs incurred by any organizational unit of the department not directly responsible for the completion of a project. It is the intent of the legislature that general fund appropriations to the department shall not be reduced as a result of department costs funded pursuant to this subsection.

(5) Except as provided in subsection (3), the department shall annually submit a list of all projects that are recommended to be funded under this part to the governor, the standing committees of the house of

representatives and the senate that primarily address issues pertaining to the protection of natural resources and the environment, and the appropriations committees in the house of representatives and the senate. This list shall be submitted to the legislature not later than February 15 of each year. This list shall also be submitted before any request for supplemental appropriation of bond funds. The list shall include the name, address, and telephone number of the eligible recipient or participant; the nature of the eligible project; the county in which the eligible project is located; an estimate of the total cost of the eligible project; and other information considered pertinent by the department.

(6) The legislature shall appropriate prospective or actual bond proceeds for projects proposed to be funded. Appropriations shall be carried over to succeeding fiscal years until the project for which the funds are appropriated is completed. Environmental cleanup projects that are eligible for funding under subsection (1)(a), but not including subsection (1)(a)(*i*) and (*ii*), shall be prioritized and approved pursuant to the procedures outlined in part 201. Projects to which loans are provided from the state water pollution control revolving fund shall be approved pursuant to state law implementing that fund. The capitalization of the regional Great Lakes protection fund shall be a 1-time appropriation.

(7) Not later than December 31 of each year, the department shall submit a list of the projects financed under this part to the governor, the standing committees of the house of representatives and the senate that primarily address issues pertaining to the protection of natural resources and the environment, and the committees of the house of representatives and the senate on appropriations for the department. The list shall include the name, address, and telephone number of the recipient or participant; the nature of the project; the amount of money received; the county in which the project is located; and other information considered pertinent by the department.

(8) As used in this section, "eligible community" means any of the following:

(a) A city, village, or township, or a county on behalf of a city, village, or township, that on May 1, 1993 meets the applicable criteria of a local government unit under section 2(f) of the neighborhood enterprise zone act, 1992 PA 147, MCL 207.772.

(b) A city that meets any of the following descriptions:

(*i*) Has a population of greater than 10,000 and is located within a county that has a population density of less than 39 residents per square mile.

(*ii*) Has a population of greater than 2,500 and is located within a county that has a population density of less than 39 residents per square mile.

(*iii*) Had an average unemployment rate of 11.5% or more during the most recent calendar year for which data is available from the Michigan employment security commission.

324.19509 Grant and loan programs; rules; maximum participation; considerations in making grant or loan; interest; grant projects under MCL 324.19508(1)(a); applicability.

Sec. 19509. (1) The department shall promulgate rules necessary to implement grant and loan programs provided in this part.

(2) The department shall assure maximum participation by local units of government and by private entities by promulgating rules that provide for a grant or loan program, where appropriate. In determining whether a grant or a loan program is appropriate, the department shall consider whether the project is likely to be undertaken without state assistance; the availability of state funds from other sources; the degree of private sector participation in the type of project under consideration; the extent of the need for the project as a demonstration project; and such other factors considered important by the department.

(3) Prior to making a grant or loan authorized by this part, the department shall consider the extent to which the making of the grant or loan contributes to the achievement of a balanced distribution of grants and loans throughout the state.

(4) The department shall provide in rules promulgated under this part that loans that are issued by the department to private entities shall include an interest charge of not less than 5% per year.

(5) Notwithstanding any other provision of this section, for grant projects considered for funding under section 19508(1)(a) on or after the effective date of the 2016 amendatory act that amended this section, subsections (1) to (4) do not apply and the department shall apply the criteria used for projects funded under section 19611.

(6) Neither this section nor section 19510 apply to loans from the state water pollution control revolving fund.

History: Add. 1995, Act 60, Imd. Eff. May 24, 1995;—Am. 2016, Act 474, Eff. Apr. 5, 2017.

324.19510 Application for grant or loan; form; requirements.

Sec. 19510. (1) An application for a grant or a loan authorized under this part shall be made on a form prescribed by the department. The department may require the applicant to provide any information reasonably necessary to allow the department to make a determination required by this part.

(2) Beginning on the effective date of the 2016 amendatory act that amended this section, an application for a grant under section 19508(1)(a) is subject to the same requirements listed in section 19610 for a loan under section 19608(1)(a)(*iv*).

324.19511 Conditions to making grant or loan.

Sec. 19511. The department shall not make a grant or a loan under section 19508(1)(a) or (b) unless all of the following conditions are met:

(a) The applicant demonstrates that the proposed project is in compliance with or will result in compliance with all applicable state laws and rules.

(b) The applicant demonstrates to the department the capability to carry out the proposed project.

(c) The applicant provides the department with evidence that a licensed professional engineer has approved the plans and specifications for the project, if appropriate.

(d) The applicant demonstrates to the department that there is an identifiable source of funds for the future maintenance and operation of the proposed project.

(e) Notwithstanding any other provision of this section, for grant projects approved for funding under section 19508(1)(a) on or after the effective date of the 2016 amendatory act that amended this section, subdivisions (a) to (d) do not apply and the department shall apply the same application requirements provided for a grant or loan in section 19609.

History: Add. 1995, Act 60, Imd. Eff. May 24, 1995;—Am. 2016, Act 472, Eff. Apr. 5, 2017.

324.19512 Recipient of grant or loan; conditions; noncompliance; revocation of grant or withholding payment; recovery of grant by department; withholding grant or loan; grant projects approved under MCL 324.19508(1)(a).

Sec. 19512. (1) A recipient of a grant or a loan made under section 19508(1)(a) or (b) must comply with all of the following:

(a) A recipient shall keep an accounting of the money spent on the project or facility in a generally accepted manner. The accounting is subject to a postaudit.

(b) A recipient shall obtain authorization from the department before implementing a change that significantly alters the proposed project or facility.

(2) The department may revoke a grant or a loan made by it under this part or withhold payment if the recipient fails to comply with the terms and conditions of the grant or loan or with the requirements of this part or the rules promulgated under this part.

(3) The department may recover a grant if the project for which the grant was made never operates.

(4) The department may withhold a grant or a loan until the department determines that the recipient is able to proceed with the proposed project or facility.

(5) To assure timely completion of a project, the department may withhold 10% of the grant or loan amount until the project is complete.

(6) Notwithstanding any other provision of this section, for grant projects approved for funding under section 19508(1)(a) on or after the effective date of the 2016 amendatory act that amended this section, subsections (1) to (5) do not apply and the recipient of any grant or loan must comply with the requirements of section 19612.

PART 196
CLEAN MICHIGAN INITIATIVE IMPLEMENTATION

324.19601 Definitions.

Sec. 19601. As used in this part:

(a) "Baseline environmental assessment" means that term as defined in sections 20101 and 21302.

(b) "Bonds" means the bonds authorized under the clean Michigan initiative act, 1998 PA 284, MCL 324.95101 to 324.95108.

(c) "Brownfield project" or "project" means the entire project to be undertaken, including, but not limited to, the actual site remediation and its resulting economic development.

(d) "Chief executive officer" means the mayor of a city, the village manager of a village, the township supervisor of a township, or the county executive of a county or, if the county does not have an elected county executive, the chairperson of the county board of commissioners.

(e) "Corrective action" means that term as it is defined in section 21302.

(f) "Department" means the department of environmental quality.

(g) "Due care activities" means those activities conducted under sections 20107a and 21304c.

(h) "Eligible activities" for projects with funding allocated under section 19608(1)(a)(*iv*) means:

(*i*) Baseline environmental assessment activities.

(*ii*) Investigations.

(*iii*) Due care activities.

(*iv*) Response activities, including response activities that are more protective of the public health, safety, and welfare and the environment than required by section 20107a or 21304c.

(*v*) Removal and closure of underground storage tanks pursuant to parts 211 and 213.

(*vi*) Dust control related to construction activities.

(*vii*) Industrial cleaning.

(*viii*) Sheeting and shoring necessary for the removal of materials exceeding part 201 cleanup criteria at projects requiring a permit under part 301, 303, or 325.

(*ix*) The following activities, provided that the total cost of these activities does not exceed the total cost of project-related activities identified in subparagraphs (*i*) to (*viii*):

(A) Disposal of solid waste, as defined in part 115, from the eligible property, provided it was not generated or accumulated by the authority or the developer.

(B) Lead, asbestos, or mold abatement, and demolition of structures that are not a response activity.

(C) Removal and disposal of lake or river sediments exceeding part 201 unrestricted criteria from, at, or related to an economic development project if the upland property either is a facility or would become a facility as a result of the deposition of dredged spoils.

(i) "Eligible property" for projects with funding allocated under section 19608(1)(a)(*iv*) means property that is known or suspected to be a facility under part 201 or a site or property under part 213 and that was used or is currently being used for commercial, industrial, public, or residential purposes.

(j) "Facility" means that term as it is defined in part 201.

(k) "Fund" means the clean Michigan initiative bond fund created in section 19606.

(*l*) "Gaming facility" means a gaming facility regulated under the Michigan gaming control and revenue act, 1996 IL 1, MCL 432.201 to 432.226.

(m) "Local unit of government" means a county, city, village, or township, or an agency of a county, city, village, or township; or a brownfield redevelopment authority, economic development corporation, or an authority or other public body created by or pursuant to state law.

(n) "Measurable economic benefit" means the permanent jobs that are created or retained, the capital invested, or the increased tax base to the applicable county, city, village, and township where the project is

located.

(o) "Measurable environmental benefit" means the extent that the requirements of part 201 or part 213, or both, are advanced at a brownfield project where environmental conditions inhibit the site's redevelopment or reuse.

(p) "Part 213 property" means a property as defined in section 21303.

(q) "Response activity" means that term as it is defined in part 201 or corrective action as defined in part 213.

History: Add. 1998, Act 288, Eff. Dec. 1, 1998;—Am. 2016, Act 473, Eff. Apr. 5, 2017.

324.19602 Findings and declaration.

Sec. 19602. The legislature finds and declares that the environmental and natural resources protection programs implemented under this part are a public purpose and of paramount public concern in the interest of the health, safety, and general welfare of the citizens of this state.

History: Add. 1998, Act 288, Eff. Dec. 1, 1998.

Popular name: Act 451

Popular name: NREPA

324.19603 Bonds; issuance; refund; security; authority of state treasurer; bonds not subject to revised municipal finance act; sale; issuance subject to agency financing reporting act; interest rate agreement.

Sec. 19603. (1) The bonds shall be issued in 1 or more series, each series to be in a principal amount, to be dated, to have the maturities that may be either serial, term, or both, to bear interest at a rate or rates, to be subject or not subject to prior redemption, and if subject to prior redemption with or without call premiums, to be payable at a place or places, to have or not have provisions for registration as to principal only or as to both principal and interest, to be in a form and to be executed in a manner as shall be determined by resolution to be adopted by the state administrative board and subject to covenants, directions, restrictions, or rights specified by resolution to be adopted by the state administrative board as necessary to ensure the marketability, insurability, or tax exempt status of the bonds. The state administrative board shall rotate the services of legal counsel when issuing bonds.

(2) The state administrative board may refund bonds issued under this part by the issuance of new bonds, whether or not the bonds to be refunded have matured or are subject to prior redemption. The state administrative board may issue bonds partly to refund bonds issued under this part and partly for any other purpose provided by this part. The principal amount of any refunding bonds issued under this section shall not be counted against the limitation on principal amount provided in the clean Michigan initiative act, 1998 PA 284, MCL 324.95101 to 324.95108. Further, refunding bonds issued under this section are not subject to the restrictions of section 19607.

(3) The state administrative board may approve insurance contracts, agreements for lines of credit, letters of credit, commitments to purchase bonds, and any other transaction to provide security to assure timely payment or purchase of any bond issued under this part.

(4) The state administrative board may authorize the state treasurer, but only within limitations contained in the authorizing resolution of the board, to do 1 or more of the following:

(a) Sell and deliver and receive payment for the bonds.

(b) Deliver bonds partly to refund bonds and partly for other authorized purposes.

(c) Select which outstanding bonds will be refunded, if any, by the new issue of bonds.

(d) Buy issued bonds at not more than their face value.

(e) Approve interest rates or methods for fixing interest rates, prices, discounts, maturities, principal amounts, purchase prices, purchase dates, remarketing dates, denominations, dates of issuance, interest payment dates, redemption rights at the option of the state or the owner, the place and time of delivery and payment, and other matters and procedures necessary to complete the authorized transactions.

(f) Execute, deliver, and pay the cost of remarketing agreements, insurance contracts, agreements for lines of credit, letters of credit, commitments to purchase bonds or notes, and any other transaction to provide security to assure timely payments or purchase of any bond issued under this part.

(5) The bonds are not subject to the revised municipal finance act, 2001 PA 34, MCL 141.2101 to 141.2821.

(6) The bonds or any series of the bonds shall be sold at a price as determined by the state administrative

board.

(7) The bonds shall be sold in accordance with a schedule established by the state administrative board.

(8) The issuance of bonds under this section is subject to the agency financing reporting act.

(9) For the purpose of more effectively managing its debt service, the state administrative board may enter into an interest rate exchange or swap, hedge, or similar agreement with respect to its bonds or notes on the terms and payable from the sources and with the security, if any, as determined by a resolution of the state administrative board.

324.19606 Clean Michigan initiative bond fund; creation; composition; establishment of restricted subaccounts.

Sec. 19606. (1) The clean Michigan initiative bond fund is created in the state treasury.

(2) The fund shall consist of all of the following:

(a) The proceeds of sales of the bonds and any premium and accrued interest received on the delivery of the bonds.

(b) Any interest or earnings generated by the proceeds described in subdivision (a).

(c) Any repayment of principal and interest made under a loan program authorized in this part.

(d) Any federal or other funds received.

(3) The department of treasury may establish restricted subaccounts within the fund as necessary to administer the fund.

History: Add. 1998, Act 288, Eff. Dec. 1, 1998.

Popular name: Act 451

Popular name: NREPA

324.19607 Disposition and allocation of fund; investment; loan repayments; expenditures; unencumbered balance not to revert to general fund; annual accounting.

Sec. 19607. (1) The total proceeds of all bonds shall be deposited into the fund and allocated as follows:

(a) Not more than $335,000,000.00 shall be used for eligible activities at facilities and part 213 properties.

(b) Not more than $50,000,000.00 shall be used for waterfront improvements.

(c) Not more than $25,000,000.00 shall be used for remediation of contaminated lake and river sediments.

(d) Not more than $50,000,000.00 shall be used for nonpoint source pollution prevention and control projects or wellhead protection projects.

(e) Not more than $90,000,000.00 shall be used for water quality monitoring and water resources protection and pollution control activities.

(f) Not more than $20,000,000.00 shall be used for pollution prevention programs.

(g) Except as provided under subsection (1)(a), not more than $5,000,000.00 shall be used to abate lead hazards.

(h) Not more than $50,000,000.00 shall be used for state park infrastructure improvements.

(i) Not more than $50,000,000.00 shall be used for local recreation projects.

(2) The state treasurer shall direct the investment of the fund. Except as may be required to maintain the exclusion from gross income of the interest paid on the bonds or to comply otherwise with state or federal law, interest and earnings from investment of the proceeds of any bond issue shall be allocated in the same proportion as earned on the investment of the proceeds of the bond issue.

(3) Except as may be required to maintain the exclusion from gross income of the interest paid on the bonds or to comply otherwise with state or federal law, all repayments of principal and interest earned under a loan program authorized by this part shall be credited to the appropriate restricted subaccount of the fund and used for the purposes authorized for that subaccount or to pay debt service on any obligation issued which pledges the loan repayments and the proceeds of which are deposited in that subaccount.

(4) The bond proceeds shall be expended in an appropriate manner that maintains the tax exempt status of the bonds.

(5) The unencumbered balance in the fund at the close of the fiscal year shall remain in the fund and shall not revert to the general fund.

(6) The department shall provide an annual accounting of bond proceeds spending on a cash basis to the department of treasury in order for the state to comply with requirements set forth for issuing tax exempt bonds, including arbitrage rebate calculations. This accounting shall be submitted to the governor, the standing committees of the house of representatives and the senate that primarily address issues pertaining to the protection of natural resources and the environment, and the appropriations committees in the house of representatives and the senate.

History: Add. 1998, Act 288, Eff. Dec. 1, 1998;—Am. 2016, Act 473, Eff. Apr. 5, 2017.

324.19608 Use of money allocated under MCL 324.19607; purposes; notice to public advisory council; payment of costs; grant prohibited; submission of annual project list; carrying over appropriations until project completion; submission of list of financed projects.

Sec. 19608. (1) Money in the fund that is allocated under section 19607 shall be used for the following purposes:

(a) Money allocated under section 19607(1)(a) shall be used by the department to fund all of the following:

(*i*) Corrective actions undertaken by the department to address releases from leaking underground storage tanks pursuant to part 213.

(*ii*) Response activities undertaken by the department at facilities pursuant to part 201 to address public health and environmental problems or to promote redevelopment.

(*iii*) Assessment activities undertaken by the department to determine whether a property is a facility.

(*iv*) $75,000,000.00 shall be used to provide grants and loans to local units of government for eligible activities at eligible properties with redevelopment potential. Of the money provided for in this subparagraph, not more than $50,000,000.00 shall be used to provide grants and not more than $25,000,000.00 shall be used to provide loans pursuant to the clean Michigan initiative grant and revolving loan program created in section 19608a. However, grants or loans provided for in this subparagraph shall not be made to a local unit of government that is responsible for causing a release or threat of release under part 201 or part 213 at the site proposed for grant or loan funding, except as provided in section 19608b(f).

(b) Money allocated under section 19607(1)(b) shall be used for waterfront redevelopment grants pursuant to part 795.

(c) Money allocated under section 19607(1)(c) shall be used for response activities for the remediation of contaminated lake and river sediments pursuant to part 201.

(d) Money allocated under section 19607(1)(d) shall be used for nonpoint source pollution prevention and control grants or wellhead protection grants under part 88.

(e) Money allocated under section 19607(1)(e) shall be deposited into the clean water fund created in section 8807.

(f) Money allocated under section 19607(1)(f) shall be expended as follows:

(*i*) $10,000,000.00 shall be deposited into the retired engineers technical assistance program fund created in section 14512.

(*ii*) $5,000,000.00 shall be deposited into the small business pollution prevention assistance revolving loan fund created in section 14513.

(*iii*) $5,000,000.00 shall be used by the department to implement pollution prevention activities other than

those funded under subparagraphs (*i*) and (*ii*).

(g) Money that is allocated under section 19607(1)(g) shall be used by the department of health and human services for remediation and physical improvements to structures to abate or minimize exposure of persons to lead hazards.

(h) Money allocated under section 19607(1)(h) shall be used for infrastructure improvements at Michigan state parks as determined by the department of natural resources. The installation or upgrade of drinking water systems or rest room facilities shall be the first priority.

(i) Money allocated under section 19607(1)(i) shall be used to provide grants to local units of government for local recreation projects under part 716.

(2) Of the money allocated under section 19607(1)(a), $93,000,000.00 shall be used for facilities or part 213 properties that pose an imminent or substantial endangerment to the public health, safety, or welfare, or to the environment. For purposes of this subsection, facilities or part 213 properties that pose an imminent or substantial endangerment include, but are not limited to, those where public access poses hazards because of potential exposure to chemicals or safety risks and where drinking water supplies are threatened by contamination.

(3) Before expending any funds allocated under subsection (1)(c) at an area of concern as designated by the parties to the Great Lakes water quality agreement of 1978 as amended by protocol signed September 7, 2012, the department shall notify the public advisory council established to oversee that area of concern regarding the development, implementation, and evaluation of response activities to be conducted with money in the fund at that area of concern.

(4) Money in the fund may be used by the department of treasury to pay for the cost of issuing bonds and by the department and the department of natural resources to pay department costs as provided in this subsection. Not more than 3% of the total amount specified in section 19607(1)(a) to (f) shall be available for appropriation to the department to pay its costs directly associated with the completion of a project authorized by section 19607(1)(a) to (f). Not more than 3% of the total amount specified in section 19607(1)(h) and (i) shall be available for appropriation to the department of natural resources to pay its costs directly associated with the completion of a project authorized by section 19607(1)(h) and (i). It is the intent of the legislature that general fund appropriations to the department and to the department of natural resources shall not be reduced as a result of costs funded pursuant to this subsection.

(5) A grant shall not be provided under this part for a project that is located at any of the following:

(a) Land sited for use as a gaming facility or as a stadium or arena for use by a professional sports team.

(b) Land or other facilities owned or operated by a gaming facility or by a stadium or arena for use by a professional sports team.

(c) Land within a project area described in a project plan pursuant to the economic development corporations act, 1974 PA 338, MCL 125.1601 to 125.1636, for a gaming facility.

(6) The department, the department of natural resources, and the department of health and human services shall each submit annually a list of all projects that will be undertaken by that department that are recommended to be funded under this part. The list shall be submitted to the governor, the standing committees of the house of representatives and the senate that primarily address issues pertaining to the protection of natural resources and the environment, and the appropriations committees in the house of representatives and the senate. The list shall be submitted to the legislative committees not later than February 15 of each year. This list shall also be submitted before any request for supplemental appropriation of bond funds. For each eligible project, the list shall include the nature of the eligible project; the county in which the eligible project is located; an estimate of the total cost of the eligible project; and other information considered pertinent by the administering state department. A project that is funded by a grant or loan with money from the fund does not need to be included on the list submitted under this subsection. However, money in the fund that is appropriated for grants and loans shall not be encumbered or expended until the administering state department has reported those projects that have been approved for a grant or a loan to the standing committees of the house of representatives and the senate that primarily address issues pertaining to the protection of natural resources and the environment and to the appropriations subcommittees in the house of representatives and the senate on natural resources and environmental quality. The department shall post on its website the criteria it will use in evaluating and recommending projects for funding under this part.

(7) The legislature shall appropriate prospective or actual bond proceeds for projects proposed to be funded. Appropriations shall be carried over to succeeding fiscal years until the project for which the funds are appropriated is completed.

(8) Not later than December 31 of each year, the department, the department of natural resources, and the department of health and human services shall each submit a list of the projects financed under this part by that department to the governor, the standing committees of the house of representatives and the senate that

primarily address issues pertaining to the protection of natural resources and the environment, and the subcommittees of the house of representatives and the senate on appropriations on natural resources and environmental quality. Each list shall include the name, address, and telephone number of the recipient or participant, if appropriate; the name and location of the project; the nature of the project; the amount of money allocated to the project; the county in which the project is located; a brief summary of what has been accomplished by the project; and other information considered pertinent by the administering state department.

324.19608a Clean Michigan initiative grant and revolving loan program.

Sec. 19608a. (1) The department shall create a clean Michigan initiative grant and revolving loan program for the purpose of making grants and loans to local units of government under section 19608(1)(a)(*iv*) for eligible activities at eligible properties with redevelopment potential.

(2) Grants provided under the clean Michigan initiative grant and revolving loan program that are used solely to determine whether a property is a site or a facility and, if so, to characterize the nature and extent of the contamination by means of an assessment or investigation shall be issued only if all of the following conditions are met:

(a) The characterization of the nature and extent of contamination includes an estimate of response activity costs in relation to the value of the property in an uncontaminated state and identifies future potential limitations on the use of the property based upon current environmental conditions.

(b) The property has demonstrable economic development potential. This subdivision does not require a specific development proposal to be identified.

(3) The department shall not make a grant or a loan under the clean Michigan initiative grant and revolving loan program unless all of the following conditions are met:

(a) The applicant demonstrates that the proposed project is in, or will result in, compliance with all applicable state laws and rules.

(b) The applicant demonstrates to the department the capability to carry out the proposed project.

(c) The applicant demonstrates to the department that there is an identifiable source of funds for the future maintenance and operation of the activities funded with money from the fund, if appropriate.

(d) Within the last 24 months, the applicant has successfully undergone an audit conducted in accordance with generally accepted auditing standards or an emergency manager has been appointed for the applicant under the local financial stability and choice act, 2012 PA 436, MCL 141.1541 to 141.1575.

(e) Within the last 24 months, the department has not revoked or terminated a grant to the applicant and the administering state department has not determined that the applicant demonstrated an inability to manage a grant.

History: Add. 2003, Act 253, Imd. Eff. Dec. 29, 2003;—Am. 2016, Act 473, Eff. Apr. 5, 2017.

Popular name: NREPA

324.19608b Grants and loans under MCL 324.19608(1)(a)(iv); conditions.

Sec. 19608b. With respect to the grants and loans under section 19608(1)(a)(*iv*), all of the following conditions apply:

(a) An applicant must be a local unit of government.

(b) A recipient is not eligible to receive more than the following:

(*i*) Except as provided in subparagraphs (*iii*) and (*iv*), 1 grant per year, not to exceed $1,000,000.00 per grant.

(*ii*) Except as provided in subparagraphs (*iii*) and (*iv*), 1 loan per year, not to exceed $1,000,000.00 per loan.

(*iii*) Brownfield projects that have significant economic and environmental benefit may be considered for more than 1 grant or loan over consecutive years, provided that the loan or grant agreement includes project-specific benchmarks for eligible activities and failure to satisfy a benchmark would terminate the project's eligibility for additional grant or loan funding, as applicable.

(*iv*) A local unit of government may be considered for and awarded more than 1 grant or loan in a single year relating to multiple unrelated brownfield projects if the projects are determined to have significant

environmental or economic benefits to the recipient's municipality or region.

(c) Except for a grant described in section 19608a(2), the department may award a grant only if it determines that both of the following apply:

(*i*) The property is an eligible property.

(*ii*) The proposed development of the property is expected to result in measurable economic benefit in excess of the grant amount requested by the applicant.

(d) The department may award a loan only if it determines that both of the following apply:

(*i*) The property is known or suspected to be an eligible property.

(*ii*) The property has economic development potential based on the applicant's planned use of the property.

(e) The department may approve funding for response activities that are more protective of the public health, safety, and welfare and the environment than required by section 20107a or 21304c if those activities provide public health or environmental benefit. In its review of a work plan that includes activities that are more protective of the public health, safety, and welfare and the environment, the department may consider, but is not limited to, all of the following:

(*i*) Proposed new land use and reliability of restrictions to prevent exposure to contamination.

(*ii*) Cost of implementation activities minimally necessary to satisfy due care requirements, the incremental cost of response activities relative to the cost of activities minimally necessary to satisfy due care requirements, and the total cost of all response activities.

(*iii*) Long-term obligations associated with leaving contamination in place and the value of reducing or eliminating these obligations.

(f) A grant or loan shall not be used to fund response activities that benefit a party that is responsible for an activity causing a release at the eligible property, except that a loan may be used to fund appropriate response activities related to redevelopment and due care activities necessary to facilitate redevelopment of the property if the party that is responsible for an activity causing a release at the eligible property meets all of the following:

(*i*) Is a local unit of government.

(*ii*) Has a proposed redevelopment for the property with measurable economic benefit.

(*iii*) Provides a minimum of 50% local matching funds for the project.

(g) A grant or loan may be used to fund due care activities necessary to facilitate redevelopment if the party responsible for an activity causing a release is not the developer of proposed redevelopment.

(h) A loan may be used to fund response activities if both of the following are met:

(*i*) A party responsible for an activity causing a release is neither the seller nor the developer of the property to receive funding.

(*ii*) The recipient can show that response activities are appropriate in relation to the redevelopment.

History: Add. 2016, Act 473, Eff. Apr. 5, 2017.

324.19609 Grant or loan application; form or format; funds under MCL 324.19608(1)(a)(iv).

Sec. 19609. (1) An application for a grant or a loan from the fund shall be made on a form or in a format prescribed by the administering state department. The administering state department may require the applicant to provide any information reasonably necessary to allow the administering state department to make a determination required by this part.

(2) Of the funds to be used to provide grants and loans under section 19608(1)(a)(*iv*), the following apply:

(a) The department shall accept, and consider for approval, applications for grants and loans throughout the year.

(b) The department shall make final application decisions within 90 days after receipt of a complete grant or loan application.

(c) A complete application includes all of the following:

(*i*) A description of the proposed eligible activities and the reasons they should be funded.

(*ii*) An itemized budget for the proposed eligible activities.

(*iii*) A schedule for the completion of the proposed eligible activities.

(*iv*) The location of the property.

(*v*) The current ownership and ownership history of the property.

(*vi*) The relevant history of the use of the property.

(*vii*) The current use of the property.

(*viii*) The existing and proposed future zoning of the property.

(*ix*) If the property is not owned by the applicant, a draft of an enforceable agreement between the property owner and the applicant that commits the property owner to cooperate with the applicant, including a commitment to allow access to the property to complete, at a minimum, the proposed eligible activities.

(*x*) A description of the property's economic redevelopment potential.

(*xi*) For loans, a resolution from the governing body of the applicant committing to repayment of the loan.

(*xii*) A letter from the chief executive officer or highest ranking appointed official indicating that the local unit of government supports the brownfield project and that the brownfield project complies with all local zoning and planning ordinances.

(*xiii*) Any other relevant information the department requires.

History: Add. 1998, Act 288, Eff. Dec. 1, 1998;—Am. 2016, Act 475, Eff. Apr. 5, 2017.

324.19610 Funding provided under MCL 324.19608(1)(a)(iv); application; review; considerations; grants for brownfield projects.

Sec. 19610.

(1) Upon receipt of a grant or loan application, for funding provided under section 19608(1)(a)(*iv*), the department shall review the application based on the following considerations:

(a) Whether the brownfield project proposed to be funded is authorized by this part.

(b) Whether the brownfield project is consistent with the local planning and zoning for the area in which the project is located.

(c) Whether the brownfield project provides measurable environmental benefit.

(d) Whether the brownfield project provides measurable economic benefit or will significantly contribute to the local unit of government's economic and community redevelopment or the revitalization of adjacent neighborhoods.

(e) The viability of the redevelopment plan.

(f) The level of public and private commitment and other resources available for the project.

(g) How the brownfield project relates to a broader economic and community development plan for the local unit of government as a whole.

(h) Other criteria that the department considers relevant.

(2) The department shall issue grants under section 19608(1)(a)(*iv*) for brownfield projects that the department determines meet the requirements of this part and will contribute to the revitalization of underutilized properties.

History: Add. 1998, Act 288, Eff. Dec. 1, 1998;—Am. 2016, Act 475, Eff. Apr. 5, 2017.

Popular name: Act 451

Popular name: NREPA

324.19610a Funding provided under MCL 324.19608(1)(iv); conditions.

Sec. 19610a. For the funds to be used to provide grants and loans under section 19608(1)(a)(*iv*), all of the following apply:

(a) To receive grant or loan funds, approved applicants must enter into a grant or loan agreement with the department. At a minimum, the grant or loan agreement shall contain all of the following:

(*i*) The approved eligible activities to be undertaken with grant or loan funds.

(*ii*) An implementation schedule for the approved eligible activities.

(*iii*) Reporting requirements, including, at a minimum, the following:

(A) The grant or loan recipient shall submit progress status reports to the department during the implementation of the brownfield project that include documentation of project costs and expenditures, at a frequency determined by the department.

(B) The grant or loan recipient shall provide a final report upon completion of the grant- or loan-funded activities within a time frame determined by the department.

(*iv*) If the property is not owned by the grant or loan recipient, an executed agreement that meets the requirements of section 19609(2)(c)(*ix*).

(*v*) When entering into a loan agreement, the loan recipient shall provide financial assurance of repayment of the loan including pledges of revenue sharing, escrow account, letter of credit, or other acceptable mechanism negotiated with the department. Use of real property as a means to secure a loan is not considered an acceptable mechanism. The department is authorized to include in the loan agreement a provision that permits the release of the financial assurance in favor of a pledge of the right of first refusal of the tax increment revenue to the department under the brownfield redevelopment financing act, 1996 PA 381, MCL 125.2651 to 125.2672, if the brownfield project has been substantially completed and the annual tax increment being captured relative to the brownfield project is equal to or greater than 125% of the annual loan

reimbursement payment.

(*vi*) Other provisions as considered appropriate by the department.

(b) All eligible activities must be consistent with an approved grant or loan work plan.

(c) Unless otherwise approved by the director of the department, only activities carried out and costs incurred after execution of a grant or loan agreement are eligible.

(d) Grant funds shall be disbursed on a reimbursement basis upon receipt of appropriate documentation.

(e) Loan funds shall be disbursed in draws based on an approved work plan, and supporting documentation must be submitted after expenses are incurred.

(f) The department shall specify documentation requirements for grants and loans on a form prescribed for requesting reimbursement or draws.

History: Add. 2016, Act 475, Eff. Apr. 5, 2017.

324.19611 Balancing distribution of grants and loans; considerations.

Sec. 19611. (1) Prior to making a grant or loan with money from the fund, the administering state department shall consider the extent to which the making of the grant or loan contributes to the achievement of a balanced distribution of grants and loans throughout the state.

(2) In determining whether a grant or a loan is appropriate under section 19608(1)(a)(*iv*), the department shall consider whether the project is likely to be undertaken without state assistance, the availability of state funds from other sources, the degree of private sector participation in the type of project under consideration, and other factors considered important by the department.

History: Add. 1998, Act 288, Eff. Dec. 1, 1998;—Am. 2016, Act 475, Eff. Apr. 5, 2017.

324.19612 Duties of grant or loan recipient; revoking grant or loan; withholding payment; cancellation of grant or loan offer; termination of grant or loan agreement; renegotiation of outstanding loan terms; disposition of loan payments and interest.

Sec. 19612. (1) A recipient of a grant or a loan made with money from the fund shall do both of the following:

(a) Keep an accounting of the money spent on the project or facility in a generally accepted manner. The accounting is subject to a postaudit.

(b) Obtain authorization from the administering state department before implementing a change that significantly alters the proposed project.

(2) The administering state department may revoke a grant or a loan made with money from the fund or withhold payment if the recipient fails to comply with the terms and conditions of the grant or loan agreement or with the requirements of this part or the rules promulgated under this part, or with other applicable law or rules. If a grant or loan is revoked, the administering state department may recover all funds awarded.

(3) The administering state department may withhold a grant or a loan until the administering state department determines that the recipient is able to proceed with the proposed project.

(4) To assure timely completion of a project, the administering state department may withhold 10% of the grant or loan amount until the project is complete.

(5) If an approved applicant fails to sign a grant or loan agreement within 90 days after receipt of a written grant or loan offer by the administering state department, the administering state department may cancel the grant or loan offer. The applicant may not appeal or contest a cancellation pursuant to this subsection.

(6) The administering state department may terminate a grant or loan agreement and require immediate repayment of the grant or loan if the recipient uses grant or loan funds for any purpose other than for the approved activities specified in the grant or loan agreement. The administering state department shall provide the recipient written notice of the termination 30 days prior to the termination.

(7) A loan made with money in the fund must be made on the following terms:

(a) A loan interest rate of not more than 50% of the prime rate as determined by the administering state department as of the date of approval of the loan.

(b) Loan recipients shall repay loans in equal annual installments of principal and interest beginning not later than 5 years after the first draw of the loan and concluding not later than 15 years after the first draw of the loan.

(c) A loan recipient shall enter into a loan agreement with the administering state department.

(d) Upon default of a loan, as determined by the administering state department, or upon the request of the loan recipient as a method to repay the loan, the department of treasury shall withhold from state payments payable to the loan recipient amounts consistent with the repayment schedule in the loan agreement until the

loan is repaid. The department of treasury shall deposit the withheld or collected money into the fund until the loan is repaid.

(8) Upon request of a loan recipient and a showing of financial hardship related to the project that was financed in whole or in part by the loan, the administering state department may renegotiate the terms of any outstanding loan, including the length of the loan, the interest rate, and the repayment terms. However, the administering state department shall not reduce or eliminate the amount of the outstanding loan principal. The department shall report to the legislature the number of loans refinanced under this subsection, the local unit of government or authority responsible for each loan refinanced, and the change in the terms of the loan, as appropriate. This information may be included in the report prepared by the department under section 16 of the brownfield redevelopment financing act, 1996 PA 381, MCL 125.2666.

(9) Loan payments and interest shall be deposited in the fund.

324.19613 Grants and loans under MCL 324.19608; conditions.

Sec. 19613. Of the funds to be used to provide grants and loans under section 19608(1)(a)(*iv*), all of the following conditions apply:

(a) A recipient of a grant shall receive not more than 1 grant per year not to exceed $1,000,000.00 per grant.

(b) A recipient of a loan shall receive a maximum of 1 loan per year not to exceed $1,000,000.00 per loan.

(c) A grant shall be awarded only if the department determines that both of the following apply:

(*i*) The property is a facility as defined in section 20101.

(*ii*) The proposed development of the property will result in measurable economic benefit in excess of the grant amount requested by the applicant.

(d) A loan shall be awarded only if the department determines that both of the following apply:

(*i*) The property is a facility as defined in section 20101 or is suspected of being a facility.

(*ii*) The property has economic development potential based on the applicant's planned use of the property.

324.19703 Bonds generally.

Sec. 19703. (1) Subject to subsection (2), the bonds shall be issued in 1 or more series, each series to be in a principal amount, to be dated, to have the maturities which may be either serial, term, or both, to bear interest at a rate or rates, to be subject or not subject to prior redemption, and if subject to prior redemption with or without call premiums, to be payable at a place or places, to have or not have provisions for registration as to principal only or as to both principal and interest, to be in a form and to be executed in a manner as shall be determined by resolution to be adopted by the state administrative board and subject to or granting those covenants, directions, restrictions, or rights specified by resolution to be adopted by the state administrative board as necessary to ensure the marketability, insurability, or tax exempt status of the bonds. The state administrative board shall rotate the services of legal counsel when issuing bonds.

(2) The state administrative board may refund bonds issued under this part by the issuance of new bonds, whether or not the bonds to be refunded have matured or are subject to prior redemption. The state administrative board may issue bonds partly to refund bonds issued under this part and partly for any other purpose provided by this part. The principal amount of any refunding bonds issued pursuant to this section shall not be counted against the limitation on principal amount provided in the Great Lakes water quality bond authorization act.

(3) The state administrative board may authorize and approve insurance contracts, agreements for lines of credit, letters of credit, commitments to purchase bonds, and any other transaction to provide security to assure timely payment or purchase of any bond issued under this part. The state administrative board may authorize and approve an interest rate exchange or swap, hedge, or similar agreement in connection with the issuance of bonds under this part, payable from the same source as the bonds.

(4) The state administrative board may authorize the state treasurer, but only within limitations contained in the authorizing resolution of the board, to do 1 or more of the following:

(a) Sell and deliver and receive payment for the bonds.

(b) Deliver bonds partly to refund bonds and partly for other authorized purposes.

(c) Select which outstanding bonds will be refunded, if any, by the new issue of bonds.

(d) Buy issued bonds.

(e) Approve interest rates or methods for determining interest rates, including fixed or variable rates, prices, discounts, maturities, principal amounts, purchase prices, purchase dates, remarketing dates, denominations, dates of issuance, interest payment dates, redemption rights at the option of the state or the owner, the place and time of delivery and payment, and other matters and procedures necessary to complete the authorized transactions.

(f) Execute, deliver, and pay the cost of remarketing agreements, insurance contracts, agreements for lines of credit, letters of credit, commitments to purchase bonds or notes, and any other transaction to provide security to assure timely payments or purchase of any bond issued under this part.

(g) Determine the details of, execute, deliver, and pay the cost of any interest rate exchange or swap, hedge, or similar agreement.

(h) Pledge all or any portion of the strategic water quality initiatives fund created in section 5204 to secure bonds issued or to be issued by the Michigan municipal bond authority created in section 4 of the shared credit rating act, 1985 PA 227, MCL 141.1054, for the purpose of funding loans under the strategic water quality initiatives loan program under part 52.

(5) The bonds shall not be subject to the revised municipal finance act, 2001 PA 34, MCL 141.2101 to 141.2821. Issuance of the bonds shall be subject to the agency financing reporting act, 2002 PA 470, MCL 129.171 to 129.177.

(6) The bonds or any series of the bonds shall be sold at public or private sale at such price or may be issued and deposited directly into the state water pollution control revolving fund created in section 16a of the shared credit rating act, 1985 PA 227, MCL 141.1066a, or the strategic water quality initiatives fund created in section 5204, as determined by or pursuant to a resolution of the state administrative board.

(7) Not more than 20% of the bonds shall be issued in any year. The first bond issuance shall be structured in such a manner that debt payments do not begin before October 1, 2003. In making the determination to issue these bonds, the department shall consider the availability of the workforce to conduct the activities authorized by this part, in order to ensure a competitive bidding process.

324.19703a Issuance of bonds; conditions; report; "fundable range" defined.

Sec. 19703a. (1) Bonds issued under this part are subject to the following:

(a) For the state fiscal year ending on September 30, 2011, bonds must not be issued or expended under this part for the purposes of section 5204b, unless the department of natural resources and environment has established a fundable range of at least $210,000,000.00 for that state fiscal year to fund projects under the state water pollution control revolving fund created in section 16a of the shared credit rating act, 1985 PA 227, MCL 141.1066a.

(b) For the state fiscal year ending on September 30, 2012, bonds must not be issued or expended under this part for the purposes of section 5204b, unless the department of natural resources and environment has established a fundable range of at least $259,000,000.00 for that state fiscal year to fund projects under the state water pollution control revolving fund created in section 16a of the shared credit rating act, 1985 PA 227, MCL 141.1066a, to the extent administratively possible and as long as sufficient applications have been submitted to the department of natural resources and environment.

(c) For each state fiscal year beginning with the state fiscal year ending September 30, 2013, the department of natural resources and environment, in conjunction with the department of treasury, shall seek to fully fund all eligible projects applying for assistance under part 53, to the extent administratively possible, utilizing the bond proceeds under this part as necessary to achieve this goal.

(2) If the department of natural resources and environment is not able to establish a fundable range under

subsection (1)(b) of at least $259,000,000.00, the department of natural resources and environment shall submit to the standing committees of the senate and house of representatives with jurisdiction over issues primarily pertaining to natural resources and the environment a report detailing the reasons why the fundable range was not set at this level.

(3) As used in this section, "fundable range" means that term as it is defined in section 5301.

Compiler's note: Enacting section 2 of Act 397 of 2002 provides:

"Enacting section 2. This amendatory act does not take effect unless the question provided for in the Great Lakes water quality bond authorization act is approved by a majority of the registered electors voting on the question at the November 2002 general election."

Act 396 of 2002, the Great Lakes water quality bond authorization act, which was approved by the Governor on May 29, 2002, and filed with the Secretary of State on May 30, 2002, provided that bonds "shall not be issued under this act unless the question set forth in section 5 [MCL 324.95205] is approved by a majority vote of the registered electors voting on the question." In accordance with Const 1963, art 9, sec 15, the question of borrowing a sum of not to exceed $1,000,000,000.00 and the issuance of general obligation bonds of

the state for the purposes set forth in the act was submitted to, and approved by, the qualified electors of the state as Proposal 02-2 at the November 5, 2002, general election.

Popular name: Act 451

Popular name: NREPA

324.19707 Bond proceeds; disposition; investment; expenditure; tax exempt status; funds remaining at close of fiscal year; annual accounting.

Sec. 19707. (1) The total proceeds of all bonds sold at public or private sale shall be deposited into the fund.

(2) The state treasurer shall direct the investment of the fund.

(3) The bond proceeds shall be expended in an appropriate manner that maintains the tax exempt status of any bonds issued as tax exempt bonds.

(4) The unencumbered balance in the fund at the close of the fiscal year shall remain in the fund and shall not lapse to the general fund.

(5) The department shall provide an annual accounting of bond proceeds spending on a cash basis to the department of treasury. This accounting shall be submitted to the governor, the standing committees of the house of representatives and the senate that primarily address issues pertaining to the protection of natural resources and the environment, and the appropriations committees in the house of representatives and the senate.

History: Add. 2002, Act 397, Eff. Nov. 5, 2002.

Compiler's note: Enacting section 2 of Act 397 of 2002 provides:

"Enacting section 2. This amendatory act does not take effect unless the question provided for in the Great Lakes water quality bond authorization act is approved by a majority of the registered electors voting on the question at the November 2002 general election."

Act 396 of 2002, the Great Lakes water quality bond authorization act, which was approved by the Governor on May 29, 2002, and filed with the Secretary of State on May 30, 2002, provided that bonds "shall not be issued under this act unless the question set forth in section 5 [MCL 324.95205] is approved by a majority vote of the registered electors voting on the question." In accordance with Const 1963, art 9, sec 15, the question of borrowing a sum of not to exceed $1,000,000,000.00 and the issuance of general obligation bonds of the state for the purposes set forth in the act was submitted to, and approved by, the qualified electors of the state as Proposal 02-2 at the November 5, 2002, general election.

Popular name: Act 451

Popular name: NREPA

324.19708 Funds; transfer; use; deposit of certain bonds in determination of allocation and transfer; audit.

Sec. 19708. (1) Subject to subsections (2), (3), and (4), the state treasurer shall transfer money in the fund as follows:

(a) In aggregate, not more than $290,000,000.00 of the money in the fund shall be deposited into the state water pollution control revolving fund created in section 16a of the shared credit rating act, 1985 PA 227, MCL 141.1066a.

(b) In aggregate, not more than $710,000,000.00 of the money in the fund shall be deposited into the strategic water quality initiatives fund created in section 5204.

(2) Money in the fund may be used by the department of treasury to pay for the cost of issuing bonds and the costs incurred under section 19703(3).

(3) Bonds that are directly deposited into the state water pollution control revolving fund or strategic water quality initiatives fund as authorized by section 19703 shall be taken into account for the purpose of determining the allocation and transfer of money set forth in subsection (1).

(4) Not later than December 14, 2012, the auditor general shall conduct an audit of the fund to assure that the money in the fund has been expended in compliance with law. Not later than December 14, 2014, the auditor general shall update its initial audit to assure that money in the fund has been expended in compliance with law.

CHAPTER 7
REMEDIATION

PART 201
ENVIRONMENTAL REMEDIATION

324.20101 Definitions.

Sec. 20101. (1) As used in this part:

(a) "Act of God" means an unanticipated grave natural disaster or other natural phenomenon of an exceptional, inevitable, and irresistible character, the effects of which could not have been prevented or avoided by the exercise of due care or foresight.

(b) "Agricultural property" means real property used for farming in any of its branches, including cultivating of soil; growing and harvesting of any agricultural, horticultural, or floricultural commodity; dairying; raising of livestock, bees, fish, fur-bearing animals, or poultry; turf and tree farming; or performing any practices on a farm as an incident to, or in conjunction with, these farming operations. Agricultural property does not include property used for commercial storage, processing, distribution, marketing, or shipping operations.

(c) "All appropriate inquiry" means an evaluation of environmental conditions at a property at the time of purchase, occupancy, or foreclosure that reasonably defines the existing conditions and circumstances at the property in conformance with 40 CFR 312 (2014).

(d) "Attorney general" means the department of the attorney general.

(e) "Background concentration" means the concentration or level of a hazardous substance that exists in the environment at or regionally proximate to a facility that is not attributable to any release at or regionally proximate to the facility. A person may demonstrate that a hazardous substance is not present at a level that exceeds background concentration by any of the following methods:

(*i*) The hazardous substance complies with the statewide default background levels under table 2 as referenced in R 299.46 of the Michigan Administrative Code.

(*ii*) The hazardous substance is listed in table 2, 3, or 4 of the department's 2005 Michigan background soil survey, is present in a soil type identified in 1 or more of those tables, and meets 1 of the following:

(A) If a glacial lobe area in table 2, 3, or 4 lists an arithmetic or geometric mean for the hazardous substance that is represented by 9 or more samples, the concentration of that hazardous substance is the lesser of the following:

(I) Two standard deviations of that mean for the soil type and glacial lobe area in which the hazardous substance is located.

(II) The uppermost value in the typical range of data for the hazardous substance in table 1 of the department's 2005 Michigan background soil survey.

(B) If a glacial lobe area in table 2, 3, or 4 lists a nonparametric median for the hazardous substance that is represented by 10 or more samples, the concentration of that hazardous substance is the lesser of the following:

(I) The 97.5 quantile for the soil type and glacial lobe area in which the hazardous substance is located.

(II) The uppermost value in the typical range of data for the hazardous substance in table 1 of the department's 2005 Michigan background soil survey.

(C) The concentration of the hazardous substance meets a level established using the 2005 Michigan background soil survey in a manner that is approved by the department.

(*iii*) The hazardous substance is listed in any other study or survey conducted or approved by the department and is within the concentrations or falls within the typical ranges published in that study or survey.

(*iv*) A site-specific demonstration.

(f) "Baseline environmental assessment" means a written document that describes the results of an all appropriate inquiry and the sampling and analysis that confirm that the property is or contains a facility. For purposes of a baseline environmental assessment, the all appropriate inquiry may be conducted or updated prior to or within 45 days after the earlier of the date of purchase, occupancy, or foreclosure.

(g) "Board" means the brownfield redevelopment board created in section 20104a.

(h) "Certificate of completion" means a written response provided by the department confirming that a response activity has been completed in accordance with the applicable requirements of this part and is

approved by the department.

(i) "Cleanup criteria for unrestricted residential use" means any of the following:

(*i*) Cleanup criteria that satisfy the requirements for the residential category in section 20120a(1)(a).

(*ii*) Cleanup criteria for unrestricted residential use under part 213.

(*iii*) Site-specific cleanup criteria approved by the department for unrestricted residential use pursuant to sections 20120a and 20120b.

(j) "Department" means the director or his or her designee to whom the director delegates a power or duty by written instrument.

(k) "Director" means the director of the department of environmental quality.

(*l*) "Directors" means the directors or their designees of the departments of environmental quality, community health, agriculture and rural development, and state police.

(m) "Disposal" means the discharge, deposit, injection, dumping, spilling, leaking, or placing of any hazardous substance into or on any land or water so that the hazardous substance or any constituent of the hazardous substance may enter the environment or be emitted into the air or discharged into any groundwater or surface water.

(n) "Enforcement costs" means court expenses, reasonable attorney fees of the attorney general, and other reasonable expenses of an executive department that are incurred in relation to enforcement under this part.

(o) "Environment" or "natural resources" means land, surface water, groundwater, subsurface strata, air, fish, wildlife, or biota within this state.

(p) "Environmental contamination" means the release of a hazardous substance, or the potential release of a discarded hazardous substance, in a quantity which is or may become injurious to the environment or to the public health, safety, or welfare.

(q) "Evaluation" means those activities including, but not limited to, investigation, studies, sampling, analysis, development of feasibility studies, and administrative efforts that are needed to determine the nature, extent, and impact of a release or threat of release and necessary response activities.

(r) "Exacerbation" means the occurrence of either of the following caused by an activity undertaken by the person who owns or operates the property, with respect to contamination for which the person is not liable:

(*i*) Migration of contamination beyond the boundaries of the property that is the source of the release at levels above cleanup criteria for unrestricted residential use unless a criterion is not relevant because exposure is reliably restricted as otherwise provided in this part.

(*ii*) A change in facility conditions that increases response activity costs.

(s) "Facility" means any area, place, parcel or parcels of property, or portion of a parcel of property where a hazardous substance in excess of the concentrations that satisfy the cleanup criteria for unrestricted residential use has been released, deposited, disposed of, or otherwise comes to be located. Facility does not include any area, place, parcel or parcels of property, or portion of a parcel of property where any of the following conditions are satisfied:

(*i*) Response activities have been completed under this part or the comprehensive environmental response, compensation, and liability act, 42 USC 9601 to 9675, that satisfy the cleanup criteria for unrestricted residential use.

(*ii*) Corrective action has been completed under the resource conservation and recovery act, 42 USC 6901 to 6992k, part 111, or part 213 that satisfies the cleanup criteria for unrestricted residential use.

(*iii*) Site-specific criteria that have been approved by the department for application at the area, place, parcel of property, or portion of a parcel of property are met or satisfied and hazardous substances at the area, place, or property that are not addressed by site-specific criteria satisfy the cleanup criteria for unrestricted residential use.

(*iv*) Hazardous substances in concentrations above unrestricted residential cleanup criteria are present due only to the placement, storage, or use of beneficial use by-products or inert materials at the area, place, or property in compliance with part 115.

(*v*) The property has been lawfully split, subdivided, or divided from a facility and does not contain hazardous substances in excess of concentrations that satisfy the cleanup criteria for unrestricted residential use.

(*vi*) Natural attenuation or other natural processes have reduced concentrations of hazardous substances to levels at or below the cleanup criteria for unrestricted residential use.

(t) "Feasibility study" means a process for developing, evaluating, and selecting appropriate response activities.

(u) "Financial assurance" means a performance bond, escrow, cash, certificate of deposit, irrevocable letter of credit, corporate guarantee, or other equivalent security, or any combination thereof.

(v) "Foreclosure" means possession by a lender of a property on which it has foreclosed on a security

interest or the expiration of a lawful redemption period, whichever occurs first.

(w) "Fund" means the cleanup and redevelopment fund established in section 20108.

(x) "Hazardous substance" means 1 or more of the following, but does not include fruit, vegetable, or field crop residuals or processing by-products, or aquatic plants, that are applied to the land for an agricultural use or for use as an animal feed, if the use is consistent with generally accepted agricultural management practices at the time of the application or stamp sands:

(*i*) Any substance that the department demonstrates, on a case by case basis, poses an unacceptable risk to the public health, safety, or welfare, or the environment, considering the fate of the material, dose-response, toxicity, or adverse impact on natural resources.

(*ii*) Hazardous substance as defined in the comprehensive environmental response, compensation, and liability act, 42 USC 9601 to 9675.

(*iii*) Hazardous waste as defined in part 111.

(*iv*) Petroleum as described as a regulated substance in section 21303.

(y) "Interim response activity" means the cleanup or removal of a released hazardous substance or the taking of other actions, prior to the implementation of a remedial action, as may be necessary to prevent, minimize, or mitigate injury to the public health, safety, or welfare, or to the environment. Interim response activity also includes, but is not limited to, measures to limit access, replacement of water supplies, and temporary relocation of people as determined to be necessary by the department. In addition, interim response activity means the taking of other actions as may be necessary to prevent, minimize, or mitigate a threatened release.

(z) "Lender" means any of the following:

(*i*) A state or nationally chartered bank.

(*ii*) A state or federally chartered savings and loan association or savings bank.

(*iii*) A state or federally chartered credit union.

(*iv*) Any other state or federally chartered lending institution.

(*v*) Any state or federally regulated affiliate or regulated subsidiary of any entity listed in subparagraphs (*i*) to (*iv*).

(*vi*) An insurance company authorized to do business in this state pursuant to the insurance code of 1956, 1956 PA 218, MCL 500.100 to 500.8302.

(*vii*) A motor vehicle sales finance company subject to the motor vehicle sales finance act, 1950 (Ex Sess) PA 27, MCL 492.101 to 492.141, with net assets in excess of $50,000,000.00.

(*viii*) A foreign bank.

(*ix*) A retirement fund regulated pursuant to state law or a pension fund regulated pursuant to federal law with net assets in excess of $50,000,000.00.

(*x*) A state or federal agency authorized by law to hold a security interest in real property or a local unit of government holding a reversionary interest in real property.

(*xi*) A nonprofit tax exempt organization created to promote economic development in which a majority of the organization's assets are held by a local unit of government.

(*xii*) Any other person that loans money for the purchase of or improvement of real property.

(*xiii*) Any person that retains or receives a security interest to service a debt or to secure a performance obligation.

(aa) "Local health department" means that term as defined in section 1105 of the public health code, 1978 PA 368, MCL 333.1105.

(bb) "Local unit of government" means a county, city, township, or village, an agency of a local unit of government, an authority or any other public body or entity created by or pursuant to state law. Local unit of government does not include this state or the federal government or a state or federal agency.

(cc) "Method detection limit" means the minimum concentration of a hazardous substance that can be measured and reported with 99% confidence that the analyte concentration is greater than zero and is determined from analysis of a sample in a given matrix that contains the analyte.

(dd) "Migrating NAPL" means that terms as it is defined in section 21302.

(ee) "Mobile NAPL" means that term as it is defined in section 21302.

(ff) "NAPL" means that term as it is defined in section 21303.

(gg) "No further action letter" means a written response provided by the department under section 20114d confirming that a no further action report has been approved after review by the department.

(hh) "No further action report" means a report under section 20114d detailing the completion of remedial actions and including a postclosure plan and a postclosure agreement, if appropriate.

(ii) "Nonresidential" means that category of land use for parcels of property or portions of parcels of property that is not residential. This category of land use may include, but is not limited to, any of the

following:

(*i*) Industrial, commercial, retail, office, and service uses.

(*ii*) Recreational properties that are not contiguous to residential property.

(*iii*) Hotels, hospitals, and campgrounds.

(*iv*) Natural areas such as woodlands, brushlands, grasslands, and wetlands.

(jj) "Operator" means a person who is in control of or responsible for the operation of a facility. Operator does not include either of the following:

(*i*) A person who holds indicia of ownership primarily to protect the person's security interest in the facility, unless that person participates in the management of the facility as described in section 20101a.

(*ii*) A person who is acting as a fiduciary in compliance with section 20101b.

(kk) "Owner" means a person who owns a facility. Owner does not include either of the following:

(*i*) A person who holds indicia of ownership primarily to protect the person's security interest in the facility, including, but not limited to, a vendor's interest under a recorded land contract, unless that person participates in the management of the facility as described in section 20101a.

(*ii*) A person who is acting as a fiduciary in compliance with section 20101b.

(*ll*) "Panel" means the response activity review panel established under section 20114e.

(mm) "Permitted release" means 1 or more of the following:

(*i*) A release in compliance with an applicable, legally enforceable permit issued under state law.

(*ii*) A lawful and authorized discharge into a permitted waste treatment facility.

(*iii*) A federally permitted release as defined in the comprehensive environmental response, compensation, and liability act, 42 USC 9601 to 9675.

(nn) "Postclosure agreement" means an agreement between the department and a person who has submitted a no further action report that prescribes, as appropriate, activities required to be undertaken upon completion of remedial actions as provided for in section 20114d.

(oo) "Postclosure plan" means a plan for land use or resource use restrictions or permanent markers at a facility upon completion of remedial actions as provided for in section 20114c.

(pp) "Release" includes, but is not limited to, any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing of a hazardous substance into the environment, or the abandonment or discarding of barrels, containers, and other closed receptacles containing a hazardous substance. Release does not include any of the following:

(*i*) A release that results in exposure to persons solely within a workplace, with respect to a claim that these persons may assert against their employers.

(*ii*) Emissions from the engine exhaust of a motor vehicle, rolling stock, aircraft, or vessel.

(*iii*) A release of source, by-product, or special nuclear material from a nuclear incident, as those terms are defined in the atomic energy act of 1954, 42 USC 2011 to 2286i, if the release is subject to requirements with respect to financial protection established by the nuclear regulatory commission under 42 USC 2210, or any release of source by-product or special nuclear material from any processing site designated under 42 USC 7912(a)(1) or 42 USC 7942(a).

(*iv*) If applied according to label directions and according to generally accepted agricultural and management practices at the time of the application, the application of a fertilizer, soil conditioner, agronomically applied manure, or pesticide, or fruit, vegetable, or field crop residuals or processing by-products, aquatic plants, or a combination of these substances. As used in this subparagraph, fertilizer and soil conditioner have the meaning given to these terms in part 85, and pesticide has the meaning given to that term in part 83.

(*v*) Application of fruits, vegetables, field crop processing by-products, or aquatic plants to the land for an agricultural use or for use as an animal feed, if the use is consistent with generally accepted agricultural and management practices at the time of the application.

(*vi*) The relocation of soil under section 20120c.

(*vii*) The placement, storage, or use of beneficial use by-products or inert materials at the site of storage or use if in compliance with part 115.

(qq) "Remedial action" includes, but is not limited to, cleanup, removal, containment, isolation, destruction, or treatment of a hazardous substance released or threatened to be released into the environment, monitoring, maintenance, or the taking of other actions that may be necessary to prevent, minimize, or mitigate injury to the public health, safety, or welfare, or to the environment.

(rr) "Remedial action plan" means a work plan for performing remedial action under this part.

(ss) "Residential" means that category of land use for parcels of property or portions of parcels of property where people live and sleep for significant periods of time such that the frequency of exposure is reasonably expected or foreseeable to meet the exposure assumptions used by the department to develop generic

residential cleanup criteria as set forth in rules promulgated under this part. This category of land use may include, but is not limited to, homes and surrounding yards, condominiums, and apartments.

(tt) "Residential closure" means a property at which the contamination has been addressed in a no further action report that satisfies the limited residential cleanup criteria under section 20120a(1)(c) or the site-specific residential cleanup criteria under sections 20120a(2) and 20120b, that contains land use or resource use restrictions, and that is approved by the department or is considered approved by the department under section 20120d.

(uu) "Residual NAPL saturation" means that term as it is defined in part 213.

(vv) "Response activity" means evaluation, interim response activity, remedial action, demolition, providing an alternative water supply, or the taking of other actions necessary to protect the public health, safety, or welfare, or the environment or the natural resources. Response activity also includes health assessments or health effect studies carried out under the supervision, or with the approval of, the department of community health and enforcement actions related to any response activity.

(ww) "Response activity costs" or "costs of response activity" means all costs incurred in taking or conducting a response activity, including enforcement costs.

(xx) "Response activity plan" means a plan for undertaking response activities. A response activity plan may include 1 or more of the following:

(*i*) A plan to undertake interim response activities.

(*ii*) A plan for evaluation activities.

(*iii*) A feasibility study.

(*iv*) A remedial action plan.

(yy) "Security interest" means any interest, including a reversionary interest, in real property created or established for the purpose of securing a loan or other obligation. Security interests include, but are not limited to, mortgages, deeds of trusts, liens, and title pursuant to lease financing transactions. Security interests may also arise from transactions such as sale and leasebacks, conditional sales, installment sales, trust receipt transactions, certain assignments, factoring agreements, accounts receivable financing arrangements, consignments, or any other transaction in which evidence of title is created if the transaction creates or establishes an interest in real property for the purpose of securing a loan or other obligation.

(zz) "Source" means any storage, handling, distribution, or processing equipment from which the release originates and first enters the environment.

(aaa) "Stamp sands" means finely grained crushed rock resulting from mining, milling, or smelting of copper ore and includes native substances contained within the crushed rock and any ancillary material associated with the crushed rock.

(bbb) "Target detection limit" means the detection limit for a hazardous substance in a given environmental medium that is specified in a rule promulgated by the department. The department shall identify 1 or more analytical methods, when a method is available, that are judged to be capable of achieving the target detection limit for a hazardous substance in a given environmental medium. The target detection limit for a given hazardous substance is greater than or equal to the method detection limit for that hazardous substance. In establishing a target detection limit, the department shall consider the following factors:

(*i*) The low level capabilities of methods published by government agencies.

(*ii*) Reported method detection limits published by state laboratories.

(*iii*) Reported method detection limits published by commercial laboratories.

(*iv*) The need to be able to measure a hazardous substance at concentrations at or below cleanup criteria.

(ccc) "Threatened release" or "threat of release" means any circumstance that may reasonably be anticipated to cause a release.

(ddd) "Venting groundwater" means groundwater that is entering a surface water of this state from a facility.

(2) As used in this part:

(a) The phrase "a person who is liable" includes a person who is described as being subject to liability in section 20126. The phrase "a person who is liable" does not presume that liability has been adjudicated.

(b) The phrase "this part" includes "rules promulgated under this part".

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1995, Act 71, Imd. Eff. June 5, 1995;—Am. 1995, Act 117, Imd. Eff. June 29, 1995;—Am. 1996, Act 115, Imd. Eff. Mar. 6, 1996;—Am. 1996, Act 380, Imd. Eff. July 24, 1996;—Am. 1996, Act 383, Imd. Eff. July 24, 1996;—Am. 2010, Act 229, Imd. Eff. Dec. 14, 2010;—Am. 2012, Act 446, Imd. Eff. Dec. 27, 2012;—Am. 2013, Act 141, Imd. Eff. Popular name: Act 451

Popular name: Environmental Remediation

Popular name: Environmental Response Act

Popular name: NREPA

324.20101a Participation in management of facility by lender; "workout" defined.

Sec. 20101a. (1) For purposes of this part, a lender holding a security interest in a facility participates in the management of the facility if that lender engages in acts of facility management that constitute actual participation in the management or operational affairs of a facility and that exceed the mere capacity to influence, or ability to influence, or the unexercised right to control facility operations. A lender holding a security interest is participating in the management of a facility, while the borrower is still in possession of the facility encumbered by the security interest, if the lender holding a security interest does any of the following:

(a) Exercises decision making control over the borrower's environmental compliance.

(b) Undertakes responsibility for the borrower's hazardous substance handling or disposal practices.

(c) Exercises control at a level comparable to that of a manager of the borrower's enterprise, such that the holder has assumed or manifested responsibility for the overall management of the enterprise encompassing the day-to-day decision making of the enterprise with respect to either or both of the following:

(*i*) Environmental compliance.

(*ii*) All, or substantially all, of the operational aspects of the enterprise other than environmental compliance. As used in this subparagraph, "operational aspects of the enterprise" includes functions such as that of facility or plant manager, operations manager, chief operating officer, or chief executive officer. Operational aspects of the enterprise do not include the financial or administrative aspects of the enterprise such as that of credit manager, accounts payable or receivable manager, personnel manager, controller, chief financial officer, or similar functions.

(2) For purposes of this part, the following do not constitute participation in the management of a facility by a lender holding a security interest in the facility:

(a) The mere capacity to influence, or ability to influence, or the unexercised right to control facility operations.

(b) An act or omission prior to the time that indicia of ownership are held primarily to protect a security interest.

(c) Undertaking or requiring an environmental inspection of the facility in which indicia of ownership are to be held, or requiring a prospective borrower to undertake response activities at a facility or to comply or come into compliance, whether prior or subsequent to the time that indicia of ownership are held primarily to protect a security interest, with any applicable law, rule, or regulation.

(d) Actions that are consistent with holding ownership indicia primarily to protect a security interest. The authority of the lender holding a security interest to take such actions may, but need not, be contained in contractual or other documents specifying requirements for financial, environmental, and other warranties, covenants, conditions, representations, or promises from the borrower. Loan policing and workout activities cover and include all activities up to foreclosure and its equivalents.

(e) Engaging in policing activities prior to foreclosure if the lender holding a security interest does not by such actions participate in the management of the facility as described in subsection (1)(a) to (c). Permissible actions include, but are not limited to, requiring the borrower to undertake response activities at the facility during the term of the security interest; requiring the borrower to comply or come into compliance with applicable federal, state, and local environmental and other laws, rules, and regulations during the term of the security interest; and securing or exercising authority to monitor or inspect the facility in which indicia of ownership are maintained, including on-site inspections, or the borrower's business or financial condition, during the term of the security interest. A lender holding a security interest that engages in workout activities prior to foreclosure and its equivalents will remain within the exemption if the lender holding a security interest does not by such action participate in the management of the facility.

(3) As used in this section, "workout" refers to those actions by which a lender holding a security interest, at any time prior to foreclosure or its equivalent, seeks to prevent, cure, or mitigate a default by the borrower or obligor or to preserve, or prevent the diminution of, the value of the security. Workout activities include, but are not limited to, restructuring or renegotiating the terms of the security interest; requiring payment of additional rent or interest; exercising forbearance; requiring or exercising rights pursuant to an assignment of accounts or other amounts owing to an obligor; requiring or exercising rights pursuant to an escrow agreement pertaining to amounts owing to an obligor; and providing specific or general financial or other advice, suggestions, counseling, or guidance.

324.20101b Liability of lender as fiduciary or representative for disabled person; responsibilities.

Sec. 20101b. (1) A lender or other person that has not participated in the management of a property as described in section 20101a before assuming ownership or control of the property as a fiduciary, as defined by section 1104 of the estates and protected individuals code, 1998 PA 386, MCL 700.1104, or in a representative capacity for a disabled person under a durable power of attorney as described in section 102 of the uniform power of attorney act and that is acting or has acted in a capacity permitted by the estates and protected individuals code, 1998 PA 386, MCL 700.1101 to 700.8206, is not personally liable as an owner or operator of the property under this part. This subsection does not do either of the following:

(a) Relieve the fiduciary from personal liability as the result of the fiduciary's assumption of personal liability, or negligence, gross negligence, or reckless, willful, or intentional misconduct.

(b) Prevent a claim against the assets that are part of or all of the estate or trust that contains the facility; another estate or trust of the decedent, grantor, ward, or other person whose estate or trust contains the facility that is administered by the lender or other person; or another estate or trust of the decedent, grantor, ward, or other person whose estate or trust contains the facility. Such a claim may be asserted against the fiduciary in its representative capacity, whether or not the fiduciary is personally liable.

(2) A lender that has not participated in the management of a property as described in section 20101a before assuming ownership or control of the property in a fiduciary capacity and that, under a fiduciary agreement entered into on or before August 1, 1990, owns or controls the property in a fiduciary capacity authorized by the banking code of 1999, 1999 PA 276, MCL 487.11101 to 487.15105, or the national bank act, chapter 106, 13 Stat. 99, is not personally liable as an owner or operator of the property under this part. This subsection does not do either of the following:

(a) Relieve the fiduciary from personal liability as the result of the fiduciary's assumption of personal liability, negligence, gross negligence, or reckless, willful, or intentional misconduct.

(b) Prevent a claim against the assets that are part of or all of the estate or trust that contains the facility; another estate or trust of the decedent, grantor, ward, or other person whose estate or trust contains the facility that is administered by the lender; or another estate or trust of the decedent, grantor, ward, or other person whose estate or trust contains the facility. Such a claim may be asserted against the fiduciary in its representative capacity, whether or not the fiduciary is personally liable.

(3) A lender that has not participated in the management of a property as described in section 20101a before assuming ownership or control of the property in a fiduciary capacity, that, under a fiduciary agreement entered into after August 1, 1990, owns or controls the property in a fiduciary capacity authorized by the banking code of 1999, 1999 PA 276, MCL 487.11101 to 487.15105, or the national bank act, chapter 106, 13 Stat. 99, that has served only in an administrative, custodial, or financial capacity with respect to the property, and that has not exercised sufficient involvement to control the owner's or operator's handling of a hazardous substance is not personally liable as an owner or operator of the property under this part. This subsection does not do either of the following:

(a) Relieve the fiduciary from personal liability as the result of the fiduciary's assumption of personal liability, negligence, gross negligence, or reckless, willful, or intentional misconduct.

(b) Prevent a claim against the assets that are part of or all of the estate or trust that contains the facility; another estate or trust of the decedent, grantor, ward, or other person whose estate or trust contains the facility that is administered by the lender; or another estate or trust of the decedent, grantor, ward, or other person whose estate or trust contains the facility. Such a claim may be asserted against the fiduciary in its representative capacity, whether or not the fiduciary is personally liable.

324.20102 Legislative finding and declaration.

Sec. 20102. The legislature hereby finds and declares:

(a) That there exist in this state certain facilities containing hazardous substances that pose a danger to the public health, safety, or welfare, or to the environment of this state.

(b) That there is a need to provide for a method of eliminating the danger of environmental contamination caused by the existence of hazardous substances at facilities within the state.

(c) That it is the purpose of this part to provide for appropriate response activity to eliminate unacceptable risks to public health, safety, or welfare, or to the environment from environmental contamination at facilities within the state.

(d) That there is a need for additional administrative and judicial remedies to supplement existing statutory and common law remedies.

(e) That the responsibility for the cost of response activities pertaining to a release or threat of release and repairing injury, destruction, or loss to natural resources caused by a release or threat of release should not be placed upon the public except when funds cannot be collected from, or a response activity cannot be undertaken by, a person liable under this part.

(f) That liability for response activities to address environmental contamination should be imposed upon those persons who are responsible for the environmental contamination.

(g) That to the extent possible, consistent with requirements under this part and rules promulgated under this part, response activities shall be undertaken by persons liable under this part.

(h) That this part is intended to provide remedies for facilities posing any threat to the public health, safety, or welfare, or to the environment, regardless of whether the release or threat of release of a hazardous substance occurred before or after October 13, 1982, the effective date of the former environmental response act, Act No. 307 of the Public Acts of 1982, and for this purpose this part shall be given retroactive application. However, criminal and civil penalties provided in this part shall apply to violations of this part that occur after July 1, 1991.

(i) That a facility that is owned by the federal government, the state, or a local unit of government, or a facility where a release or threat of release is caused by the federal government, the state, or a local unit of government, should not be treated differently in terms of the expenditure of money for response activities than any facility.

(j) That if a person who is liable under section 20126 is the state or a local unit of government, this part should be enforced by the attorney general and the department in the same manner as it would be for any other person who is liable under section 20126.

(k) That this part is not intended to impose penalties or exemplary damages upon parties conducting response activities pursuant to a decree or order to which the United States is a party.

(*l*) That this part is intended to foster the redevelopment and reuse of vacant manufacturing facilities and abandoned industrial sites that have economic development potential, if that redevelopment or reuse assures the protection of the public health, safety, welfare, and the environment.

(m) That it is the intent of the legislature that, in implementing this part, the department shall act reasonably in its exercise of professional judgment.

324.20102a Applicability of provisions in effect on May 1, 1995 to certain actions; incorporation by reference; approval of changes in response activity plan.

Sec. 20102a. (1) Notwithstanding any other provision of this part, the following actions shall be governed by the provisions of this part that were in effect on May 1, 1995:

(a) Any judicial action or claim in bankruptcy that was initiated by any person on or before May 1, 1995

under this part.

(b) An administrative order that was issued on or before May 1, 1995 pursuant to section 20119.

(c) An enforceable agreement with the state entered into on or before May 1, 1995 by any person under this part.

(2) For purposes of this section, the provisions of this part that were in effect on May 1, 1995 are hereby incorporated by reference.

(3) Notwithstanding subsection (1), upon request of a person implementing response activity, the department shall approve changes in a plan for response activity to be consistent with sections 20118 and 20120a.

324.20104 Coordination of activities; rules; guideline, bulletin, interpretive statement, or operational memorandum not binding on person; damages; use of nonuse valuation methods; applicability of provisions to certain bankruptcy actions or claims.

Sec. 20104. (1) The department shall coordinate all activities required under this part and may promulgate rules necessary to implement this part.

(2) A guideline, bulletin, interpretive statement, or operational memorandum under this part shall not be given the force and effect of law. A guideline, bulletin, interpretive statement, or operational memorandum under this part is not legally binding on any person.

(3) Claims for natural resource damages may be pursued only in accordance with principles of scientific and economic validity and reliability. Contingent nonuse valuation methods or similar nonuse valuation methods shall not be utilized and damages shall not be recovered for nonuse values unless and until rules are promulgated that establish an appropriate means of determining such damages.

(4) A contingent nonuse valuation method or similar nonuse valuation method shall not be utilized for natural resource damage calculations unless a determination is made by the department that such a method satisfies principles of scientific and economic validity and reliability and rules for utilizing a contingent nonuse valuation method or a similar nonuse valuation method are subsequently promulgated.

(5) The provisions in this section related to natural resource damages as added by 1995 PA 71 do not apply to any judicial or administrative action or claim in bankruptcy initiated on or before March 1, 1995.

324.20104a Brownfield redevelopment board; creation; membership; quorum; business conducted at public meeting; writings subject to freedom of information act; duties and responsibilities.

Sec. 20104a. (1) The brownfield redevelopment board is created within the department.

(2) The board shall consist of the following members:

(a) The director or his or her designee.

(b) The director of the department of technology, management, and budget or his or her designee.

(c) The chief executive officer of the Michigan economic development corporation or his or her designee.

(3) A majority of the members of the board constitute a quorum for the transaction of business at a meeting of the board.

(4) The business which the board may perform shall be conducted at a public meeting of the board held in compliance with the open meetings act, 1976 PA 267, MCL 15.261 to 15.275.

(5) A writing prepared, owned, used, in the possession of, or retained by the board in the performance of an official function is subject to the freedom of information act, 1976 PA 442, MCL 15.231 to 15.246.

(6) The board shall implement the duties and responsibilities as provided in this part and as otherwise provided by law.

324.20107a Duties of owner or operator having knowledge of facility; hazardous substances; obligations based on current numeric cleanup or site-specific criteria; liability for costs and damages; compliance with section; applicability of subsection (1)(a) to (c) to state or local unit of government; "express public purpose" explained.

Sec. 20107a. (1) A person who owns or operates property that he or she has knowledge is a facility shall do all of the following with respect to hazardous substances at the facility:

(a) Undertake measures as are necessary to prevent exacerbation.

(b) Exercise due care by undertaking response activity necessary to mitigate unacceptable exposure to hazardous substances, mitigate fire and explosion hazards due to hazardous substances, and allow for the intended use of the facility in a manner that protects the public health and safety.

(c) Take reasonable precautions against the reasonably foreseeable acts or omissions of a third party and the consequences that foreseeably could result from those acts or omissions.

(d) Provide reasonable cooperation, assistance, and access to the persons that are authorized to conduct response activities at the facility, including the cooperation and access necessary for the installation, integrity, operation, and maintenance of any complete or partial response activity at the facility. Nothing in this subdivision shall be interpreted to provide any right of access not expressly authorized by law, including access authorized pursuant to a warrant or a court order, or to preclude access allowed pursuant to a voluntary agreement.

(e) Comply with any land use or resource use restrictions established or relied on in connection with the response activities at the facility.

(f) Not impede the effectiveness or integrity of any land use or resource use restriction employed at the facility in connection with response activities.

(2) The owner's or operator's obligations under this section shall be based upon the current numeric cleanup criteria under section 20120a(1) or site-specific criteria approved under section 20120b.

(3) A person who violates subsection (1) who is not otherwise liable under this part for the release at the facility is liable for response activity costs and natural resource damages attributable to any exacerbation and any fines or penalties imposed under this part resulting from the violation of subsection (1) but is not liable for performance of additional response activities unless the person is otherwise liable under this part for performance of additional response activities. The burden of proof in a dispute as to what constitutes exacerbation shall be borne by the party seeking relief.

(4) Compliance with this section does not satisfy a person's obligation to perform response activities as otherwise required under this part.

(5) Subsection (1)(a) to (c) does not apply to the state or to a local unit of government that is not liable under section 20126(1)(c) or (3)(a), (b), (c), or (e) or to the state or a local unit of government that acquired property by purchase, gift, transfer, or condemnation prior to June 5, 1995 or to a person who is exempt from liability under section 20126(4)(c). However, if the state or local unit of government, acting as the operator of a parcel of property that the state or local unit of government has knowledge is a facility, offers access to that parcel on a regular or continuous basis pursuant to an express public purpose and invites the general public to use that property for the express public purpose, the state or local unit of government is subject to this section but only with respect to that portion of the facility that is opened to and used by the general public for that express purpose, and not the entire facility. Express public purpose includes, but is not limited to, activities such as a public park, municipal office building, or municipal public works operation. Express public purpose does not include activities surrounding the acquisition or compilation of parcels for the purpose of future development.

(6) Subsection (1)(a) to (c) does not apply to a person who is exempt from liability under section 20126(3)(c) or (d) except with regard to that person's activities at the facility.

324.20108 Cleanup and redevelopment fund; creation; deposit of assets into fund;

subaccounts; unexpended balance to be carried forward.

Sec. 20108. (1) The cleanup and redevelopment fund is created in the state treasury.

(2) The state treasurer may receive money or other assets from any source for deposit into the fund. The state treasurer shall direct the investment of the fund. The state treasurer shall credit to the fund interest and earnings from fund investments.

(3) In addition to the money received under subsection (2), the fund shall receive as revenue money collected by the attorney general in actions filed under this part, collected by the state under this part, or collected by a person under section 20135(2). Money collected and placed into the fund under this subsection may be earmarked by the department for use at specific sites.

(4) The state treasurer may establish subaccounts within the fund, and shall establish a subaccount for all money in the former environmental response fund on the effective date of the 1996 amendments to this section. Proceeds of all cost recovery actions taken and settlements entered into pursuant to this part, excluding natural resource damages, by the department or the attorney general, or both, shall be credited to this subaccount.

(5) An unexpended balance within the fund at the close of the fiscal year shall be carried forward to the following fiscal year.

Sec. 20108a. (1) The revitalization revolving loan fund is created within the state treasury.

(2) The state treasurer may receive money or other assets from any source for deposit into the revitalization revolving loan fund. The state treasurer shall direct the investment of the revitalization revolving loan fund. The state treasurer shall credit to the revitalization revolving loan fund interest and earnings from revitalization revolving loan fund investments.

(3) An unexpended balance within the revitalization revolving loan fund at the close of the fiscal year shall be carried forward to the following fiscal year.

(4) The department shall annually submit to the governor a request for a lump-sum appropriation from the revitalization revolving loan fund for loans pursuant to the revitalization revolving loan program under section 20108b.

(5) The department shall expend money from the revitalization revolving loan fund, upon appropriation, only for the revitalization loan program created in section 20108b.

324.20108c State site cleanup fund; creation; deposit of assets into fund; investment; interest and earnings; money remaining in fund; lapse; use of money; state sites cleanup program; establishment; purpose; expenditure; list of facilities with state liability; prioritized list; payment for necessary response activities; carrying forward unexpended funds; compliance with MCL 18.1451; report.

Sec. 20108c. (1) The state site cleanup fund is created within the state treasury.

(2) The state treasurer may receive money or other assets from any source for deposit into the state site cleanup fund. The state treasurer shall direct the investment of the state site cleanup fund. The state treasurer shall credit to the state site cleanup fund interest and earnings from fund investments.

(3) Money in the state site cleanup fund at the close of the fiscal year shall remain in the fund and shall not lapse to the general fund.

(4) Money in the state site cleanup fund shall be used for the state sites cleanup program established under this section.

(5) The department shall establish a state sites cleanup program for the purpose of expending money in the state sites cleanup fund, including the $20,000,000.00 appropriated by the legislature for state site cleanup pursuant to Act No. 265 of the Public Acts of 1994.

(6) The department shall expend money appropriated for state site cleanup only for response activities at facilities where the state is liable as an owner or operator under section 20126 or where the state has licensure or decommissioning obligations as an owner or possessor of radioactive materials that are regulated by the nuclear regulatory commission. Money expended for the state sites cleanup program shall not be used to pay fines, penalties, or damages.

(7) Six months after the effective date of this section, and annually thereafter by October 1 of each year, each state executive department and agency shall provide to the department a detailed list of all facilities where the state executive department or agency is liable as an owner or operator under section 20126. Subsequent lists do not need to include facilities identified in a previous list. This list shall include the following information for each facility:

(a) The facility name.

(b) Location.

(c) Use history of the facility.

(d) A detailed summary of available information regarding the source, nature, and extent of the contamination at the facility.

(e) A detailed summary of available information on any public health or environmental impacts at the facility.

(f) A detailed summary of available information on the resale and redevelopment potential of the facility.

(g) A description of and estimated cost of the response activities needed at the facility, if known.

(8) Within 12 months after the effective date of this section and by February 1 of each year thereafter, the board shall develop a prioritized list of the facilities identified pursuant to subsection (3). Sites posing the greatest risk to the public health, safety, welfare, or the environment and those having high resale and redevelopment potential shall be given the highest priority. The list shall include the following information for each facility:

(a) The facility's priority order.

(b) Response activities to be completed at the facility.

(c) Estimated cost of the response activities.

(d) The state executive department or agency that is liable as an owner or operator under section 20126.

(9) All state executive departments and agencies that are liable as an owner or operator under section 20126 are responsible for undertaking and paying for all necessary response activities that cannot be addressed with money appropriated to the department for state site cleanup as described in subsection (1) or any money appropriated to the department specifically for the purpose of response activities at facilities for which the state is liable as an owner or operator. The existence of these funds does not affect the liability of any person under this part or any state or federal law.

(10) The $20,000,000.00 appropriated pursuant to Act No. 265 of the Public Acts of 1994 and to be expended pursuant to this section shall carry over to succeeding fiscal years. The unexpended portion of the appropriation is considered a work project appropriation, and any unencumbered or unallotted funds are carried forward to the succeeding fiscal year. The following is in compliance with section 451(3) of the management and budget act, Act No. 431 of the Public Acts of 1984, being section 18.1451 of the Michigan Compiled Laws:

(a) The purpose of the project to be carried forward is to provide for contaminated site cleanups.

(b) The project will be accomplished by contracts.

(c) The total estimated cost of the project will be $20,000,000.00.

(d) The tentative completion date is September 30, 1999.

(11) The department shall submit an annual report to the governor and the legislature on the status of the response activities being conducted with money appropriated to the department to implement this section and the need for additional funds to conduct future response activities.

324.20112a Inventory of residential closures; creation and update; compilation of data; no further action reports.

Sec. 20112a. (1) Subject to subsection (3), the department shall create, and update on an ongoing basis, an inventory of residential closures and a separate inventory of other known facilities. Each inventory shall contain, if applicable, at least the following information for each facility:

(a) Location.

(b) Whether 1 or more response activity plans were submitted under section 20114b and the status of department approval.

(c) Whether a notice of land use or resource use restrictions under section 20114c was submitted to the department.

(d) Whether a no further action report under section 20114d was submitted to the department and whether the report included a postclosure plan or proposed postclosure agreement and the status of department approval.

(2) The department may categorize facilities on the inventory created under subsection (1) in a manner that the department believes is useful for the general public.

(3) The department shall create and update on an ongoing basis a separate inventory of residential closures.

(4) The department shall post the inventories created under subsections (1) and (2) on the department's

website.

(5) The department shall compile the following data on a quarterly basis and post the data on its website:

(a) The number of response activity plans received by the department and itemized as follows:

(*i*) Approved by the department.

(*ii*) Disapproved by the department.

(*iii*) Recommended for approval by the panel.

(*iv*) Recommended for disapproval by the panel.

(*v*) Approved by operation of law under section 20114b.

(b) The number of no further action reports received by the department and itemized as follows:

(*i*) Approved by the department.

(*ii*) Disapproved by the department.

(*iii*) Recommended for approval by the panel.

(*iv*) Recommended for disapproval by the panel.

(*v*) Approved by operation of law.

(c) The number of baseline environmental assessments received by the department.

(6) The department shall annually determine the percentage of no further action reports approved by operation of law under section 20114d. If the percentage in any year is in excess of 10%, the department shall notify the standing committees of the senate and the house of representatives with jurisdiction over issues related to natural resources and the environment of this occurrence.

324.20113 Appropriation; purposes; request to governor; list of facilities; use of fund; expenditures; limitation; providing list of projects to governor and legislative committees; "urbanized area" defined.

Sec. 20113. (1) Money required to implement the programs described under this part and to pay for response activities recommended under this part shall be appropriated from the fund and any other source the legislature considers necessary to implement the requirements of this part.

(2) The department shall annually submit to the governor a request for appropriation from the fund. The request will include a lump sum amount for the purposes of subsection (3)(e). For the purposes set forth in subsection (3)(a), (b), (c), and (d), the request shall include a list of facilities where the department is proposing to expend funds. The list shall include the following information for each facility: the common name of the facility, the response activities that are planned to be conducted, and the estimated amount of money that is needed to conduct the response activities. The legislature shall approve by law the list of facilities to be addressed and shall provide a lump sum appropriation for these sites based on the total estimated amount needed for the approved facilities.

(3) Money from the fund may be used, upon appropriation, for the following as determined by the department:

(a) Superfund match, which includes funding for any response activity that is required to match federal dollars at a superfund site as required under the comprehensive environmental response, compensation, and liability act, 42 USC 9601 to 9675.

(b) Response activities to address actual or potential public health or environmental problems.

(c) Completion of response activities initiated by the state using environmental protection bond funds or completion of response activities at facilities initiated by a person who was liable under this part prior to 1995 PA 71 but is not liable under section 20126 of this part, where such response activities have ceased.

(d) Response activities at facilities that will facilitate redevelopment.

(e) Emergency response actions for facilities to be determined by the department.

(4) Money in the fund shall be expended first for the purposes described in subsection (3)(a) and (e) and health or environmental problems under subsection (3)(b) that are related to acute health or environmental problems. Following these expenditures, not less than 50% of the remaining money expended under this section shall be expended for response activities that facilitate redevelopment of urbanized areas. All additional expenditures under this section shall be expended following the expenditures described in this subsection. As used in this subsection, "urbanized area" means an urbanized area as determined by the economics and statistics administration, United States bureau of census, according to the 2000 census.

(5) Not later than April 1 of each year, the department shall provide to the governor, the senate and house of representatives standing committees with jurisdiction over issues pertaining to natural resources and the environment, and the senate and house of representatives appropriations committees a list of all projects financed under this part through the preceding fiscal year. The list shall include the project site and location, the nature of the project, the total amount of money authorized, the total amount of money expended, and project status.

324.20114 Owner or operator of facility; duties; response activity without prior approval; easement; applicability of subsections (1) and (3); effect of section on authority of department to conduct response activities or on liability of certain persons; determination of nature and extent of hazardous substance; "available analytical method" defined.

Sec. 20114. (1) Except as provided in subsection (4), an owner or operator of property who has knowledge that the property is a facility shall do all of the following with respect to a release for which the owner or operator is liable under section 20126:

(a) Subject to subsection (6), determine the nature and extent of the release at the facility.

(b) Make the following notifications:

(*i*) If the release is of a reportable quantity of a hazardous substance under 40 CFR 302.4 and 302.6 (July 1, 2012 edition), report the release to the department within 24 hours after obtaining knowledge of the release.

(*ii*) If the owner or operator has reason to believe that 1 or more hazardous substances are emanating from or have emanated from and are present beyond the boundary of his or her property at a concentration in excess of cleanup criteria for unrestricted residential use, notify the department and the owners of property where the hazardous substances are present within 30 days after obtaining knowledge that the release has migrated.

(*iii*) If the release is a result of an activity that is subject to permitting under part 615 and the owner or operator is not the owner of the surface property and the release results in hazardous substance concentrations in excess of cleanup criteria for unrestricted residential use, notify the department and the surface owner within 30 days after obtaining knowledge of the release.

(c) Immediately stop or prevent an ongoing release at the source.

(d) Immediately implement measures to address, remove, or contain hazardous substances that are released after June 5, 1995 if those measures are technically practical, are cost effective, and abate an unacceptable risk to the public health, safety, or welfare or the environment. At a facility where hazardous substances are released after June 5, 1995, and those hazardous substances have not affected groundwater but are likely to, groundwater contamination shall be prevented if it can be prevented by measures that are technically practical, cost effective, and abate an unacceptable risk to the public health, safety, or welfare or the environment.

(e) Immediately identify and eliminate any threat of fire or explosion or any direct contact hazards.

(f) Initiate a remedial action that is necessary and feasible to address unacceptable risks associated with residual NAPL saturation, migrating NAPL, and mobile NAPL using best practices for managing NAPL, including, but not limited to, best practices developed by the American society for testing and materials or the interstate technology and regulatory council.

(g) Diligently pursue response activities necessary to achieve the cleanup criteria established under this part. Except as otherwise provided in this part, in pursuing response activities under this subdivision, the owner or operator may do either of the following:

(*i*) Proceed under section 20114a to conduct self-implemented response activities.

(*ii*) Proceed under section 20114b if the owner or operator wishes to, or is required to, obtain departmental approval of 1 or more aspects of planning response activities.

(h) Upon written request by the department, take 1 or more of the following actions:

(*i*) Provide a response activity plan containing a plan for undertaking interim response activities and undertake interim response activities consistent with that plan.

(*ii*) Provide a response activity plan containing a plan for undertaking evaluation activities and undertake evaluation activities consistent with that plan.

(*iii*) Pursue remedial actions under section 20114a and, upon completion, submit a no further action report under section 20114d.

(*iv*) Take any other response activity determined by the department to be technically sound and necessary to protect the public health, safety, welfare, or the environment.

(*v*) Submit to the department for approval a response activity plan containing a remedial action plan that, when implemented, will achieve the cleanup criteria established under this part.

(*vi*) Implement an approved response activity plan in accordance with a schedule approved by the department pursuant to this part.

(*vii*) Submit a no further action report under section 20114d after completion of remedial action.

(2) Subsection (1) does not preclude a person from simultaneously undertaking 1 or more aspects of planning or implementing response activities at a facility under section 20114a without the prior approval of the department, unless 1 or more response activities are being conducted pursuant to an administrative order or agreement or judicial decree that requires prior department approval, and submitting a response activity plan to the department under section 20114b.

(3) Except as provided in subsection (4), a person who holds an easement interest in a portion of a property who has knowledge that there may be a release within that easement shall report the release to the department within 24 hours after obtaining knowledge of the release. This subsection applies to reportable quantities of hazardous substances established pursuant to 40 CFR 302.4 and 302.6 (July 1, 2012 edition).

(4) The requirements of subsections (1) and (3) do not apply to a permitted release or a release in compliance with applicable federal, state, and local air pollution control laws.

(5) This section does not do either of the following:

(a) Limit the authority of the department to take or conduct response activities pursuant to this part.

(b) Limit the liability of a person who is liable under section 20126.

(6) If a hazardous substance is released at a property and there is no available analytical method or generic cleanup criteria for that hazardous substance, the nature and extent of the hazardous substance may be determined by any of the following means, singly or in combination:

(a) If another hazardous substance with an available analytical method was released at the same location and has similar fate and mobility characteristics, determine the nature and extent of that hazardous substance as a surrogate.

(b) For venting groundwater, use a modeling demonstration, an ecological demonstration, or a combination of both, consistent with section 20120e(9) and (10), to determine whether the hazardous substance has reached surface water.

(c) Develop and propose to the department an analytical method for approval by the department.

(d) In lieu of determining the nature and extent of the hazardous substance release, eliminate the potential for exposure in areas where the hazardous substance is expected to be located through removal, containment, exposure barriers, or land use or resource use restrictions.

(7) As used in this section, "available analytical method" means a method that is approved and published by a governmental agency, is conducted routinely by commercial laboratories in the United States, and identifies and quantitatively measures the specific hazardous substance or class of substances.

324.20114a Undertaking response activities without prior approval of department; exception; completion; submission of no further action report.

Sec. 20114a. (1) Subject to section 20114 and other applicable law, a person may undertake response

activities without prior approval by the department unless 1 or more response activities are being conducted pursuant to an administrative order or agreement or judicial decree that requires prior department approval. Except as otherwise provided in this part, conducting response activities under this section does not relieve any person who is liable under this part from the obligation to conduct further response activities as may be required by the department under this part or other applicable law.

(2) Upon completion of remedial actions that satisfy the cleanup criteria established under this part, a person undertaking remedial actions may submit to the department a no further action report.

History: Add. 1995, Act 71, Imd. Eff. June 5, 1995;—Am. 1996, Act 115, Imd. Eff. Mar. 6, 1996;—Am. 2010, Act 228, Imd. Eff. Dec. 14, 2010.

324.20114b Response activity plan; submission; form; availability; response by department; failure of department to respond within certain time frames; extension; appeal of department's decision.

Sec. 20114b. (1) Subject to section 20114(1)(h), a person undertaking response activity under this part may submit to the department a response activity plan that includes a request for department approval of 1 or more aspects of response activity.

(2) A person who submits a response activity plan under this section and who is not subject to an administrative order or agreement or judicial decree that requires prior department approval of response activity shall submit a response activity plan review request form with the response activity plan. The department shall specify the required content of the response activity request form and make the form available on the department's website.

(3) Upon receipt of a response activity plan submitted for approval under this subsection, the department shall approve, approve with conditions, or deny the response activity plan, or shall notify the submitter that the plan does not contain sufficient information for the department to make a decision. The department shall provide its determination within 150 days after the plan was received by the department unless the plan requires public participation under section 20120d(2). If the plan requires public participation under section 20120d(2), the department shall respond within 180 days. If the department's response is that the plan does not include sufficient information, the department shall identify the information that is required for the department to make a decision. If a plan is approved with conditions, the department's approval shall state with specificity the conditions of the approval. If the plan is denied, the department's denial shall, to the extent practical, state with specificity all of the reasons for denial.

(4) If the department fails to provide a written response within the time frames required by subsection (3), the response activity plan is considered approved. If the department denies a response activity plan under subsection (3), a person may subsequently revise and resubmit the response activity plan for approval.

(5) Any time frame required by this section may be extended by mutual agreement of the department and a person submitting a response activity plan. An agreement extending a time frame shall be in writing.

(6) A person requesting approval of a response activity plan may appeal the department's decision in accordance with section 20114e, if applicable.

324.20114c Remedial actions satisfying or not satisfying cleanup criteria for unrestricted residential use; preparation and implementation of postclosure plan; contents; notice of land use or resource use restrictions to department and zoning authority; liability; obligation to undertake response activities.

Sec. 20114c. (1) If remedial actions at a facility satisfy cleanup criteria for unrestricted residential use, land use or resource use restrictions or monitoring is not required.

(2) Upon completion of remedial actions at a facility for a category of cleanup that does not satisfy cleanup criteria for unrestricted residential use, the person conducting the remedial actions shall prepare and implement a postclosure plan for that facility. A postclosure plan shall include both of the following:

(a) Land use or resource use restrictions as provided in section 20121.

(b) Permanent markers to describe restricted areas of the facility and the nature of any restrictions. A permanent marker is not required under this subdivision if the only applicable land use or resource use restrictions relate to 1 or more of the following:

(*i*) A facility at which remedial action satisfies the cleanup criteria for the nonresidential category under section 20120a(1)(b).

(*ii*) Use of groundwater.

(*iii*) Protection of the integrity of exposure controls that prevent contact with soil, and those controls are composed solely of asphalt, concrete, or landscaping materials. This subparagraph does not apply if the hazardous substances that are addressed by the barrier exceed a cleanup criterion based on acute toxic effects, reactivity, corrosivity, ignitability, explosivity, or flammability.

(*iv*) Construction requirements or limitations for structures that may be built in the future.

(3) A person who implements a postclosure plan shall provide notice of the land use or resource use restrictions to the department and to the zoning authority for the local unit of government in which the facility is located within 30 days after recording the land use or resource use restrictions with the register of deeds.

(4) Implementation of remedial actions does not relieve a person who is liable under section 20126 of that person's responsibility to report and provide for response activity to address a subsequent release or threat of release.

(5) Implementation by any person of remedial actions without department approval does not relieve that person of an obligation to undertake response activities or limit the ability of the department to take action to require response activities necessary to comply with this part by a person who is liable under section 20126.

History: Add. 2010, Act 228, Imd. Eff. Dec. 14, 2010;—Am. 2012, Act 446, Imd. Eff. Dec. 27, 2012;—Am. 2014, Act 542, Imd. Eff. Jan. 15, 2015.

324.20114d No further action report.

Sec. 20114d. (1) A person may submit a no further action report under this subsection for remedial actions addressing contamination for which the person is or is not liable. Remedial actions included in a no further action report may address all or a portion of contamination at a facility as follows:

(a) The remedial actions may address 1 or more releases at a facility.

(b) The remedial actions may address 1 or more hazardous substances at a facility.

(c) The remedial actions may address contamination in 1 or more environmental media at a facility.

(d) The remedial actions may address contamination within the entire facility or only a portion of a facility.

(e) The remedial actions may address contamination at a facility through any combination of subdivisions (a) through (d).

(2) A no further action report submitted under subsection (1) must document the basis for concluding that the remedial actions included in the no further action report are protective of the public health, safety, and welfare, and the environment with respect to the environmental contamination addressed by the remedial actions. A no further action report may include a request that, upon approval, the release or conditions addressed by the no further action report be designated as a residential closure. A no further action report shall be submitted with a form developed by the department. The department shall make this form available on its website.

(3) A no further action report submitted under subsection (1) shall be submitted with the following, as applicable:

(a) If the remedial action at the facility satisfies the cleanup criteria for unrestricted residential use for the hazardous substances and portion of the facility addressed in the no further action report, neither a postclosure plan or a proposed postclosure agreement is required to be submitted.

(b) If the remedial action requires only land use or resource use restrictions and financial assurance is not required or the financial assurance is de minimis, a postclosure plan is required but a proposed postclosure agreement is not required to be submitted.

(c) For circumstances other than those described in subdivision (a) or (b), a postclosure plan and a proposed postclosure agreement are required to be submitted.

(4) A proposed postclosure agreement that is submitted as part of a no further action report must include all of the following:

(a) Provisions for monitoring, operation and maintenance, and oversight necessary to assure the effectiveness and integrity of the remedial action.

(b) Financial assurance to pay for monitoring, operation and maintenance, oversight, and other costs determined by the department to be necessary to assure the effectiveness and integrity of the remedial action.

(c) A provision requiring notice to the department of the owner's intent to convey any interest in the facility 14 days prior to consummating the conveyance. A conveyance of title, an easement, or other interest in the property shall not be consummated by the property owner without adequate and complete provision for compliance with the terms and conditions of the postclosure plan and the postclosure agreement.

(d) A provision granting the department the right to enter the property at reasonable times for the purpose of determining and monitoring compliance with the postclosure plan and postclosure agreement, including the right to take samples, inspect the operation of the remedial action measures, and inspect records.

(5) A postclosure agreement may waive the requirement for permanent markers.

(6) The person submitting a no further action report shall include a signed affidavit attesting to the fact that the information upon which the no further action report is based is complete and true to the best of that person's knowledge. The no further action report must also include a signed affidavit from an environmental consultant who meets the professional qualifications described in section 20114e(2) and who prepared the no further action report, attesting to the fact that the remedial actions detailed in the no further action report comply with all applicable requirements and that the information upon which the no further action report is based is complete and true to the best of that person's knowledge. In addition, the environmental consultant shall attach a certificate of insurance demonstrating that the environmental consultant has obtained at least all of the following from a carrier that is authorized to conduct business in this state:

(a) Statutory worker compensation insurance as required in this state.

(b) Professional liability errors and omissions insurance. This policy must not exclude bodily injury, property damage, or claims arising out of pollution for environmental work and must be issued with a limit of not less than $1,000,000.00 per claim.

(c) Contractor pollution liability insurance with limits of not less than $1,000,000.00 per claim, if not included under the professional liability errors and omissions insurance required under subdivision (b). The insurance requirement under this subdivision is not required for environmental consultants who do not perform contracting functions.

(d) Commercial general liability insurance with limits of not less than $1,000,000.00 per claim and $2,000,000.00 aggregate.

(e) Automobile liability insurance with limits of not less than $1,000,000.00 per claim.

(7) A person submitting a no further action report shall maintain all documents and data prepared, acquired, or relied upon in connection with the no further action report for not less than 10 years after the later of the date on which the department approves the no further action report under this section, or the date on which no further monitoring, operation, or maintenance is required to be undertaken as part of the remedial action covered by the report. All documents and data required to be maintained under this section shall be made available to the department upon request.

(8) Upon receipt of a no further action report submitted under this subsection, the department shall approve or deny the no further action report or shall notify the submitter that the report does not contain sufficient information for the department to make a decision. If the no further action report requires a postclosure agreement, the department may negotiate alternative terms than those included within the proposed postclosure agreement. The department shall provide its determination within 150 days after the report was received by the department under this subsection unless the report requires public participation under section 20120d(2). If the report requires public participation under section 20120d(2), the department shall respond within 180 days. If the department's response is that the report does not include sufficient information, the department shall identify the information that is required for the department to make a decision. If the report is denied, the department's denial must, to the extent practical, state with specificity all of the reasons for denial. If the no further action report, including any required postclosure plan and postclosure agreement, is approved, the department shall provide the person submitting the no further action report with a no further action letter. The department shall review and provide a written response within the time frames required by this subsection for at least 90% of the no further action reports submitted to the department under this section in each calendar year.

(9) If the department fails to provide a written response within the time frames required by subsection (8), the no further action report is considered approved.

(10) A person requesting approval of a no further action report under subsection (8) may appeal the department's decision in accordance with section 20114e.

(11) Any time frame required by this section may be extended by mutual agreement of the department and

a person submitting a no further action report. An agreement extending a time frame must be in writing.

(12) Following approval of a no further action report under this section, the owner or operator of the facility addressed by the no further action report may submit to the department an amended no further action report. The amended no further action report must include the proposed changes to the original no further action report and an accompanying rationale for the proposed change. The process for review and approval of an amended no further action report is the same as the process for no further action reports.

324.20114e Response activity review panel.

Sec. 20114e. (1) The director shall establish a response activity review panel to advise him or her on disputes.

(2) The panel must consist of 15 individuals, appointed by the director. Each member of the panel must meet all of the following minimum requirements:

(a) Meet 1 or more of the following:

(*i*) Hold a current professional engineer's or professional geologist's license or registration from a state, tribe, or United States territory, or the Commonwealth of Puerto Rico, and have the equivalent of 6 years of full-time relevant experience.

(*ii*) Have a baccalaureate degree from an accredited institution of higher education in a discipline of engineering or science and the equivalent of 10 years of full-time relevant experience.

(*iii*) Have a master's degree from an accredited institution of higher education in a discipline of engineering or science and the equivalent of 8 years of full-time relevant experience.

(b) Remain current in his or her field through participation in continuing education or other activities.

(3) An individual is not eligible to be a member of the panel if any of the following is true:

(a) The individual is a current employee of any office, department, or agency of this state.

(b) The individual is a party to 1 or more contracts with the department and the compensation paid under those contracts represented more than 5% of the individual's annual gross revenue in any of the preceding 3 years.

(c) The individual is employed by an entity that is a party to 1 or more contracts with the department and the compensation paid to the individual's employer under these contracts represented more than 5% of the employer's annual gross revenue in any of the preceding 3 years.

(d) The individual was employed by the department within the preceding 3 years.

(4) An individual appointed to the panel serves for a term of 3 years and may be reappointed for 1 additional 3-year term. After serving 2 consecutive terms, the individual shall not be a member of the panel for a period of at least 2 years before being eligible to be appointed to the panel again. The terms for members first appointed must be staggered so that not more than 5 vacancies are scheduled to occur in a single year. Individuals appointed to the panel serve without compensation. However, members of the panel may be reimbursed for their actual and necessary expenses incurred in the performance of their official duties as members of the panel.

(5) A vacancy on the panel shall be filled in the same manner as the original appointment.

(6) The business that the panel may perform shall be conducted at a public meeting of the panel held in compliance with the open meetings act, 1976 PA 267, MCL 15.261 to 15.275.

(7) A person who submitted a response activity plan; remedial action plan; postclosure plan; a no further action report; a request for certificate of completion or documentation of due care compliance under this part; or an initial assessment report, final assessment report, closure report, or documentation of due care compliance under part 213 may appeal a decision made by the department regarding a dispute by submitting a petition to the director. However, an issue that was addressed as part of the final decision of the director under section 21332 or that is the subject of a contested case hearing under section 21332 is not eligible for review by the panel. The petition must include the issues in dispute, the relevant facts upon which the dispute is based, factual data, analysis, opinion, and supporting documentation for the petitioner's position. The petitioner shall also submit a fee of $3,500.00. If the director believes that the dispute may be able to be resolved without convening the panel, the director may contact the petitioner regarding the issues in dispute and may negotiate a resolution of the dispute. This negotiation period must not exceed 45 days. If the dispute

is resolved without convening the panel, any fee that is submitted with the petition shall be returned.

(8) If a dispute is not resolved pursuant to subsection (7), the director shall schedule a meeting of 5 members of the panel, selected on the basis of their relevant expertise, within 45 days after receiving the original petition. If the dispute involves an underground storage tank system, at least 3 of the members selected must have relevant experience in the American Society for Testing and Materials risk-based corrective action processes described in part 213. A member selected for the dispute resolution process shall agree not to accept employment by the person bringing the dispute before the panel, or to undertake any employment concerning the facility in question for a period of 1 year after the decision has been rendered on the matter if that employment would represent more than 5% of the member's gross revenue in any of the preceding 3 years. The director shall provide a copy of all supporting documentation to members of the panel who will hear the dispute. An alternative member may be selected by the director to replace a member who is unable to participate in the dispute resolution process. Any action by the members selected to hear the dispute requires a majority of the votes cast. The members selected for the dispute resolution process shall elect a chairperson of the dispute resolution process. At a meeting scheduled to hear the dispute, representatives of the petitioner and the department must each be afforded an opportunity to present their positions to the panel. The fee that is received by the director along with the petition shall be forwarded to the state treasurer for deposit into the fund.

(9) Within 45 days after hearing the dispute, the members of the panel who were selected for and participated in the dispute resolution process shall make a recommendation regarding the petition and provide written notice of the recommendation to the director of the department and the petitioner. The written recommendation must include the specific scientific or technical rationale for the recommendation. The panel's recommendation regarding the petition may be to adopt, modify, or reverse, in whole or in part, the department's decision that is the subject of the petition. If the panel does not make its recommendation within this 45-day time period, the decision of the department is the final decision of the director.

(10) Within 60 days after receiving written notice of the panel's recommendation, the director shall issue a final decision, in writing, regarding the petition. However, this time period may be extended by written agreement between the director and the petitioner. If the director agrees with the recommendation of the panel, the department shall incorporate the recommendation into its response to the response activity plan, no further action report, request for certificate of completion, initial assessment report, final assessment report, closure report, or documentation of due care compliance. If the director rejects the recommendation of the panel, the director shall issue a written decision to the petitioner with a specific rationale for rejecting the recommendation of the panel. If the director fails to issue a final decision within the time period provided for in this subsection, the recommendation of the panel shall be considered the final decision of the director. The final decision of the director under this subsection is subject to review pursuant to section 631 of the revised judicature act of 1961, 1961 PA 236, MCL 600.631.

(11) Upon request of the director, the panel shall make a recommendation to the department on whether a member should be removed from the panel for noncompliance with this part. Prior to making this recommendation, the panel may convene a peer review panel to evaluate the conduct of the member.

(12) A member of the panel shall not participate in the dispute resolution process for any appeal in which that member has a conflict of interest. The director shall select a member of the panel to replace a member who has a conflict of interest under this subsection. For purposes of this subsection, a member has a conflict of interest if a petitioner has hired that member or the member's employer on any environmental matter within the preceding 3 years.

(13) As used in this section:

(a) "Dispute" means any disagreement over a technical, scientific, or administrative issue, including, but not limited to, disagreements over assessment of risk, response activity plans, remedial action plans, no further action reports, certificates of completion, documentation of due care compliance under this part, determinations of whether a person has submitted sufficient information for the department to make a decision regarding a submittal under this part or part 213, and initial assessment reports, final assessment reports, closure reports, postclosure plans, and documentations of due care compliance under part 213.

(b) "Relevant experience" means active participation in the preparation, design, implementation, and assessment of remedial investigations, feasibility studies, interim response activities, and remedial actions under this part or experience in the American society for testing and materials risk-based corrective action processes described in part 213. This experience must demonstrate the exercise of sound professional judgment and knowledge of the requirements of this part or part 213, or both.

324.20114f Certificate of completion.

Sec. 20114f. (1) Upon completion of a response activity a person may request a certificate of completion from the department.

(2) To obtain a certificate of completion from the department under this section, a person shall submit each of the following to the department:

(a) A certificate of completion request form. The department shall specify the required content of the request form and make the form available on the department's website.

(b) Documentation of the completed response activity.

(3) Upon receipt of a request for a certificate of completion submitted under this subsection, the department shall issue a certificate or deny the request, or shall notify the submitter that there is not sufficient information for the department to make a decision. If the department's response is that the request does not include sufficient information, the department shall identify the information that is required for the department to make a decision. If the request is denied, the department's denial shall, to the extent practical, state with specificity all of the reasons for denial. The department shall make a decision under this subsection and shall provide the person submitting the request with a certificate of completion, as appropriate, within 1 of the following time frames, as applicable:

(a) 150 days after the request was received by the department if the response activity was undertaken without prior approval of the department and the department determines that the response activity complies with the applicable requirements of this part.

(b) 90 days after the request was received by the department if the response activity was undertaken pursuant to a response activity plan that was approved under section 20114b and the department determines that the response activity was completed in accordance with the approved plan.

(4) If the department fails to provide a written response within the time frame required by subsection (3), the response activity is considered approved.

(5) Any time frame required by this section may be extended by mutual agreement of the department and a person submitting a request for a certificate of completion or a person who has received a certificate of completion. An agreement extending a time frame shall be in writing.

(6) A person requesting a certificate of completion may appeal the department's decision in accordance with section 20114e, if applicable.

324.20114g Documentation of due care compliance.

Sec. 20114g. (1) A person may submit to the department documentation of due care compliance regarding a facility. The documentation of due care compliance shall be submitted on a form provided by the department and shall contain documentation of compliance with section 20107a, and other information required by the department.

(2) Within 45 business days after receipt of the documentation of due care compliance under subsection (1) containing sufficient information for the department to make a decision, the department shall approve, approve with conditions, or deny the documentation of due care compliance. If the department does not approve the documentation of due care compliance, the department shall provide the person that submitted the documentation the reasons why the documentation of due care compliance was not approved.

(3) A person that disagrees with a decision of the department under this section may submit a petition for review of scientific or technical disputes to the response activity review panel pursuant to section 20114e.

324.20115 Notice to department of agriculture and rural development; information;

"substance regulated by the department of agriculture and rural development" defined; response activities to be consistent with MCL 324.8714(2).

Sec. 20115. (1) The department, upon confirmation of a release or threat of release of a substance that is regulated by the department of agriculture and rural development, shall notify the department of agriculture and rural development. The department of agriculture and rural development shall undertake or ensure the initiation of the necessary response activity to immediately stop or prevent further releases at the site. The department of agriculture and rural development shall consult with the department in the development of response activities if a release or threat of a release of a substance regulated by the department of agriculture and rural development occurs. The department of agriculture and rural development shall provide to the department information necessary to identify substances regulated by the department of agriculture and rural development. This information shall include but is not limited to the list of state registered pesticides.

(2) As used in this section, "substance regulated by the department of agriculture and rural development" means any of the following:

(a) A pesticide as defined in section 8305.

(b) A fertilizer as defined in section 8501.

(c) A soil conditioner as defined in section 8501a.

(d) A liming material as defined in section 1 of 1955 PA 162, MCL 290.531.

(3) Response activities conducted under this section shall be consistent with the requirements of section 8714(2).

324.20115a Release or threat of release from underground storage tank system; corrective actions.

Sec. 20115a. (1) Notwithstanding any other provision of this part, if a release or threat of release at a facility is solely the result of a release or threat of release from an underground storage tank system regulated under part 213, the response activities implemented at the facility shall be the corrective actions required under part 213, and the requirements of section 20114 shall not apply to that release.

(2) Notwithstanding any other provision of this part, if a release or threat of release at a facility is not solely the result of a release or threat of release from an underground storage tank system, the owner or operator of the underground storage tank system as defined in part 213 may choose to conduct corrective actions of the release from the underground storage tank system pursuant to part 213, and the requirements of section 20114 shall not apply to that release.

324.20116 Transfer of interest in real property; notice; certification of completed response activity.

Sec. 20116. (1) A person who has knowledge or information or is on notice through a recorded instrument that a portion or the entirety of a parcel of that person's property is a facility shall not transfer an interest in that real property unless he or she provides written notice to the purchaser or other person to which the property is transferred disclosing the known general nature and extent of the hazardous substance release and any land or resource use restrictions that are known by the person to apply. A restrictive covenant or notice that contains the required information that is recorded in the deed records for the property satisfies this requirement.

(2) The owner of real property for which a notice required in subsection (1) has been recorded may, upon completion of a response activity under this part for the facility, record with the register of deeds for the appropriate county a certification that the response activity has been completed.

324.20117 Information required to be furnished; requirements; right to enter public or private property; purposes; duties of person entering public or private property; copies of sample analyses, photographs, or videotapes; completion of inspections and investigations; refusing entry or information; powers of attorney general; injunction; civil fine; availability of information to public; protection of information; administrative subpoena; witness fees and mileage; court order; contempt; "information" defined.

Sec. 20117. (1) To determine the need for response activity or selecting or taking a response activity or otherwise enforcing this part or a rule promulgated under this part, the directors or their authorized representatives may upon reasonable notice require a person to furnish any information that the person may have relating to any of the following:

(a) The identification, nature, and quantity of materials that have been or are generated, treated, stored, handled, or disposed of at a facility or transported to a facility.

(b) The nature or extent of a release or threatened release at or from a facility.

(2) Upon reasonable notice, a person required to furnish information pursuant to subsection (1) shall either:

(a) Grant the directors or their authorized representatives access at all reasonable times to any place, property, or location to inspect and copy the related information.

(b) Copy and furnish to the directors or their authorized representatives the related information.

(3) If there is a reasonable basis to believe that there may be a release or threat of release, the directors or their authorized representatives have the right to enter at all reasonable times any public or private property for any of the following purposes:

(a) Identifying a facility.

(b) Investigating the existence, origin, nature, or extent of a release or threatened release.

(c) Inspecting, testing, taking photographs or videotapes, or sampling of any of the following: soils, air, surface water, groundwater, suspected hazardous substances, or any containers or labels of suspected hazardous substances.

(d) Determining the need for or selecting any response activity.

(e) Taking or monitoring implementation of any response activity.

(4) A person that enters public or private property pursuant to subsection (3) shall present credentials; make a reasonable effort to contact the person in charge of the facility or that person's designee; describe the nature of the activities authorized under subsection (3) to be undertaken; and inform the person that is in charge of the facility that he or she is entitled to participate in the collection of split samples, and is entitled to a copy of the results of any analysis of samples and a copy of any photograph or videotape taken. The person in charge or his or her agent may accompany the directors or their authorized representatives during the activities authorized under subsection (3) that take place and may participate in the collection of any split samples on the property. The absence or unavailability of the person in charge or that person's agent shall not delay or limit the authority of the directors or their authorized representatives to enter the property or proceed with the activities authorized under subsection (3).

(5) If the directors or their authorized representatives obtain any samples, before leaving the property they shall give to the person in charge of the property from which the samples were obtained a receipt describing the sample. A copy of the results of any analysis of the samples shall upon request be furnished promptly to

the person in charge. A copy of any photograph or videotape taken pursuant to subsection (3)(c) shall upon request be furnished promptly to the person in charge.

(6) All inspections and investigations undertaken by the directors or their authorized representatives under this section shall be completed with reasonable promptness.

(7) If refused entry or information under subsections (1) to (4), for the purposes of enforcing the information gathering and entry authority provided in this section, the attorney general, on behalf of the state, may do either of the following:

(a) Petition the court of appropriate jurisdiction for a warrant authorizing access to property or information pursuant to this section.

(b) Commence a civil action to compel compliance with a request for information or entry pursuant to this section, to authorize information gathering and entry provided for in this section, and to enjoin interference with the exercise of the authority provided in this section.

(8) In a civil action brought pursuant to subsection (7), if there is a reasonable basis to believe there may be a release or a threatened release, the court shall in the case of interference or noncompliance with information requests pursuant to subsection (1), or with entry or inspection requests pursuant to subsection (3), enjoin interference with and direct compliance with the requests unless the defendant establishes that, under the circumstances of the case, the request is arbitrary and capricious, an abuse of discretion, or otherwise not in accordance with law.

(9) In a civil action brought pursuant to subsection (7), if there is a reasonable basis to believe there may be a release or a threatened release, the court may assess a civil fine not to exceed $25,000.00 for each day of noncompliance against a person that unreasonably fails to comply with subsection (1), (2), or (3).

(10) Information obtained by the directors or their authorized representatives as authorized under subsection (1) or (2) shall be available to the public to the extent provided by the freedom of information act, Act No. 442 of the Public Acts of 1976, being sections 15.231 to 15.246 of the Michigan Compiled Laws. A person who provides information pursuant to subsection (1) or (2), or the person in charge of a facility at which photographs or videotapes are taken pursuant to subsection (3), may designate the information that the person believes to be entitled to protection as if the information was exempt from disclosure as being either trade secrets or information of a personal nature under section 13(1)(a) or (g) of the freedom of information act, Act No. 442 of the Public Acts of 1976, being section 15.243 of the Michigan Compiled Laws, and submit that specifically designated information separately from other information required to be provided under this section.

(11) Notwithstanding subsection (10), the following information obtained by the directors or their authorized representatives as required by this section shall be available to the public:

(a) The trade name, common name, or generic class or category of the hazardous substance.

(b) The physical properties of a hazardous substance, including its boiling point, melting point, flash point, specific gravity, vapor density, solubility in water, and vapor pressure at 20 degrees Celsius.

(c) The hazards to the public health, safety, or welfare, or the environment posed by a hazardous substance, including physical hazards, such as explosion, and potential acute and chronic health hazards.

(d) The potential routes of human exposure to the hazardous substance at the facility being investigated, entered, or inspected under this section.

(e) The location of disposal of any waste stream released or threatened to be released from the facility.

(f) Monitoring data or analysis of monitoring data pertaining to disposal activities related to the facility.

(g) Hydrogeologic data.

(h) Groundwater monitoring data.

(12) To collect information for the purpose of identifying persons who are liable under section 20126 or to otherwise enforce this part or a rule promulgated under this part, the attorney general may by administrative subpoena require the attendance and testimony of witnesses and production of papers, reports, documents, answers to questions, and other information the attorney general considers necessary. Witnesses shall be paid the same fees and mileage that are paid witnesses in the courts of this state. If a person fails or refuses to obey the administrative subpoena, the circuit court for the county of Ingham or for the county in which that person resides has jurisdiction to order that person to comply with the subpoena. A failure to obey the order of the court is punishable by the court as contempt.

(13) As used in this section, "information" includes, but is not limited to, documents, materials, records, photographs, and videotapes.

324.20118 Response activity; remedial action; purposes; selection or approval; conditions.

Sec. 20118. (1) The department may take response activity or approve of response activity proposed by a person that is consistent with this part and the rules promulgated under this part relating to the selection and implementation of response activity that the department concludes is necessary and appropriate to protect the public health, safety, or welfare, or the environment.

(2) Remedial action undertaken under subsection (1) may address all or a portion of contamination at a facility as follows:

(a) Remedial action may address 1 or more releases at a facility.

(b) Remedial action may address 1 or more hazardous substances at a facility.

(c) Remedial action may address contamination in 1 or more environmental media at a facility.

(d) Remedial action may address contamination within the entire facility or only a portion of a facility.

(e) Remedial action may address contamination at a facility through any combination of subdivisions (a) through (d).

(3) Remedial action undertaken under subsection (1) shall accomplish all of the following:

(a) Assure the protection of the public health, safety, and welfare, and the environment with respect to the environmental contamination addressed by the remedial action.

(b) Except as otherwise provided in subsections (4) and (5), attain a degree of cleanup and control of the environmental contamination addressed by the remedial action that complies with all applicable or relevant and appropriate requirements, rules, criteria, limitations, and standards of state and federal environmental law.

(c) Except as otherwise provided in subsections (4) and (5), be consistent with any cleanup criteria incorporated in rules promulgated under this part for the environmental contamination addressed by the remedial action.

(4) The department may select or approve of a remedial action meeting the criteria provided for in section 20120a that does not attain a degree of control or cleanup of hazardous substances that complies with R 299.3(5) or R 299.3(6) of the Michigan administrative code, or both, if the department makes a finding that the remedial action is protective of the public health, safety, and welfare, and the environment. Notwithstanding any other provision of this subsection, the department shall not approve of a remedial action that does not attain a degree of control or cleanup of hazardous substances that complies with R 299.3(5) or R 299.3(6) of the Michigan administrative code if the remedial action is being implemented by a person who is liable under section 20126 and the release was grossly negligent or intentional, unless attaining that degree of control is technically infeasible, or the adverse environmental impact of implementing a remedial action to satisfy the rule would exceed the environmental benefit of that remedial action.

(5) A remedial action may be selected or approved pursuant to subsection (4) with regard to R 299.3(5) or R 299.3(6), or both, of the Michigan administrative code, if the department determines, based on the administrative record, that 1 or more of the following conditions are satisfied:

(a) Compliance with R 299.3(5) or R 299.3(6), or both, of the Michigan administrative code is technically impractical.

(b) The remedial action selected or approved will, within a reasonable period of time, attain a standard of performance that is equivalent to that required under R 299.3(5) or R 299.3(6) of the Michigan administrative code.

(c) The adverse environmental impact of implementing a remedial action to satisfy R 299.3(5) or R 299.3(6), or both, of the Michigan administrative code would exceed the environmental benefit of the remedial action.

(d) The remedial action provides for the reduction of hazardous substance concentrations in the aquifer through a naturally occurring process that is documented to occur at the facility and both of the following conditions are met:

(*i*) It has been demonstrated that there will be no adverse impact on the environment as the result of migration of the hazardous substances during the remedial action, except for that part of the aquifer approved by the department in connection with the remedial action.

(*ii*) The remedial action includes enforceable land use restrictions or other institutional controls necessary to prevent unacceptable risk from exposure to the hazardous substances, as defined by the cleanup criteria approved as part of the remedial action.

324.20119 Action to abate danger or threat; administrative order; noncompliance; liability; petition for reimbursement; action in court of claims; evidence.

Sec. 20119. (1) In accordance with this section, if the department determines that there may be an imminent and substantial endangerment to the public health, safety, or welfare, or the environment, because of a release or threatened release, the department may require persons who are liable under section 20126 to take necessary action to abate the danger or threat.

(2) The department may issue an administrative order to a person identified by the department as a person who is liable under section 20126 requiring that person to perform response activity relating to a facility for which that person is liable or to take any other action required by this part. An order issued under this section shall state with reasonable specificity the basis for issuance of the order and specify a reasonable time for compliance.

(3) Within 30 days after issuance of an administrative order under this section, a person to which the order was issued shall indicate in writing whether the person intends to comply with the order.

(4) A person who, without sufficient cause, violates or fails to properly comply with an administrative order issued under this section is liable for either or both of the following:

(a) A civil fine of not more than $25,000.00 for each day in which the violation occurs or the failure to comply continues. A fine imposed under this subsection shall be based upon the seriousness of the violation and any good faith efforts by the violator to comply with the administrative order.

(b) Exemplary damages in an amount at least equal to the amount of any costs of response activity incurred by the state as a result of a failure to comply with an administrative order but not more than 3 times the amount of these costs.

(5) A person, to which an administrative order was issued under this section and that complied with the terms of the order, who believes that the order was arbitrary and capricious or unlawful may petition the department, within 60 days after completion of the required action, for reimbursement from the fund for the reasonable costs of the action plus interest at the rate described in section 20126a(3) and other necessary costs incurred in seeking reimbursement under this subsection. If the department refuses to grant all or part of the petition, the petitioner may, within 30 days of receipt of the refusal, file an action against the department in the court of claims seeking this relief. A failure by the department either to grant or deny all or any part of a petition within 120 days of receipt constitutes a denial of that part of the petition, which denial is reviewable as final agency action in the court of claims. To obtain reimbursement, the petitioner shall establish by a preponderance of the evidence that the petitioner is not liable under section 20126 or that the action ordered was arbitrary and capricious or unlawful, and in either instance that costs for which the petitioner seeks reimbursement are reasonable in light of the action required by and undertaken pursuant to the relevant order.

324.20120 Selection of remedial action; factors.

Sec. 20120. (1) All of the following shall be considered when a person is selecting a remedial action or the department is selecting or approving a remedial action:

(a) The effectiveness of alternatives in protecting the public health, safety, and welfare and the environment.

(b) The long-term uncertainties associated with the proposed remedial action.

(c) The persistence, toxicity, mobility, and propensity to bioaccumulate of the hazardous substances.

(d) The short- and long-term potential for adverse health effects from human exposure.

(e) Costs of remedial action, including long-term maintenance costs. However, the cost of a remedial action shall be a factor only in choosing among alternatives that adequately protect the public health, safety, and welfare and the environment, consistent with the requirements of section 20120a.

(f) Reliability of the alternatives.

(g) The potential for future response activity costs if an alternative fails.

(h) The potential threat to human health, safety, and welfare and the environment associated with excavation, transportation, and redisposal or containment.

(i) The ability to monitor remedial performance.

(j) For remedial actions that require the opportunity for public participation under section 20120d, the public's perspective about the extent to which the proposed remedial action effectively addresses requirements of this part.

(2) Evaluation of the factors in subsection (1) shall consider all factors in balance with one another as necessary to achieve the objectives of this part. No single factor in subsection (1) shall be considered the most important.

History: Add. 2010, Act 228, Imd. Eff. Dec. 14, 2010.

***** *324.20120a THIS SECTION IS AMENDED EFFECTIVE 91 DAYS AFTER ADJOURNMENT OF THE 2024 REGULAR SESSION SINE DIE: See 324.20120a.amended* *****

324.20120a Cleanup criteria; response activity plan; departmental duties; rules.

Sec. 20120a. (1) The department may establish cleanup criteria and approve of remedial actions in the categories listed in this subsection. The cleanup category proposed shall be the option of the person proposing the remedial action, subject to department approval if required, considering the appropriateness of the categorical criteria to the facility. The categories are as follows:

(a) Residential.

(b) Nonresidential.

(c) Limited residential.

(d) Limited nonresidential.

(2) As an alternative to the categorical criteria under subsection (1), the department may approve a response activity plan or a no further action report containing site-specific criteria that satisfy the requirements of section 20120b and other applicable requirements of this part. The department shall utilize only reasonable and relevant exposure pathways in determining the adequacy of a site-specific criterion. Additionally, the department may approve a remedial action plan for a designated area-wide zone encompassing more than 1 facility, and may consolidate remedial actions for more than 1 facility.

(3) The department shall develop cleanup criteria pursuant to subsection (1) based on generic human health risk assessment assumptions that are determined by the department to appropriately characterize patterns of human exposure associated with certain land uses. The department shall consider only reasonable and relevant exposure pathways and factors in determining these assumptions. The department may prescribe more than 1 generic set of exposure assumptions within each category described in subsection (1). If the department prescribes more than 1 generic set of exposure assumptions within a category, each set of exposure assumptions creates a subcategory within a category described in subsection (1). The department shall specify facility characteristics that determine the applicability of criteria derived for these categories or subcategories. When developing and promulgating cleanup criteria under subsection (1), the department shall do all of the following:

(a) Except as set forth in subdivision (c), for each hazardous substance, use final toxicity values from the United States Environmental Protection Agency integrated risk information system, or more recent United States Environmental Protection Agency Office of Pesticide Programs toxicity values for pesticides that are incorporated by the integrated risk information system in place of values that have been archived by the integrated risk information system, if available. If the United States Environmental Protection Agency has determined that there is insufficient scientific data to derive a value for inclusion in the integrated risk information system, the department shall not derive or adopt such a value for that hazardous substance. If a value is not available in the integrated risk information system, the department shall apply the following order of precedence when selecting toxicity values:

(*i*) The best value from the agency for toxic substances and disease registry final minimal risk levels for hazardous substances or the United States Environmental Protection Agency provisional peer-reviewed toxicity values.

(*ii*) If a value is not available under subparagraph (*i*), the best final value from the United States Environmental Protection Agency health effects assessment summary table, or final values adopted by other states, the World Health Organization, Canada, or the European Union.

(*iii*) If a value is not available under subparagraph (*i*) or (*ii*), a value developed by the department if there is sufficient supporting toxicity data and information available in the peer-reviewed published scientific literature.

(b) Apply the following order of precedence when selecting chemical or physical data for the development of cleanup criteria:

(*i*) The best relevant experimentally measured data.

(*ii*) If data is not available under subparagraph (*i*), the best relevant modeled or estimated data.

(c) If the department desires to use a toxicity value or input that is different than a value that is available on the United States Environmental Protection Agency integrated risk information system, or more recent United States Environmental Protection Agency Office of Pesticide Programs toxicity values for pesticides that are incorporated by the integrated risk information system in place of values that have been archived by the integrated risk information system, or desires to establish a value when the Environmental Protection Agency determined that there was insufficient scientific data to do so when last evaluated by the Environmental Protection Agency, the department shall provide public notice and a written explanation of its intent to do so and conduct a stakeholder process to obtain input. After obtaining stakeholder input, the department may promulgate a rule to use an alternative value in accordance with the order of precedence set forth in subdivision (a)(*i*) through (*iii*), if the department demonstrates all of the following:

(*i*) The integrated risk information system value is based on a determination that is at least 10 years old.

(*ii*) There is more current data in the peer-reviewed scientific literature that is used on a general basis by the United States Environmental Protection Agency or multiple other regulatory agencies nationally for the purpose of calculating cleanup criteria or standards.

(*iii*) After assessing the body of evidence for the hazardous substance using a rigorous systematic review methodology, such as that used by the National Toxicology Program's Office of Health Assessment and Translation and the European Food Safety Authority, the weight of scientific evidence clearly supports the use of the proposed value as best available science for the purpose of calculating generic cleanup criteria.

(d) Use a daily exposure time for inhalation in the exposure intake for a nonresidential worker in an algorithm or equation used to calculate generic cleanup criteria under this part that is equal to the average number of hours, not to exceed 10 hours, that a nonresidential worker spends working in a 5-day work week according to the most appropriate governmental data or information.

(e) When the department considers the pregnant woman as a potential sensitive receptor to address prenatal developmental effects, the department may apply a single-event exposure scenario for a hazardous substance, pursuant to the process set forth in subdivision (f), only when either of the following occurs:

(*i*) The United States Environmental Protection Agency applies a single-event exposure scenario to establish regional screening levels for that hazardous substance.

(*ii*) The department demonstrates, after conducting a comprehensive assessment of the specific hazardous substance, that, for that specific hazardous substance, a single exposure may result in an adverse effect and the weight of scientific evidence supports the application of a single-event exposure scenario. The department's comprehensive assessment must evaluate the body of scientific evidence using a systematic review methodology, such as that used by the National Toxicology Program's Office of Health Assessment and Translation and the European Food Safety Authority. The comprehensive assessment must, if appropriate, take into account all of the following:

(A) Whether there is data available involving single-day exposures to the hazardous substance during pregnancy.

(B) The differences in sensitivity, periods of development, and progression of different types of developmental effects in humans and animals.

(C) Differences in toxicokinetics between species.

(f) Before conducting the comprehensive assessment in subdivision (e)(*ii*), the department shall provide public notice and a written explanation of its intent to do so. Upon completion of the assessment, the department shall conduct a stakeholder process to obtain input. If, upon obtaining stakeholder input, the department elects to apply a single-event exposure scenario for a particular hazardous substance, the department shall do so in a rule.

(4) If a hazardous substance poses a carcinogenic risk to humans, the cleanup criteria derived for cancer risk under this section shall be the 95% upper bound on the calculated risk of 1 additional cancer above the background cancer rate per 100,000 individuals using the generic set of exposure assumptions established under subsection (3) for the appropriate category or subcategory. If the hazardous substance poses a risk of an adverse health effect other than cancer, cleanup criteria shall be derived using appropriate human health risk assessment methods for that adverse health effect and the generic set of exposure assumptions established under subsection (3) for the appropriate category or subcategory. A hazard quotient of 1.0 shall be used to

derive noncancer cleanup criteria. For the noncarcinogenic effects of a hazardous substance present in soils, the intake shall be assumed to be 100% of the protective level, unless compound and site-specific data are available to demonstrate that a different source contribution is appropriate. If a hazardous substance poses a risk of both cancer and 1 or more adverse health effects other than cancer, cleanup criteria shall be derived under this section for the most sensitive effect.

(5) If a cleanup criterion derived under subsection (4) for groundwater in an aquifer differs from either: (a) the state drinking water standards established pursuant to section 5 of the safe drinking water act, 1976 PA 399, MCL 325.1005, or (b) the national secondary drinking water regulations established pursuant to 42 USC 300g-1, or (c), if there is not national secondary drinking water regulation for a contaminant, the concentration determined by the department according to methods approved by the United States Environmental Protection Agency below which taste, odor, appearance, or other aesthetic characteristics are not adversely affected, the cleanup criterion is the more stringent of (a), (b), or (c) unless the department determines that compliance with this subsection is not necessary because the use of the aquifer is reliably restricted or controlled under provisions of a postclosure plan or a postclosure agreement or by site-specific criteria approved by the department under section 20120b.

(6) The department shall not approve a remedial action plan or no further action report in categories set forth in subsection (1)(b) to (d), unless the person documents that the current zoning of the property is consistent with the categorical criteria being proposed, or that the governing zoning authority intends to change the zoning designation so that the proposed criteria are consistent with the new zoning designation, or the current property use is a legal nonconforming use. The department shall not grant final approval for a remedial action plan or no further action report that relies on a change in zoning designation until a final determination of that zoning change has been made by the local unit of government. The department may approve of a remedial action plan or no further action report that achieves categorical criteria that are based on greater exposure potential than the criteria applicable to current zoning. In addition, the remedial action plan or no further action report must include documentation that the current property use is consistent with the current zoning or is a legal nonconforming use. Abandoned or inactive property must be considered on the basis of zoning classifications as described above.

(7) Cleanup criteria from 1 or more categories in subsection (1) may be applied at a facility, if all relevant requirements are satisfied for application of a pertinent criterion.

(8) The need for soil remediation to protect an aquifer from hazardous substances in soil shall consider the vulnerability of the aquifer or aquifers potentially affected if the soil remains at the facility. Migration of hazardous substances in soil to an aquifer is a pertinent pathway if appropriate based on consideration of site specific factors.

(9) The department may establish cleanup criteria for a hazardous substance using a biologically based model developed or identified as appropriate by the United States Environmental Protection Agency if the department determines all of the following:

(a) That application of the model results in a criterion that more accurately reflects the risk posed.

(b) That data of sufficient quantity and quality are available for a specified hazardous substance to allow the scientifically valid application of the model.

(c) The United States Environmental Protection Agency has determined that application of the model is appropriate for the hazardous substance in question.

(10) If the target detection limit or the background concentration for a hazardous substance is greater than a cleanup criterion developed for a category pursuant to subsection (1), the criterion is the target detection limit or background concentration, whichever is larger, for that hazardous substance in that category.

(11) The department may also approve cleanup criteria if necessary to address conditions that prevent a hazardous substance from being reliably measured at levels that are consistently achievable in samples from the facility in order to allow for comparison with generic cleanup criteria. A person seeking approval of a criterion under this subsection shall document the basis for determining that the relevant published target detection limit cannot be achieved in samples from the facility.

(12) In determining the adequacy of a land-use based response activity to address sites contaminated by polychlorinated biphenyls, the department shall not require response activity in addition to that which is subject to and complies with applicable federal regulations and policies that implement the toxic substances control act, 15 USC 2601 to 2692.

(13) Remedial action to address the release of uncontaminated mineral oil satisfies cleanup criteria under this part for groundwater or for soil if all visible traces of mineral oil are removed from groundwater and soil.

(14) Approval by the department of remedial action based on the categorical standard in subsection (1)(a) or (b) shall be granted only if the pertinent criteria are satisfied in the affected media. The department shall approve the use of probabilistic or statistical methods or other scientific methods of evaluating environmental

data when determining compliance with a pertinent cleanup criterion if the methods are determined by the department to be reliable, scientifically valid, and best represent actual site conditions and exposure potential.

(15) If a discharge of venting groundwater complies with this part, a permit for the discharge is not required.

(16) Remedial actions that rely on categorical cleanup criteria developed pursuant to subsection (1) shall also consider other factors necessary to protect the public health, safety, and welfare, and the environment as specified by the department, if the department determines based on data and existing information that such considerations are relevant to a specific facility. These factors include, but are not limited to, the protection of surface water quality and consideration of ecological risks if pertinent to the facility based on the requirements of this part.

(17) The department shall promulgate all generic cleanup criteria and target detection limits as rules. Except for generic cleanup criteria and target detection limits developed before January 11, 2018, and those generic cleanup criteria determined as set forth in subsections (5) and (23) and section 20120e(1)(a), generic cleanup criteria and target detection limits, and any modifications or revisions to generic cleanup criteria and target detection limits, are not legally enforceable until promulgated as rules. The generic cleanup criteria and target detection limits are subject to all of the following:

(a) The department may periodically repromulgate rules for any portion of the generic cleanup criteria to adopt and use new toxicity values or chemical or physical data selected pursuant to subsection (3)(a) and (b) or to otherwise update the generic cleanup criteria in accordance with this part to incorporate, as appropriate, knowledge gained through research and studies in the areas of fate and transport and risk assessment taking into account best practices from other states, reasonable and realistic conditions, and sound science. The department may also repromulgate rules that establish target detection limits to update those limits in accordance with this part.

(b) If generic cleanup criteria are included in or relied upon as a basis for decision in a work plan, response activity plan, remedial action plan, postclosure plan, request for certificate of completion, or similar document, that is submitted to the department or approved by the department prior to the effective date of a rule revising those cleanup criteria, then the generic cleanup criteria effective at the time of submittal or prior approval continue to apply to the review, revision, or implementation of the plan, request, or document, as well as to any future review, approval, or disapproval of a no further action report or any part thereof that is based on the plan, request, or document, unless either of the following occur:

(*i*) The person making the submittal voluntarily elects to apply the revised cleanup criteria.

(*ii*) The department director makes a site-specific demonstration, based on clear and convincing evidence, that the prior cleanup criteria are no longer protective of the public health, safety, or welfare, or the environment, given the totality of circumstances at the site, including any site-specific factors that reduce exposure or risk, such as the existence of land or resource use restrictions that reduce or restrict exposure. This subparagraph does not apply if, no later than 6 months after the promulgation of the rule revision changing the cleanup criteria, both of the following conditions are met:

(A) The person has substantially completed all active remediation as set forth in the approved plan, request, or similar document, and only monitoring, maintenance, or postclosure activities remain.

(B) The person submits a request for a no further action approval to the department.

(c) No further action reports that have been approved by the department and that rely on cleanup criteria that have been subsequently revised remain valid, subject to the liability provisions of section 20126(4)(e).

(d) If generic cleanup criteria are included in or relied upon as a basis for decision in a no further action report, other than a no further action report described in subdivision (b)(*ii*), that is submitted to the department but not yet approved by the department prior to the effective date of a rule revising those cleanup criteria, then the generic cleanup criteria effective at the time of submittal continue to apply to the review, revision, and approval of the report unless either of the following occur:

(*i*) The person making the submittal voluntarily elects to apply the revised cleanup criteria.

(*ii*) The department director makes a site-specific demonstration, based on clear and convincing evidence, that the prior generic cleanup criteria are no longer protective of the public health, safety, or welfare, or the environment, given the totality of circumstances at the site, including any site-specific factors that reduce exposure or risk, such as the existence of land or resource use restrictions that reduce or restrict exposure.

(e) A demonstration by the department director under subdivision (b) or (d) that prior cleanup criteria are no longer protective of the public health, safety, or welfare, or the environment, is appealable in accordance with section 20114e.

(f) Notwithstanding subdivisions (b) through (d), an owner's or operator's obligations under section 20107a shall be based upon the current numeric cleanup criteria under section 20120a(1) or site-specific criteria approved under section 20120b.

(18) A person demonstrates compliance with indoor air inhalation criteria for a hazardous substance at a facility under this part if all of the following conditions are met:

(a) The facility is an establishment covered by the classifications provided by sector 31-33 – manufacturing, of the North American Industry Classification System, United States, 2012, published by the Office of Management and Budget.

(b) The person complies with the Michigan occupational safety and health act, 1974 PA 154, MCL 408.1001 to 408.1094, and the rules promulgated under that act applicable to the exposure to the hazardous substance, including, but not limited to, the occupational health standards for air contaminants, R 325.51101 to R 325.51108 of the Michigan Administrative Code.

(c) The hazardous substance is included in the facility's hazard communication program under section 14a of the Michigan occupational safety and health act, 1974 PA 154, MCL 408.1014a, and the hazard communication rules, R 325.77001 to R 325.77004 of the Michigan Administrative Code, except that, unless the hazardous substance is in use in the facility, the requirement to have a material safety data sheet in the workplace requires only a generic material safety data sheet for the hazardous substance and the labeling requirements do not apply.

(19) The department shall promulgate as rules the algorithms used to calculate, modify, or revise all residential and nonresidential generic cleanup criteria, as well as the tables listing, by hazardous substance, all toxicity, exposure, and other algorithm factors or variables used in the department's calculations, modifications, or revisions.

(20) Calculation and application of toxic equivalency quotients are subject to the following:

(a) The toxic equivalency factors used must only be those adopted by the World Health Organization.

(b) When compounds contributed by 2 or more persons acting independently are combined in a toxic equivalency quotient to assess human health risks, harm is divisible and subject to apportionment of liability under subsections 20129(1) and (2).

(c) To assess human health risks, the toxic equivalency quotient must be compared to generic or site-specific criteria for the reference hazardous substance.

(21) Polychlorinated dibenzodioxin and dibenzofuran congeners are not likely to leach from soil to groundwater. The groundwater surface water interface protection and the residential drinking water protection exposure pathways are not applicable or relevant when assessing polychlorinated dibenzodioxin and dibenzofuran congeners unless the department demonstrates that those congeners are leaching at material concentrations through co-solvation.

(22) Polychlorinated dibenzodioxin and dibenzofuran congeners are not likely to volatilize from soil or groundwater into the air. Vapor inhalation exposure pathways are not applicable or relevant when assessing polychlorinated dibenzodioxin and dibenzofuran congeners.

(23) For a substance that does not have generic cleanup criteria, if, based on the best available information, the department determines that the substance is a hazardous substance, the department may calculate generic cleanup criteria for that hazardous substance using toxicity values and chemical and physical data selected pursuant to subsection (3)(a) and (b) and in accordance with all other requirements of this part and publish the generic cleanup criteria on the department's website. Within 30 days after publishing the new generic cleanup criteria, the department shall initiate rule-making to promulgate rules for the new criteria by filing a rule-making request under section 39 of the administrative procedures act, 1969 PA 306, MCL 24.239. The rule-making request shall only include the revisions necessary to promulgate the new generic cleanup criteria. The new generic cleanup criteria published pursuant to this subsection take effect and are legally enforceable when published by the department if the department also initiates rule-making to promulgate rules for the new criteria within 30 days. The new generic cleanup criteria published pursuant to this subsection remain effective and legally enforceable until replaced by a final rule or, until the director directs the department to withdraw the rule request under section 66(11) of the administrative procedures act, 1969 PA 306, MCL 24.266, or the time limitation in either section 45(1) or section 66(12) of the administrative procedures act, 1969 PA 306, MCL 24.245 and 24.266, is not met.

***** *324.20120a.amended THIS AMENDED SECTION IS EFFECTIVE 91 DAYS AFTER ADJOURNMENT*

324.20120a.amended Cleanup criteria; response activity plan; departmental duties; rules.

Sec. 20120a. (1) The department may establish cleanup criteria and approve of remedial actions in the categories listed in this subsection. The cleanup category proposed must be the option of the person proposing the remedial action, subject to department approval if required, considering the appropriateness of the categorical criteria to the facility. The categories are as follows:

(a) Residential.

(b) Nonresidential.

(c) Limited residential.

(d) Limited nonresidential.

(2) As an alternative to the categorical criteria under subsection (1), the department may approve a response activity plan or a no further action report containing site-specific criteria that satisfy the requirements of section 20120b and other applicable requirements of this part. The department shall utilize only reasonable and relevant exposure pathways in determining the adequacy of a site-specific criterion. Additionally, the department may approve a remedial action plan for a designated area-wide zone encompassing more than 1 facility, and may consolidate remedial actions for more than 1 facility.

(3) The department shall develop cleanup criteria under subsection (1) based on generic human health risk assessment assumptions that are determined by the department to appropriately characterize patterns of human exposure associated with certain land uses. The department shall consider only reasonable and relevant exposure pathways and factors in determining these assumptions. The department may prescribe more than 1 generic set of exposure assumptions within each category described in subsection (1). If the department prescribes more than 1 generic set of exposure assumptions within a category, each set of exposure assumptions creates a subcategory within a category described in subsection (1). The department shall specify facility characteristics that determine the applicability of criteria derived for these categories or subcategories. When developing and promulgating cleanup criteria under subsection (1), the department shall do all of the following:

(a) Except as set forth in subdivision (c), for each hazardous substance, use final toxicity values from the United States Environmental Protection Agency integrated risk information system, or more recent United States Environmental Protection Agency Office of Pesticide Programs toxicity values for pesticides that are incorporated by the integrated risk information system in place of values that have been archived by the integrated risk information system, if available. If the United States Environmental Protection Agency has determined that there is insufficient scientific data to derive a value for inclusion in the integrated risk information system, the department shall not derive or adopt a value for that hazardous substance. If a value is not available in the integrated risk information system, the department shall apply the following order of precedence when selecting toxicity values:

(*i*) The best value from the agency for toxic substances and disease registry final minimal risk levels for hazardous substances or the United States Environmental Protection Agency provisional peer-reviewed toxicity values.

(*ii*) If a value is not available under subparagraph (*i*), the best final value from the United States Environmental Protection Agency health effects assessment summary table, or final values adopted by other states, the World Health Organization, Canada, or the European Union.

(*iii*) If a value is not available under subparagraph (*i*) or (*ii*), a value developed by the department if there is sufficient supporting toxicity data and information available in the peer-reviewed published scientific literature.

(b) Apply the following order of precedence when selecting chemical or physical data for the development of cleanup criteria:

(*i*) The best relevant experimentally measured data.

(*ii*) If data is not available under subparagraph (*i*), the best relevant modeled or estimated data.

(c) If the department desires to use a toxicity value or input that is different than a value that is available on the United States Environmental Protection Agency integrated risk information system, or more recent United States Environmental Protection Agency Office of Pesticide Programs toxicity values for pesticides that are incorporated by the integrated risk information system in place of values that have been archived by the integrated risk information system, or desires to establish a value when the United States Environmental Protection Agency determined that there was insufficient scientific data to do so when last evaluated by the United States Environmental Protection Agency, the department shall provide public notice and a written explanation of its intent to do so and conduct a stakeholder process to obtain input. After obtaining stakeholder input, the department may promulgate a rule to use an alternative value in accordance with the

order of precedence set forth in subdivision (a)(*i*) to (*iii*), if the department demonstrates all of the following:

(*i*) The integrated risk information system value is based on a determination that is at least 10 years old.

(*ii*) There is more current data in the peer-reviewed scientific literature that is used on a general basis by the United States Environmental Protection Agency or multiple other regulatory agencies nationally for the purpose of calculating cleanup criteria or standards.

(*iii*) After assessing the body of evidence for the hazardous substance using a rigorous systematic review methodology, such as that used by the National Toxicology Program's Office of Health Assessment and Translation and the European Food Safety Authority, the weight of scientific evidence clearly supports the use of the proposed value as best available science for the purpose of calculating generic cleanup criteria.

(d) Use a daily exposure time for inhalation in the exposure intake for a nonresidential worker in an algorithm or equation used to calculate generic cleanup criteria under this part that is equal to the average number of hours, not to exceed 10 hours, that a nonresidential worker spends working in a 5-day work week according to the most appropriate governmental data or information.

(e) When the department considers the pregnant woman as a potential sensitive receptor to address prenatal developmental effects, the department may apply a single-event exposure scenario for a hazardous substance, under the process set forth in subdivision (f), only when either of the following occurs:

(*i*) The United States Environmental Protection Agency applies a single-event exposure scenario to establish regional screening levels for that hazardous substance.

(*ii*) The department demonstrates, after conducting a comprehensive assessment of the specific hazardous substance, that, for that specific hazardous substance, a single exposure may result in an adverse effect and the weight of scientific evidence supports the application of a single-event exposure scenario. The department's comprehensive assessment must evaluate the body of scientific evidence using a systematic review methodology, such as that used by the National Toxicology Program's Office of Health Assessment and Translation and the European Food Safety Authority. The comprehensive assessment must, if appropriate, take into account all of the following:

(A) Whether there is data available involving single-day exposures to the hazardous substance during pregnancy.

(B) The differences in sensitivity, periods of development, and progression of different types of developmental effects in humans and animals.

(C) Differences in toxicokinetics between species.

(f) Before conducting the comprehensive assessment in subdivision (e)(*ii*), the department shall provide public notice and a written explanation of its intent to do so. On completion of the assessment, the department shall conduct a stakeholder process to obtain input. If, after obtaining stakeholder input, the department elects to apply a single-event exposure scenario for a particular hazardous substance, the department shall do so in a rule.

(4) If a hazardous substance poses a carcinogenic risk to humans, the cleanup criteria derived for cancer risk under this section must be the 95% upper bound on the calculated risk of 1 additional cancer above the background cancer rate per 100,000 individuals using the generic set of exposure assumptions established under subsection (3) for the appropriate category or subcategory. If the hazardous substance poses a risk of an adverse health effect other than cancer, cleanup criteria must be derived using appropriate human health risk assessment methods for that adverse health effect and the generic set of exposure assumptions established under subsection (3) for the appropriate category or subcategory. A hazard quotient of 1.0 must be used to derive noncancer cleanup criteria. For the noncarcinogenic effects of a hazardous substance present in soils, the intake must be assumed to be 100% of the protective level, unless compound and site-specific data are available to demonstrate that a different source contribution is appropriate. If a hazardous substance poses a risk of both cancer and 1 or more adverse health effects other than cancer, cleanup criteria must be derived under this section for the most sensitive effect.

(5) If a cleanup criterion derived under subsection (4) for groundwater in an aquifer differs from either: (a) the state drinking water standards established under section 5 of the safe drinking water act, 1976 PA 399, MCL 325.1005, or (b) the national secondary drinking water regulations established under 42 USC 300g-1, or (c), if there is not national secondary drinking water regulation for a contaminant, the concentration determined by the department according to methods approved by the United States Environmental Protection Agency below which taste, odor, appearance, or other aesthetic characteristics are not adversely affected, the cleanup criterion is the more stringent of (a), (b), or (c) unless the department determines that compliance with this subsection is not necessary because the use of the aquifer is reliably restricted or controlled under provisions of a postclosure plan or a postclosure agreement or by site-specific criteria approved by the department under section 20120b.

(6) The department shall not approve a remedial action plan or no further action report in categories set

forth in subsection (1)(b) to (d), unless the person documents that the current zoning of the property is consistent with the categorical criteria being proposed, or that the governing zoning authority intends to change the zoning designation so that the proposed criteria are consistent with the new zoning designation, or the current property use is a legal nonconforming use. The department shall not grant final approval for a remedial action plan or no further action report that relies on a change in zoning designation until a final determination of that zoning change has been made by the local unit of government. The department may approve a remedial action plan or no further action report that achieves categorical criteria that are based on greater exposure potential than the criteria applicable to current zoning. In addition, the remedial action plan or no further action report must include documentation that the current property use is consistent with the current zoning or is a legal nonconforming use. Abandoned or inactive property must be considered on the basis of zoning classifications as described above.

(7) Cleanup criteria from 1 or more categories in subsection (1) may be applied at a facility, if all relevant requirements are satisfied for application of a pertinent criterion.

(8) The need for soil remediation to protect an aquifer from hazardous substances in soil must consider the vulnerability of the aquifer or aquifers potentially affected if the soil remains at the facility. Migration of hazardous substances in soil to an aquifer is a pertinent pathway if appropriately based on consideration of site-specific factors.

(9) The department may establish cleanup criteria for a hazardous substance using a biologically based model developed or identified as appropriate by the United States Environmental Protection Agency if the department determines all of the following:

(a) That application of the model results in a criterion that more accurately reflects the risk posed.

(b) That data of sufficient quantity and quality are available for a specified hazardous substance to allow the scientifically valid application of the model.

(c) The United States Environmental Protection Agency has determined that application of the model is appropriate for the hazardous substance in question.

(10) If the target detection limit or the background concentration for a hazardous substance is greater than a cleanup criterion developed for a category under subsection (1), the criterion is the target detection limit or background concentration, whichever is larger, for that hazardous substance in that category.

(11) The department may also approve cleanup criteria if necessary to address conditions that prevent a hazardous substance from being reliably measured at levels that are consistently achievable in samples from the facility in order to allow for comparison with generic cleanup criteria. A person seeking approval of a criterion under this subsection shall document the basis for determining that the relevant published target detection limit cannot be achieved in samples from the facility.

(12) In determining the adequacy of a land-use based response activity to address sites contaminated by polychlorinated biphenyls, the department shall not require response activity in addition to that which is subject to and complies with applicable federal regulations and policies that implement the toxic substances control act, 15 USC 2601 to 2697.

(13) Remedial action to address the release of uncontaminated mineral oil satisfies cleanup criteria under this part for groundwater or for soil if all visible traces of mineral oil are removed from groundwater and soil.

(14) Approval by the department of remedial action based on the categorical standard in subsection (1)(a) or (b) must be granted only if the pertinent criteria are satisfied in the affected media. The department shall approve the use of probabilistic or statistical methods or other scientific methods of evaluating environmental data when determining compliance with a pertinent cleanup criterion if the methods are determined by the department to be reliable, scientifically valid, and best represent actual site conditions and exposure potential.

(15) If a discharge of venting groundwater complies with this part, a permit for the discharge is not required.

(16) Remedial actions that rely on categorical cleanup criteria developed under subsection (1) must also consider other factors necessary to protect the public health, safety, and welfare, and the environment as specified by the department, if the department determines based on data and existing information that these considerations are relevant to a specific facility. These factors include, but are not limited to, the protection of surface water quality and consideration of ecological risks if pertinent to the facility based on the requirements of this part.

(17) The department shall promulgate all generic cleanup criteria and target detection limits as rules. Except for generic cleanup criteria and target detection limits developed before January 11, 2018, and those generic cleanup criteria determined as set forth in subsections (5) and (23) and section 20120e(1)(a), generic cleanup criteria and target detection limits, and any modifications or revisions to generic cleanup criteria and target detection limits, are not legally enforceable until promulgated as rules. The generic cleanup criteria and target detection limits are subject to all of the following:

(a) The department may periodically repromulgate rules for any portion of the generic cleanup criteria to adopt and use new toxicity values or chemical or physical data selected under subsection (3)(a) and (b) or to otherwise update the generic cleanup criteria in accordance with this part to incorporate, as appropriate, knowledge gained through research and studies in the areas of fate and transport and risk assessment taking into account best practices from other states, reasonable and realistic conditions, and sound science. The department may also repromulgate rules that establish target detection limits to update those limits in accordance with this part.

(b) If generic cleanup criteria are included in or relied on as a basis for decision in a work plan, response activity plan, remedial action plan, postclosure plan, request for certificate of completion, or similar document, that is submitted to the department or approved by the department before the effective date of a rule revising those cleanup criteria, then the generic cleanup criteria effective at the time of submittal or prior approval continue to apply to the review, revision, or implementation of the plan, request, or document, as well as to any future review, approval, or disapproval of a no further action report or any part of the no further action report that is based on the plan, request, or document, unless either of the following occurs:

(*i*) The person making the submittal voluntarily elects to apply the revised cleanup criteria.

(*ii*) The department director makes a site-specific demonstration, based on clear and convincing evidence, that the prior cleanup criteria are no longer protective of the public health, safety, or welfare, or the environment, given the totality of circumstances at the site, including any site-specific factors that reduce exposure or risk, such as the existence of land or resource use restrictions that reduce or restrict exposure. This subparagraph does not apply if, no later than 6 months after the promulgation of the rule revision changing the cleanup criteria, both of the following conditions are met:

(A) The person has substantially completed all active remediation as set forth in the approved plan, request, or similar document, and only monitoring, maintenance, or postclosure activities remain.

(B) The person submits a request for a no further action approval to the department.

(c) No further action reports that have been approved by the department and that rely on cleanup criteria that have been subsequently revised remain valid, subject to the liability provisions of section 20126(4)(e).

(d) If generic cleanup criteria are included in or relied on as a basis for decision in a no further action report, other than a no further action report described in subdivision (b)(*ii*), that is submitted to the department but not yet approved by the department before the effective date of a rule revising those cleanup criteria, then the generic cleanup criteria effective at the time of submittal continue to apply to the review, revision, and approval of the report unless either of the following occurs:

(*i*) The person making the submittal voluntarily elects to apply the revised cleanup criteria.

(*ii*) The department director makes a site-specific demonstration, based on clear and convincing evidence, that the prior generic cleanup criteria are no longer protective of the public health, safety, or welfare, or the environment, given the totality of circumstances at the site, including any site-specific factors that reduce exposure or risk, such as the existence of land or resource use restrictions that reduce or restrict exposure.

(e) A demonstration by the department director under subdivision (b) or (d) that prior cleanup criteria are no longer protective of the public health, safety, or welfare, or the environment, is appealable in accordance with section 20114e.

(f) Notwithstanding subdivisions (b) to (d), an owner's or operator's obligations under section 20107a are based on the current numeric cleanup criteria under subsection (1) or site-specific criteria approved under section 20120b.

(18) A person demonstrates compliance with indoor air inhalation criteria for a hazardous substance at a facility under this part if all of the following conditions are met:

(a) The facility is an establishment covered by the classifications provided by sector 31-33 – manufacturing, of the North American Industry Classification System, United States, 2012, published by the Office of Management and Budget.

(b) The person complies with the Michigan occupational safety and health act, 1974 PA 154, MCL 408.1001 to 408.1094, and the rules promulgated under that act applicable to the exposure to the hazardous substance, including, but not limited to, the occupational health standards for air contaminants, R 325.51101 to R 325.51108 of the Michigan Administrative Code.

(c) The hazardous substance is included in the facility's hazard communication program under section 14a of the Michigan occupational safety and health act, 1974 PA 154, MCL 408.1014a, and the hazard communication rules, R 325.77001 to R 325.77004 of the Michigan Administrative Code, except that, unless the hazardous substance is in use in the facility, the requirement to have a material safety data sheet in the workplace requires only a generic material safety data sheet for the hazardous substance and the labeling requirements do not apply.

(19) The department shall promulgate as rules the algorithms used to calculate, modify, or revise all

residential and nonresidential generic cleanup criteria, as well as the tables listing, by hazardous substance, all toxicity, exposure, and other algorithm factors or variables used in the department's calculations, modifications, or revisions.

(20) Calculation and application of toxic equivalency quotients are subject to the following:

(a) The toxic equivalency factors used must only be those adopted by the World Health Organization.

(b) When compounds contributed by 2 or more persons acting independently are combined in a toxic equivalency quotient to assess human health risks, harm is divisible and subject to apportionment of liability under subsections 20129(1) and (2).

(c) To assess human health risks, the toxic equivalency quotient must be compared to generic or site-specific criteria for the reference hazardous substance.

(21) Polychlorinated dibenzodioxin and dibenzofuran congeners are not likely to leach from soil to groundwater. The groundwater surface water interface protection and the residential drinking water protection exposure pathways are not applicable or relevant when assessing polychlorinated dibenzodioxin and dibenzofuran congeners unless the department demonstrates that those congeners are leaching at material concentrations through co-solvation.

(22) Polychlorinated dibenzodioxin and dibenzofuran congeners are not likely to volatilize from soil or groundwater into the air. Vapor inhalation exposure pathways are not applicable or relevant when assessing polychlorinated dibenzodioxin and dibenzofuran congeners.

(23) For a substance that does not have generic cleanup criteria, if, based on the best available information, the department determines that the substance is a hazardous substance, the department may calculate generic cleanup criteria for that hazardous substance using toxicity values and chemical and physical data selected under subsection (3)(a) and (b) and in accordance with all other requirements of this part and publish the generic cleanup criteria on the department's website. Within 30 days after publishing the new generic cleanup criteria, the department shall initiate rule-making to promulgate rules for the new criteria by filing a rule-making request under section 39 of the administrative procedures act of 1969, 1969 PA 306, MCL 24.239. The rule-making request must only include the revisions necessary to promulgate the new generic cleanup criteria. The new generic cleanup criteria published under this subsection take effect and are legally enforceable when published by the department if the department also initiates rule-making to promulgate rules for the new criteria within 30 days. The new generic cleanup criteria published under this subsection remain effective and legally enforceable until replaced by a final rule, or the time limitation in section 45(1) of the administrative procedures act of 1969, 1969 PA 306, MCL 24.245, is not met.

324.20120b Numeric or nonnumeric site-specific criteria.

Sec. 20120b. (1) Subject to subsection (4), the department shall approve numeric or nonnumeric site-specific criteria in a response activity under section 20120a if such criteria, in comparison to generic criteria, better reflect best available information concerning the toxicity or exposure risk posed by the hazardous substance or other factors.

(2) Site-specific criteria approved under subsection (1) may, as appropriate:

(a) Use the algorithms for calculating generic criteria established by rule or propose and use different algorithms.

(b) Alter any value, parameter, or assumption used to calculate generic criteria, with the exception of the risk targets specified in section 20120a(4).

(c) Take into consideration the depth below the ground surface of contamination, which may reduce the potential for exposure and serve as an exposure barrier.

(d) Be based on information related to the specific facility or information of general applicability, including peer-reviewed scientific literature.

(e) Use probabilistic methods of calculation.

(f) Use nonlinear-threshold-based calculations where scientifically justified.

(g) Take into account a land use or resource use restriction.

(3) If there is not a generic cleanup criterion for a hazardous substance in regard to a relevant exposure pathway, releases of the hazardous substance may be addressed through any of the following means, singly or

in combination:

(a) Eliminate exposure to the hazardous substance through removal, containment, exposure barriers, or land use or resource use restrictions.

(b) If another hazardous substance is expected to have similar fate, mobility, bioaccumulation, and toxicity characteristics, apply the cleanup criteria for that hazardous substance as a surrogate. Before using a surrogate, the person shall notify the department, provide a written explanation why the surrogate is suitable, and request approval. If the department does not notify the person that it disapproves the use of the chosen surrogate within 90 days after receipt of the notice, the surrogate is considered approved. A hazardous substance may be used as a surrogate for a single hazardous substance or for a class or category of hazardous substances.

(c) For venting groundwater, use a modeling demonstration, an ecological demonstration, or a combination of both, consistent with section 20120e(9) and (10), to demonstrate that the hazardous substance is not likely to migrate to a surface water body or has not or will not impair the existing or designated uses for a surface water body.

(d) If toxicity information is available for the hazardous substance, develop site-specific cleanup criteria for the hazardous substance pursuant to subsections (1) and (2), or develop simplified site-specific screening criteria based upon toxicity and concentrations found on site, and request department approval. If the department does not notify the person that it disapproves the site-specific criteria or screening criteria within 90 days after receipt of the request, the criteria are considered approved.

(e) Any other method approved by the department.

(4) Site-specific criteria approved by the department are not invalidated by subsequent changes to the generic criteria for that hazardous substance, including changes to toxicity, exposure, or other values or variables used by the department to calculate the generic criteria.

324.20120c Relocation of contaminated soil.

Sec. 20120c. (1) An owner or operator may relocate contaminated soil off-site or allow contaminated soil to be relocated off-site if all of the following requirements are met:

(a) The person determines that the soil can be lawfully relocated without posing a threat to the public health, safety, or welfare or the environment. In making the determination, the owner or operator shall consider whether the soil is subject to regulation under part 111. For the purposes of this subdivision, soil poses a threat to the public health, safety, or welfare or the environment if concentrations of hazardous substances in the soil exceed the cleanup criterion determined pursuant to section 20120a(1) or (2) that apply to the facility to which the soil will be relocated. Any land use or resource use restrictions that would be required for the application of a criterion pursuant to section 20120a(1) or (2) shall be in place at the facility before the soil is relocated. Contaminated soil shall not be relocated to a location that is not a facility.

(b) Prior department approval is obtained if the contaminated soil is being relocated off-site from or to either of the following:

(*i*) A facility where a remedial action plan that includes soil as an affected media has been approved by the department based on a categorical cleanup criterion in section 20120a(1)(b), (c), or (d) or site-specific criteria under section 20120a(2).

(*ii*) A facility where a no further action report that includes soil as an affected medium has been approved by the department.

(c) If contaminated soil is being relocated off-site in a manner not addressed by subdivision (b), the owner or operator of the facility from which soil is being relocated provides notice to the department within 14 days after the soil is relocated. The notice shall include all of the following:

(*i*) The facility from which soil was relocated.

(*ii*) The facility to which the soil was relocated.

(*iii*) The volume of soil relocated.

(*iv*) A summary of information or data on which the owner or operator based the determination required in subdivision (a) that the soil did not present a threat to the public health, safety, or welfare or the environment.

(*v*) If land use or resource use restrictions in a postclosure plan or a postclosure agreement would apply to

the soil when it is relocated, documentation that those restrictions are in place.

(2) An owner or operator may relocate contaminated soil, or allow contaminated soil to be relocated, on-site if all of the following requirements are met:

(a) If either a remedial action plan that includes soil as an affected medium or a no further action report that includes soil as an affected medium has been approved for a facility, the person assures that the same degree of control required for application of the criteria of section 20120a(1) or (2) under the remedial action plan or no further action report is provided for the contaminated soil. This subdivision does not apply to soils that are temporarily relocated for the purpose of implementing response activity or utility construction if the response activity or utility construction is completed in a timely fashion and the short-term hazards are appropriately controlled.

(b) If 500 cubic yards or more of contaminated soil are being relocated on-site at a facility where either a remedial action plan that includes soil as an affected medium or a no further action report that includes soil as an affected medium has been approved by the department, the owner or operator of the facility at which soil is being relocated provides notice to the department within 14 days after the soil is relocated. The notice shall include all of the following:

(*i*) The facility from which soil was relocated.

(*ii*) The facility to which the soil was taken.

(*iii*) The volume of soil relocated.

(*iv*) A summary of information or data assuring that the same degree of control required for application of the criteria of section 20120a(1) or (2) is provided for the contaminated soil under subdivision (a).

(*v*) If land use or resource use restrictions in a postclosure plan or a postclosure agreement would apply to the soil when it is relocated, documentation that those restrictions are in place.

(c) If subdivision (b) does not apply and an owner or operator relocates contaminated soil on-site without department approval or notice to the department, the owner of the facility within which contaminated soil is relocated includes the following information regarding the relocation as part of disclosing the general nature and extent of the release under section 20116 to a purchaser or other person to which the facility is transferred:

(*i*) The facility from which soil was relocated.

(*ii*) The facility to which the soil was taken.

(*iii*) The volume of soil relocated.

(*iv*) A summary of the basis for the owner's or operator's determination that the relocation did not cause any exacerbation under section 20107a(1).

(d) Section 20107a(1) and (3) applies to the relocation of soil under this subsection even if an owner or operator is not otherwise subject to section 20107a.

(3) The determination required by subsections (1)(a) and (2)(a) shall be based on knowledge of the person undertaking or approving of the removal or relocation of soil, or on characterization of the soil for the purpose of compliance with this section.

(4) This section does not apply to the following:

(a) Soil that is designated as an inert material pursuant to section 11507(3).

(b) Uncontaminated soil that is mixed with a beneficial use by-product under part 115.

(c) Soil that is relocated for treatment or disposal in conformance with applicable laws and regulations.

(d) The relocation of uncontaminated soil.

(5) As used in this section:

(a) "Contaminated soil" means soil that meets all of the following criteria:

(*i*) The soil is contaminated with 1 or more hazardous substances at levels that exceed the background concentration for that hazardous substance or those hazardous substances.

(*ii*) The soil is contaminated with 1 or more hazardous substances at levels that exceed any applicable cleanup criteria under section 20120a(1) or any applicable site-specific criteria under section 20120b.

(b) "Off-site" means property that is not on-site.

(c) "On-site" means within any contiguous or adjacent parcels owned by or under the control of an owner or operator.

(d) "Uncontaminated soil" means soil that is either of the following:

(*i*) Not contaminated with any hazardous substances due to human activity.

(*ii*) Contaminated with 1 or more hazardous substances as a result of human activity but the levels of those hazardous substances at the facility do not exceed any categorical cleanup criteria under section 20120a(1) or site-specific criteria under section 20120b.

History: Add. 1995, Act 71, Imd. Eff. June 5, 1995;—Am. 2010, Act 228, Imd. Eff. Dec. 14, 2010;—Am. 2012, Act 446, Imd. Eff. Dec. 27, 2012.

324.20120d Public meeting; notice; publication; summary document; administrative record; comments or information not included in record.

Sec. 20120d. (1) At a facility where state funds will be spent to develop or implement a remedial action plan or where the department determines there is a significant public interest, within 30 days after the completion of a remedial investigation for the facility, the department shall provide the county and the township, city, or village in which the facility is located a notice of the completion of the remedial investigation, a summary of the remedial investigation, and notice of an opportunity for residents of the local unit of government to meet with the department regarding the remedial investigation and any proposed feasibility study for the facility. Upon a request for a public meeting by the governing body of the local unit of government or by 25 citizens of the local unit of government, the department shall, within 30 days of the request, meet with persons in the local unit of government. The person or persons requesting the public meeting shall publicize and provide accommodations for the meeting. The meeting shall be held in the local unit of government in which the facility is located. The department shall provide copies of the notices and summary required in this subsection to the governing body of the local unit of government, to the known persons who are liable under section 20126, and to the main public library of the local unit of government in which the facility is located. The department shall send representatives to the meeting who are familiar with the facility and who are involved with determining the appropriate remedial actions to be taken at the facility. Persons who are liable under section 20126 for the facility may send representatives to the meeting.

(2) Before approval of a proposed remedial action plan, response activity plan, or no further action report based on categorical criteria provided for in section 20120a(1)(c) or (d) or site-specific criteria provided for in section 20120a(2) and where the department determines that there is significant public interest, the department shall do all of the following:

(a) Publish a notice and brief summary of the proposed remedial action plan, response activity plan, or no further action report.

(b) Provide for public review and comment pertinent to documents relating to the proposed remedial action plan, response activity plan, or no further action report.

(c) Provide an opportunity for a public meeting at or near the facility when any of the following occur:

(*i*) The department determines that there is a significant public interest or that for any other reason a public meeting is appropriate.

(*ii*) A city, township, or village in which the facility is located, by a majority vote of its governing body, requests a public meeting.

(*iii*) A local health department with jurisdiction in the area in which the facility is located requests a public meeting.

(d) Provide a document that summarizes the major issues raised by the public and how they are to be addressed by the final approved remedial action plan, response activity plan, or no further action report.

(3) For purposes of this section, publication shall include, at a minimum, publication in a local newspaper or newspaper of general circulation in this state. In addition, the administrative record shall be made available by the department for inspection by members of the public at or near the facility and in Lansing.

(4) The department shall prepare a summary document that explains the reasons for the selection or approval of a remedial action plan, response activity plan, or no further action report. In addition, the department shall compile an administrative record of the decision process that results in the selection of a remedial action plan. The administrative record shall contain all of the following:

(a) Remedial investigation data regarding the facility.

(b) If applicable, a feasibility study and remedial actions planned or completed.

(c) If applicable, a summary document that explains the reasons why a remedial investigation or feasibility study was not conducted.

(d) Applicable comments and information received from the public, if any.

(e) If applicable, a document that summarizes the significant concerns raised by the members of the public and how they are to be addressed.

(f) Other information appropriate to the facility.

(5) If comments or information are submitted for inclusion in the administrative record that are not included in the administrative record, a brief explanation of why the information was not considered relevant shall be sent to the party by the department and included in the record.

324.20120e Response activity providing for venting groundwater; definitions.

Sec. 20120e. (1) Subject to other requirements of this section, a person may demonstrate compliance with requirements under this part for a response activity providing for venting groundwater by meeting any of the following, singly or in combination:

(a) Generic GSI criteria, which are the water quality standards for surface waters developed by the department pursuant to part 31. The use of surface water quality standards or variances shall be allowable in any of the cleanup categories provided for in section 20120a(1).

(b) A variance from the surface water quality standards as approved by the department under part 31. A variance shall be used only if the variance is requested by a person performing response activities with respect to venting groundwater.

(c) Mixing zone-based GSI criteria established under this part, which are consistent with part 31. The use of mixing zone-based GSI criteria shall be allowable in any of the categories provided for in section 20120a(1) and (2) and shall be allowable for criteria based on chronic-based or acute-based surface water quality criteria.

(d) Site-specific criteria established under section 20120b or this subdivision or a combination of both. The use of mixing zones established under this part may be applied to, or included as, site-specific criteria. Biological criteria may be used as site-specific criteria. If biological criteria are used, then sentinel wells shall be used for a period as needed to determine if the biological criteria may be exceeded due to future increased mass loading to the surface water from the venting plume. Numerical evaluations of analyses of the samples from the sentinel wells shall be performed in connection with this determination.

(e) An ecological demonstration under subsection (9).

(f) A modeling demonstration under subsection (10).

(2) Whole effluent toxicity testing shall not be required or be a criterion or be the basis for any criteria under subsection (1) for venting groundwater except for samples taken at the GSI.

(3) The pathway addressed by GSI criteria under subsection (1) shall be considered a relevant pathway when a remedial investigation or application of best professional judgment leads to the conclusion that a hazardous substance in groundwater is reasonably expected to vent to surface water in concentrations that exceed the generic GSI criteria. The factors to be considered in determining whether the pathway is relevant include all of the following:

(a) Whether there is a hydraulic connection between groundwater and the surface water in question.

(b) The proximity of surface water to source areas and areas of the groundwater contaminant plume that currently, or may in the future be expected to, exceed the generic GSI criteria.

(c) Subject to subsection (23)(g), whether the receiving surface water is a surface water of the state as that term is defined in part 31 and rules promulgated under that part.

(d) The direction of groundwater movement.

(e) The presence of artificial structures or natural features that would alter hydraulic pathways. This includes, but is not limited to, highly permeable zones, utility corridors, and seawalls.

(f) The mass of hazardous substances present at the facility that may affect groundwater.

(g) Documented facility-specific evidence of natural attenuation, if any.

(h) Whether or not a sewer that has an outfall to surface water has openings in the portion of the sewer where the sewer and the groundwater contaminant plume intersect that allows the groundwater contaminant plume to migrate into the sewer. If it can be demonstrated that the sewer is sufficiently tight to prevent inflow to the sewer where the groundwater contaminant plume intersects the sewer or if the sewer is otherwise impervious, based on accepted industry standards, to prevent inflow from groundwater into the sewer at that location, then the GSI pathway with respect to the sewer is not relevant and shall not apply.

(4) For purposes of determining the relevance of a pathway under subsection (3), both of the following apply:

(a) GSI monitoring wells are not required in order to make a determination if other information is sufficient to make a judgment that the pathway is not relevant.

(b) Fate and transport modeling may be used, if appropriate, to support a professional judgment.

(5) A person may proceed under section 20114a to undertake the following response activities involving

venting groundwater:

(a) Evaluation activities associated with a response activity providing for venting groundwater using alternative monitoring points, an ecological demonstration, a modeling demonstration, or any combination of these. If a person who is liable under section 20126 decides not to take additional response activities to address the GSI pathway based on alternative monitoring points, an ecological demonstration, a modeling demonstration, or a determination under subsection (14), or any combination of these, the person shall notify the department and request department approval. A notification and request for approval under this subdivision shall not be considered an admission of liability under section 20126.

(b) Response activities that rely on GSI monitoring wells to demonstrate compliance under subsection (1)(a).

(c) Except as provided in subdivision (a) and subsection (6), response activities that rely on monitoring from alternative monitoring points to demonstrate compliance with subsection (1)(a) if the person submits to the department a notice of alternative monitoring points at least 30 days prior to relying on those alternative monitoring points that contains substantiating evidence that the alternative monitoring points comply with this section.

(d) Response activities implemented by a person who is not liable under section 20126 that rely on a modeling demonstration, or rely on an ecological demonstration, or a combination of these, to demonstrate compliance with subsection (1)(a).

(6) A person shall proceed under section 20114b to undertake response activities that rely on monitoring from alternative monitoring points or rely on an ecological demonstration, a modeling demonstration, or a combination of these, to demonstrate compliance with subsection (1)(a) if 1 or more of the following conditions apply to the venting groundwater:

(a) An applicable criterion is based on acute toxicity endpoints.

(b) The venting groundwater contains a bioaccumulative chemical of concern as identified in the water quality standards for surface waters developed pursuant to part 31 and for which the person is liable under this part.

(c) The venting groundwater is entering a surface water body protected for coldwater fisheries identified in the following publications:

(*i*) "Coldwater Lakes of Michigan," as published in 1976 by the department of natural resources.

(*ii*) "Designated Trout Lakes and Regulations," issued September 10, 1998, by the director of the department of natural resources under the authority of part 411.

(*iii*) "Designated Trout Streams for the State of Michigan," as issued under order of the director of the department of natural resources, FO-210.08, on November 8, 2007.

(d) The venting groundwater is entering a surface water body designated as an outstanding state resource water or outstanding international resource water as identified in the water quality standards for surface waters developed pursuant to part 31.

(7) A person shall proceed under section 20114b to undertake response activities that rely on monitoring from alternative monitoring points, or rely on an ecological demonstration, or rely on a modeling demonstration or that use mixing zone-based GSI criteria, or any combination of these, as applicable, to demonstrate compliance with subsection (1)(b), (c), (d), (e), or (f).

(8) Alternative monitoring points may be used to demonstrate compliance with subsection (1) if the alternative monitoring points meet the following standards:

(a) The locations where venting groundwater enters surface water have been reasonably identified to allow monitoring for the evaluation of compliance with criteria. This identification shall include all of the following:

(*i*) Identification of the location of alternative monitoring points within areas of venting groundwater.

(*ii*) Documentation of the approximate boundaries of the areas where the groundwater plume vents to surface water. This documentation shall include information about the substrate character and geology in the areas where groundwater vents to surface water.

(*iii*) Documentation that the venting area identified and alternative monitoring points include points that are reasonably representative of the higher concentrations of hazardous substances present in the groundwater at the GSI.

(b) The alternative monitoring points allow for venting groundwater to be sampled at the GSI. Devices used for sampling at alternative monitoring points may be beyond the water's edge and on top of or into the sediments, at the GSI.

(c) Sentinel monitoring points are used in conjunction with the alternative monitoring points for a period as needed to assure that any potential exceedance of an applicable surface water quality standard can be identified with sufficient notice to allow additional response activity, if needed, to be implemented that will

address the exceedance. Sentinel monitoring points shall include, at a minimum, monitoring points upland of the surface water body.

(9) An ecological demonstration may be used to demonstrate compliance with subsection (1) if the ecological demonstration meets the following:

(a) The boundaries of the area where the groundwater plume vents to surface water are documented as provided in subsection (8)(a)(*ii*).

(b) Sampling data for the area described in subdivision (a), when compared to other reasonably proximate areas of that surface water body, do not show an impairment of existing or designated uses for that surface water body caused by, or contributed to by, the venting plume, or do not show that the venting plume will cause or contribute to impairment of existing or designated uses of that surface water body in a situation where the area of the surface water immediately outside the venting area of the venting plume shows an impairment of existing or designated uses.

(c) Sampling data for the area described in subdivision (a) do not show exceedances of applicable criteria under subsection (1) in the surface water body caused by, or contributed to by, the venting plume.

(d) The sampling data in subdivisions (b) and (c) may be data on benthic organisms, fish, and the water column of the surface water, which data may be in the form of an in situ bioassay or a biological community assessment.

(e) Sentinel monitoring in on-land wells is performed for a period as needed to show that the groundwater plume is not likely to migrate to the surface water body and vent in the future in a mass amount and rate that would impair the existing or designated uses for that surface water body, or cause or contribute to exceedances of surface water quality standards in the surface water body.

(10) A modeling demonstration may be used to demonstrate compliance with subsection (1) if the modeling demonstration meets all of the following:

(a) The modeling methodology is generally recognized as a means to model venting groundwater plumes or is an innovative method that is scientifically justifiable.

(b) The results of the modeling show that the venting plume at the GSI complies with the applicable criteria under subsection (1) or supports the ecological demonstration, as applicable.

(c) The model is supported by site-specific information and appropriate field measurements.

(11) If alternative monitoring points or an ecological demonstration or a modeling demonstration or a combination of these is used for the response activity and sentinel wells are installed, a contingency plan for potential additional response activity may be required.

(12) If a person intends to utilize mixing zone-based GSI criteria under subsection (1)(c) or site-specific criteria under subsection (1)(d) in conjunction with alternative monitoring points, an ecological demonstration, or a modeling demonstration, or a combination of these, the person shall submit to the department a response activity plan that includes the following:

(a) A demonstration of compliance with the standards in subsection (6), (7), or (8), as applicable.

(b) If compliance with a mixing zone-based groundwater-surface water interface criterion under subsection (1)(c) is to be determined with data from the alternative monitoring points, documentation that it is possible to reasonably estimate the volume and rate of venting groundwater.

(c) A site-specific monitoring plan that takes into account the basis for the site-specific criterion or mixing zone criterion.

(13) If there is an exceedance of an applicable GSI criterion based on acute toxicity at a compliance monitoring point applicable at a particular facility, then action shall be taken as follows:

(a) A person that is implementing the response activity at that facility and that determines that there is an exceedance shall notify the department of that condition within 7 days of obtaining knowledge that the exceedance is occurring.

(b) If the person described in subdivision (a) is a person liable under section 20126, then that person shall, within 30 days of the date on which notice is required under subdivision (a), do 1 or more of the following:

(*i*) Commence response activity to address the exceedance at the applicable compliance monitoring point and submit a schedule to the department for the response activity.

(*ii*) Submit a notice of intent to the department to propose an alternative monitoring point or perform an ecological demonstration or perform a modeling demonstration or a combination of these. The notice shall include a schedule for submission of the proposal.

(*iii*) Submit a notice of intent to the department to propose a site-specific criterion or a mixing zone criterion under sections 20120a and 20120b. The notice shall include a schedule for submission of the proposal.

(c) The department may approve a schedule as submitted under subdivision (b) or direct reasonable modifications in the schedule. The department may grant extensions of time for actions required under

subdivision (b) and for activities in an approved or department-modified schedule if the person is acting in good faith and site conditions inhibit progress or completion of the activity. The department's decision to grant an extension or impose a schedule modification shall consider the practical problems associated with carrying out the response activity and the nature and extent of the exceedances of applicable GSI criteria.

(14) Response activity beyond evaluations shall not be required if venting groundwater has no effect or only a de minimis effect on a surface water body. A determination under this subsection may be based on mass flow and rate of groundwater movement calculations. A person evaluating a venting plume that determines that the plume has no effect or only a de minimis effect on a surface water body shall notify the department of the determination. The department may, within 90 days after receipt of the determination, disapprove the determination. If the department does not notify the person that it disapproves the determination within the 90-day period, then the person's determination shall be final.

(15) If a person has controlled the source of groundwater contamination and has demonstrated that compliance with GSI criteria developed under this part is unachievable, that person may file a technical impracticability waiver request with the department. The technical impracticability waiver shall document the reasons why compliance is unachievable. The department shall respond to the waiver within 180 days with an approval, request for additional information, or denial that provides a detailed description of the reasons for denial.

(16) Natural attenuation of hazardous substances in venting groundwater upgradient of the GSI is an acceptable form of remediation and may be relied upon in lieu of any active remediation of the groundwater. Natural attenuation may be occurring by way of dispersion, diffusion, sorption, degradation, transformative reactions, and other methods.

(17) A permit shall not be required under part 31 for any venting groundwater contamination plume that is addressed under this section.

(18) Wetlands shall be protected for the groundwater surface water pathway to the extent that particular designated uses, as defined by part 31, which are specific to that wetland would otherwise be impaired by a groundwater contamination plume venting to surface water in the wetland.

(19) If a groundwater contamination plume is entering a sewer that discharges to surface water, and the GSI pathway is relevant, all of the following apply:

(a) If the groundwater enters a storm sewer that is owned or operated by an entity that is subject to federal municipal separate storm sewer system regulations and a part 31 permit for the discharges from the system, the contaminated groundwater entering the sewer is subject to regulation by the entity's ordinance regarding illicit discharges, but the regulation of the contaminated groundwater shall not prevent the use of subdivision (b) or other provisions of this section to determine the need for response activity under this part.

(b) All of the following apply:

(*i*) The compliance monitoring point may be a groundwater monitoring well, if proposed by the person performing the response action, or that person may choose another point for measuring compliance under this subparagraph.

(*ii*) A mixing zone may be applied that accounts for the mixing which occurs in the receiving surface water into which the sewer system discharges.

(*iii*) Attenuation that occurs in the sewer system prior to the sewer system outfall to surface water shall be considered.

(*iv*) The compliance point is at the sewer system outfall to surface water, which shall account for any applicable mixing zone for the sewer system outfall.

(*v*) Monitoring to determine compliance may be performed at a location where the contaminated groundwater enters the sewer or downstream from that location but upstream of the sewer outfall at the surface water, if practicable and representative. Appropriate back calculation from the compliance point to the monitoring point may be applied to account for mixing and other attenuation that occurs in the sewer system before the compliance point. As appropriate, such a monitoring point may require another monitoring point in the sewer system upstream from the area where the contaminated groundwater enters the sewer. Upstream sampling in the sewer may be performed to determine source contribution.

(*vi*) The contaminant mass flow, and the rate and amount of groundwater flow, into the sewer may be considered and may result in a determination that the migration into the sewer is de minimis and does not require any response activity in addition to the evaluation that leads to such determination.

(c) Factors in subdivision (b) may be considered and applied to determine if an illicit discharge is occurring and how to regulate the discharge.

(20) If the department denies a response activity plan containing a proposal for alternative monitoring points, an ecological demonstration, or a modeling demonstration, or a combination of these, the department shall state the reasons for denial, including the scientific and technical basis for the denial. A person may

appeal a decision of the department in a response activity plan or no further action report regarding venting groundwater as a scientific or technical dispute under section 20114e.

(21) This section is intended to allow a person to demonstrate compliance with requirements under this part for a response activity involving venting groundwater, and, for this purpose, this section shall be given retroactive application and shall be available for use by such person. A person performing response activity involving venting groundwater under any judgment, consent judgment, order, consent order, or agreement that was entered prior to the effective date of the 2012 amendatory act that amended this section may pursue, alter, or terminate such response activity based on any provision of this section subject to any necessary entry or approval by the court in a case of a judgment, consent judgment, or court order or any necessary amendment procedure to amend an agreement. The department shall not oppose use of any provision of this section as grounds to amend an agreement or for a court to modify or terminate response activity obligations involving venting groundwater under a judgment, consent judgment, or court order. A person performing response activity involving venting groundwater under any remedial action plan, interim response plan designed to meet criteria, interim response action plan, or response activity plan that was approved by the department prior to the effective date of the 2012 amendatory act that amended this section may submit an amended plan to the department for approval that pursues, alters, or terminates response activity based on any provision of this section. The department shall not oppose use of any provision of this section in approving an amended plan.

(22) A person that undertakes response activity under subsection (4) or that takes action under subsection (13)(b) shall not be considered to be making an admission of liability by undertaking such response activities or taking such action.

(23) As used in this section:

(a) "Alternative monitoring points" means alternative monitoring points authorized under subsection (8).

(b) "Ecological demonstration" means an ecological demonstration authorized under subsection (1)(e).

(c) "GSI" means groundwater-surface water interface, which is the location at which groundwater enters surface water.

(d) "GSI monitoring well" means a vertical well installed in the saturated zone as close as practicable to surface water with a screened interval or intervals that are representative of the groundwater venting to the surface water.

(e) "Mixing zone-based GSI criteria" means mixing zone-based GSI criteria authorized under subsection (1)(c).

(f) "Modeling demonstration" means a modeling demonstration authorized under subsection (1)(f).

(g) "Surface water" does not include any of the following:

(*i*) Groundwater.

(*ii*) Hyporheic zone water.

(*iii*) Water in enclosed sewers.

(*iv*) Water in drainage ways and ponds used solely for wastewater or storm water conveyance, treatment, or control.

(*v*) Water in subgrade utility runs and utility lines and permeable fill in and around them.

324.20120f Vapor intrusion; evaluation and management methods.

Sec. 20120f. (1) To satisfy the requirements of this part, a person may evaluate, address, and manage the vapor intrusion to the indoor air inhalation exposure pathway for a hazardous substance using any of the following methods:

(a) Meeting all of the conditions in section 20120a(18).

(b) For purposes of evaluating and addressing the vapor intrusion to the indoor air inhalation pathway in connection with any release of petroleum as described as a regulated substance defined in section 21303(h)(*ii*), the process outlined in the Interstate Technology Regulatory Council petroleum vapor intrusion guidance document (PVI-1, Oct-14).

(c) An approach, using multiple lines of evidence, demonstrating that the vapor intrusion to the indoor air inhalation exposure pathway does not pose an unacceptable risk to the public health, safety, or welfare, or the environment consistent with all or a combination of 1 or more of the following:

(*i*) The United States Environmental Protection Agency "OSWER Technical Guide for Assessing and Mitigating the Vapor Intrusion Pathway from Subsurface Vapor Sources to Indoor Air" (OSWER Publication 9200.2-154, June 2015).

(*ii*) The Interstate Technology Regulatory Council petroleum vapor intrusion guidance document (PVI-1, Oct-14).

(*iii*) The United States Environmental Protection Agency's "Documentation for EPA's Implementation of the Johnson and Ettinger Model to Evaluate Site Specific Vapor Intrusion into Buildings Version 6.0" (USEPA, September 2017).

(d) Indoor air sampling that accounts for actual site conditions and demonstrates acceptable indoor air concentrations resulting from vapor intrusion compared to any of the following:

(*i*) When criteria in subparagraph (*ii*) are not available, regional screening levels published by the United States Environmental Protection Agency that are applicable to residential or nonresidential land use, as appropriate, at cancer and noncancer risk levels specified in section 20120a(4).

(*ii*) Applicable indoor air inhalation generic cleanup criteria promulgated by the department.

(*iii*) Site-specific criteria approved by the department.

(e) An alternative method or model for assessing vapor intrusion risk that utilizes only site-specific variables or a combination of site-specific or building-specific variables if the method or model is scientifically sound and supported by adequate site information. An alternative method or model under this subdivision to address contamination that has migrated beyond the boundaries of the property that is the source of the release must be approved by the department.

(f) A method or model allowed in a promulgated rule.

(2) The indoor air inhalation pathway is not a reasonable and relevant pathway for purposes of response activities undertaken under this part if there is no occupied building or planned occupied building that is within the following distances from subsurface volatile hazardous substance contamination:

(a) For petroleum contamination, within both a 30-foot lateral separation distance and the permissible vertical separation distance under the Interstate Technology Regulatory Council petroleum vapor intrusion guidance document (PVI-1, Oct-14).

(b) For any volatile hazardous substance contamination other than petroleum, within both a 100-foot lateral separation distance and a 100-foot vertical separation distance.

(3) If there is an occupied building or planned occupied building within the distances from subsurface volatile hazardous substance contamination in subsection (2), the indoor air inhalation pathway is not necessarily a reasonable and relevant pathway; rather, further evaluation is needed to determine whether the indoor air inhalation pathway is reasonable and relevant considering site-specific factors such as site-specific geology or hydrogeology, measured contaminant concentrations, the existence of institutional controls, including land use or resource use restrictions, or the existence of exposure controls, exposure barriers, or other mitigating factors, including building ventilation or use.

324.20121 Land or resource use restrictions; restrictive covenants or other instruments.

Sec. 20121. (1) A person may impose land or resource use restrictions to reduce or restrict exposure to hazardous substances, to eliminate a potential exposure pathway, to assure the effectiveness and integrity of containment or exposure barriers, to provide for access, or to otherwise assure the effectiveness and integrity of response activities undertaken at a property.

(2) A restrictive covenant used to impose land or resource use restrictions under subsection (1) shall, at a minimum, include all of the following:

(a) A legal description of the property that is subject to the restrictions that is sufficient to identify the property and is sufficient to record the document with the register of deeds for the county where the property is located. If the property being restricted constitutes a portion of a parcel, the restrictive covenant shall also include 1 of the following:

(*i*) A legal description and a scaled drawing of the portion that is restricted.

(*ii*) A survey of the portion that is restricted.

(*iii*) Another type of description or drawing approved by the department.

(b) A brief narrative description of response activities and environmental contamination at the property or identify a publicly accessible information repository where that information may be obtained, such as a public library.

(c) A description of the activity and use limitations imposed on the property. The description should be drafted, to the extent practicable, using plain, everyday language in an effort to make the activity and use limitations understandable to the reader without having to reference statutory or regulatory text or department guidance.

(d) A grant to the department of the ability to enforce the restrictive covenant by legal action in a court of appropriate jurisdiction.

(e) A signature of the property owner or someone with the express written consent of the property owner unless the restrictive covenant has been ordered by a court of competent jurisdiction. For condominium common elements and similar commonly owned property, the restrictive covenant may be signed by an authorized person.

(3) In addition to the requirements of subsection (2), a restrictive covenant may contain other information, restrictions, requirements, and rights agreed to by the persons signing it, including, but not limited to, 1 or more of the following:

(a) A provision requiring notice to the department or other persons upon transfer or before construction or changes in use that could affect environmental contamination or increase exposure at the property.

(b) A provision granting rights of access to the department or other persons. These rights may include, but are not limited to, the right to enter the property for the purpose of monitoring compliance with the restrictive covenant, the right to take samples, and the right to implement response activities.

(c) A provision subordinating a property interest that has priority, if agreed to by the person that owns the superior interest.

(d) A provision granting the right to enforce the restrictive covenant to persons in addition to the department, including, but not limited to, the local unit of government in which the property is located or the United States environmental protection agency.

(e) A provision obligating the owner of the land subject to the restrictive covenant to inspect or maintain exposure barriers, permanent markers, fences, or other aspects of the response action or remedy.

(f) A provision limiting the restrictive covenant to a specific duration, or terminating the restrictive covenant upon the occurrence of a specific event or condition, such as the completion of additional response activities that are approved by the department.

(g) A provision providing notice of hazardous substances that exceed aesthetic-based cleanup criteria.

(4) A restrictive covenant used to impose land or resource use restrictions under this section shall be recorded with the register of deeds for the county where the property is located.

(5) A restrictive covenant under this section that is recorded under subsection (4) does both of the following:

(a) Runs with the land.

(b) Is perpetual unless, by its terms, it is limited to a specific duration or is terminated by the occurrence of a specific event.

(6) Upon recording, a copy of the restrictive covenant shall be provided to the department together with a notice that includes the street address or parcel number for the property or properties subject to the covenant. A restrictive covenant that meets the requirements of this section need not be approved by the department except as expressly required elsewhere in this part.

(7) The following instruments may impose the land or resource use restrictions described in subsection (1) if they meet the requirements of a restrictive covenant under this section:

(a) A conservation easement.

(b) A court order or judicially approved settlement involving the property.

(8) An institutional control may be used to impose the land or resource use restrictions described in subsection (1) instead of or in addition to a restrictive covenant. Institutional controls that may be considered include, but are not limited to, local ordinances or state laws and regulations that limit or prohibit the use of contaminated groundwater, prohibit the raising of livestock, prohibit development in certain locations, or restrict property to certain uses, such as a zoning ordinance. A local ordinance that serves as an institutional control under this section shall be published and maintained in the same manner as a zoning ordinance and shall include a requirement that the local unit of government notify the department at least 30 days prior to adopting a modification to the ordinance or prior to the lapsing or revocation of the ordinance.

(9) Alternative instruments and means may be used, with department approval, to impose the land or

resource use restrictions described in subsection (1), including, but not limited to, licenses and license agreements, contracts with local, state, or federal units of government, health codes or regulations, or government permitting requirements.

(10) The department, with the approval of the state administrative board, may place restrictive covenants described in this section on deeds of state-owned property.

(11) A restrictive covenant recorded pursuant to this part, whether recorded before or after the effective date of the amendatory act that added this section, is valid and enforceable even if 1 or more of the following situations exist:

(a) It is not appurtenant to an interest in real property.

(b) The right to enforce it can be or has been assigned.

(c) It is not of a character that has been recognized traditionally at common law.

(d) It imposes a negative burden.

(e) It imposes an affirmative obligation on a person having an interest in the real property.

(f) The benefit or burden does not touch or concern real property.

(g) There is no privity of estate or contract.

(h) The owner of the land subject to the restrictive covenant and the person benefited or burdened are the same person.

(12) Restrictive covenants or other instruments that impose land or resource use restrictions that were recorded before the effective date of the amendatory act that added this section are not invalidated or made unenforceable by this section. Except as provided in subsection (11), this section only applies to a restrictive covenant or other instrument recorded after the effective date of the amendatory act that added this section. This section does not invalidate or render unenforceable any instrument or interest that is otherwise enforceable under the law of this state.

324.20126 Liability under part.

Sec. 20126. (1) Notwithstanding any other provision or rule of law and except as provided in subsections (2), (3), (4), and (5) and section 20128, the following persons are liable under this part:

(a) The owner or operator of a facility if the owner or operator is responsible for an activity causing a release or threat of release.

(b) The owner or operator of a facility at the time of disposal of a hazardous substance if the owner or operator is responsible for an activity causing a release or threat of release.

(c) An owner or operator of a facility who becomes an owner or operator on or after June 5, 1995, unless the owner or operator complies with either of the following:

(*i*) A baseline environmental assessment is conducted prior to or within 45 days after the earlier of the date of purchase, occupancy, or foreclosure, and the owner or operator provides the baseline environmental assessment to the department and subsequent purchaser or transferee within 6 months after the earlier of the date of purchase, occupancy, or foreclosure. For purposes of this section, assessing property to conduct a baseline environmental assessment does not constitute occupancy.

(*ii*) The owner or operator requests and receives from the department a determination that its failure to comply with the time frames in subparagraph (*i*) when conducting and submitting a baseline environmental assessment was inconsequential.

(d) A person who by contract, agreement, or otherwise arranged for disposal or treatment, or arranged with a transporter for transport for disposal or treatment, of a hazardous substance owned or possessed by the

person, by any other person, at a facility owned or operated by another person and containing the hazardous substance. This subdivision does not include any of the following:

(*i*) A person who, on or after June 5, 1995, arranges for the sale or transport of a secondary material for use in producing a new product. As used in this subparagraph, secondary material means scrap metal, paper, plastic, glass, textiles, or rubber, that has demonstrated reuse or recycling potential and has been separated or removed from the solid waste stream for reuse or recycling, whether or not subsequent separation and processing is required, if substantial amounts of the material are consistently used in the manufacture of products that may otherwise be produced from a raw or virgin material.

(*ii*) A person who, prior to June 5, 1995, arranges for the sale or transport of a secondary material for use in producing a new product unless the state has incurred response activity costs associated with these secondary materials prior to December 17, 1999. As used in this subparagraph, secondary material means scrap metal, paper, plastic, glass, textiles, or rubber, that has demonstrated reuse or recycling potential and has been separated or removed from the solid waste stream for reuse or recycling, whether or not subsequent separation and processing is required, if substantial amounts of the material are consistently used in the manufacture of products that may otherwise be produced from a raw or virgin material.

(*iii*) A person who arranges the lawful transport or disposal of any product or container that is commonly used in a residential household, is in a quantity commonly used in a residential household, and was used in the person's residential household.

(*iv*) A person who stores or uses or arranges for the storage or use of a beneficial use by-product or inert material in compliance with part 115.

(e) A person who accepts or accepted any hazardous substance for transport to a facility selected by that person.

(f) The estate or trust of a person described in subdivisions (a) to (e).

(2) Subject to section 20107a, an owner or operator who complies with subsection (1)(c)(*i*) and (*ii*) is not liable for contamination existing at the facility at the earlier of the date of purchase, occupancy, or foreclosure, unless the person is responsible for an activity causing the contamination existing at the facility. Subsection (1)(c) does not alter a person's liability with regard to a subsequent release or threat of release at a facility if the person is responsible for an activity causing the subsequent release or threat of release.

(3) Notwithstanding subsection (1), the following persons are not liable under this part with respect to contamination at a facility resulting from a release or threat of release unless the person is responsible for an activity causing that release or threat of release:

(a) The state or a local unit of government that acquired ownership or control of a facility involuntarily through bankruptcy, tax delinquency, abandonment, or other circumstances in which the government involuntarily acquires title or control by virtue of its governmental function or as provided in this part; a local unit of government to which ownership or control of a facility is transferred by the state or by another local unit of government that is not liable under subsection (1); or the state or a local unit of government that acquired ownership or control of a facility by seizure, receivership, or forfeiture pursuant to the operation of law or by court order.

(b) A state or local unit of government that holds or acquires an easement interest in a facility, holds or acquires an interest in a facility by dedication in a plat, or by dedication pursuant to 1909 PA 283, MCL 220.1 to 239.6, or otherwise holds or acquires an interest in a facility for a transportation or utility corridor, including sewers, pipes, and pipelines, or public right of way.

(c) A person who holds an easement interest in a facility or holds a utility franchise to provide service, for the purpose of conveying or providing goods or services, including, but not limited to, utilities, sewers, roads, railways, and pipelines; or a person that acquires access through an easement.

(d) A person who owns severed subsurface mineral rights or severed subsurface formations or who leases subsurface mineral rights or formations.

(e) The state or a local unit of government that leases property to a person if the state or the local unit of government is not liable under this part for environmental contamination at the property.

(f) A person who owns or occupies residential real property if hazardous substance use at the property is consistent with residential use.

(g) A person who acquires a facility as a result of the death of the prior owner or operator of the facility, whether by inheritance, devise, or transfer from an inter vivos or testamentary trust.

(h) A person who did not know and had no reason to know that the property was a facility. To establish that the person did not know and did not have a reason to know that the property was a facility, the person shall have undertaken at the time of acquisition all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice. A determination of liability under this subdivision shall take into account any specialized knowledge or experience on the part of the person, the

relationship of the purchase price to the value of the property if uncontaminated by a hazardous substance, commonly known or reasonable ascertainable information about the property, the obviousness of the presence or likely presence of a release or threat of release at the property, and the ability to detect a release or threat of release by appropriate inspection.

(i) A utility performing normal construction, maintenance, and repair activities in the normal course of its utility service business. This subdivision does not apply to property owned by the utility.

(j) A lessee who uses the leased property for a retail, office, or commercial purpose regardless of the level of the lessee's hazardous substance use.

(k) A person who holds a license, easement, or lease, or who otherwise occupies or operates property, for the purpose of siting, constructing, operating, or removing a wind energy conversion system or any component of a wind energy conversion system. As used in this subdivision, "wind energy conversion system" means that term as defined in section 13 of the clean, renewable, and efficient energy act, 2008 PA 295, MCL 460.1013.

(*l*) A person who owns or occupies a residential condominium unit for both of the following:

(*i*) Contamination of the unit if hazardous substance use within the unit is consistent with residential use.

(*ii*) Contamination of any general common element, limited common element, or common area in which the person has an ownership interest or right of occupation by reason of owning or occupying the residential condominium unit.

(4) Notwithstanding subsection (1), the following persons are not liable under this part:

(a) The owner or operator of property at or from which there is a release or threat of release and the release or threat of release is subject to corrective action under part 111 or is being addressed as part of a corrective action under part 111. A corrective action under part 111 may be implemented using processes and cleanup criteria, as appropriate, under this part. However, a release or threat of release that is subject to or that has been or is being addressed through part 111 corrective action shall not also be subject to remediation and department oversight under this part.

(b) A lender that engages in or conducts a lawful marshalling or liquidation of personal property if the lender does not cause or contribute to the environmental contamination. This includes holding a sale of personal property on a portion of the facility.

(c) The owner or operator of property onto which contamination has migrated unless that person is responsible for an activity causing the release that is the source of the contamination.

(d) A person who owns or operates a facility in which the release or threat of release was caused solely by 1 or more of the following:

(*i*) An act of God.

(*ii*) An act of war.

(*iii*) An act or omission of a third party other than an employee or agent of the person or a person in a contractual relationship existing either directly or indirectly with a person who is liable under this section.

(e) Any person for environmental contamination addressed in a no further action report that is approved by the department or is considered approved under section 20114d. However, a person may be liable under this part for the following:

(*i*) A subsequent release not addressed in the no further action report if the person is otherwise liable under this part for that release.

(*ii*) Environmental contamination that is not addressed in the no further action report and for which the person is otherwise liable under this part.

(*iii*) If the no further action report relies on land use or resource use restrictions, an owner or operator who desires to change those restrictions is responsible for any response activities necessary to comply with this part for any land use or resource use other than the land use or resource use that was the basis for the no further action report.

(*iv*) If the no further action report relies on monitoring necessary to ensure the effectiveness and integrity of the remedial action, an owner or operator who is otherwise liable for environmental contamination addressed in a no further action report is liable under this part for additional response activities necessary to address any potential exposure to the environmental contamination demonstrated by the monitoring in excess of the levels relied on in the no further action report.

(*v*) If the remedial actions that were the basis for the no further action report fail to meet performance objectives that are identified in the no further action report, an owner or operator who is otherwise liable for environmental contamination addressed in the no further action report is liable under this part for response activities necessary to satisfy the performance objectives or otherwise comply with this part.

(5) Notwithstanding any other provision of this part, the state or a local unit of government or a lender who has not participated in the management of the facility is not liable under this part for costs or damages as a

result of response activity taken in response to a release or threat of release. For a lender, this subsection applies only to response activity undertaken prior to foreclosure. This subsection does not preclude liability for costs or damages as a result of gross negligence, including reckless, willful, or wanton misconduct, or intentional misconduct by the state or local unit of government.

(6) In establishing liability under this section, the department bears the burden of proof.

(7) Notwithstanding subsection (1)(c), if the owner or operator of the facility became the owner or operator of the facility on or after June 5, 1995 and prior to March 6, 1996, and the facility contains an underground storage tank system as defined in part 213, that owner or operator is liable under this part only if the owner or operator is responsible for an activity causing a release or threat of release.

(8) An owner or operator who was in compliance with subsection (1)(c)(*i*) and (*ii*) prior to December 14, 2010 is considered to be in compliance with subsection (1)(c)(*i*) and (*ii*).

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1995, Act 71, Imd. Eff. June 5, 1995;—Am. 1996, Act 115, Imd. Eff. Mar. 6, 1996;—Am. 1999, Act 196, Imd. Eff. Dec. 17, 1999;—Am. 2010, Act 227, Imd. 324.20126a Joint several liability; costs of amounts recoverable; interest; recovery; permitted release; action by attorney general; action brought by state or other person.

Sec. 20126a. (1) Except as provided in section 20126(2), a person who is liable under section 20126 is jointly and severally liable for all of the following:

(a) All costs of response activity lawfully incurred by the state relating to the selection and implementation of response activity under this part.

(b) Any other costs of response activity reasonably incurred under the circumstances by any other person.

(c) Damages for the full value of injury to, destruction of, or loss of natural resources, including the reasonable costs of assessing the injury, destruction, or loss resulting from the release.

(2) The costs of response activity recoverable under subsection (1) shall also include all costs of response activity reasonably incurred by the state prior to the promulgation of rules relating to the selection and implementation of response activity under this part, excepting those cases where cost recovery actions have been filed before July 12, 1990. A person challenging the recovery of costs under this subdivision has the burden of establishing that the costs were not reasonably incurred under the circumstances that existed at the time the costs were incurred.

(3) The amounts recoverable in an action under this section shall include interest. This interest shall accrue from the date payment is demanded in writing, or the date of the expenditure or damage, whichever is later. The rate of interest on the outstanding unpaid balance of the amounts recoverable under this section shall be the same rate as is specified in section 6013(8) of the revised judicature act of 1961, 1961 PA 236, MCL 600.6013.

(4) In the case of injury to, destruction of, or loss of natural resources under subsection (1)(c), liability shall be to the state for natural resources belonging to, managed by, controlled by, appertaining to, or held in trust by the state or a local unit of government. Sums recovered by the state under this part for natural resource damages shall be retained by the department, for use only to restore, repair, replace, or acquire the equivalent of the natural resources injured or acquire substitute or alternative resources. There shall be no double recovery under this part for natural resource damages, including the costs of damage assessment or restoration, rehabilitation, replacement, or acquisition, for the same release and natural resource.

(5) A person shall not be required under this part to undertake response activity for a permitted release. Recovery by any person for response activity costs or damages resulting from a permitted release shall be pursuant to other applicable law, in lieu of this part. With respect to a permitted release, this subsection does not affect or modify the obligations or liability of any person under any other state law, including common law, for damages, injury, or loss resulting from a release of a hazardous substance or for response activity or the costs of response activity.

(6) If the department determines that there may be an imminent and substantial endangerment to the public health, safety, or welfare, or to the environment because of an actual or threatened release from a facility, the attorney general may bring an action against any person who is liable under section 20126 or any other appropriate person to secure the relief that may be necessary to abate the danger or threat. The court has jurisdiction to grant such relief as the public interest and the equities of the case may require.

(7) The costs recoverable under this section may be recovered in an action brought by the state or any other person.

324.20128 Liability of response activity contractor; effect of warranty; liability of employer to employee; governmental employee exempt from liability; definitions; liability of person in rendering care, assistance, or advice on release of petroleum; effect of exception under subsection (6); burden of establishing liability.

Sec. 20128. (1) Except as otherwise provided in this section, a person who is a response activity contractor for any release or threatened release is not liable to any person for injuries, costs, damages, expenses, or other liability, including, but not limited to, claims for indemnification or contribution and claims by third parties for death, personal injuries, illness, or loss of or damages to property or economic loss that result from the release or threatened release. This subsection does not apply if a release or threatened release is caused by conduct of the response activity contractor that is negligent, grossly negligent, or that constitutes intentional misconduct.

(2) Subsection (1) does not affect the liability of a person under any warranty under federal, state, or common law. This subsection does not affect the liability of an employer who is a response activity contractor to any employee of the employer under law, including any law relating to worker's compensation.

(3) An employee of this state or a local unit of government who provides services relating to a response activity while acting within the scope of his or her authority as a governmental employee has the same exemption from liability as is provided to the response activity contractor under subsection (1).

(4) Except as provided in this section, this section does not affect the liability under this part or under any other federal or state law of any person.

(5) As used in subsections (1) to (4):

(a) "Response activity contract" means a written contract or agreement entered into by a response activity contractor with 1 or more of the following:

(*i*) The department.

(*ii*) The department of public health.

(*iii*) A person who is arranging for response activity under this part.

(b) "Response activity contractor" means 1 or both of the following:

(*i*) A person who enters into a response activity contract with respect to a release or threatened release and is carrying out the terms of a contract.

(*ii*) A person who is retained or hired by a person described in subparagraph (*i*) to provide any service relating to a response activity.

(6) Notwithstanding any other provision of law, a person is not liable for response activity costs or damages that result from an act or a failure to act in the course of rendering care, assistance, or advice with respect to a release of petroleum into or on the surface waters of the state or on the adjoining shorelines to the surface waters of the state if the act or failure to act was consistent with the national contingency plan or as otherwise directed by the federal on-scene coordinator or the director. This subsection does not apply to any of the following:

(a) A person who is liable under section 20126 who is a responsible party.

(b) An action with respect to personal injury or wrongful death.

(c) A person that is grossly negligent or engages in willful misconduct.

(7) A person who is liable under section 20126 who is a responsible party is liable for any response activity costs and damages that another person is relieved of under subsection (6).

(8) As used in this subsection and subsections (6) and (7):

(a) "Damages" means damages of any kind for which liability may exist under the laws of this state resulting from, arising out of, or related to the release or threatened release of petroleum.

(b) "Federal on-scene coordinator" means the federal official predesignated by the United States environmental protection agency or the United States coast guard to coordinate and direct federal responses under the national contingency plan, or the official designated by the lead agency to coordinate and direct response activity under the national contingency plan.

(c) "National contingency plan" means the national contingency plan prepared and published under section 311 of title III of the federal water pollution control act, chapter 758, 86 Stat. 862, 33 U.S.C. 1321.

(d) "Petroleum" means that term as it is defined in part 213.

(e) "Responsible party" means a responsible party as defined under section 1001 of title I of the oil pollution act of 1990, Public Law 101-380, 33 U.S.C. 2701.

(9) This section does not affect a plaintiff's burden of establishing liability under this part.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1995, Act 71, Imd. Eff. June 5, 1995.

324.20129 Divisibility of harm and apportionment of liability; liability for indivisible harm; contribution; factors in allocating response activity costs and damages; reallocation of uncollectible amount; effect of consent order; resolution of liability in approved settlement; contribution protection; effect of state obtaining less than complete relief; contribution from person not party to consent order; subordinate rights in action for contribution.

Sec. 20129. (1) If 2 or more persons acting independently are liable under section 20126 and there is a reasonable basis for division of harm according to the contribution of each person, each person is subject to liability under this part only for the portion of the total harm attributable to that person. However, a person seeking to limit his or her liability on the grounds that the entire harm is capable of division has the burden of proof as to the divisibility of the harm and as to the apportionment of liability.

(2) If 2 or more persons are liable under section 20126 for an indivisible harm, each person is subject to liability for the entire harm.

(3) A person may seek contribution from any other person who is liable under section 20126 during or following a civil action brought under this part. This subsection does not diminish the right of a person to bring an action for contribution in the absence of a civil action by the state under this part. In a contribution action brought under this part, the court shall consider all of the following factors in allocating response activity costs and damages among liable persons:

(a) Each person's relative degree of responsibility in causing the release or threat of release.

(b) The principles of equity pertaining to contribution.

(c) The degree of involvement of and care exercised by the person with regard to the hazardous substance.

(d) The degree of cooperation by the person with federal, state, or local officials to prevent, minimize, respond to, or remedy the release or threat of release.

(e) Whether equity requires that the liability of some of the persons should constitute a single share.

(4) If, in an action for contribution under subsection (3), the court determines that all or part of a person's share of liability is uncollectible from that person, then the court may reallocate any uncollectible amount among the other liable persons according to the factors listed in subsection (3). A person whose share is determined to be uncollectible continues to be subject to contribution and to any continuing liability to the state.

(5) A person who has resolved his or her liability to the state in an administrative or judicially approved consent order is not liable for claims for contribution regarding matters addressed in the consent order. The consent order does not discharge any of the other persons liable under section 20126 unless the terms of the consent order provide for this discharge, but the potential liability of the other persons is reduced by the amount of the consent order.

(6) A person who is not liable under this part, including a person who was issued a written determination under former section 20129a affirming that the person meets the criteria for an exemption from liability, and who is otherwise in compliance with section 20107a, shall be considered to have resolved his or her liability to the state in an administratively approved settlement under the comprehensive environmental response, compensation, and liability act, 42 USC 9601 to 9675, and shall by operation of law be granted contribution

protection under 42 USC 9613(f)(2) and under this part in the same manner that contribution protection is provided pursuant to subsection (5).

(7) If the state obtains less than complete relief from a person who has resolved his or her liability to the state in an administrative or judicially approved consent order under this part, the state may bring an action against any other person liable under section 20126 who has not resolved his or her liability.

(8) A person who has resolved his or her liability to the state for some or all of a response activity in an administrative or judicially approved consent order may seek contribution from any person who is not a party to the consent order described in subsection (5).

(9) In an action for contribution under this section, the rights of any person who has resolved his or her liability to the state is subordinate to the rights of the state, if the state files an action under this part.

324.20130 Indemnification, hold harmless, or similar agreement or conveyance; subrogation.

Sec. 20130. (1) An indemnification, hold harmless, or similar agreement or conveyance is not effective to transfer from a person who is liable under section 20126 to the state for evaluation or response activity costs or damages for a release or threat of release to any other person the liability imposed under this part. This section does not bar an agreement to insure, hold harmless, or indemnify a party to the agreement for liability under this part.

(2) This part does not bar a cause of action that a person subject to liability under this part, or a guarantor, has or would have by reason of subrogation or otherwise against any person.

324.20131 Limitations on liability; circumstances requiring total costs and damages.

Sec. 20131. (1) Except as provided in subsection (2), the liability under this part for each release or threat of release shall not exceed the total of all the costs of response activities, fines, and exemplary damages, plus $50,000,000.00 damages for injury to, destruction of, or loss of natural resources resulting from the release or threat of release, including the reasonable costs of assessing the injury, destruction, or loss resulting from the release or threat of release.

(2) Notwithstanding the limitations in subsection (1), the liability of a person under this part shall be the full and total costs and damages listed in subsection (1), in either of the following circumstances:

(a) The release or threatened release of a hazardous substance was the result of willful misconduct or gross negligence of the party.

(b) The primary cause of the release or threat of release was a knowing violation of applicable safety, construction, or operating standards or regulations.

324.20132 Covenant not to sue generally; future enforcement action.

Sec. 20132. (1) The state may provide a person with a covenant not to sue concerning any liability to the state under this part, including future liability, resulting from a release or threatened release addressed by response activities, whether that action is on a facility or off a facility, if each of the following is met:

(a) The covenant not to sue is in the public interest.

(b) The covenant not to sue would expedite response activity consistent with rules promulgated under this part.

(c) There is full compliance with a consent order under this part for response to the release or threatened release concerned.

(d) The response activity has been approved by the department.

(2) The state shall provide a person, to which the department is authorized under subsection (1) to issue a covenant not to sue for the portion of response activity described in subdivision (a) or (b), with a covenant not to sue with respect to future liability to the state under this part for a future release or threatened release, and a person provided the covenant not to sue is not liable to the state under section 20126 with respect to that release or threatened release at a future time. The portion of response activity to which the covenant not to sue pertains is either of the following:

(a) The transport and secure disposition off site of hazardous substances in a facility meeting the requirements of sections 3004(c), (d), (e), (f), (g), (m), (o), (p), (u), and (v) and 3005(c) of subtitle C of the solid waste disposal act, title II of Public Law 89-272, 42 U.S.C. 6924 and 6925, if the department has required off-site disposition and has rejected proposed remedial action that is consistent with the rules promulgated under this part and that does not include off-site disposition.

(b) The treatment of hazardous substances so as to destroy, eliminate, or permanently immobilize the hazardous constituents of the substances, so that, in the judgment of the department, the substances no longer present any current or currently foreseeable future significant risk to the public health, safety, or welfare, or the environment; no by-product of the treatment or destruction process presents any significant hazard to the public health, safety, or welfare, or the environment; and all by-products are themselves treated, destroyed, or contained in a manner that assures that the by-products do not present any current or currently foreseeable future significant risk to the public health, safety, or welfare, or the environment.

(3) A covenant not to sue concerning future liability to the state shall not take effect until the department certifies that remedial action has been completed in accordance with the requirements of this part at the facility that is the subject of the covenant.

(4) In assessing the appropriateness of a covenant not to sue granted under subsection (1) and any condition to be included in a covenant not to sue under subsection (1) or (2), the state shall consider whether the covenant or condition is in the public interest on the basis of factors such as the following:

(a) The effectiveness and reliability of the remedial action, in light of the other alternative remedial actions considered for the facility concerned.

(b) The nature of the risks remaining at the facility.

(c) The extent to which performance standards are included in the consent order.

(d) The extent to which the response activity provides a complete remedy for the facility, including a reduction in the hazardous nature of the substances at the facility.

(e) The extent to which the technology used in the response activity is demonstrated to be effective.

(f) Whether the fund or other sources of funding would be available for any additional response activities that might eventually be necessary at the facility.

(g) Whether response activity will be carried out, in whole or in significant part, by persons who are liable under section 20126.

(5) A covenant not to sue under this section is subject to the satisfactory performance by a person of his or her obligations under the agreement concerned.

(6) Except for the portion of the remedial action that is subject to a covenant not to sue under subsection (2), a covenant not to sue a person concerning future liability to the state shall include an exception to the covenant that allows the state to sue that person concerning future liability resulting from the release or threatened release that is the subject of the covenant if the liability arises out of conditions that are unknown at the time the department certifies under subsection (3) that remedial action has been completed at the facility concerned.

(7) In extraordinary circumstances, the state may determine, after assessment of relevant factors such as those referred to in subsection (4) and volume, toxicity, mobility, strength of evidence, ability to pay, litigative risks, public interest considerations, precedential value, and inequities and aggravating factors, not to include the exception in subsection (6) if other terms, conditions, or requirements of the agreement

containing the covenant not to sue are sufficient to provide all reasonable assurances that the public health and the environment will be protected from any future releases at or from the facility.

(8) The state may include any provisions providing for future enforcement action under section 20119 or 20137 that in the discretion of the department are necessary and appropriate to assure protection of the public health, safety, welfare, and the environment.

324.20133 Redevelopment or reuse of facility; covenant not to sue; conditions; demonstration; limitation; reservation of right to assert claims; irrevocable right of entry; monitoring compliance.

Sec. 20133. (1) The state may provide a person who proposes to redevelop or reuse a facility, including a vacant manufacturing or abandoned industrial site, with a covenant not to sue concerning liability under section 20126 and 20107a, if all of the following conditions are met:

(a) The covenant not to sue is in the public interest.

(b) The covenant not to sue will yield new resources to facilitate implementation of response activity.

(c) The covenant not to sue would, when appropriate, expedite response activity consistent with the rules promulgated under this part.

(d) Based upon available information, the department determines that the redevelopment or reuse of the facility is not likely to do any of the following:

(*i*) Exacerbate or contribute to the existing release or threat of release.

(*ii*) Interfere with the implementation of response activities.

(*iii*) Pose health risks related to the release or threat of release to persons who may be present at or in the vicinity of the facility.

(e) The proposal to redevelop or reuse the facility has economic development potential.

(2) A person who requests a covenant not to sue under subsection (1) shall demonstrate to the satisfaction of the state all of the following:

(a) That the person is financially capable of redeveloping and reusing the facility in accordance with the covenant not to sue.

(b) That the person is not affiliated in any way with any person who is liable under section 20126 for a release or threat of release at the facility.

(3) A covenant not to sue issued under this section shall address only past releases or threats of release at a facility and shall expressly reserve the right of the state to assert all other claims against the person that proposes to redevelop or reuse the facility, including, but not limited to, those claims arising from any of the following:

(a) The release or threat of release of any hazardous substance resulting from the redevelopment or reuse of the facility to the extent such claims otherwise arise under this part.

(b) Interference with or failure to cooperate with the department, its contractors, or other persons conducting response activities approved by the department.

(c) Failure to comply with section 20107a.

(4) A covenant not to sue issued under this section shall provide for an irrevocable right of entry to the department, its contractors, or other persons performing response activity related to the release or threat of release addressed by the covenant not to sue for the purposes listed in section 20117(3)(a) through (e) and for monitoring compliance with the covenant not to sue.

324.20134 Consent order; settlement.

Sec. 20134. (1) The department and the attorney general may enter into a consent order with a person who is liable under section 20126 or any group of persons who are liable under section 20126 to perform a response activity if the department and the attorney general determine that the persons who are liable under

section 20126 will properly implement the response activity and that the consent order is in the public interest, will expedite effective response activity, and will minimize litigation. The consent order may, as determined appropriate by the department and the attorney general, provide for implementation by a person or any group of persons who are liable under section 20126 of any portion of response activity at the facility. A decision of the attorney general not to enter into a consent order under this part is not subject to judicial review.

(2) Whenever practical and in the public interest, as determined by the department, the department and the attorney general shall as promptly as possible reach a final settlement with a person in an administrative or civil action under this part if this settlement involves only a minor portion of the response costs at the facility concerned and, in the judgment of the department and the attorney general, the conditions in either of the following are met:

(a) Both of the following are minimal in comparison to other hazardous substances at the facility:

(*i*) The amount of the hazardous substances contributed by that person to the facility.

(*ii*) The toxic or other hazardous effects of the substances contributed by that person to the facility.

(b) Except as provided in subsection (3), the person meets all of the following conditions:

(*i*) The person is the owner of the real property on or in which the facility is located.

(*ii*) The person did not conduct or permit the generation, transportation, storage, treatment, or disposal of any hazardous substance at the facility.

(*iii*) The person did not contribute to the release or threat of release of a hazardous substance at the facility through any action or omission.

(3) A settlement shall not be made under subsection (2)(b) if the person purchased the real property with actual or constructive knowledge that the property was used for the generation, transportation, storage, treatment, or disposal of a hazardous substance.

(4) A settlement under subsection (2) may be set aside if information obtained after the settlement indicates that the person settling does not meet the conditions set forth in subsection (2)(a) or (b).

324.20135 Civil action; jurisdiction; conditions; notice; awarding costs and fees; rights not impaired; venue.

Sec. 20135. (1) Except as otherwise provided in this part, a person, including a local unit of government on behalf of its citizens, whose health or enjoyment of the environment is or may be adversely affected by a release from a facility or threat of release from a facility, other than a permitted release or a release in compliance with applicable federal, state, and local air pollution control laws, by a violation of this part or a rule promulgated or order issued under this part, or by the failure of the directors to perform a nondiscretionary act or duty under this part, may commence a civil action against any of the following:

(a) An owner or operator who is liable under section 20126 for injunctive relief necessary to prevent irreparable harm to the public health, safety, or welfare, or the environment from a release or threatened release in relation to that facility.

(b) A person who is liable under section 20126 for a violation of this part or a rule promulgated under this part or an order issued under this part in relation to that facility.

(c) One or more of the directors if it is alleged that 1 or more of the directors failed to perform a nondiscretionary act or duty under this part.

(2) The circuit court has jurisdiction in actions brought under subsection (1)(a) to grant injunctive relief necessary to protect the public health, safety, or welfare, or the environment from a release or threatened release. The circuit court has jurisdiction in actions brought under subsection (1)(b) to enforce this part or a rule promulgated or order issued under this part by ordering such action as may be necessary to correct the

violation and to impose any civil fine provided for in this part for the violation. A civil fine recovered under this section shall be deposited in the fund. The circuit court has jurisdiction in actions brought under subsection (1)(c) to order 1 or more of the directors to perform the nondiscretionary act or duty concerned.

(3) An action shall not be filed under subsection (1)(a) or (b) unless all of the following conditions exist:

(a) The plaintiff has given at least 60 days' notice in writing of the plaintiff's intent to sue, the basis for the suit, and the relief to be requested to each of the following:

(*i*) The department.

(*ii*) The attorney general.

(*iii*) The proposed defendants.

(b) The state has not commenced and is not diligently prosecuting an action under this part or under other appropriate legal authority to obtain injunctive relief concerning the facility or to require compliance with this part or a rule or an order under this part.

(4) An action shall not be filed under subsection (1)(c) until the plaintiff has given in writing at least 60 days' notice to the directors of the plaintiff's intent to sue, the basis for the suit, and the relief to be requested.

(5) In issuing a final order in an action brought pursuant to this section, the court may award costs of litigation, including reasonable attorney and expert witness fees to the prevailing or substantially prevailing party if the court determines that an award is appropriate.

(6) This section does not affect or otherwise impair the rights of any person under federal, state, or common law.

(7) An action under subsection (1)(a) or (b) shall be brought in the circuit court for the circuit in which the alleged release, threatened release, or other violation occurred. An action under subsection (1)(c) shall be brought in the circuit court for Ingham county.

324.20135a Access to property; action by court.

Sec. 20135a. (1) A person who is liable under section 20126 or a lender that has a security interest in all or a portion of a facility may file a petition in the circuit court of the county in which the facility is located seeking access to the facility in order to conduct response activities approved by the department. If the court grants access to property under this section, the court may do any of the following:

(a) Provide compensation to the property owner or operator for damages related to the granting of access to the property, including compensation for loss of use of the property.

(b) Enjoin interference with the response activities.

(c) Grant any other appropriate relief as determined by the court.

(2) If a court grants access to property under this section, the owner or operator of the property to which access is granted is not liable for either of the following:

(a) A release caused by the response activities for which access is granted unless the owner or operator is otherwise liable under section 20126.

(b) For conditions associated with the response activity that may present a threat to public health or safety.

Popular name: NREPA

324.20137 Additional relief; failure of facility owner or operator to report hazardous substance release; civil fine; providing copy of complaint to attorney general; jurisdiction;

judicial review; intervenor.

Sec. 20137. (1) Subject to subsections (2) and (3), in addition to other relief authorized by law, the attorney general may, on behalf of the state, commence a civil action seeking 1 or more of the following:

(a) Temporary or permanent injunctive relief necessary to protect the public health, safety, or welfare, or the environment from the release or threat of release.

(b) Recovery of state response activity costs pursuant to section 20126a.

(c) Damages for the full value of injury to, destruction of, or loss of natural resources resulting from the release or threat of release, including the reasonable costs of assessing the injury, destruction, or loss resulting from the release or threat of release.

(d) A declaratory judgment on liability for future response activity costs and damages.

(e) A civil fine of not more than $1,000.00 for each day of noncompliance without sufficient cause with a written request of the department pursuant to section 20114(1)(h). A fine imposed under this subdivision shall be based on the seriousness of the violation and any good faith efforts of the person to comply with the request of the department.

(f) A civil fine of not more than $10,000.00 for each day of violation of this part. A fine imposed under this subdivision shall be based upon the seriousness of the violation and any good faith efforts of the person to comply with this part.

(g) A civil fine of not more than $25,000.00 for each day of violation of a judicial order or an administrative order issued pursuant to section 20119, including exemplary damages pursuant to section 20119.

(h) Enforcement of an administrative order issued pursuant to section 20119.

(i) Enforcement of information gathering and entry authority pursuant to section 20117.

(j) Enforcement of the reporting requirements under section 20114.

(k) Any other relief necessary for the enforcement of this part.

(2) An owner or operator of a facility from which a hazardous substance is released that is determined to be reportable under section 20114(1)(b)(*i*), other than a permitted release, who fails to notify the department within 24 hours after obtaining knowledge of the release or who submits in such notification any information that the person knows to be false or misleading, is subject to a civil fine of not more than $25,000.00 for each day in which the violation occurs or the failure to comply continues. A fine imposed under this subsection shall be based upon the seriousness of the violation and any good-faith efforts by the violator to comply with this subsection.

(3) A person who is responsible for an activity causing a release in excess of the concentrations that satisfy the criteria established pursuant to section 20120a(1)(a) or (b), as appropriate for the use of the property, is subject to a civil fine as provided in this part unless a fine or penalty has already been imposed for the release under another part of this act. However, a civil fine shall not be imposed under this subsection against a person who made a good-faith effort to prevent the release and to comply with the provisions of this part. This subsection does not apply to a release from an underground storage tank system as defined in part 213.

(4) If an action is brought under this part by a plaintiff other than the attorney general, the plaintiff shall, at the time of filing, provide a copy of the complaint to the attorney general.

(5) Except as otherwise provided in this part, an action brought under this part may be brought in the circuit court for the county of Ingham, in the county in which the defendant resides, has a place of business, or in which the registered office of a defendant corporation is located, or in the county where the release occurred.

(6) A state court does not have jurisdiction to review challenges to a response activity selected or approved by the department under this part or to review an administrative order issued under this part in any action except an action that is 1 of the following:

(a) An action to recover response costs, damages, or for contribution.

(b) An action by the state to enforce an administrative order under this part or by any other person under section 20135(1)(b) to enforce an administrative order or to recover a fine for violation of an order.

(c) An action pursuant to section 20119(5) for review of a decision by the department denying or limiting reimbursement.

(d) An action pursuant to section 20135 challenging a response activity selected or approved by the department, if the action is filed after the completion of the response activity.

(e) An action by the state pursuant to section 20126a(6) to compel response activity.

(7) In any judicial action under this part, judicial review of any issues concerning the selection or adequacy of a response activity taken, ordered, or agreed to by the state are limited to the administrative record. If the court finds that the record is incomplete or inadequate, the court may consider supplemental material in the

action. In considering objections raised in a judicial action under this part, the court shall uphold the state's decision in selecting a response activity unless the objecting party can demonstrate based on the administrative record that the decision was arbitrary and capricious or otherwise not in accordance with law. In reviewing alleged procedural errors, the court may disallow costs or damages only to the extent the errors were so serious and related to matters of such central importance that the activity would have been significantly changed had the errors not been made.

(8) In an action commenced under this part, any person may intervene as a matter of right if that person claims an interest relating to the subject matter of the action and is situated so that the disposition of the action may, as a practical matter, impair or impede the person's ability to protect that interest, unless the court finds the person's interest is adequately represented by an existing party.

Popular name: NREPA

324.20138 Unpaid costs and damages as lien on facility; priority; commencement and sufficiency of lien; petition; notice of hearing; increased value as lien; perfection, duration, and release of lien; document stating completion of response activities.

Sec. 20138. (1) All unpaid costs and damages for which a person is liable under section 20126 constitute a lien in favor of the state upon a facility that has been the subject of response activity by the state and is owned by that person. A lien under this subsection has priority over all other liens and encumbrances except liens and encumbrances recorded before the date the lien under this subsection is recorded. A lien under this subsection arises when the state first incurs costs for response activity at the facility for which the person is responsible.

(2) If the attorney general determines that the lien provided in subsection (1) is insufficient to protect the interest of the state in recovering response costs at a facility, the attorney general may file a petition in the circuit court of the county in which the facility is located seeking either or both of the following:

(a) A lien upon the facility subject to response activity that takes priority over all other liens and encumbrances that are or have been recorded on the facility.

(b) A lien upon real or personal property or rights to real or personal property, other than the facility, owned by the person described in subsection (1), having priority over all other liens and encumbrances except liens and encumbrances recorded prior to the date the lien under this subsection is recorded. However, the following are not subject to the lien provided for in this subdivision:

(*i*) Assets of a qualified pension plan or individual retirement account under the internal revenue code.

(*ii*) Assets held expressly for the purpose of financing a dependent's college education.

(*iii*) Up to $500,000.00 in nonbusiness real or personal property or rights to nonbusiness real or personal property, except that not more than $25,000.00 of this amount may be cash or securities.

(3) A petition submitted pursuant to subsection (2) shall set forth with as much specificity as possible the type of lien sought, the property that would be affected, and the reasons the attorney general believes the lien is necessary. Upon receipt of a petition under subsection (2), the court shall promptly schedule a hearing to determine whether the petition should be granted. Notice of the hearing shall be provided to the attorney general, the property owner, and any persons holding liens or perfected security interests in the real property subject to response activity. A lien shall not be granted under subsection (2) against the owner of the facility if the owner is not liable under section 20126.

(4) In addition to the lien provided in subsections (1) and (2), if the state incurs costs for response activity that increases the market value of real property that is the location of a release or threatened release, the increase in value caused by the state funded response activity, to the extent the state incurred unpaid costs and damages, constitutes a lien in favor of the state upon the real property. This lien has priority over all other liens or encumbrances that are or have been recorded upon the property.

(5) A lien provided in subsection (1), (2), or (4) is perfected against real property when a notice of lien is filed by the department with the register of deeds in the county in which the real property is located. A lien upon personal property provided in subsection (2) is perfected when a notice of lien is filed by the department in accordance with applicable law and regulation for the perfection of a lien on that type of personal property. In addition, the department shall, at the time of the filing of the notice of lien, provide a copy of the notice of lien to the owner of that property by certified mail.

(6) A lien under this section continues until the liability for the costs and damages is satisfied or resolved or becomes unenforceable through the operation of the statute of limitations provided in section 20140.

(7) Upon satisfaction of the liability secured by the lien, the department shall file a notice of release of lien in the same manner as provided in subsection (5).

(8) If the department, at the time or prior to the time of filing the notice of release of lien pursuant to subsection (7), has made a determination that the person liable under section 20126 has completed all of the response activity at the real property pursuant to the approved remedial action plan, the department shall execute and file with the notice of release of lien a document stating that all response activities required in the approved remedial action plan have been completed.

324.20139 Applicability of penalties; conduct constituting felony; penalties; jurisdiction; criminal liability for substantial endangerment to public health, safety, or welfare; determination; knowledge attributable to defendant; award; rules; "serious bodily injury" defined.

Sec. 20139. (1) The penalties provided in this section only apply to a release that occurs after July 1, 1991.

(2) A person who does any of the following is guilty of a felony and shall be fined not less than $2,500.00 or more than $25,000.00 for each violation:

(a) Knowingly releases or causes a release contrary to applicable federal, state, or local requirements or contrary to any permit or license held by that person, if that person knew or should have known that the release could cause personal injury or property damage.

(b) Intentionally makes a false statement, representation, or certification in any application, record, report, plan, or other document filed or required to be maintained under this part.

(c) Intentionally renders inaccurate any monitoring device or record required to be maintained under this part.

(d) Misrepresents his or her qualifications under section 20114d or 20114e.

(3) In addition to a fine imposed under subsection (2), the court may impose an additional fine of not more than $25,000.00 for each day during which the release occurred. If the conviction is for a violation committed after a first conviction of the person under this subsection, the court shall impose a fine of not less than $25,000.00 and not more than $50,000.00 per day of violation. Upon conviction, in addition to a fine, the court in its discretion may sentence the defendant to imprisonment for not more than 2 years or impose probation upon a person for a violation of this part. With the exception of the issuance of criminal complaints, issuance of warrants, and the holding of an arraignment, the circuit court for the county in which the violation occurred has exclusive jurisdiction.

(4) Upon a finding by the court that the action of a criminal defendant prosecuted under this section poses or posed a substantial endangerment to public health, safety, or welfare, the court shall impose, in addition to the penalties set forth in subsections (2) and (3), a fine of not less than $1,000,000.00 and, in addition to a fine, a sentence of 5 years' imprisonment.

(5) To find a defendant criminally liable for substantial endangerment under subsection (4), the court shall determine that the defendant knowingly or recklessly acted in such a manner as to cause a danger of death or serious bodily injury and that either of the following has occurred:

(a) The defendant had an actual awareness, belief, or understanding that his or her conduct would cause a substantial danger of death or serious bodily injury.

(b) The defendant acted in gross disregard of the standard of care that any reasonable person would observe in similar circumstances.

(6) Knowledge possessed by a person other than the defendant under subsection (5) may be attributable to the defendant if the defendant took affirmative steps to shield himself or herself from the relevant information.

(7) The department may pay an award of up to $10,000.00 to an individual that provides information leading to the arrest and conviction of a person for a violation of this section. The department shall promulgate rules that prescribe criteria for granting awards under this section. An award shall not be made under this section until rules are promulgated prescribing the criteria for making awards. Awards under this subsection may be paid from the Michigan environmental assurance fund, if enabling legislation creating the

fund is enacted into law.

(8) As used in this section, "serious bodily injury" means bodily injury that involves a substantial risk of death, unconsciousness, extreme physical pain, protracted and obvious disfigurement, or protracted loss or impairment of the function of a bodily member, organ, or mental faculty.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1995, Act 71, Imd. Eff. June 5, 1995;—Am. 2010, Act 230, Imd. Eff. Dec. 14, 2010.

324.20140 Limitation periods; effect of subsection (3).

Sec. 20140. (1) Except as provided in subsections (2) and (3), the limitation period for filing actions under this part is as follows:

(a) For the recovery of response activity costs and natural resources damages pursuant to section 20126a(1)(a), (b), or (c), within 6 years of initiation of physical on-site construction activities for the remedial action selected or approved by the department at a facility, except as provided in subdivision (b).

(b) For 1 or more subsequent actions for recovery of response activity costs pursuant to section 20126, at any time during the response activity, if commenced not later than 3 years after the date of completion of all response activity at the facility.

(c) For civil fines under this part, within 3 years after discovery of the violation for which the civil fines are assessed.

(2) For recovery of natural resources damages that accrued prior to July 1, 1991, the limitation period for filing actions under this part is July 1, 1994.

(3) For recovery of response activity costs that were incurred prior to July 1, 1991, the limitation period for filing actions under this part is July 1, 1994.

(4) Subsection (3) is curative and intended to clarify the original intent of the legislature and applies retroactively.

324.20142 Compliance as bar to certain claims; exceptions.

Sec. 20142. (1) Except as provided in section 20126a(5), a person who has complied with the requirements of this part or is exempt from liability under this part is not subject to a claim in law or equity for performance of response activities under part 17, part 31, or common law.

(2) This section does not bar any of the following:

(a) Tort claims unrelated to performance of response activities.

(b) Tort claims for damages which result from response activities.

(c) Tort claims related to the exercise or failure to exercise responsibilities under section 20107a.

VOLUNTEER IMMUNITY

324.20301 Definitions.

Sec. 20301. As used in this part:

(a) "Hazardous material" means a chemical or other material which is or may become injurious to the public health, safety, or welfare, or to the environment.

(b) "Remedial action" means an activity to protect the public health, safety, welfare, or the environment and includes, but is not limited to, cleanup, removal, containment, or isolation of spills.

(c) "Spill" means any leaking, pumping, pouring, emptying, emitting, discharging, escaping, leaching, or disposing of a hazardous material in a quantity which is or may become injurious to the public health, safety, welfare, or to the environment.

(d) "Volunteer" means an individual who is designated as a volunteer by the public entity designated by the governor and is acting solely on behalf of that entity without remuneration beyond reimbursement for out-of-pocket expenses in connection with the assistance.

(e) "Waters of the state" means all groundwaters, lakes, rivers, streams, and other watercourses including the Great Lakes and their connecting waterways within the jurisdiction of the state.

History: 1994, Act 451, Eff. Mar. 30, 1995.

Popular name: Act 451

Popular name: NREPA

324.20302 Hazardous material spills; immunity of volunteers from civil suits; effect of gross negligence or willful misconduct.

Sec. 20302. (1) A volunteer who assists in remedial actions associated with a spill of a hazardous material into the waters of the state following a declaration by the governor pursuant to section 3 of the emergency preparedness act, Act No. 390 of the Public Acts of 1976, being section 30.403 of the Michigan Compiled Laws, that the spill has caused a state of disaster is not liable in a civil action for damages resulting from an act or omission arising out of and in the course of the volunteer's good faith rendering of that assistance.

(2) Subsection (1) does not apply to a volunteer whose act or omission was the result of the volunteer's gross negligence or willful misconduct.

CHAPTER 8

UNDERGROUND STORAGE TANKS

PART 211

UNDERGROUND STORAGE TANK REGULATIONS

****** 324.21101 THIS SECTION IS REPEALED BY ACT 451 OF 1994 EFFECTIVE UPON THE EXPIRATION OF 12 MONTHS AFTER PART 215 BECOMES INVALID PURSUANT TO SECTION 21546 (3) ******

324.21101 Definitions; applicability of certain authority.

Sec. 21101. As used in this part:

(a) "Department" means the department of natural resources, underground storage tank division.

(b) "Fund" means the underground storage tank regulatory enforcement fund created in section 21104.

(c) "Local unit of government" means a municipality, county, or governmental authority or any combination of municipalities, counties, or governmental authorities.

(d) "Natural gas" means natural gas, synthetic gas, and manufactured gas.

(e) "Operator" means a person who is presently, or was at the time of a release, in control of or responsible for the operation of an underground storage tank system.

(f) "Owner" means a person who holds, or at the time of a release who held, a legal, equitable, or possessory interest of any kind in an underground storage tank system or in the property on which an underground storage tank system is located, including, but not limited to, a trust, vendor, vendee, lessor, or lessee. However, owner does not include a person or a regulated financial institution who, without participating in the management of an underground storage tank system and who is not otherwise engaged in petroleum production, refining, or marketing relating to the underground storage tank system, is acting in a fiduciary capacity or who holds indicia of ownership primarily to protect the person's or the regulated financial institution's security interest in the underground storage tank system or the property on which it is located. This exclusion does not apply to a grantor, beneficiary, remainderman, or other person who could directly or indirectly benefit financially from the exclusion other than by the receipt of payment for fees and expenses related to the administration of a trust.

(g) "Regulated substance" means any of the following:

(*i*) A substance defined in section 101(14) of title I of the comprehensive environmental response, compensation, and liability act of 1980, Public Law 96-510, 42 U.S.C. 9601, but not including a substance regulated as a hazardous waste under subtitle C of the solid waste disposal act, title II of Public Law 89-272, 42 U.S.C. 6921 to 6931 and 6933 to 6939b.

(*ii*) Petroleum, including crude oil or any fraction of crude oil that is liquid at standard conditions of temperature and pressure (60 degrees Fahrenheit and 14.7 pounds per square inch absolute). Petroleum includes but is not limited to mixtures of petroleum with de minimis quantities of other regulated substances, and petroleum-based substances composed of a complex blend of hydrocarbons derived from crude oil through processes of separation, conversion, upgrading, or finishing such as motor fuels, jet fuels, distillate fuel oils, residual fuel oils, lubricants, and petroleum solvents.

(*iii*) A substance listed in section 112 of part A of title I of the clean air act, chapter 360, 84 Stat. 1685, 42 U.S.C. 7412.

(h) "Release" means any spilling, leaking, emitting, discharging, escaping, leaching, or disposing from an underground storage tank system into groundwater, surface water, or subsurface soils.

(i) "Underground storage tank system" means a tank or combination of tanks, including underground pipes connected to the tank or tanks, which is, was, or may have been used to contain an accumulation of regulated substances, and the volume of which, including the volume of the underground pipes connected to the tank or tanks, is 10% or more beneath the surface of the ground. An underground storage tank system does not include any of the following:

(*i*) A farm or residential tank of 1,100 gallons or less capacity used for storing motor fuel for noncommercial purposes.

(*ii*) A tank used for storing heating oil for consumptive use on the premises where the tank is located.

(*iii*) A septic tank.

(*iv*) A pipeline facility, including gathering lines regulated under either of the following:

(A) The natural gas pipeline safety act of 1968, Public Law 90-481, 49 U.S.C. Appx 1671 to 1677, 1679a to 1682, and 1683 to 1687.

(B) Sections 201 to 215 and 217 of the hazardous liquid pipeline safety act of 1979, title II of Public Law 96-129, 49 U.S.C. Appx 2001 to 2015.

(*v*) A surface impoundment, pit, pond, or lagoon.

(*vi*) A storm water or wastewater collection system.

(*vii*) A flow-through process tank.

(*viii*) A liquid trap or associated gathering lines directly related to oil or gas production and gathering operations.

(*ix*) A storage tank situated in an underground area, such as a basement, cellar, mineworking, drift, shaft, or tunnel if the storage tank is situated upon or above the surface of the floor.

(*x*) Any pipes connected to a tank that is described in subparagraphs (*i*) to (*xvi*).

(*xi*) An underground storage tank system holding hazardous wastes listed or identified under subtitle C of the solid waste disposal act, title II of Public Law 89-272, 42 U.S.C. 6921 to 6931 and 6933 to 6939b, or a mixture of such hazardous waste and other regulated substances.

(*xii*) A wastewater treatment tank system that is part of a wastewater treatment facility regulated under section 307(b) of title III or section 402 of title IV of the federal water pollution control act, 33 U.S.C. 1317 and 1342.

(*xiii*) Equipment or machinery that contains regulated substances for operational purposes such as hydraulic lift tanks and electrical equipment tanks.

(*xiv*) An underground storage tank system with a capacity of 110 gallons or less.

(*xv*) An underground storage tank system that contains a de minimis concentration of regulated substances.

(*xvi*) An emergency spill or overflow containment underground storage tank system that is expeditiously emptied after use.

History: 1994, Act 451, Eff. Mar. 30, 1995.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Underground Storage Tank Division to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

For transfer of powers and duties of the department of environmental quality under the aboveground storage tank program from department of environmental quality to bureau of fire services, department of licensing and regulatory affairs, see E.R.O. No. 2012-7, compiled at MCL 29.462.

Popular name: Act 451

Popular name: NREPA

****** 324.21102 THIS SECTION IS REPEALED BY ACT 451 OF 1994 EFFECTIVE UPON THE EXPIRATION OF 12 MONTHS AFTER PART 215 BECOMES INVALID PURSUANT TO SECTION 21546 (3) ******

324.21102 Underground storage tank system; registration or renewal of registration; notification of change; indication of materials stored; tests; forwarding copy of registration or notification of change to local unit of government; rules; exemption; notification of closure or removal.

Sec. 21102. (1) A person that is the owner of an underground storage tank system shall register and annually renew the registration on the underground storage tank system with the department. However, the owner or operator of an underground storage tank closed prior to January 1, 1974 in compliance with the fire prevention code, 1941 PA 207, MCL 29.1 to 29.33, and the rules promulgated under that act, is exempt from the registration requirements of this section.

(2) A person that is the owner of an underground storage tank system shall register the underground storage tank system with the department prior to bringing the underground storage tank system into use. Additionally, an installation registration form containing the information required by the department shall be submitted to the department at least 45 days prior to the installation of the underground storage tank system.

(3) Except as otherwise provided in subsections (4) and (5), a person that is the owner of an underground storage tank system registered under subsection (1) or (2) shall notify the department of any change in the information required under section 21103 or of the removal of an underground storage tank system from service.

(4) A person that is the owner of an underground storage tank system, the contents of which are changed routinely, may indicate all the materials that are stored in the underground storage tank system on the registration form described in section 21103. A person providing the information described in this subsection is not required to notify the department of changes in the contents of the underground storage tank system unless the material to be stored in the system differs from the information provided on the registration form.

(5) Except as otherwise provided in section 21103(2), a person that is the owner of an underground storage tank system registered under subsection (1) or (2) is not required to notify the department of a test conducted on the tank system but shall furnish this information upon the request of the department.

(6) Upon the request of a local unit of government in which an underground storage tank system is located, the department shall forward a copy of a registration or notification of change under this section to the local unit of government where the underground storage tank system is located.

(7) The department may promulgate rules that require proof of registration under this part to be attached to the underground storage tank system or to the property where the underground storage tank system is located.

(8) Except as otherwise provided in this subsection, an underground storage tank system or an underground storage tank that is part of the system that has been closed or removed pursuant to rules promulgated under this part is exempt from the requirements of this section. However, the owner of an underground storage tank

system or an underground storage tank that is part of the system that has been closed or removed shall notify the department of the closure or removal pursuant to rules promulgated by the department.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 2016, Act 465, Eff. Mar. 29, 2017.

Compiler's note: For transfer of powers and duties of the department of environmental quality under the aboveground storage tank program from department of environmental quality to bureau of fire services, department of licensing and regulatory affairs, see E.R.O. No. 2012-7, compiled at MCL 29.462.

Popular name: Act 451

Popular name: NREPA

Administrative rules: R 29.2101 et seq. of the Michigan Administrative Code.

324.21102a Installation of underground storage tanks; prohibited conditions.

Sec. 21102a. (1) Except as provided in subsection (2), a person shall not install an underground storage tank that meets any of the following conditions:

(a) Is within 2,000 feet of an existing type I community or type IIa noncommunity public water well.

(b) Is within 800 feet of an existing type IIb or type III noncommunity public water well.

(c) Is within 300 feet of any other type of well not described in subdivision (a) or (b).

(2) A person that wishes to install an underground storage tank that does not meet the conditions described under subsection (1) may only replace an active underground storage tank if both of the following requirements are met:

(a) A professional engineer or qualified underground storage tank consultant certifies that a combination of the construction material of the underground storage tank and the leak detection used to monitor the underground storage tank is more likely to prevent and detect a release from the replacement underground storage tank than the existing underground storage tank.

(b) The facility where the active, existing underground storage tank is located is in compliance with this part and the rules promulgated under this part.

(3) As used in this section:

(a) "Professional engineer" means that term as defined in section 2001 of the occupational code, 1980 PA 299, MCL 339.2001.

(b) "Qualified underground storage tank consultant" means an individual who meets the requirements described under section 21325.

History: Add. 2022, Act 160, Imd. Eff. July 19, 2022.

****** 324.21103 THIS SECTION IS REPEALED BY ACT 451 OF 1994 EFFECTIVE UPON THE EXPIRATION OF 12 MONTHS AFTER PART 215 BECOMES INVALID PURSUANT TO SECTION 21546 (3) ******

324.21103 Registration forms; suspected or confirmed release from system; notice; supplementary information.

Sec. 21103. (1) The registration required by section 21102(1) and (2) shall be provided either:

(a) On a form provided by the department and in compliance with section 9002 of the solid waste disposal act, 42 U.S.C. 6991a.

(b) On a form approved by the department and in compliance with section 9002 of the solid waste disposal act.

(2) If there is a suspected or confirmed release from an underground storage tank system, the owner or operator of the underground storage tank system shall notify the department within 24 hours and if requested by the department shall file the following supplementary information if known:

(a) The owner of the property where the underground storage tank system is located.

(b) A history of the current and previous contents of the underground storage tank system, including the generic chemical name, chemical abstract service number, or trade name, whichever is most descriptive of the contents, and including the date or dates on which the contents were changed or removed.

(c) A history of the monitoring procedures and leak detection tests and methods employed with respect to the underground storage tank system and the resulting findings.

History: 1994, Act 451, Eff. Mar. 30, 1995.

Compiler's note: For transfer of powers and duties of the department of environmental quality under the aboveground storage tank program from department of environmental quality to bureau of fire services, department of licensing and regulatory affairs, see E.R.O. 324.21104 Underground storage tank regulatory enforcement fund; creation; receipts; investment; crediting interest and earnings; reversion to general fund prohibited; use of money; notice of balance in fund.

Sec. 21104. (1) The underground storage tank regulatory enforcement fund is created in the state treasury. The fund may receive money as provided in this part and as otherwise provided by law. The state treasurer shall direct the investment of the fund. Interest and earnings of the fund shall be credited to the fund. Money in the fund at the close of the fiscal year shall remain in the fund and shall not revert to the general fund.

(2) Money in the fund shall be used by the department only to enforce this part and the rules promulgated under this part and the rules promulgated under the fire prevention code, 1941 PA 207, MCL 29.1 to 29.33, pertaining to the delivery and dispensing operations of regulated substances.

(3) The department of treasury shall, before November 1 of each year, notify the department of the balance in the fund at the close of the preceding fiscal year.

324.21108 Enforcement of part and rules.

Sec. 21108. (1) The department shall enforce this part and the rules promulgated under this part.

(2) The department may delegate the authority to enforce this part and the rules promulgated under this part to a local unit of government that has sufficient employees who are certified by the department under subsection (3) as underground storage tank system inspectors. A local unit of government may apply for delegation under this section by submitting a resolution of the governing body of the local unit of government and an application containing the information required by the department. The department may revoke a delegation under this section for a violation of this part, the rules promulgated under this part, or a contract entered between the department and the local unit of government.

(3) The department may certify individuals who are qualified to enforce this part and the rules promulgated under this part as underground storage tank system inspectors. The department may revoke an individual's certification under this section for violating this part or rules promulgated under this part.

(4) If the department elects to delegate enforcement authority under subsection (2), the department shall promulgate rules that do both of the following:

(a) Establish criteria for delegation under subsection (2).

(b) Establish qualifications for certification of individuals as underground storage tank system inspectors under subsection (3).

(5) The department may contract with a local unit of government for the purpose of enforcing this part and the rules promulgated under this part.

(6) The department or a certified underground storage tank system inspector within his or her jurisdiction, at the discretion of the department or inspector and without a complaint and without restraint or liability for trespass, may, at an hour reasonable under the circumstances involved, enter into and upon real property including a building or premises where regulated substances may be stored for the purpose of inspecting and examining the property, buildings, or premises, and their occupancies and contents to determine compliance with this part and the rules promulgated under this part.

(7) The department shall enhance its audit and inspection program to monitor the installation and operation of new underground storage tank systems or components to ensure that equipment meets minimum quality standards, that the installation is done properly, and that the monitoring systems are properly utilized.

(8) The department shall conduct a study regarding the causes of underground storage tank leaks and prepare a report making recommendations regarding upgrading underground storage tank system standards, establishing timetables for the replacement of equipment, and instituting any other practices or procedures which will minimize releases of regulated substances into the environment. The report shall be submitted by July 1, 1995 to the members of the legislature who are members of committees dealing with natural resource issues.

324.21109 Additional safeguards; resolution; enactment or enforcement of certain ordinances prohibited.

Sec. 21109. (1) The department may, upon resolution of the governing body of a local unit of government in whose jurisdiction an underground storage tank system is being installed, require additional safeguards, other than those specified in rules, when the public health, safety, or welfare, or the environment is endangered.

(2) A local unit of government shall not enact or enforce a provision of an ordinance that is inconsistent with this part or rules promulgated under this part.

(3) A local unit of government shall not enact or enforce a provision of an ordinance that requires a permit, license, approval, inspection, or the payment of a fee or tax for the installation, use, closure, or removal of an underground storage tank system.

324.21301a Purpose and applicability of part.

Sec. 21301a. (1) This part is intended to provide remedies using a process and procedures separate and distinct from the process, procedures, and criteria established under part 201 for sites posing a threat to the public health, safety, or welfare, or to the environment, as a result of releases from underground storage tank systems, regardless of whether the release or threat of release of a regulated substance occurred before or after January 19, 1989, the effective date of the former leaking underground storage tank act, 1988 PA 478, and for this purpose, this part shall be given retroactive application. However, criminal penalties provided in this part only apply to violations of this part that occur after April 13, 1995.

(2) The liability provisions that are provided for in this part shall be given retroactive application.

History: Add. 1995, Act 22, Imd. Eff. Apr. 13, 1995;—Am. 1996, Act 116, Imd. Eff. Mar. 6, 1996;—Am. 2012, Act 108, Imd. Eff. May 1, 2012.

324.21301b Actions governed by provisions in part; changes in corrective action; corrective

actions by nonliable parties.

Sec. 21301b. (1) Notwithstanding any other provision of this part, the following actions shall be governed by the provisions of this part that were in effect on May 1, 1995:

(a) Any judicial action or claim in bankruptcy that was initiated by any person on or before May 1, 1995.

(b) An administrative order that was issued on or before May 1, 1995.

(c) An enforceable agreement with the state entered into on or before May 1, 1995 by any person under this part.

(d) For purposes of this section, the provisions of this part that were in effect on May 1, 1995 are hereby incorporated by reference.

(2) Notwithstanding subsection (1), upon request of a person who has not completed implementing corrective actions under this part, the department shall approve changes in corrective action to be consistent with sections 21304a, 21308a, 21309a, and 21311a.

(3) Notwithstanding any other provision of this part, a person that is not liable under this part may conduct corrective actions under this part in the same manner as a person that is liable under this part. Notwithstanding any other provision of this part, the department shall provide responses to nonliable parties conducting corrective actions for reports submitted under this part in the same manner that it provides responses to persons that are liable under this part.

History: Add. 1996, Act 116, Imd. Eff. Mar. 6, 1996;—Am. 2012, Act 446, Imd. Eff. Dec. 27, 2012.

Popular name: Act 451

Popular name: NREPA

324.21302 Definitions; A to M.

Sec. 21302. As used in this part:

(a) "Air" means ambient or indoor air at the point of exposure.

(b) "All appropriate inquiry" means an evaluation of environmental conditions at a property at the time of purchase, occupancy, or foreclosure that reasonably defines the existing conditions and circumstances at the property in conformance with 40 CFR 312.

(c) "Baseline environmental assessment" means a written document that describes the results of an all appropriate inquiry and the sampling and analysis that confirm that the property is a site. However, for purposes of a baseline environmental assessment, the all appropriate inquiry under 40 CFR 312.20(a) may be conducted within 45 days after the date of acquisition of a property and the components of an all appropriate inquiry under 40 CFR 312.20(b) and 40 CFR 312.20(c)(3) may be conducted or updated within 45 days after the date of acquisition of a property.

(d) "Biota" means the plant and animal life in an area affected by a corrective action plan.

(e) "Capillary fringe" means the portion of the aquifer above an unconfined saturated zone in which groundwater is drawn upward by capillary force and can include the presence of LNAPL.

(f) "Consultant" means a person that meets the requirements set forth in section 21325.

(g) "Contamination" or "contaminated" means the presence of a regulated substance in soil, surface water, or groundwater or air that has been released from an underground storage tank system at a concentration exceeding the level set forth in the RCBA tier I screening levels established under section 20120a(1)(a) and (b).

(h) "Corrective action" means the investigation, assessment, cleanup, removal, containment, isolation, treatment, or monitoring of regulated substances released into the environment from an underground storage tank system that is necessary under this part to prevent, minimize, or mitigate injury to the public health, safety, or welfare, the environment, or natural resources.

(i) "DNAPL" means a dense nonaqueous-phase liquid with a specific gravity greater than 1 and composed of 1 or more organic compounds that are immiscible or sparingly soluble in water. DNAPL encompasses all potential occurrences of DNAPL.

(j) "Grab sample" means a single sample or measurement taken at a specific time or over as short a period as feasible.

(k) "Groundwater" means water below the land surface in the zone of saturation and capillary fringe.

(*l*) "Groundwater not in an aquifer" means the saturated formation below the land surface that yields groundwater at an insignificant rate considering the local and regional hydrogeology and is not likely in hydraulic communication with groundwater in an aquifer. This includes water trapped or isolated in fill material in an underground storage tank or equivalent basin.

(m) "Heating oil" means petroleum that is no. 1, no. 2, no. 4-light, no. 4-heavy, no. 5-light, no. 5-heavy, and no. 6 technical grades of fuel oil; other residual fuel oils including navy special fuel oil and bunker c; and

other fuels when used as substitutes for 1 of these fuel oils. Heating oil is typically used in the operation of heating equipment, boilers, or furnaces.

(n) "LNAPL" means a light nonaqueous-phase liquid having a specific gravity less than 1 and composed of 1 or more organic compounds that are immiscible or sparingly soluble in water, and the term encompasses all potential occurrences of LNAPL.

(o) "Local unit of government" means a city, village, township, county, fire department, or local health department as defined in section 1105 of the public health code, 1978 PA 368, MCL 333.1105.

(p) "Low flow sampling" means minimal drawdown groundwater sampling procedures as described in the United States environmental protection agency, office of research and development, office of solid waste and emergency response, EPA/540/S-95/504, December, 1995, EPA groundwater issue.

(q) "Migrating NAPL" means NAPL that is observed to spread or expand laterally or vertically or otherwise result in an increased volume of the NAPL extent, usually indicated by time series data or observation. Migrating NAPL does not include NAPL that appears in a well within the historical extent of the NAPL due to a fluctuating water table.

(r) "Mobile NAPL" means NAPL that exceeds residual saturation, and includes migrating NAPL, but not all mobile NAPL is migrating NAPL.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1995, Act 22, Imd. Eff. Apr. 13, 1995;—Am. 2012, Act 111, Imd. Eff. May 1, 2012;—Am. 2012, Act 446, Imd. Eff. Dec. 27, 2012.

Popular name: Act 451

Popular name: NREPA

324.21303 Definitions; N to V.

Sec. 21303. As used in this part:

(a) "NAPL" means a nonaqueous-phase liquid or a nonaqueous-phase liquid solution composed of 1 or more organic compounds that are immiscible or sparingly soluble in water. NAPL includes both DNAPL and LNAPL.

(b) "Operator" means a person who is presently, or was at the time of a release, in control of, or responsible for, the operation of an underground storage tank system.

(c) "Owner" means a person who holds, or at the time of a release who held, a legal, equitable, or possessory interest of any kind in an underground storage tank system or in the property on which an underground storage tank system is or was located including, but not limited to, a trust, vendor, vendee, lessor, or lessee.

(d) "Property" means real estate that is contaminated by a release from an underground storage tank system.

(e) "Public highway" means a road or highway under the jurisdiction of the state transportation department, a county road commission, or a local unit of government.

(f) "Qualified underground storage tank consultant" means a person who meets the requirements established in section 21325.

(g) "RBCA" means the American Society for Testing and Materials (ASTM) document entitled standard guide for risk-based corrective action applied at petroleum release sites, designation E 1739-95 (reapproved 2010) E1; standard guide for risk-based corrective action designation E 2081-00 (reapproved 2010) E1; and standard guide for development of conceptual site models and remediation strategies for light nonaqueous-phase liquids released to the subsurface designation E 2531-06 E1, all of which are hereby incorporated by reference.

(h) "Regulated substance" means any of the following:

(*i*) A substance defined in section 101(14) of title I of the comprehensive environmental response, compensation, and liability act of 1980, Public Law 96-510, 42 USC 9601, but not including a substance regulated as a hazardous waste under subtitle C of the solid waste disposal act, title II of Public Law 89-272, 42 USC 6921 to 6939e.

(*ii*) Petroleum, including crude oil or any fraction of crude oil that is liquid at standard conditions of temperature and pressure (60 degrees Fahrenheit and 14.7 pounds per square inch absolute). Petroleum includes but is not limited to mixtures of petroleum with de minimis quantities of other regulated substances and petroleum-based substances composed of a complex blend of hydrocarbons derived from crude oil through processes of separation, conversion, upgrading, or finishing such as motor fuels, jet fuels, distillate fuel oils, residual fuel oils, lubricants, and petroleum solvents.

(*iii*) A substance listed in section 112 of part A of title I of the clean air act, chapter 360, 84 Stat 1685, 42 USC 7412.

(i) "Release" means any spilling, leaking, emitting, discharging, escaping, or leaching from an

underground storage tank system into groundwater, surface water, or subsurface soils.

(j) "Residual NAPL saturation" means the range of NAPL saturations greater than zero NAPL saturation up to the NAPL saturation at which NAPL capillary pressure equals pore entry pressure and includes the maximum NAPL saturation, below which NAPL is discontinuous and immobile under the applied gradient.

(k) "Risk-based screening level" or "RBSL" means the unrestricted residential and nonresidential generic cleanup criteria developed by the department pursuant to part 201.

(*l*) "Saturated zone" means a soil area where the soil pores are filled with groundwater and can include the presence of LNAPL.

(m) "Site" means a location where a release has occurred or a threat of release exists from an underground storage tank system, excluding any location where corrective action was completed which satisfies the applicable RBSL or SSTL.

(n) "Surface water" means all of the following, but does not include groundwater or an enclosed sewer, other utility line, storm water retention basin, or drainage ditch:

(*i*) The Great Lakes and their connecting waters.

(*ii*) All inland lakes.

(*iii*) Rivers.

(*iv*) Streams.

(*v*) Impoundments.

(o) "Site-specific target level" or "SSTL" means an RBCA risk-based remedial action target level for contamination developed for a site under RBCA tier II and tier III evaluations.

(p) "Threat of release" or "threatened release" means any circumstance that may reasonably be anticipated to cause a release. Threat of release or threatened release does not include the ownership or operation of an underground storage tank system if the underground storage tank system is operated in accordance with part 211 and rules promulgated under that part.

(q) "Tier I", "tier II", and "tier III" mean those terms as they are used in RBCA.

(r) "Underground storage tank system" means a tank or combination of tanks, including underground pipes connected to the tank or tanks, which is, was, or may have been used to contain an accumulation of regulated substances, and the volume of which, including the volume of the underground pipes connected to the tank or tanks, is 10% or more beneath the surface of the ground. An underground storage tank system does not include any of the following:

(*i*) A farm or residential tank of 1,100 gallons or less capacity used for storing motor fuel for noncommercial purposes.

(*ii*) A tank used for storing heating oil for consumptive use on the premises where the tank is located.

(*iii*) A septic tank.

(*iv*) A pipeline facility, including gathering lines regulated under either of the following:

(A) The natural gas pipeline safety act of 1968, Public Law 90-481, 49 USC Appx 1671 to 1677, 1679a to 1682, and 1683 to 1687.

(B) Sections 201 to 215 and 217 of the hazardous liquid pipeline safety act of 1979, title II of Public Law 96-129, 49 USC Appx 2001 to 2015.

(*v*) A surface impoundment, pit, pond, or lagoon.

(*vi*) A storm water or wastewater collection system.

(*vii*) A flow-through process tank.

(*viii*) A liquid trap or associated gathering lines directly related to oil or gas production and gathering operations.

(*ix*) A storage tank situated in an underground area such as a basement, cellar, mineworking, drift, shaft, or tunnel if the storage tank is situated upon or above the surface of the floor.

(*x*) Any pipes connected to a tank that is described in subdivisions (*i*) to (*ix*).

(*xi*) An underground storage tank system holding hazardous wastes listed or identified under subtitle C of the solid waste disposal act, title II of Public Law 89-272, 42 USC 6921 to 6939e, or a mixture of such hazardous waste and other regulated substances.

(*xii*) A wastewater treatment tank system that is part of a wastewater treatment facility regulated under section 307(b) of title III or section 402 of title IV of the federal water pollution control act, 33 USC 1317 and 1342.

(*xiii*) Equipment or machinery that contains regulated substances for operational purposes such as hydraulic lift tanks and electrical equipment tanks.

(*xiv*) An underground storage tank system that has a capacity of 110 gallons or less.

(*xv*) An underground storage tank system that contains a de minimis concentration of regulated substances.

(*xvi*) An emergency spill or overflow containment underground storage tank system that is expeditiously

emptied after use.

(s) "Vadose zone" means the soil between the land surface and the top of the capillary fringe. Vadose zone is also known as an unsaturated zone or a zone of aeration.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1995, Act 22, Imd. Eff. Apr. 13, 1995;—Am. 1996, Act 116, Imd. Eff. Mar. 6, 1996;—Am. 2012, Act 111, Imd. Eff. May 1, 2012;—Am. 2012, Act 446, Imd. Eff. Dec. 27, 2012;—Am. 2016, Act 381, Eff. Mar. 29, 2017.

Popular name: Act 451

Popular name: NREPA

324.21304 Liability of owner or operator not limited or removed; owner or operator as or employing consultant.

Sec. 21304. (1) Actions taken by a consultant pursuant to this part do not limit or remove the liability of an owner or operator that is liable under section 21323a except as specifically provided for in this part.

(2) Notwithstanding any other provision in this part, if an owner or operator that is liable under section 21323a is a consultant or employs a consultant, this part does not require the owner or operator that is liable under section 21323a to retain an outside consultant to perform the responsibilities required under this part. Those responsibilities may be performed by an owner or operator that is liable under section 21323a who is a consultant or by a consultant employed by the owner or operator that is liable under section 21323a.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 2012, Act 446, Imd. Eff. Dec. 27, 2012.

Popular name: Act 451

Popular name: NREPA

324.21304a Corrective action activities; conduct; manner; use of tier I risk-based screening levels for regulated substances; carcinogenic risk from regulated substance; applicable RBSL or SSTL for groundwater differing from certain standards; corrective action by owner or operator of underground storage tank.

Sec. 21304a. (1) Corrective action activities undertaken pursuant to this part shall be conducted in accordance with the process outlined in RBCA in a manner that is protective of the public health, safety, and welfare, and the environment. Corrective action activities that involve a discharge into air or groundwater as defined in section 21302 or surface water as defined in section 21303 shall be consistent with parts 31 and 55.

(2) The tier I risk-based screening levels for regulated substances are the unrestricted residential and nonresidential generic cleanup criteria developed by the department pursuant to part 201 and shall be utilized in accordance with the process outlined in RBCA as screening levels only.

(3) If a regulated substance poses a carcinogenic risk to humans, the tier I RBSLs derived for cancer risk shall be the 95% upper bound on the calculated risk of 1 additional cancer above the background cancer rate per 100,000 individuals using the exposure assumptions and pathways established by the process in RBCA. If a regulated substance poses a risk of both cancer and an adverse health effect other than cancer, cleanup criteria shall be derived for cancer and each adverse health effect.

(4) If the applicable RBSL or SSTL for groundwater differs from either (a) the state drinking water standard established pursuant to section 5 of the safe drinking water act, 1976 PA 399, MCL 325.1005, or (b) criteria for adverse aesthetic characteristics derived pursuant to R 299.5709 of the Michigan administrative code, the SSTL shall be the more stringent of (a) or (b) unless the person that undertakes corrective actions under this part determines that compliance with (a) or (b) is not necessary because the use of the groundwater is reliably restricted pursuant to section 21310a.

(5) Corrective action at sites where a release has occurred or a threat of release exists from an underground storage tank system is regulated exclusively under this part. Notwithstanding any other provision of this part, an owner or operator that is liable under section 21323a may choose, in its sole discretion, to fulfill its corrective action obligations pursuant to part 201 in lieu of corrective actions pursuant to this part in either of the following situations:

(a) If a release or threat of release at a site is not solely the result of a release or threat of release from an underground storage tank system, the owner or operator that is liable under section 21323a may choose, in its sole discretion, to perform response activities pursuant to part 201 in lieu of corrective actions pursuant to this part.

(b) If a release from an underground storage tank system involves venting groundwater, the owner or operator that is liable under section 21323a may choose, in its sole discretion, to follow the procedures set forth in section 20120e in performing corrective action under this part related to venting groundwater to address the venting groundwater pursuant to part 201 in lieu of corrective actions addressing the venting

groundwater pursuant to this part.

History: Add. 1995, Act 22, Imd. Eff. Apr. 13, 1995;—Am. 1996, Act 116, Imd. Eff. Mar. 6, 1996;—Am. 2012, Act 108, Imd. Eff. May 1, 2012;—Am. 2012, Act 446, Imd. Eff. Dec. 27, 2012.

Popular name: Act 451

324.21304b Removal or relocation of soil.

Sec. 21304b. (1) A person shall not remove soil, or allow soil to be removed, from a site to an off-site location unless that person determines that the soil can be lawfully relocated without posing a threat to the public health, safety, or welfare, or the environment. The determination shall consider whether the soil is subject to regulation under parts 111 and 115.

(2) For the purposes of subsection (1), soil poses a threat to the public health, safety, or welfare, or the environment if concentrations of regulated substances in the soil exceed the tier I RBSLs established pursuant to section 21304a that apply to the location to which the soil will be moved or relocated, except if the soil is to be removed from the site for disposal or treatment, the soil shall satisfy the appropriate regulatory criteria for disposal or treatment. Any land use restriction that would be required for the application of a criterion pursuant to section 21304a shall be in place at the location to which the soil will be moved. Soil may be relocated only to another location that is similarly contaminated, considering the general nature, concentration, and mobility of regulated substances present at the location to which the contaminated soil will be removed. Contaminated soil shall not be moved to a location that is not a site unless it is taken there for treatment or disposal in conformance with applicable laws and regulations.

(3) A person shall not relocate soil, or allow soil to be relocated, within a site of environmental contamination where a corrective action plan was approved unless that person provides assurances that the same degree of control required for application of the criteria of section 21304a is provided for the contaminated soil.

(4) The prohibition in subsection (3) against relocation of contaminated soil within a site of environmental contamination does not apply to soils that are temporarily relocated for the purpose of implementing corrective actions or utility construction if the corrective actions or utility construction is completed in a timely fashion and the short-term hazards are appropriately controlled.

(5) If soil is being relocated in a manner not addressed by this section, the person that owns or operates the site from which soil is being moved shall notify the department within 14 days after the soil is moved. The notice shall include all of the following:

(a) The location from which soil will be removed.

(b) The location to which the soil will be taken.

(c) The volume of soil to be removed.

(d) A summary of information or data on which the person is basing the determination required in subsection (2) that the soil does not present a threat to the public health, safety, or welfare, or the environment.

(e) If land use restrictions would apply pursuant to section 21310a, to the soil when it is relocated, the notice shall include documentation that those restrictions are in place.

(6) The determination required by subsections (1) and (3) shall be based on knowledge of the person undertaking or approving the removal or relocation of soil, or on characterization of the soil for the purpose of compliance with this section.

(7) This section does not apply to soil that is designated as an inert material pursuant to section 11507.

History: Add. 1996, Act 116, Imd. Eff. Mar. 6, 1996;—Am. 2012, Act 108, Imd. Eff. May 1, 2012;—Am. 2012, Act 446, Imd. Eff. Dec. 27, 2012.

324.21304c Duty of owner or operator of property; basis; liability for corrective action activity costs and natural resource damages; applicability of subsection (1)(a) to (f).

Sec. 21304c. (1) A person that owns or operates property that the person has knowledge is contaminated shall do all of the following with respect to regulated substances at the property:

(a) Undertake measures as are necessary to prevent exacerbation.

(b) Exercise due care by undertaking corrective action necessary to mitigate unacceptable exposure to regulated substances, mitigate fire and explosion hazards due to regulated substances, and allow for the intended use of the property in a manner that protects the public health and safety.

(c) Take reasonable precautions against the reasonably foreseeable acts or omissions of a third party and

the consequences that foreseeably could result from those acts or omissions.

(d) Provide reasonable cooperation, assistance, and access to the persons that are authorized to conduct corrective action activities at the property, including the cooperation and access necessary for the installation, integrity, operation, and maintenance of any complete or partial corrective action activity at the property. Nothing in this subdivision shall be interpreted to provide any right of access not expressly authorized by law, including access authorized pursuant to a warrant or a court order, or to preclude access allowed pursuant to a voluntary agreement.

(e) Comply with any land use or resources use restrictions established or relied on in connection with the corrective action activities at the property.

(f) Not impede the effectiveness or integrity of any corrective action or land use or resource use restriction employed at the property in connection with corrective action activities.

(2) A person's obligations under this section shall be based upon the applicable RBSL or SSTL.

(3) A person that violates subsection (1) that is not otherwise liable under this part for the release at the property is liable for corrective action activity costs and natural resource damages attributable to any exacerbation and any fines or penalties imposed under this part resulting from the violation of subsection (1) but is not liable for performance of additional corrective action activities unless the person is otherwise liable under this part for performance of additional corrective action activities. The burden of proof in a dispute as to what constitutes exacerbation shall be borne by the party seeking relief.

(4) Compliance with this section does not satisfy a person's obligation to perform corrective action activities as otherwise required under this part.

(5) Subsection (1)(a) to (c) and (f) does not apply to this state, a county road commission, or a local unit of government if it is not liable under section 21323a(3)(a), (b), (c), or (e) or to this state, a county road commission, or a local unit of government if it acquired property by purchase, gift, transfer, or condemnation or to a person that is exempt from liability under section 21323a(4)(b). However, if this state or a local unit of government, unless exempt from liability under section 21323a(4)(b), acting as the owner or operator of property offers access to the property on a regular or continuous basis for a public purpose and invites the public to use the property for the public purpose, this state or the local unit of government is subject to this section but only with respect to that portion of the property that is opened to and used by the public for the public purpose, and not the entire property. Public purpose includes, but is not limited to, activities such as a park, office building, or public works operation. Public purpose does not include a public highway or activities surrounding the acquisition or compilation of parcels for the purpose of future development.

(6) Subsection (1)(a) to (c) does not apply to a person that is exempt from liability under section 21323a(3)(c) or (d) except with regard to that person's activities at the property.

(7) Subsection (1)(a) to (f) applies to an owner or operator who is liable under section 21323a with respect to regulated substances present within a public highway above applicable RBSLs or SSTLs.

History: Add. 2012, Act 108, Imd. Eff. May 1, 2012;—Am. 2012, Act 446, Imd. Eff. Dec. 27, 2012;—Am. 2016, Act 381, Eff. Mar. 29, 2017.

324.21304d Transfer of interest in real property in which notice required; certification of completed corrective action activity; disclosure.

Sec. 21304d. (1) If a person owns a parcel of real property and has knowledge or information or is on notice through a recorded instrument that the real property is a site, the person shall not transfer an interest in that real property unless the person provides written notice to the transferee that the real property is a site and of the general nature and extent of the release.

(2) A person that owns real property for which a notice required in subsection (1) has been recorded may, upon completion of all corrective action activities for the site as approved by the department, record with the register of deeds for the appropriate county a certification that all corrective action activity required in an approved final assessment report has been completed.

(3) A person shall not transfer an interest in real property unless the person fully discloses any land or resource use restrictions that apply to that real property as a part of corrective action that has been or is being implemented in compliance with section 21304a.

324.21307 Report of release; initial response actions; duties of owner or operator liable under MCL 324.21323a.

Sec. 21307. (1) Upon confirmation of a release from an underground storage tank system, the owner or operator that is liable under section 21323a shall report the release to the department within 24 hours after discovery. The department may investigate the release. However, an investigation by the department does not relieve the owner or operator that is liable under section 21323a from any responsibilities related to the release provided for in this part.

(2) After a release has been reported under subsection (1), the owner or operator that is liable under section 21323a shall immediately begin and expeditiously perform all of the following initial actions:

(a) Identify and mitigate immediate fire, explosion hazards, and acute vapor hazards.

(b) Take action to prevent further release of the regulated substance into the environment including removing the regulated substance from the underground storage tank system that is causing the release.

(c) Using the process outlined by RBCA regarding NAPL, take steps necessary and feasible under this part to address unacceptable immediate risks.

(d) Excavate and contain, treat, or dispose of soils above the water table that are visibly contaminated with a regulated substance if the contamination is likely to cause a fire hazard.

(e) Take any other action necessary to abate an immediate threat to public health, safety, or welfare, or the environment.

(3) Immediately following initiation of initial response actions under this section, the owner or operator that is liable under section 21323a shall do all of the following:

(a) Visually inspect the areas of any aboveground releases or exposed areas of belowground releases and prevent further migration of the released substance into surrounding soils, groundwater, and surface water.

(b) Continue to monitor and mitigate any additional immediate fire and safety hazards posed by vapors or NAPL that have migrated from the underground storage tank system excavation zone and entered into subsurface structures.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1995, Act 22, Imd. Eff. Apr. 13, 1995;—Am. 2012, Act 108, Imd. Eff. May 1, 2012;—Am. 2012, Act 446, Imd. Eff. Dec. 27, 2012.

Popular name: Act 451

324.21307a Site closure report; activities requiring notification by owner or operator to department.

Sec. 21307a. (1) Following initiation of initial actions under section 21307, the owner or operator that is liable under section 21323a shall complete the requirements of this part and submit related reports or executive summaries detailed in this part to address the contamination at the site. At any time that sufficient corrective action has been undertaken to address contamination, the owner or operator that is liable under section 21323a shall complete and submit a site closure report pursuant to section 21312a and omit the remaining interim steps.

(2) In addition to the reporting requirements specified in this part, the owner or operator that is liable under section 21323a shall provide 48-hour notification to the department prior to initiating any of the following activities:

(a) Soil excavation.

(b) Well drilling, including monitoring well installation.

(c) Sampling of soil or groundwater.

(d) Construction of treatment systems.

History: Add. 1995, Act 22, Imd. Eff. Apr. 13, 1995;—Am. 2012, Act 108, Imd. Eff. May 1, 2012;—Am. 2012, Act 446, Imd. Eff. Dec. 27, 2012.

324.21308 Repealed. 1995, Act 22, Imd. Eff. Apr. 13, 1995.

Compiler's note: The repealed section pertained to initial assessment of release.

Popular name: Act 451

Popular name: NREPA

324.21308a Initial assessment report; discovery of migrating or mobile NAPL; additional information; supporting documentation upon request.

Sec. 21308a. (1) Within 180 days after a release has been discovered, the owner or operator that is liable under section 21323a shall complete an initial assessment report and submit the report to the department on a form created pursuant to section 21316. The report shall include the following information:

(a) Results of initial actions taken under section 21307(2).

(b) Site information and site characterization results. The following items shall be included as appropriate given the site conditions:

(*i*) The property address.

(*ii*) The name of the business, if applicable.

(*iii*) The name, address, and telephone number of a contact person for the owner or operator that is liable under section 21323a.

(*iv*) The time and date of release discovery.

(*v*) The time and date the release was reported to the department.

(*vi*) A site map that includes all of the following:

(A) The location of each underground storage tank in the leaking underground storage tank system.

(B) The location of any other known current or former underground storage tank system on the site.

(C) The location of fill ports, dispensers, and other pertinent system components for known current or former underground storage tank systems on the site.

(D) Soil and groundwater sample locations, if applicable.

(E) The locations of nearby buildings, roadways, paved areas, or other structures.

(*vii*) A description of how the release was discovered.

(*viii*) A list of regulated substances the underground storage tank system contained when the release occurred.

(*ix*) A list of the regulated substances the underground storage tank system contained in the past other than those listed in subparagraph (*viii*).

(*x*) The location of nearby surface waters and wetlands.

(*xi*) The location of nearby underground sewers and utility lines.

(*xii*) The component of the underground storage tank system from which the release occurred (e.g., piping, underground storage tank, overfill).

(*xiii*) Whether the underground storage tank system was emptied to prevent further release.

(*xiv*) A description of what other steps were taken to prevent further migration of the regulated substance into the soil or groundwater.

(*xv*) Whether toxic or explosive vapors or migrating or mobile NAPL was found and what steps were taken to evaluate those conditions and the current levels of toxic or explosive vapors or migrating or mobile NAPL in nearby structures.

(*xvi*) The extent to which all or part of the underground storage tank system or soil, or both, was removed.

(*xvii*) Data from analytical testing of soil and groundwater samples.

(*xviii*) A description of the mobile or migrating NAPL investigation and evaluation conducted pursuant to section 21307(2)(c) and, if the evaluation of NAPL concludes that NAPL is recoverable and removal is necessary under this part to abate an unacceptable risk pursuant to the provisions outlined in RBCA, a description of the removal, including all of the following:

(A) A description of the actions taken to remove any NAPL.

(B) The name of the person or persons responsible for implementing the NAPL removal measures.

(C) The estimated quantity, type, and thickness of NAPL observed or measured in wells, boreholes, and excavations.

(D) The type of NAPL recovery system used.

(E) Whether any discharge will take place on site or off site during the recovery operation and where this discharge will be located.

(F) The type of treatment applied to, and the effluent quality expected from, any discharge.

(G) The steps that have been or are being taken to obtain necessary permits for any discharge.

(H) The quantity and disposition of the recovered NAPL.

(*xix*) Identification of any other contamination on the site not resulting from the release and the source, if known.

(*xx*) An estimate of the horizontal and vertical extent of on-site and off-site soil contamination exceeding the applicable RBSL for tier I sites or the applicable SSTL for tier II or tier III sites.

(*xxi*) The depth to groundwater.

(*xxii*) An identification of potential migration and exposure pathways and receptors.

(*xxiii*) An estimate of the amount of soil in the vadose zone that is contaminated.

(*xxiv*) If the on-site assessment indicates that off-site soil or groundwater may be affected, report the steps that have been taken or will be taken including an implementation schedule to expeditiously secure access to off-site properties to complete the delineation of the extent of the release if the contamination exceeds the applicable RBSL or the applicable SSTL.

(*xxv*) Groundwater flow rate and direction.

(*xxvi*) Laboratory analytical data collected. The owner or operator may elect to obtain groundwater samples utilizing a grab sample technique for initial assessment and monitoring purposes that do not represent initial delineation of the limit of contamination or closure verification sampling.

(*xxvii*) The vertical distribution of contaminants that exceed the applicable RBSL or applicable SSTL.

(c) Site classification under section 21314a.

(d) Tier I or tier II evaluation according to the RBCA process.

(e) A work plan, including an implementation schedule for conducting a final assessment report under section 21311a, to determine the vertical and horizontal extent of the contamination that exceeds the applicable RBSL or applicable SSTL as necessary for preparation of the corrective action plan.

(2) If migrating or mobile NAPL is discovered at a site after the submittal of an initial assessment report pursuant to subsection (1), the owner or operator that is liable under section 21323a shall do both of the following:

(a) Perform initial actions identified in section 21307(2)(c).

(b) Submit to the department an amendment to the initial assessment report within 30 days of discovery of the migrating or mobile NAPL that describes response actions taken as a result of the migrating or mobile NAPL discovery.

(3) The department shall not require any additional information beyond that required under this section to be included in an initial assessment report. The owner or operator that is liable under section 21323a shall provide supporting documentation to the data and conclusions of the initial assessment report upon request by the department.

324.21309a Corrective action plan.

Sec. 21309a. (1) If initial actions under section 21307 have not resulted in completion of corrective action, an owner or operator that is liable under section 21323a shall prepare a corrective action plan to address contamination at the site. Corrective action plans submitted as part of a final assessment report shall use the process described in RBCA and shall be based upon the site information and characterization results of the initial assessment report.

(2) A corrective action plan shall include all of the following:

(a) A description of the corrective action to be implemented, including an explanation of how that action will meet the requirements of the tier I, II, or III evaluation in the RBCA process. The corrective action plan shall also include an analysis of the selection of indicator parameters to be used in evaluating the implementation of the corrective action plan, if indicator parameters are to be used. The corrective action plan shall include an analysis of the recoverability of the NAPL and whether the NAPL is mobile or migrating, and a description of ambient air quality monitoring activities to be undertaken during the corrective action if such activities are appropriate.

(b) An operation and maintenance plan if any element of the corrective action requires operation and maintenance. The operation and maintenance plan shall include information that describes the proposed operation and maintenance actions.

(c) A monitoring plan if monitoring of environmental media or site activities or both is required to confirm the effectiveness and integrity of the remedy. The monitoring plan shall include all of the following:

(*i*) Location of monitoring points.

(*ii*) Environmental media to be monitored, including, but not limited to, soil, air, water, or biota.

(*iii*) Monitoring schedule.

(*iv*) Monitoring methodology, including sample collection procedures such as grab sampling procedures for monitoring groundwater, among other procedures.

(*v*) Substances to be monitored, including an explanation of the selection of any indicator parameters to be used.

(*vi*) Laboratory methodology, including the name of the laboratory responsible for analysis of monitoring samples, method detection limits, and practical quantitation levels. Raw data used to determine method detection limits shall be made available to the department on request.

(*vii*) Quality control/quality assurance plan.

(*viii*) Data presentation and evaluation plan.

(*ix*) How the monitoring data will be used to demonstrate effectiveness of corrective action activities.

(*x*) Other elements required by the department to determine the adequacy of the monitoring plan. Department requests for information pursuant to this subparagraph shall be limited to factors not adequately addressed by information required under subparagraphs (*i*) through (*ix*) and shall be accompanied by an explanation of the need for the additional information.

(d) An explanation of any land use or resource use restrictions, if the restrictions are required pursuant to section 21310a, including how those restrictions will be effective in preventing or controlling unacceptable exposures.

(e) A schedule for implementation of the corrective action.

(f) If the corrective action plan includes the operation of a mechanical soil or groundwater remediation system, or both, a financial assurance mechanism to pay for monitoring, operation, and maintenance necessary to assure the effectiveness and integrity of the corrective action remediation system.

(g) If provisions for operation and maintenance, monitoring, or financial assurance are included in the corrective action plan, and those provisions are not complied with, the corrective action plan is void from the time of lapse or violation until the lapse or violation is corrected.

(3) If a corrective action plan prepared under this section does not result in an unrestricted use of the property, the owner or operator that is liable under section 21323a shall provide notice to the public by means designed to reach those members of the public directly impacted by the release above a residential RBSL and the proposed corrective action. The notice shall include the name, address, and telephone number of a contact person. A copy of the notice and proof of providing the notice shall be submitted to the department. The department shall ensure that site release information and corrective action plans that do not result in an unrestricted use of property are made available to the public for inspection upon request.

324.21310a Notice of corrective action; institutional controls; restrictive covenants; alternative mechanisms; notice of land use restrictions.

Sec. 21310a. (1) If the corrective action activities at a site result in a final remedy that relies on a nonresidential RBSL or an SSTL, institutional controls shall be implemented as provided in this subsection. A notice of corrective action shall be recorded with the register of deeds for the county in which the site is located prior to submittal of a closure report under section 21312a. A notice shall be filed under this subsection only by the person that owns the property or with the express written permission of the person that owns the property. A notice of corrective action recorded under this subsection shall state the land use that

was the basis of the corrective action. The notice shall state that if there is a proposed change in the land use at any time in the future, that change may necessitate further evaluation of potential risks to the public health, safety, and welfare and to the environment and that the department shall be contacted regarding any proposed change in the land use. Additional requirements for monitoring or operation and maintenance shall not apply if contamination levels do not exceed the levels established in the tier I evaluation.

(2) If corrective action activities at a site rely on institutional controls other than as provided in subsection (1), the institutional controls shall be implemented as provided in this subsection. The restrictive covenant shall be recorded with the register of deeds for the county in which the property is located within 30 days from submittal of the final assessment report pursuant to section 21311a, unless otherwise agreed to by the department. The restrictive covenant shall be filed only by the person that owns the property or with the express written permission of the person that owns the property. The restrictions shall run with the land and be binding on the owner's successors, assigns, and lessees. The restrictions shall apply until regulated substances no longer present an unacceptable risk to the public health, safety, or welfare or to the environment. The restrictive covenant shall include a survey and property description which define the areas addressed by the corrective action plan and the scope of any land use or resource use limitations. The form and content of the restrictive covenant shall include provisions to accomplish all of the following:

(a) Restrict activities at the site that may interfere with corrective action, operation and maintenance, monitoring, or other measures necessary to assure the effectiveness and integrity of the corrective action.

(b) Restrict activities that may result in exposure to regulated substances above levels established in the corrective action plan.

(c) Prevent a conveyance of title, an easement, or other interest in the property from being consummated by the person that owns the property without adequate and complete provision for compliance with the corrective action plan and prevention of exposure to regulated substances described in subdivision (b).

(d) Grant to the department and its designated representatives the right to enter the property at reasonable times for the purpose of determining and monitoring compliance with the corrective action plan, including, but not limited to, the right to take samples, inspect the operation of the corrective action measures, and inspect records.

(e) Allow this state to enforce restrictions set forth in the covenant by legal action in a court of appropriate jurisdiction.

(f) Describe generally the uses of the property that are consistent with the corrective action plan.

(3) If the owner or operator that is liable under section 21323a determines that exposure to regulated substances may be restricted by a means other than a restrictive covenant in a manner that protects against exposure to regulated substances as defined by the RBSLs and SSTLs, the owner or operator that is liable under section 21323a may select a corrective action plan that relies on alternative mechanisms. Mechanisms that may be considered under this subsection include, but are not limited to, any of the following:

(a) Compliance with an ordinance, state law, or rule that limits or prohibits the use of contaminated groundwater above the RBSLs or SSTLs identified in the corrective action plan, prohibits the raising of livestock, prohibits development in certain locations, or restricts property to certain uses. An ordinance under this subdivision shall be filed with the register of deeds on the affected property or shall be filed as an ordinance affecting multiple properties. An ordinance adopted after the effective date of the 2016 amendatory act that amended this section shall include a requirement that the local unit of government notify the department 30 days before adopting a modification to the ordinance or the lapsing or revocation of the ordinance.

(b) A license or license agreement with the state transportation department if regulated substances are proposed to be left in place within a public highway owned or controlled by the state transportation department. The license or license agreement may include a financial mechanism in an amount calculated to reflect the reasonably estimated increased cost of any activity anticipated to be performed as described in the most recently adopted state 5-year program, that has the potential to disturb or expose the environmental contamination left in place within the public highway, including, but not limited to, 1 of the following:

(*i*) A bond executed by a surety authorized to do business in this state.

(*ii*) Insurance coverage, as evidenced by a proof of insurance.

(*iii*) Eligibility under the underground storage tank cleanup fund created in section 21506b.

(*iv*) A letter of credit.

(*v*) A corporate guarantee.

(*vi*) Self-insurance meeting a financial test approved by the state transportation department.

(c) If the state transportation department fails or refuses to grant a license or enter into a license agreement within 120 days after submission of a request to issue a license or enter into a license agreement, and for public highways owned or controlled by a county road commission or a local unit of government, reliance on

the existence of a public highway, if the owner or operator that is liable under section 21323a does all of the following:

(*i*) Provides the department and the person that owns or operates the public highway with the following information related to the release and site:

(A) The site name, address, and facility identification number, and the name and contact information of the person relying on the alternative mechanism.

(B) Identification of the department district office with jurisdiction over the site.

(C) The name of the affected public highway and the nearest intersection.

(D) Identification of known or suspected contaminants.

(E) A statement that residual or mobile NAPL is or is not present at the affected public highway.

(F) The media affected, including depth of contaminated soil, depth of groundwater, and predominate groundwater flow direction.

(G) A scale drawing of the portion of the public highway subject to the alternate mechanism that depicts the area impacted by regulated substances and the location of utilities in the impacted area, including storm water systems and municipal separate storm water systems.

(H) Identification of all ownership and possessory or use property interests related to the public highway and whether they are affected by the contamination and whether they have received notification of the existing conditions as part of a corrective action plan or pursuant to the due care requirements under section 21304c.

(I) Identification of exposure risks from drinking water, direct contact, groundwater, soil excavation, or relocation.

(*ii*) Confirms that there are no current plans to relocate, vacate, or abandon the public highway.

(*iii*) Either provides a certification to the person that owns or operates the public highway that any contamination present as a result of the release from the underground storage tank system does not enter a storm sewer system or provides all information necessary to clearly identify the nature and extent of the contamination that enters or has the potential to enter the storm sewer system.

(4) A person that applies for a permit issued by a county road commission or a local unit of government to excavate, bore, drill, or perform any other intrusive activity within a public highway or right-of-way of a public highway shall identify whether the proposed work will take place within an area being relied upon as an alternative institutional control.

(5) Reliance on a public highway as an alternative mechanism under subsection (3)(b) does not affect an owner's or operator's liability under section 21323a or impose liability for corrective action or any other obligation on the state transportation department, a county road commission, or a local unit of government. Information provided pursuant to section 21310a(3) or (4) to the person that owns or operates a public highway does not create an estoppel, obligation, or liability on the person that owns or operates the public highway. The use of a public highway as an alternative mechanism does not limit or restrict any right or duty of the state transportation department, a county road commission, or a local unit of government to operate, maintain, repair, reconstruct, enlarge, relocate, abandon, vacate, or otherwise exercise its jurisdiction over any public highway or public highway right-of-way or any part thereof, or to permit any utilities or others to use any public highway or public highway right-of-way, or any part thereof.

(6) A person that implements corrective action activities that relies on land use restrictions shall provide notice of the land use restrictions that are part of the corrective action plan to the local unit of government in which the site is located within 30 days of filing of the land use restrictions with the county register of deeds.

324.21311a Final assessment report; information; providing supporting documentation upon request.

Sec. 21311a. (1) Within 365 days after a release has been discovered, an owner or operator that is liable under section 21323a shall complete a final assessment report that includes a corrective action plan developed

under section 21309a and submit the report to the department on a form created pursuant to section 21316. The report shall include the following information:

(a) A site assessment under the RBCA process, as necessary for determining site classification, and the extent of contamination relative to the applicable RBSLs or applicable SSTLs set forth in the corrective action plan.

(b) Tier II and tier III evaluation, as appropriate, under the RBCA process.

(c) A feasibility analysis. The following shall be included, as appropriate, given the site conditions and the applicable RBSL or applicable SSTL:

(*i*) On-site and off-site corrective action alternatives to remediate contaminated soil and groundwater for each cleanup type above the applicable RBSL or applicable SSTL, including alternatives that permanently and significantly reduce the volume, toxicity, and mobility of the regulated substances if above the applicable RBSL or applicable SSTL.

(*ii*) An analysis of the recoverability and whether the NAPL is mobile or migrating.

(*iii*) The costs associated with each corrective action alternative including alternatives that permanently and significantly reduce the volume, toxicity, and mobility of the regulated substances that are above the applicable RBSL or applicable SSTL.

(*iv*) The effectiveness and feasibility of each corrective action alternative in meeting cleanup criteria that are above the applicable RBSL or applicable SSTL.

(*v*) The time necessary to implement and complete each corrective action alternative.

(*vi*) The preferred corrective action alternative based upon subparagraphs (*i*) through (*v*) and an implementation schedule for completion of the corrective action.

(d) A corrective action plan.

(e) A schedule for corrective action plan implementation.

(2) The owner or operator that is liable under section 21323a shall provide supporting documentation to the data and conclusions of the final assessment report upon request by the department. The department shall not require any additional information beyond that required under this section to be included in its final assessment report.

324.21312a Closure report; information; confirmation of receipt by department; additional information.

Sec. 21312a. (1) Upon completion of the corrective action, the owner or operator that is liable under section 21323a shall complete a closure report and submit the report to the department on a form created pursuant to section 21316. The report shall include the following information:

(a) A summary of corrective action activities and documentation of the basis for concluding that corrective actions have been completed.

(b) Closure verification sampling results. Groundwater samples shall be collected utilizing a low-flow technique for closure verification or other method approved by the department.

(c) The person submitting a closure report shall include a signed affidavit attesting to the fact that the information upon which the closure report is based is complete and true to the best of that person's knowledge. The closure report shall also include a signed affidavit from the consultant who prepared the closure report attesting to the fact that the corrective actions detailed in the closure report comply with all applicable requirements under the applicable RBCA standard and that the information upon which the closure report is based is true and accurate to the best of that consultant's knowledge. In addition, the consultant shall attach a certificate of insurance demonstrating that the consultant has obtained at least all of the insurance required under section 21325.

(d) A person submitting a closure report shall maintain all documents and data prepared, acquired, or relied upon in connection with the closure report for not less than 6 years after the date on which the closure report was submitted. All documents and data required to be maintained under this section shall be made available to

the department upon request.

(2) Within 60 days after receipt of a closure report under subsection (1), the department shall provide the owner or operator that is liable under section 21323a who submitted the closure report with a confirmation of the department's receipt of the report.

(3) The department shall not require any additional information beyond that required under this section to be included in a closure report.

324.21313a Failure to provide required submittal; penalty; computing period of time; extension of reporting deadline; contract provision for payment of fines; disposition of money collected; accrual of penalty.

Sec. 21313a. (1) Beginning on May 1, 2012, except as provided in subsection (6), and except for the confirmation provided in section 21312a(2), if a required submittal under section 21308a, 21311a, or 21312a(1) is not provided during the time required, the department may impose a penalty according to the following schedule:

(a) Not more than $100.00 per day for the first 7 days that the report is late.

(b) Not more than $500.00 per day for days 8 through 14 that the report is late.

(c) Not more than $1,000.00 per day for each day beyond day 14 that the report is late.

(2) Subject to subsection (6), for purposes of this section, in computing a period of time, the day of the act, event, or default, after which the designated period of time begins to run is not included. The last day of the period is included, unless it is a Saturday, Sunday, legal holiday, or holiday, in which event the period runs until the end of the next day that is not a Saturday, Sunday, legal holiday, or holiday.

(3) The department may, upon request, grant an extension to a reporting deadline provided in this part for good cause upon written request 15 days prior to the deadline.

(4) The owner or operator that is liable under section 21323a may by contract transfer the responsibility for paying fines under this section to a consultant retained by the owner or operator that is liable under section 21323a.

(5) The department shall forward all money collected pursuant to this section to the state treasurer for deposit in the emergency response fund created in section 21507.

(6) A penalty shall not begin to accrue under this section unless the department has first notified the person on whom the penalty is imposed that he or she is subject to the penalties provided in this section.

324.21315 Audit; final assessment report or closure report.

Sec. 21315. (1) The department shall design and implement a program to selectively audit final assessment reports and closure reports submitted under this part. Upon receipt of a final assessment report or closure report, the department shall have 90 days to determine whether it will audit the report and inform the owner or operator that is liable under section 21323a of its intention to audit the submitted report within 7 days of the determination. If the department does not inform the owner or operator that is liable under section 21323a of its intention to audit the report within the required time limits, the department shall not audit the report. If the department determines that it will conduct an audit, the audit shall be completed within 180 days of the submission. The department shall inform the owner or operator that is liable under section 21323a in writing of the results of the audit within 14 days of the completion of the audit. All audits shall be conducted based on the standards, criteria, and procedures in effect at the time the final assessment report or closure report was submitted.

(2) The department shall have until January 27, 2013 to selectively audit final assessment reports or closure reports that were submitted on or after November 1, 2011 but not later than July 1, 2012.

(3) If the department conducts an audit, the results of the audit shall approve, approve with conditions, or deny the final assessment report or closure report or shall notify the owner or operator that is liable under section 21323a that the report does not contain sufficient information for the department to make a decision. If the department's response is that the report does not include sufficient information, the department shall identify the information that is required for the department to make a decision. If a report is approved with conditions, the department's approval shall state with specificity the conditions of the approval.

(4) If the department does not perform an audit and provide a written response in accordance with subsection (1) to a final assessment report or closure report submitted after June 15, 2012, the report is considered approved. An owner or operator that is liable under section 21323a may request written confirmation from the department that the report is considered approved under this section, and the department shall provide written confirmation within 14 days of the request.

(5) Any time frame required by this section may be extended by mutual agreement of the department and an owner or operator that is liable under section 21323a submitting a final assessment or closure report. An agreement extending a time frame shall be in writing.

(6) If an audit conducted under this section does not confirm that corrective action has been conducted in compliance with this part or does not confirm that applicable RBSLs or SSTLs have been met, the department shall include both of the following in the written response as required in subsection (1):

(a) The specific deficiencies and the section or sections of this part or rules applicable to this part or applicable RBCA standard that support the department's conclusion of noncompliance or that applicable RBSLs or SSTLs have not been met.

(b) Recommendations about corrective actions or documentation that may address the deficiencies identified under subsection (6)(a).

(7) If the department denies a final assessment report or closure report under this section, an owner or operator that is liable under section 21323a shall either revise and resubmit the report for approval, submit a petition for review of scientific or technical disputes to the response activity review panel pursuant to section 20114e and pay a fee in the amount of $300.00 in lieu of the $3,500.00 fee set forth in section 20114e(7), or submit a petition to the department's office of administrative hearings for a contested case hearing pursuant to section 21332.

(8) Notwithstanding section 21312a, after conducting an audit under this section, the department may issue a closure letter for any site that meets the applicable RBSL or SSTL pursuant to section 21304a.

(9) The department shall only audit a report required under this part 1 time. If the report does not contain sufficient information for the department to make a decision or the department's audit identifies deficiencies as described in subsection (6), the department may audit a revised report if sufficient information is provided for the department to make a decision or, to evaluate whether the identified deficiencies have been corrected, which shall be completed within 90 days of the revised report's submission to the department.

324.21316a Delivery of regulated substance to underground storage tank as misdemeanor; penalty; notice of violation; placard; tampering with placard as misdemeanor; commencement of criminal actions.

Sec. 21316a. (1) A person shall not knowingly deliver a regulated substance to an underground storage tank system that has had a placard affixed to it under subsection (2). A person that knowingly delivers a regulated substance to an underground storage tank system that has had a placard affixed to it under subsection (2) is guilty of a misdemeanor punishable by imprisonment for not more than 90 days or a fine of not more than $500.00, or both. A person is considered to have knowledge if placards have been affixed to the underground storage tank system at the property and are visible at the time of the delivery.

(2) The department, upon discovery of the operation of an underground storage tank system in violation of this part, rules promulgated under this part, part 211, or rules promulgated under part 211, shall provide notification prohibiting delivery of regulated substances to the underground storage tank system by affixing a placard providing notice of the violation in plain view to the underground storage tank system. The department shall provide a minimum of 15 days' notice to the owner or operator that is liable under section 21323a prior to affixing a placard for violations of this part or rules promulgated under this part, unless the violation causes an imminent and substantial endangerment to the public health, safety, or welfare or the environment.

(3) A person shall not remove, deface, alter, or otherwise tamper with a placard affixed to an underground storage tank system pursuant to subsection (2). A person that knowingly removes, defaces, alters, or otherwise tampers with a placard affixed to an underground storage tank system pursuant to subsection (2) such that the notification is not discernible is guilty of a misdemeanor punishable by imprisonment for not more than 90 days or a fine of not more than $500.00, or both.

(4) The attorney general or, upon request by the department, county prosecuting attorney may commence criminal actions for violation of subsections (1) and (3) in the circuit court of the county where the violation occurred.

324.21319a Administrative order.

Sec. 21319a. (1) In accordance with this section, if the department determines that there may be an imminent risk to the public health, safety, or welfare, or the environment, because of a release or threatened release, the department may require an owner or operator that is liable under section 21323a to take action as may be necessary to abate the danger or threat.

(2) The department may issue an administrative order to an owner or operator that is liable under section 21323a requiring that person to perform corrective actions relating to a site, or to take any other action required by this part. An order issued under this section shall state with reasonable specificity the basis for issuance of the order and specify a reasonable time for compliance.

(3) Within 30 days after issuance of an administrative order under this section, a person to whom the order was issued shall indicate in writing whether the person intends to comply with the order.

(4) A person who, without sufficient cause, violates or fails to properly comply with an administrative order issued under this section is liable for either or both of the following:

(a) A civil fine of not more than $25,000.00 for each day during which the violation occurs or the failure to comply continues. A fine imposed under this subsection shall be based upon the seriousness of the violation and any good faith efforts by the violator to comply with the administrative order.

(b) For exemplary damages in an amount at least equal to the amount of any costs of corrective action incurred by the state as a result of a failure to comply with an administrative order but not more than 3 times the amount of these costs.

(5) A person to whom an administrative order was issued under this section may appeal the administrative order pursuant to section 21333.

History: Add. 1995, Act 22, Eff. May 14, 1995;—Am. 2012, Act 112, Imd. Eff. May 1, 2012;—Am. 2012, Act 446, Imd. Eff. Dec. 27, 2012.

324.21323 Commencement of civil action by attorney general; return or retention of federal funds.

Sec. 21323. (1) The attorney general may, on behalf of the department, commence a civil action seeking any of the following:

(a) A temporary or permanent injunction.

(b) Recovery of all costs incurred by the state for taking corrective action.

(c) Damages for the full injury done to the natural resources of this state along with enforcement and litigation costs incurred by the state.

(d) Declaratory judgment on liability for future corrective action costs.

(e) Subject to section 21313a, a civil fine of not more than $10,000.00 for each underground storage tank system for each day of noncompliance with a requirement of this part or a rule promulgated under this part. A fine imposed under this subdivision shall be based upon the seriousness of the violation and any good faith efforts by the violator to comply with the part or rule.

(f) A civil fine of not more than $25,000.00 for each day of noncompliance with a corrective action order issued pursuant to this part. A fine imposed under this subdivision shall be based upon the seriousness of the violation and any good faith efforts by the violator to comply with the corrective action order.

(g) Recovery of funds provided to the state from the United States environmental protection agency's leaking underground storage tank trust fund.

(2) A civil action brought under subsection (1) may be brought in the circuit court for the county where the release occurred or for the county where the defendant resides.

(3) The state may, when appropriate, return to the United States environmental protection agency any federal funds recovered under this part. The state may also retain any federal funds recovered under this part in a separate account for use in implementing this part, with such use subject to approval of the United States environmental protection agency.

324.21323a Liability under part; burden of proof; compliance.

Sec. 21323a. (1) Notwithstanding any other provision of this act, and except as otherwise provided in this section and section 21323c, the following persons are liable under this part:

(a) The owner or operator if the owner or operator is responsible for an activity causing a release or threat of release.

(b) An owner or operator who became an owner or operator on or after March 6, 1996, unless the owner or

operator complies with the following:

(*i*) A baseline environmental assessment is conducted prior to or within 45 days after the earlier of the date of purchase, occupancy, or foreclosure. For purposes of this section, assessing property to conduct a baseline environmental assessment does not constitute occupancy.

(*ii*) The owner or operator provides a baseline environmental assessment to the department and subsequent purchaser or transferee within 6 months after the earlier of the date of purchase, occupancy, or foreclosure.

(*iii*) If the owner or operator fails to meet the time frames in subparagraphs (*i*) and (*ii*), the owner or operator requests and receives from the department a determination that its failure to comply with the time frames was inconsequential.

(c) The estate or trust of a person described in subdivisions (a) and (b).

(2) Subject to section 21304c, an owner or operator who complies with subsection (1)(b) is not liable for contamination existing at the property on which an underground storage tank system is located at the earlier of the date of purchase, occupancy, or foreclosure, unless the person is responsible for an activity causing the contamination. Subsection (1)(b) does not alter a person's liability with regard to a subsequent release or threat of release from an underground storage tank system if the person is responsible for an activity causing the subsequent release or threat of release.

(3) Notwithstanding subsection (1), the following persons are not liable under this part with respect to contamination at property on which an underground storage tank system is located resulting from a release or threat of release unless the person is responsible for an activity causing that release or threat of release:

(a) This state, a county road commission, or a local unit of government if it acquired ownership or control of the property involuntarily through bankruptcy, tax delinquency, abandonment, a transfer from a lender or other circumstances in which the government involuntarily acquires title or control by virtue of its governmental function or as provided in this part; a county road commission or a local unit of government to which ownership or control of property is transferred by this state, by a county road commission, or by another local unit of government that is not liable under subsection (1); or this state, a county road commission, or a local unit of government if it acquired ownership or control of property by seizure, receivership, or forfeiture pursuant to the operation of law or by court order.

(b) This state, a county road commission, or a local unit of government if it holds or acquires an easement interest in property, holds or acquires an interest in property by dedication in a plat, or by dedication pursuant to the public highways and private roads act, 1909 PA 283, MCL 220.1 to 239.6, or otherwise holds or acquires an interest in property for a transportation or utility corridor, including sewers, pipes, and pipelines, or public rights-of-way.

(c) A person that holds an easement interest in property or holds a utility franchise to provide service, for the purpose of conveying or providing goods or services, including, but not limited to, utilities, sewers, roads, railways, and pipelines; or a person that acquires access through an easement.

(d) A person that owns severed subsurface mineral rights or severed subsurface formations or who leases subsurface mineral rights or formations.

(e) This state, a county road commission, or a local unit of government if it leases property to a person and is not liable under this part for environmental contamination at the property.

(f) A person that acquires property as a result of the death of the prior owner or operator of the property, whether by inheritance, devise, or transfer from an inter vivos or testamentary trust.

(g) A person that did not know and had no reason to know that the property was contaminated. To establish that the person did not know and did not have a reason to know that the property was contaminated, the person shall have undertaken at the time of acquisition all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice. A determination of liability under this section shall take into account any specialized knowledge or experience on the part of the person, the relationship of the purchase price to the value of the property if uncontaminated by a regulated substance, commonly known or reasonable ascertainable information about the property, the obviousness of the presence or likely presence of a release or threat of release at the property, and the ability to detect a release or threat of release by appropriate inspection.

(h) A utility performing normal construction, maintenance, and repair activities in the normal course of its utility service business. This subdivision does not apply to property owned by the utility.

(i) A lessee who uses the leased property for a retail, office, or commercial purpose regardless of the level of the lessee's regulated substance use unless the lessee is otherwise liable under this section.

(4) Notwithstanding subsection (1), the following persons are not liable under this part:

(a) A lender that engages in or conducts a lawful marshaling or liquidation of personal property if the lender does not cause or contribute to the environmental contamination. This includes holding a sale of personal property on a portion of the property.

(b) A person that owns or operates property onto which contamination has migrated unless that person is responsible for an activity causing the release that is the source of the contamination.

(c) A person that owns or operates property on which the release or threat of release was caused solely by 1 or more of the following:

(*i*) An act of God.

(*ii*) An act of war.

(*iii*) An act or omission of a third party other than an employee or agent of the person or a person in a contractual relationship existing either directly or indirectly with a person that is liable under this section.

(d) Any person for environmental contamination addressed in a closure report that is approved by the department or is considered approved under section 21315(4). Notwithstanding this subdivision, a person may be liable under this part for the following:

(*i*) A subsequent release not addressed in the closure report if the person is otherwise liable under this part for that release.

(*ii*) Environmental contamination that is not addressed in the closure report and for which the person is otherwise liable under this part.

(*iii*) If the closure report relies on land use or resource use restrictions, a person who desires to change those restrictions is responsible for any corrective action necessary to comply with this part for any land use or resource use other than the land use or resource use that was the basis for the closure report. However, if the closure report relies on an alternate mechanism as provided for in section 21310a and the ordinance, state law, or rule is modified, lapses, or is revoked or the public highway is relocated, vacated, or abandoned, the owner or operator that is liable under section 21323a for the environmental contamination addressed in the closure report shall notify the department 30 days before the ordinance, state law, or rule is modified, lapses, or is revoked or the public highway is relocated, vacated, or abandoned. In such cases, the owner or operator is liable under this part for additional corrective action activities necessary to address any increased risk of exposure to the environmental contamination.

(*iv*) If the closure report relies on monitoring necessary to assure the effectiveness and integrity of the corrective action, an owner or operator that is liable under section 21323a for environmental contamination addressed in a closure report is liable under this part for additional corrective action activities necessary to address any potential exposure to the environmental contamination demonstrated by the monitoring in excess of the levels relied on in the closure report.

(*v*) If the corrective actions that were the basis for the closure report fail to meet performance objectives that are identified in the closure report or section 21304a, an owner or operator that is liable under section 21323a for environmental contamination addressed in the closure report is liable under this part for corrective action necessary to satisfy the performance objectives or otherwise comply with this part.

(5) Notwithstanding any other provision of this part, the state or a local unit of government or a lender who has not participated in the management of the property is not liable under this part for costs or damages as a result of corrective action taken in response to a release or threat of release. For a lender, this subsection applies only to corrective action undertaken prior to foreclosure. This subsection does not preclude liability for costs or damages as a result of gross negligence, including reckless, willful, or wanton misconduct, or intentional misconduct by this state or local unit of government.

(6) In establishing liability under this section, the department bears the burden of proof.

(7) An owner or operator who was in compliance with subsection (1)(b) prior to May 1, 2012 is considered to be in compliance with subsection (1)(b).

History: Add. 2012, Act 108, Imd. Eff. May 1, 2012;—Am. 2012, Act 446, Imd. Eff. Dec. 27, 2012;—Am. 2016, Act 381, Eff. Mar. 29, 2017.

324.21323b Joint and several liability; recovery of costs.

Sec. 21323b. (1) Except as provided in section 21323a(2), a person that is liable under section 21323a is jointly and severally liable for all of the following:

(a) All costs of corrective action lawfully incurred by the state relating to the selection and implementation of corrective action under this part.

(b) All costs of corrective action reasonably incurred under the circumstances by any other person.

(c) Damages for the full value of injury to, destruction of, or loss of natural resources, including the reasonable costs of assessing the injury, destruction, or loss resulting from the release.

(2) The costs of corrective action recoverable under subsection (1) shall also include all costs of corrective action reasonably incurred by the state prior to the promulgation of rules relating to the selection and

implementation of corrective action under this part. A person challenging the recovery of costs under this subsection has the burden of establishing that the costs were not reasonably incurred under the circumstances that existed at the time the costs were incurred.

(3) The amounts recoverable in an action under this section may include interest, attorney fees, witness fees, and the costs of litigation to the prevailing or substantially prevailing party. The interest shall accrue from the date payment is demanded in writing, or the date of the expenditure or damage, whichever is later. The rate of interest on the outstanding unpaid balance of the amounts recoverable under this section shall be the same rate as is specified in section 6013(8) of the revised judicature act of 1961, 1961 PA 236, MCL 600.6013.

(4) In the case of injury to, destruction of, or loss of natural resources under subsection (1)(c), liability shall be to the state for natural resources belonging to, managed by, controlled by, appertaining to, or held in trust by the state or a local unit of government. Sums recovered by the state under this part for natural resource damages shall be retained by the department for use only to restore, repair, replace, or acquire the equivalent of the natural resources injured or acquire substitute or alternative resources. There shall be no double recovery under this part for natural resource damages, including the costs of damage assessment or restoration, rehabilitation, replacement, or acquisition, for the same release and natural resource.

(5) A person shall not be required under this part to undertake corrective action for a permitted release. Recovery by any person for corrective action costs or damages resulting from a permitted release shall be pursuant to other applicable law, in lieu of this part. With respect to a permitted release, this subsection does not affect or modify the obligations or liability of any person under any other state law, including common law, for damages, injury, or loss resulting from a release of a regulated substance or for corrective action or the costs of corrective action.

(6) If the department determines that there may be an imminent and substantial endangerment to the public health, safety, or welfare or to the environment because of an actual or threatened release from an underground storage tank system, the attorney general may bring an action against any person that is liable under section 21323a or any other appropriate person to secure the relief that may be necessary to abate the danger or threat. The court has jurisdiction to grant such relief as the public interest and the equities of the case may require.

(7) The costs recoverable under this section may be recovered in an action brought by the state or any other person.

Popular name: Act 451

Popular name: NREPA

324.21323c Liability of corrective action contractor; "corrective action contract" and "corrective action contractor" defined; liability if act or failure to act consistent with national contingency plan or directed by federal on-scene coordinator or director; damages; definitions; burden of proof.

Sec. 21323c. (1) Except as otherwise provided in this section, a person that is a corrective action contractor for any release or threatened release is not liable to any person for injuries, costs, damages, expenses, or other liability, including, but not limited to, claims for indemnification or contribution and claims by third parties for death, personal injuries, illness, or loss of or damages to property or economic loss that result from the release or threatened release. This subsection does not apply if a release or threatened release is caused by conduct of the corrective action contractor that is negligent or grossly negligent or that constitutes intentional misconduct.

(2) Subsection (1) does not affect the liability of a person under any warranty under federal, state, or common law. This subsection does not affect the liability of an employer who is a corrective action contractor to any employee of the employer under law, including any law relating to worker's compensation.

(3) An employee of this state or a local unit of government who provides services relating to a corrective action while acting within the scope of his or her authority as a governmental employee has the same exemption from liability as is provided to the corrective action contractor under subsection (1).

(4) Except as provided in this section, this section does not affect the liability under this part or under any other federal or state law of any person.

(5) As used in subsections (1) to (4):

(a) "Corrective action contract" means a contract or agreement entered into by a corrective action contractor with 1 or more of the following:

(*i*) The department.

(*ii*) The department of community health.

(*iii*) A person that is arranging for corrective action under this part.

(b) "Corrective action contractor" means all of the following:

(*i*) A person that enters into a corrective action contract with respect to a release or threatened release and is carrying out the terms of a contract.

(*ii*) A person that is retained or hired by a person described in subparagraph (*i*) to provide any service relating to a corrective action.

(*iii*) A qualified underground storage tank consultant.

(6) Notwithstanding any other provision of law, a person is not liable for corrective action costs or damages that result from an act or a failure to act in the course of rendering care, assistance, or advice with respect to a release of petroleum into or on the surface waters of the state or on the adjoining shorelines to the surface waters of the state if the act or failure to act was consistent with the national contingency plan or as otherwise directed by the federal on-scene coordinator or the director. This subsection does not apply to any of the following:

(a) A person that is liable under section 21323a that is a responsible party.

(b) An action with respect to personal injury or wrongful death.

(c) A person that is grossly negligent or engages in willful misconduct.

(7) A person that is liable under section 21323a and that is a responsible party is liable for any corrective action costs and damages that another person is relieved of under subsection (6).

(8) As used in this subsection and subsections (6) and (7):

(a) "Damages" means damages of any kind for which liability may exist under the laws of this state resulting from, arising out of, or related to the release or threatened release of petroleum.

(b) "Federal on-scene coordinator" means the federal official predesignated by the United States environmental protection agency or the United States coast guard to coordinate and direct federal responses under the national contingency plan or the official designated by the lead agency to coordinate and direct corrective action under the national contingency plan.

(c) "National contingency plan" means the national contingency plan prepared and published under section 311 of title III of the federal water pollution control act, 33 USC 1321.

(9) This section does not affect a plaintiff's burden of establishing liability under this part.

Popular name: Act 451

Popular name: NREPA

324.21323d Basis for division of harm; action for contribution; reallocation of uncollectible amount; effect of consent order.

Sec. 21323d. (1) If 2 or more persons acting independently are liable under section 21323a and there is a reasonable basis for division of harm according to the contribution of each person, each person is subject to liability under this part only for the portion of the total harm attributable to that person. However, a person seeking to limit that person's liability on the grounds that the entire harm is capable of division has the burden of proof as to the divisibility of the harm and as to the apportionment of liability.

(2) If 2 or more persons are liable under section 21323a for an indivisible harm, each person is subject to liability for the entire harm.

(3) A person may seek contribution from any other person that is liable under section 21323a during or following a civil action brought under this part. This subsection does not diminish the right of a person to bring an action for contribution in the absence of a civil action by the state under this part. In a contribution action brought under this part, the court shall consider all of the following factors in allocating corrective action costs and damages among liable persons:

(a) Each person's relative degree of responsibility in causing the release or threat of release.

(b) The principles of equity pertaining to contribution.

(c) The degree of involvement of and care exercised by the person with regard to the regulated substance.

(d) The degree of cooperation by the person with federal, state, or local officials to prevent, minimize, respond to, or remedy the release or threat of release.

(e) Whether equity requires that the liability of some of the persons should constitute a single share.

(4) If, in an action for contribution under subsection (3), the court determines that all or part of a person's share of liability is uncollectible from that person, then the court may reallocate any uncollectible amount among the other liable persons according to the factors listed in subsection (3). A person whose share is determined to be uncollectible continues to be subject to contribution and to any continuing liability to the state.

(5) A person that has resolved that person's liability to the state in an administrative or judicially approved consent order is not liable for claims for contribution regarding matters addressed in the consent order. The consent order does not discharge any of the other persons liable under section 21323a unless the terms of the consent order provide for this discharge, but the potential liability of the other persons is reduced by the amount of the consent order.

(6) A person that is not liable under this part, including a person that was issued a written determination under former section 20129a affirming that the person meets the criteria for an exemption from liability, and that is otherwise in compliance with section 21304c, shall be considered to have resolved that person's liability to the state in an administratively approved settlement under the applicable federal law and shall by operation of law be granted contribution protection under federal law and under this part in the same manner that contribution protection is provided pursuant to subsection (5).

(7) If the state obtains less than complete relief from a person that has resolved that person's liability to the state in an administrative or judicially approved consent order under this part, the state may bring an action against any other person liable under section 21323a that has not resolved that person's liability.

(8) A person that has resolved that person's liability to the state for some or all of a corrective action in an administrative or judicially approved consent order may seek contribution from any person that is not a party to the consent order described in subsection (5).

(9) In an action for contribution under this section, the rights of any person that has resolved that person's liability to the state is subordinate to the rights of the state, if the state files an action under this part.

324.21323e Effect of indemnification, hold harmless, or similar agreement or conveyance.

Sec. 21323e. (1) An indemnification, hold harmless, or similar agreement or conveyance is not effective to transfer from a person that is liable under section 21323a to the state for evaluation or corrective action costs or damages for a release or threat of release to any other person the liability imposed under this part. This section does not bar an agreement to insure, hold harmless, or indemnify a party to the agreement for liability under this part.

(2) This part does not bar a cause of action that a person subject to liability under this part, or a guarantor, has or would have by reason of subrogation or otherwise against any person.

History: Add. 2012, Act 108, Imd. Eff. May 1, 2012.

Popular name: Act 451

Popular name: NREPA

324.21323f Costs and damages; limitation.

Sec. 21323f. (1) Except as provided in subsection (2), the liability under this part for each release or threat of release shall not exceed the total of all the costs of corrective action and fines, plus $50,000,000.00 damages for injury to, destruction of, or loss of natural resources resulting from the release or threat of release, including the reasonable costs of assessing the injury, destruction, or loss resulting from the release or threat of release.

(2) Notwithstanding the limitations in subsection (1), the liability of a person under this part shall be the full and total costs and damages listed in subsection (1), in either of the following circumstances:

(a) The release or threatened release of a regulated substance was the result of willful misconduct or gross negligence of the party.

(b) The primary cause of the release or threat of release was a knowing violation of applicable safety, construction, or operating standards or regulations.

324.21323g Covenant not to sue; conditions; effect; factors; covenant not to sue concerning future liability; exception; provisions providing for future enforcement action.

Sec. 21323g. (1) The state may provide a person with a covenant not to sue concerning any liability to the state under this part, including future liability, resulting from a release or threatened release addressed by corrective action, whether that action is on or off the property on which an underground storage tank system is located, if each of the following is met:

(a) The covenant not to sue is in the public interest.

(b) The covenant not to sue would expedite corrective action consistent with rules promulgated under this part.

(c) There is full compliance with a consent order under this part for response to the release or threatened release concerned.

(d) The corrective action has been approved by the department.

(2) A covenant not to sue concerning future liability to the state shall not take effect until the department certifies that corrective action has been completed in accordance with the requirements of this part at the property that is the subject of the covenant.

(3) In assessing the appropriateness of a covenant not to sue and any condition to be included in a covenant not to sue, the state shall consider whether the covenant or condition is in the public interest on the basis of factors such as the following:

(a) The effectiveness and reliability of the corrective action, in light of the other alternative corrective actions considered for the property concerned.

(b) The nature of the risks remaining at the property.

(c) The extent to which performance standards are included in the consent order.

(d) The extent to which the corrective action provides a complete remedy for the property, including a reduction in the hazardous nature of the substances at the property.

(e) The extent to which the technology used in the corrective action is demonstrated to be effective.

(f) Whether corrective action will be carried out, in whole or in significant part, by persons that are liable under section 21323a.

(4) A covenant not to sue under this section is subject to the satisfactory performance by a person of that person's obligations under the agreement concerned.

(5) A covenant not to sue a person concerning future liability to the state shall include an exception to the covenant that allows the state to sue that person concerning future liability resulting from the release or threatened release that is the subject of the covenant if the liability arises out of conditions that are unknown at the time the department certifies under subsection (2) that corrective action has been completed at the property concerned.

(6) In extraordinary circumstances, the state may determine, after assessment of relevant factors such as those referred to in subsection (3) and volume, toxicity, mobility, strength of evidence, ability to pay, litigative risks, public interest considerations, precedential value, and inequities and aggravating factors, not to include the exception in subsection (5) if other terms, conditions, or requirements of the agreement containing the covenant not to sue are sufficient to provide all reasonable assurances that the public health and the environment will be protected from any future releases at or from the property.

(7) The state may include any provisions providing for future enforcement action that in the discretion of the department are necessary and appropriate to assure protection of the public health, safety, and welfare and the environment.

324.21323h Proposal to redevelop or reuse contaminated property; covenant not to sue; conditions; assertion of claims; irrevocable right of entry to department, its contractors, or other persons performing corrective action.

Sec. 21323h. (1) The state may provide a person that proposes to redevelop or reuse property contaminated by a release from an underground storage tank system, including a vacant manufacturing or abandoned industrial site, with a covenant not to sue concerning liability under section 21323a, if all of the following conditions are met:

(a) The covenant not to sue is in the public interest.

(b) The covenant not to sue will yield new resources to facilitate implementation of corrective action.

(c) The covenant not to sue would, when appropriate, expedite corrective action consistent with the rules promulgated under this part.

(d) Based upon available information, the department determines that the redevelopment or reuse of the property is not likely to do any of the following:

(*i*) Exacerbate or contribute to the existing release or threat of release.

(*ii*) Interfere with the implementation of corrective action.

(*iii*) Pose health risks related to the release or threat of release to persons who may be present at or in the vicinity of the property.

(e) The proposal to redevelop or reuse the property has economic development potential.

(2) A person that requests a covenant not to sue under subsection (1) shall demonstrate to the satisfaction of the state all of the following:

(a) That the person is financially capable of redeveloping and reusing the property in accordance with the covenant not to sue.

(b) That the person is not affiliated in any way with any person that is liable under section 21323a for a release or threat of release at the property.

(c) Compliance with section 21304c.

(3) A covenant not to sue issued under this section shall address only past releases or threats of release at a property and shall expressly reserve the right of the state to assert all other claims against the person that proposes to redevelop or reuse the property, including, but not limited to, those claims arising from any of the following:

(a) The release or threat of release of any regulated substance resulting from the redevelopment or reuse of the property to the extent such claims otherwise arise under this part.

(b) Interference with or failure to cooperate with the department, its contractors, or other persons conducting corrective action.

(4) A covenant not to sue issued under this section shall provide for an irrevocable right of entry to the department, its contractors, or other persons performing corrective action related to the release or threat of release addressed by the covenant not to sue and for monitoring compliance with the covenant not to sue.

324.21323i Consent order; final settlement.

Sec. 21323i. (1) The department and the attorney general may enter into a consent order with a person that is liable under section 21323a or any group of persons that are liable under section 21323a to perform corrective action if the department and the attorney general determine that the persons that are liable under section 21323a will properly implement the corrective action and that the consent order is in the public interest, will expedite effective corrective action, and will minimize litigation. The consent order may, as determined appropriate by the department and the attorney general, provide for implementation by a person or any group of persons that are liable under section 21323a of any portion of corrective action at the property. A decision of the attorney general not to enter into a consent order under this part is not subject to judicial review.

(2) Whenever practical and in the public interest, as determined by the department, the department and the attorney general shall as promptly as possible reach a final settlement with a person in an administrative or civil action under this part if this settlement involves only a minor portion of the response costs at the property concerned and, in the judgment of the department and the attorney general, the conditions in either of the following are met:

(a) Both of the following are minimal in comparison to other regulated substances at the property:

(*i*) The amount of the regulated substances contributed by that person to the property.

(*ii*) The toxic or other regulated effects of the substances contributed by that person to the property.

(b) Except as provided in subsection (3), the person meets all of the following conditions:

(*i*) The person is the owner of the property on or in which the underground storage tank system is or was located.

(*ii*) The person did not conduct or permit the generation, transportation, storage, treatment, or disposal of any regulated substance at the property.

(*iii*) The person did not contribute to the release or threat of release of a regulated substance at the property through any action or omission.

(3) A settlement shall not be made under subsection (2)(b) if the person purchased the property with actual or constructive knowledge that the property was used for the generation, transportation, storage, treatment, or disposal of a regulated substance.

(4) A settlement under subsection (2) may be set aside if information obtained after the settlement indicates that the person settling does not meet the conditions set forth in subsection (2)(a) or (b).

324.21323j Civil action.

Sec. 21323j. (1) Except as otherwise provided in this part, a person, including a local unit of government on behalf of its citizens, whose health or enjoyment of the environment is or may be adversely affected by a release from an underground storage tank system or threat of release from an underground storage tank system, by a violation of this part or a rule promulgated or order issued under this part, or by the failure of the directors to perform a nondiscretionary act or duty under this part, may commence a civil action against any of the following:

(a) An owner or operator who is liable under section 21323a for injunctive relief necessary to prevent irreparable harm to the public health, safety, or welfare or the environment from a release or threatened release in relation to that underground storage tank system on the property on which the underground storage tank system is located.

(b) A person that is liable under section 21323a for a violation of this part or a rule promulgated under this part or an order issued under this part in relation to that underground storage tank system on the property on which the underground storage tank system is located.

(c) One or more of the directors if it is alleged that 1 or more of the directors failed to perform a nondiscretionary act or duty under this part.

(2) The circuit court has jurisdiction in actions brought under subsection (1)(a) to grant injunctive relief necessary to protect the public health, safety, or welfare or the environment from a release or threatened release. The circuit court has jurisdiction in actions brought under subsection (1)(b) to enforce this part or a rule promulgated or order issued under this part by ordering such action as may be necessary to correct the violation and to impose any civil fine provided for in this part for the violation. A civil fine recovered under this section shall be deposited in the general fund. The circuit court has jurisdiction in actions brought under subsection (1)(c) to order 1 or more of the directors to perform the nondiscretionary act or duty concerned.

(3) An action shall not be filed under subsection (1)(a) or (b) unless all of the following conditions exist:

(a) The plaintiff has given at least 60 days' notice in writing of the plaintiff's intent to sue, the basis for the suit, and the relief to be requested to each of the following:

(*i*) The department.

(*ii*) The attorney general.

(*iii*) The proposed defendants.

(b) The state has not commenced and is not diligently prosecuting an action under this part or under other appropriate legal authority to obtain injunctive relief concerning the underground storage tank system or the property on which the underground storage tank system is located or to require compliance with this part or a rule or an order under this part.

(4) An action shall not be filed under subsection (1)(c) until the plaintiff has given in writing at least 60 days' notice to the directors of the plaintiff's intent to sue, the basis for the suit, and the relief to be requested.

(5) In issuing a final order in an action brought pursuant to this section, the court may award costs of litigation, including reasonable attorney and expert witness fees, to the prevailing or substantially prevailing party.

(6) This section does not affect or otherwise impair the rights of any person under federal, state, or common law.

(7) An action under subsection (1)(a) or (b) shall be brought in the circuit court for the circuit in which the alleged release, threatened release, or other violation occurred. An action under subsection (1)(c) shall be brought in the circuit court for Ingham county.

(8) All unpaid costs and damages for which a person is liable under this part constitute a lien in favor of the state upon a property that has been the subject of corrective action by the state and is owned by that person. A lien under this subsection has priority over all other liens and encumbrances except liens and encumbrances recorded before the date the lien under this subsection is recorded. A lien under this subsection arises when the state first incurs costs for corrective action at the property for which the person is responsible.

(9) If the attorney general determines that the lien provided in subsection (8) is insufficient to protect the interest of the state in recovering corrective action costs at a property, the attorney general may file a petition in the circuit court of the county in which the facility is located seeking either or both of the following:

(a) A lien upon the property owned by the person described in subsection (8), subject to corrective action that takes priority over all other liens and encumbrances that are or have been recorded on the property.

(b) A lien upon real or personal property or rights to real or personal property, other than the property which was the subject of corrective action, owned by the person described in subsection (8), having priority over all other liens and encumbrances except liens and encumbrances recorded prior to the date the lien under this subsection is recorded. However, the following are not subject to the lien provided for in this subsection:

(*i*) Assets of a qualified pension plan or individual retirement account under the internal revenue code.

(*ii*) Assets held expressly for the purpose of financing a dependent's college education.

(*iii*) Up to $500,000.00 in nonbusiness real or personal property or rights to nonbusiness real or personal property, except that not more than $25,000.00 of this amount may be cash or securities.

(10) A petition submitted pursuant to subsection (9) shall set forth with as much specificity as possible the type of lien sought, the property that would be affected, and the reasons the attorney general believes the lien is necessary. Upon receipt of a petition under subsection (3), the court shall promptly schedule a hearing to determine whether the petition should be granted. Notice of the hearing shall be provided to the attorney general, the property owner, and any persons holding liens or perfected security interest in the real property subject to corrective action. A lien shall not be granted under subsection (9) against the owner of the property if the owner is not liable under section 21323a.

(11) In addition to the lien provided in subsections (8) and (9), if the state incurs costs for corrective action that increases the market value of real property that is the location of a release or threatened release, the increase in the value caused by the state-funded corrective action, to the extent the state incurred unpaid costs and damages, constitutes a lien in favor of the state upon the real property. This lien has priority over all other liens or encumbrances that are or have been recorded upon the property.

(12) A lien provided in subsection (8), (9), or (11) is perfected against real property when a notice of lien is filed by the department with the register of deeds in the county in which the real property is located. A lien upon personal property provided in subsection (9) is perfected when a notice of lien is filed by the department in accordance with applicable law and regulation for the perfection of a lien on that type of personal property. In addition, the department shall, at the time of the filing of the notice of lien, provide a copy of the notice of lien to the owner of that property by certified mail.

(13) A lien under this section continues until the liability for the costs and damages is satisfied or resolved or becomes unenforceable through the operation of the statute of limitations provided in this part.

(14) Upon satisfaction of the liability secured by the lien, the department shall file a notice of release of lien in the same manner as provided in subsection (12).

(15) If the department, at the time or prior to the time of filing the notice of release of lien pursuant to subsection (14), has made a determination that the person liable under section 21323a has completed all of the corrective action, the department shall execute and file with the notice of release of lien a document stating that all corrective action has been completed.

324.21323k Access to property.

Sec. 21323k. (1) A person that is liable under section 21323a or a lender that has a security interest in all or a portion of a property on which contamination from a release of regulated substances from an underground storage tank system may file a petition in the circuit court of the county in which the property is located seeking access to the property in order to conduct corrective action. If the court grants access to property under this section, the court may do any of the following:

(a) Provide compensation to the person that owns or operates the property for damages related to the granting of access to the property, including compensation for loss of use of the property.

(b) Enjoin interference with the corrective action.

(c) Grant any other appropriate relief as determined by the court.

(2) If a court grants access to property under this section, the person that owns or operates the property to which access is granted is not liable for either of the following:

(a) A release caused by the corrective action for which access is granted unless the person is otherwise liable under section 21323a.

(b) For conditions associated with the corrective action that may present a threat to public health or safety.

History: Add. 2012, Act 108, Imd. Eff. May 1, 2012.

Popular name: Act 451

324.21323*l* Limitation period for filing actions.

Sec. 21323*l*. The limitation period for filing actions under this part is as follows:

(a) For the recovery of corrective action costs and natural resources damages pursuant to section 21323b(1)(a), (b), or (c), within 6 years of initiation of physical on-site construction activities for the corrective action at the property by the person seeking recovery, except as provided in subdivision (b).

(b) For 1 or more subsequent actions for recovery of corrective action costs pursuant to section 21323b, at

any time during the corrective action, if commenced not later than 3 years after the date of completion of all corrective action at the property.

(c) For civil fines under this part, within 3 years after discovery of the violation for which the civil fines are assessed.

History: Add. 2012, Act 108, Imd. Eff. May 1, 2012.

Popular name: Act 451

324.21323m Persons exempt from liability.

Sec. 21323m. (1) Except as provided in section 21323b(5), a person that has complied with the requirements of this part or is exempt from liability under this part is not subject to a claim in law or equity for performance of corrective action under part 17, part 31, or common law.

(2) A person who is exempt from liability under section 21323a is not liable for a claim for corrective action costs, fines or penalties, natural resources damages, or equitable relief under part 17, part 31, or common law resulting from the contamination existing on the site or migrating from the site on the earlier of the date of purchase, occupancy, foreclosure or transfer of ownership, or control of the site to the person. The liability protection afforded in this subsection does not extend to a violation of any permit issued under state law. This subsection does not alter a person's liability for violation of section 21304c.

(3) This section does not bar any of the following:

(a) Tort claims unrelated to performance of corrective action.

(b) Tort claims for damages which result from corrective action.

(c) Tort claims related to the exercise or failure to exercise responsibilities under section 21304c.

History: Add. 2012, Act 108, Imd. Eff. May 1, 2012;—Am. 2012, Act 446, Imd. Eff. Dec. 27, 2012.

Popular name: Act 451

Popular name: NREPA

324.21323n Documentation of due care.

Sec. 21323n. (1) A person may submit to the department documentation of due care compliance regarding a site. The documentation of due care compliance shall be submitted on a form provided by the department and shall contain documentation of compliance with section 21304c prepared by a qualified underground storage tank consultant, and other information required by the department.

(2) Within 45 business days after receipt of documentation of due care compliance under subsection (1) containing sufficient information for the department to make a decision, the department shall approve, approve with conditions, or deny the documentation of due care compliance. If the department does not approve the documentation of due care compliance, the department shall provide the person that submitted the documentation the reasons why the documentation of due care compliance was not approved.

(3) A person that disagrees with a decision of the department under this section may submit a petition for review of scientific or technical disputes to the response activity review panel pursuant to section 20114e or submit a petition to the department's office of administrative hearings for a contested case hearing pursuant to section 21332.

History: Add. 2012, Act 446, Imd. Eff. Dec. 27, 2012.

Popular name: Act 451

Popular name: NREPA

324.21324 Submission of false, misleading, or fraudulent information as felony; penalty; civil fine; retroactive application; "fraudulent" and "fraudulent practice" defined; investigation and commencement of action by attorney general or county prosecutor; subpoena; enforcement; order granting immunity; failure to comply with subpoena; prosecution under other laws not precluded; apportionment of fines.

Sec. 21324. (1) Beginning April 25, 1994, a person who makes or submits or causes to be made or submitted either directly or indirectly a statement, report, confirmation, certification, proposal, or other information under this part knowing that the statement, report, confirmation, certification, proposal, or other information is false or misleading is guilty of a felony punishable by imprisonment for not more than 5 years or a fine of not more than $50,000.00, or both. In addition to any penalty imposed under this subsection, a person convicted under this subsection shall pay restitution to the fund for the amount received in violation of this subsection. For purposes of this subsection, a submission includes transmittal by any means and each such transmittal constitutes a separate submission.

(2) A person who makes or submits or causes to be made or submitted either directly or indirectly a statement, report, confirmation, certification proposal, or other information under this part knowing that the statement, report, confirmation, certification, proposal, or other information is false, misleading, or fraudulent, or who commits a fraudulent practice, is subject to a civil fine of $50,000.00 for each submission or fraudulent practice. In addition to any civil fine imposed under this subsection, a person found responsible under this subsection shall pay restitution to the fund for the amount received in violation of this subsection. The legislature intends that this subsection be given retroactive application. For purposes of this subsection, a submission includes transmittal by any means and each such transmittal constitutes a separate submission.

(3) As used in subsection (2), "fraudulent" or "fraudulent practice" includes, but is not limited to, the following:

(a) Representing that services were done or work was provided that was not done or provided.

(b) Contaminating an otherwise clean resource or site with contaminated soil or product from a contaminated resource or site.

(c) Returning a load of contaminated soil to its original site for reasons other than remediation of the soil.

(d) Causing damage intentionally or as the result of gross negligence to an underground storage tank system, which damage results in a release at a site.

(e) Placing an underground storage tank system at a contaminated site where an underground storage tank system did not previously exist for the purpose of disguising the source of contamination.

(f) Any intentional act or act of gross negligence that causes or allows contamination to spread at a site.

(g) Submitting a false or misleading laboratory report or misrepresenting or falsifying any test result, analysis, or investigation.

(h) Conducting sampling, testing, monitoring, or excavation that is not justified by the site condition.

(i) Falsifying a signature on a statement, report, confirmation, certification, proposal, or other document provided under this part.

(j) Misrepresenting or falsifying the source of data regarding site conditions.

(k) Misrepresenting or falsifying the date upon which a release occurred.

(*l*) Falsely characterizing the contents of an underground storage tank system or reporting regulated substances or parameters other than the substance that was in the underground storage tank system.

(m) Failing to report subsequent suspected or confirmed releases from sites that have had a previously reported release.

(n) Falsifying the date on which an underground storage tank system or any of its components were removed from the ground and site.

(o) Any other act or omission of a false, fraudulent, or misleading nature undertaken to gain compliance or the appearance of compliance with this part.

(4) The attorney general or county prosecutor may conduct an investigation of an alleged violation of this section and bring an action for a violation of this section.

(5) If the attorney general or county prosecutor has reasonable cause to believe that a person has information or is in possession, custody, or control of any documents or records, however stored or embodied, or tangible object relevant to an investigation for violation of this part, the attorney general or county prosecutor may, before bringing any action, make an ex parte request to a magistrate for issuance of a subpoena requiring that person to appear and be examined under oath or to produce the documents, records, or objects for inspection and copying, or both. Service may be accomplished by any means described in the Michigan court rules. Requests made by the attorney general may be brought in Ingham county.

(6) If a person objects to or otherwise fails to comply with a subpoena served under subsection (5), an action may be brought in district court to enforce the demand. Actions filed by the attorney general may be brought in Ingham county.

(7) The attorney general or county prosecutor may apply to the district court for an order granting immunity to any person who refuses to provide or objects to providing information, documents, records, or objects sought pursuant to this section. If the judge is satisfied that it is in the interest of justice that immunity be granted, he or she shall enter an order granting immunity to the person and requiring them to appear and be examined under oath or to produce the documents, records, or objects for inspection and copying, or both.

(8) A person who fails to comply with a subpoena issued pursuant to subsection (5) or a requirement to appear and be examined pursuant to subsection (7) is subject to a civil fine of not more than $25,000.00 for each day of continued noncompliance.

(9) This section does not preclude prosecutions under the laws of this state including, but not limited to, section 157a, 218, 248, 249, 280, or 422 of the Michigan penal code, Act No. 328 of the Public Acts of 1931, being sections 750.157a, 750.218, 750.248, 750.249, 750.280, and 750.422 of the Michigan Compiled Laws.

(10) All civil fines collected pursuant to this section shall be apportioned in the following manner:

(a) Fifty percent shall be deposited in the general fund and shall be used by the department to fund fraud investigations under this part.

(b) Twenty-five percent shall be paid to the office of the county prosecutor or attorney general, whichever office brought the action.

(c) Twenty-five percent shall be paid to a local police department or sheriff's office, or a city or county health department, if investigation by such office or department led to the bringing of the action. If more than 1 office or department is eligible for payment under this subsection, division of payment shall be on an equal basis. If there is not a local office or department entitled to payment under this subsection, the money shall be deposited into the emergency response fund established in section 21507.

324.21325 Qualified underground tank consultant; requirements.

Sec. 21325. A person shall be considered a qualified underground storage tank consultant if the person meets all of the following requirements:

(a) Has experience in all phases of underground storage tank work, including RBCA, tank removal oversight, site assessment, soil removal, feasibility, design, remedial system installation, remediation management activities, and site closure and possesses or employs at least 1 of the following:

(*i*) A professional engineer license with 3 or more years of relevant corrective action experience, preferably involving underground storage tanks.

(*ii*) A professional geologist certification or a similar approved designation such as a professional hydrologist or a certified groundwater professional, with 3 or more years of relevant corrective action experience, preferably involving underground storage tanks.

(*iii*) A person with a master's degree from an accredited institution of higher education in a discipline of engineering or science and 8 years of full-time relevant experience or a person with a baccalaureate degree from an accredited institution of higher education in a discipline of engineering or science and 10 years of full-time relevant experience. This experience shall be documented with professional and personal references, past employment references and histories, and documentation that all requirements of the occupational safety and health act of 1970, Public Law 91-596, 84 Stat 1590, and regulations promulgated under that act, and the Michigan occupational safety and health act, 1974 PA 154, MCL 408.1001 to 408.1094, and rules promulgated under that act have been met.

(*iv*) A person that was certified by the department as an underground storage tank professional pursuant to section 21543 on May 1, 2012.

(b) Has all of the following insurance policies written by carriers authorized to write such business, or approved as an eligible surplus lines insurer, by this state and which are placed with an insurer listed in a.m. best's with a rating of no less than B+ VII:

(*i*) Worker's compensation insurance.

(*ii*) Professional liability errors and omissions insurance. This policy may not exclude bodily injury, property damage, or claims arising out of pollution for environmental work and shall be issued with a limit of not less than $1,000,000.00 per occurrence.

(*iii*) Contractor pollution liability insurance with limits of not less than $1,000,000.00 per occurrence, if not included under the professional liability errors and omissions insurance required under subparagraph (*ii*). The insurance requirement under this subparagraph is not required for consultants who do not perform contracting functions.

(*iv*) Commercial general liability insurance with limits of not less than $1,000,000.00 per occurrence and $2,000,000.00 aggregate.

(*v*) Automobile liability insurance with limits of not less than $1,000,000.00 per occurrence.

(c) Has demonstrated compliance with the occupational safety and health act of 1970, Public Law 91-596, 84 Stat 1590, and the regulations promulgated under that act, and the Michigan occupational safety and health act, 1974 PA 154, MCL 408.1001 to 408.1094, and the rules promulgated under that act, and is able to demonstrate that all such rules and regulations have been complied with during the person's previous corrective action activity.

324.21326 Furnishing information to department; right of entry; inspections and investigations; powers of attorney general.

Sec. 21326. (1) Upon request of the department for the purpose of conducting an investigation, taking corrective action, or enforcing this part, a person shall furnish the department with all available information about all of the following:

(a) The underground storage tank system and its associated equipment.

(b) The past or present contents of the underground storage tank system.

(c) Any releases and investigations of releases.

(2) The department has the right to enter at all reasonable times in or upon any private or public property for any of the following purposes:

(a) Inspecting an underground storage tank system.

(b) Obtaining samples of any substance from an underground storage tank system.

(c) Requiring and supervising the conduct of monitoring or testing of an underground storage tank system, its associated equipment, or contents.

(d) Conducting monitoring or testing of an underground storage tank system in cases where there is no identified responsible party.

(e) Conducting monitoring or testing, or taking samples of soils, air, surface water, or groundwater.

(f) Taking corrective action.

(g) Inspecting and copying any records related to an underground storage tank system.

(3) All inspections and investigations undertaken by the department under this section shall be commenced and completed with reasonable promptness.

(4) The attorney general, on behalf of the department, may do either of the following:

(a) Petition a court of appropriate jurisdiction for a warrant to authorize access to any private or public property to implement this part.

(b) Commence a civil action pursuant to section 21323 for an order authorizing the department to enter any private or public property as necessary to implement this part.

324.21332 Contested case hearing; petition; hearing.

Sec. 21332. (1) Subject to subsection (2), an owner or operator that is liable under section 21323a may petition the department for a contested case hearing pursuant to the administrative procedures act of 1969, 1969 PA 306, MCL 24.201 to 24.328, regarding any of the following:

(a) Corrective action proposed, commenced, or completed.

(b) The SSTLs proposed for a site.

(c) The imposition of penalties pursuant to section 21313a.

(d) The results of any audit performed under section 21315.

(e) A decision regarding the documentation of due care compliance under section 21323n.

(2) Upon receipt of a petition from an owner or operator that is liable under section 21323a pursuant to this section, the department shall conduct the hearing pursuant to chapter 4 of the administrative procedures act of 1969, 1969 PA 306, MCL 24.271 to 24.287. However, an issue that was addressed as part of the final decision of the director under section 20114e or that is being considered by the response activity review panel under section 20114e is not eligible for review as part of a contested case hearing under this section.

324.21333 Appeal of final agency decision.

Sec. 21333. An owner or operator that is liable under section 21323a may appeal a final agency decision to affix a placard under section 21316a(2) or issue an administrative order under section 21319a(2) to the circuit court for the county where the underground storage tank system is located or the Ingham county circuit court in the same manner as and according to the same procedures provided for appeals to the circuit court under section 631 of the revised judicature act of 1961, 1961 PA 236, MCL 600.631. The court shall set aside the final agency decision if substantial rights of the petitioner have been prejudiced because the decision or order is any of the following:

(a) In violation of the constitution or a statute.

(b) In excess of the statutory authority or jurisdiction of the agency.

(c) Made upon unlawful procedure resulting in material prejudice to a party.

(d) Not supported by competent, material, and substantial evidence on the whole record.

(e) Arbitrary, capricious, or clearly an abuse or unwarranted exercise of discretion.

(f) Affected by other substantial and material error of law.

Popular name: NREPA

324.21502 Definitions; A to O.

Sec. 21502. As used in this part:

(a) "Administrator" means the administrator of the authority as provided for in section 21525.

(b) "Affiliate" means a person that directly, or indirectly through 1 or more intermediaries, controls the person specified.

(c) "Approved claim" means a claim that is approved pursuant to section 21510.

(d) "Authority" means the underground storage tank authority created in section 21523.

(e) "Board of directors" or "board" means the board of directors of the authority.

(f) "Bond proceeds account" means the account within the fund to which proceeds of bonds or notes issued under this part have been credited.

(g) "Bonds or notes" means the bonds, notes, commercial paper, other obligations of indebtedness, or any combination of these, issued by the finance authority pursuant to this part.

(h) "Bulk transfer" means a transfer of refined petroleum or a refined petroleum product from, or purchase for resale by, a refiner, pipeline terminal operator, supplier, or marine terminal operator to or from another refiner, pipeline terminal operator, supplier, or marine terminal operator through pipeline tender or marine delivery, including pipeline movements of refined petroleum or a refined petroleum product from 1 or more marine vessel movements of refined petroleum or a refined petroleum product. Refined petroleum or a refined petroleum product in a refinery, pipeline, terminal, or marine vessel transporting refined petroleum or a refined petroleum product to a refinery or terminal is in the bulk transfer terminal system. Notwithstanding anything to the contrary in this subdivision, refined petroleum or a refined petroleum product transferred or purchased for resale by a refiner, pipeline terminal operator, supplier, or marine terminal operator must be delivered to or otherwise remain within the bulk transfer terminal system prior to removal across the rack in order to constitute a bulk transfer.

(i) "Bulk transfer terminal system" means the refined petroleum or refined petroleum product distribution system consisting of refineries, pipelines, marine vessels, and terminals and includes refined petroleum or refined petroleum product storage tanks and refined petroleum or refined petroleum product storage facilities that are part of a refinery, boat terminal transfer, or terminal owned, operated, or controlled by a refiner, marine terminal operator, or pipeline terminal operator.

(j) "Claim" means the submission by the owner or operator or his or her representative of documentation on an application requesting payment by the authority. A claim shall include, at a minimum, a completed and signed claim form and the name, address, and telephone number of the owner or operator.

(k) "Claims limit" means $1,000,000.00 per release. Two or more claims arising out of the same, interrelated, associated, repeated, or continuous releases or a series of related releases shall be subject to 1

claims limit. Any claim that takes place over 2 or more claim periods shall be subject to 1 claims limit.

(*l*) "Claim period" means a 1-year period commencing on October 1 of each year and ending on September 30 the following year.

(m) "Claim period aggregate limit" means the following aggregate claims limit for all releases discovered during a claim period:

(*i*) For owners, operators, and affiliates of 1 to 100 refined petroleum underground storage tanks, $1,000,000.00.

(*ii*) For owners, operators, and affiliates of more than 100 refined petroleum underground storage tanks, $2,000,000.00.

(n) "Controls" means the possession or the contingent or noncontingent right to acquire possession, direct or indirect, of the power to direct or cause the direction of the management and policies of a person, whether through the ownership of voting securities or interests, by contract, other than a commercial contract for goods or nonmanagement services, by pledge of securities, or otherwise, unless the power is the result of an official position with or corporate office held by the person.

(o) "Corrective action" means that term as it is defined in section 21302.

(p) "Deductible amount" means the amount of corrective action costs or indemnification costs that are required to be paid by an owner or operator as provided in section 21510a.

(q) "Department" means the department of environmental quality.

(r) "Eligible person" means an owner or operator who meets the eligibility requirements under this part to submit a claim.

(s) "Excluded liquid" means that term as defined in 26 CFR 48.4081-1.

(t) "Finance authority" means the Michigan finance authority created by Executive Reorganization Order No. 2010-2, MCL 12.194.

(u) "Financial responsibility requirements" means the financial responsibility for taking corrective action and for compensating third parties for bodily injury and property damage caused by a release from a refined petroleum underground storage tank system that the owner or operator of a refined petroleum underground storage tank system must demonstrate under part 211 and the rules promulgated under that part.

(v) "Fund" means the underground storage tank cleanup fund created in section 21506b and includes the bond proceeds account established within the fund.

(w) "Indemnification" means indemnification of an owner or operator for a legally enforceable judgment entered against the owner or operator by a third party, or a legally enforceable settlement entered between the owner or operator and a third party, compensating that third party for bodily injury or property damage, or both, caused by an accidental release as those terms are defined in R 29.2163 of the Michigan Administrative Code.

(x) "Location" means a parcel of property where refined petroleum underground storage tank systems are registered pursuant to part 211.

(y) "Marine terminal operator" means a person that stores refined petroleum or a refined petroleum product at a boat terminal transfer.

(z) "Operator" means that term as it is defined in section 21303 or a person to whom an approved claim has been assigned or transferred.

(aa) "Owner" means that term as it is defined in section 21303.

(bb) "Oxygenate" means an organic compound containing oxygen and having properties as a fuel that are compatible with petroleum, including, but not limited to, ethanol, methanol, or methyl tertiary butyl ether (MTBE).

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 2004, Act 390, Imd. Eff. Oct. 12, 2004;—Am. 2006, Act 318, Imd. Eff. July 20, 2006;—Am. 2012, Act 113, Imd. Eff. May 1, 2012;—Am. 2014, Act 416, Imd. Eff. Dec. 30, 2014;—Am. 2016, Act 380, Eff. Mar. 22, 2017.

Popular name: Act 451

Popular name: NREPA

324.21503 Definitions; P to W.

Sec. 21503. As used in this part:

(a) "Person" means an individual, partnership, corporation, association, governmental entity, or other legal entity.

(b) "Pipeline terminal operator" means a person that receives and stores refined petroleum or a refined petroleum product in tanks and other equipment used in receiving and storing refined petroleum or a refined petroleum product from interstate and intrastate pipelines, pending wholesale bulk reshipment.

(c) "Qualifying expenditures" means an expenditure for a specific activity that does not exceed the

allowable payment for that activity as detailed on the schedule of costs.

(d) "Rack" means a mechanism for delivering refined petroleum or a refined petroleum product from a refiner, a pipeline terminal operator, or a marine terminal operator into a railroad tank car, a transport truck, a tank wagon, or the fuel supply tank of a marine vessel.

(e) "Refined petroleum" means aviation gasoline, middle distillates, jet fuel, kerosene, gasoline, residual oils, and any oxygenates that have been blended with any of these. Refined petroleum includes refined petroleum products and transmix. Refined petroleum does not include excluded liquids.

(f) "Refined petroleum fund" means the refined petroleum fund established under section 21506a.

(g) "Refined petroleum underground storage tank" means an underground storage tank system used for the storage of refined petroleum.

(h) "Refiner" means a person that meets both of the following:

(*i*) Manufactures or produces refined petroleum or a refined petroleum product at a refinery.

(*ii*) Is a taxable fuel registrant that is a refiner for purposes of 26 CFR 48.4081-1.

(i) "Refinery" means a facility used by a refiner to produce refined petroleum or a refined petroleum product from crude oil, unfinished oils, natural gas liquids, or other hydrocarbons by any process involving substantially more than the blending of refined petroleum and from which refined petroleum or a refined petroleum product may be removed by pipeline or marine vessel or at a rack.

(j) "Regulated financial institution" means a state or nationally chartered bank, savings and loan association or savings bank, credit union, or other state or federally chartered lending institution or a regulated affiliate or regulated subsidiary of any of these entities.

(k) "Regulatory fee" means the environmental protection regulatory fee imposed under section 21508.

(*l*) "Release" means that term as it is defined in section 21303.

(m) "Removal" or "removed" means a physical transfer other than by evaporation, loss, or destruction of refined petroleum or a refined petroleum product from a refiner, pipeline terminal operator, or marine terminal operator.

(n) "Schedule of costs" means the list of allowable reimbursement amounts that may be paid on a claim, as established in section 21510b.

(o) "Site" means that term as it is defined in section 21303.

(p) "Supplier" means a supplier or permissive supplier licensed under the motor fuel tax act, 2000 PA 403, MCL 207.1001 to 207.1170.

(q) "Tank wagon" means a straight truck having 1 or more compartments other than the fuel supply tank designed or used to carry fuel.

(r) "Terminal" means a refined petroleum or refined petroleum products storage and distribution facility that meets all of the following requirements:

(*i*) Is registered as a qualified terminal by the internal revenue service.

(*ii*) Is supplied by a pipeline or a marine vessel.

(*iii*) Has a rack from which refined petroleum or refined petroleum products may be removed.

(s) "Transmix" means the mixed product that results from the buffer or interface of 2 different products in a pipeline shipment, or a mixture of 2 different products within a refinery or terminal that results in an off-grade mixture.

(t) "Transport truck" means a semitrailer combination rig designed or used for the purpose of transporting refined petroleum or a refined petroleum product over the public roads or highways.

(u) "Two-party exchange" means a transaction, including a book transfer, in which refined petroleum or a refined petroleum product is transferred from 1 supplier to another supplier and to which all of the following apply:

(*i*) The transaction includes a transfer of refined petroleum or a refined petroleum product from the person that holds the original inventory position for the refined petroleum or refined petroleum product in storage tanks as reflected in the records of the refiner, pipeline terminal operator, or marine terminal operator.

(*ii*) The exchange transaction is completed before removal across the rack by the receiving supplier.

(*iii*) The refiner, pipeline terminal operator, or marine terminal operator in its books and records treats the receiving exchange party as the supplier that removes the refined petroleum or refined petroleum product across a rack for purposes of reporting the transaction to the department under the motor fuel tax act, 2000 PA 403, MCL 207.1001 to 207.1170.

(v) "Underground storage tank system" means that term as it is defined in section 21303.

(w) "Work invoice" means a list of goods or services for costs of corrective action related to a claim, including a statement of the amount due.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1996, Act 181, Imd. Eff. May 3, 1996;—Am. 2006, Act 318, Imd. Eff. July 20,

2006;—Am. 2012, Act 113, Imd. Eff. May 1, 2012;—Am. 2014, Act 416, Imd. Eff. Dec. 30, 2014;—Am. 2016, Act 380, Eff. Mar. 22, 2017.

Popular name: NREPA

324.21504 Objectives of part.

Sec. 21504. The objectives of this part are to fund corrective actions to address releases from refined petroleum underground storage tank systems, to assist owners and operators of refined petroleum underground storage tank systems in meeting their financial responsibility requirements pursuant to part 211, and to achieve compliance with part 213.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 2004, Act 390, Imd. Eff. Oct. 12, 2004;—Am. 2014, Act 416, Imd. Eff. Dec. 30, 2014.

Popular name: Act 451

324.21505 Legislative findings.

Sec. 21505. The legislature finds that releases from underground storage tanks are a significant cause of contamination of the natural resources, water resources, and groundwater in this state. The purpose of this part and of the authority created by this part is to preserve and protect the water resources of the state and to prevent, abate, or control the pollution of water resources and groundwater, to protect and preserve the public health, safety, and welfare, and to assist in the financing of corrective actions due to releases from refined petroleum underground storage tank systems.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 2004, Act 390, Imd. Eff. Oct. 12, 2004;—Am. 2014, Act 416, Imd. Eff. Dec. 30, 2014.

324.21506 Repealed. 2014, Act 416, Imd. Eff. Dec. 30, 2014.

Compiler's note: The repealed section pertained to Michigan underground storage tank financial assurance fund.

324.21506a Refined petroleum fund; creation; deposit of money or other assets; investment; money remaining at close of fiscal year; expenditures; purposes.

Sec. 21506a. (1) The refined petroleum fund is created within the state treasury.

(2) The state treasurer may receive money or other assets from any source for deposit into the refined petroleum fund. The state treasurer shall direct the investment of the refined petroleum fund. The state treasurer shall credit to the refined petroleum fund interest and earnings from refined petroleum fund investments.

(3) Money in the refined petroleum fund at the close of the fiscal year remains in the refined petroleum fund and does not lapse to the general fund.

(4) Money from the refined petroleum fund shall be expended, upon appropriation, only for 1 or more of the following purposes:

(a) Corrective actions performed by the department pursuant to section 21320.

(b) The legacy release program created in section 21519a.

(c) The reasonable costs of the department in administering the refined petroleum fund and implementing part 213.

(d) Not more than $5,000,000.00 annually for petroleum product inspection programs under both of the following:

(*i*) The weights and measures act, 1964 PA 283, MCL 290.601 to 290.635.

(*ii*) The motor fuels quality act, 1984 PA 44, MCL 290.641 to 290.650d.

(e) Not more than $3,000,000.00 annually for the bureau of fire services and office of the state fire marshal, storage tank division, in the department of licensing and regulatory affairs.

(f) Reimbursement by the authority to local units of government and county road commissions for the costs of corrective action to manage, relocate, or dispose of any media contaminated by regulated substances left in place within a public highway pursuant to section 21310a if all of the following occur:

(*i*) The local unit of government or county road commission has submitted to the authority a claim for reimbursement on a form created by the authority.

(*ii*) The claim for reimbursement is for reasonable and necessary eligible corrective action costs determined by the administrator pursuant to section 21515(2) to (10).

(*iii*) The amount of reimbursement is not more than $200,000.00 per claim.

(g) Not more than $5,000,000.00 annually for the department to provide grants and loans in accordance with part 196 to facilitate brownfield redevelopment at part 213 properties. Money shall not be provided under this subsection to fund the performance of response activities at a part 213 property to address contamination that is solely attributable to a release regulated under part 201.

(h) The permanent closure of an underground storage tank system by the department if the underground storage tank system meets the conditions that require permanent closure under R 29.2153 of the Michigan Administrative Code or the department determines it is necessary to protect public health, safety, welfare, or the environment.

History: Add. 2004, Act 390, Imd. Eff. Oct. 12, 2004;—Am. 2006, Act 318, Imd. Eff. July 20, 2006;—Am. 2007, Act 67, Imd. Eff. Sept. 28, 2007;—Am. 2012, Act 113, Imd. Eff. May 1, 2012;—Am. 2014, Act 416, Imd. Eff. Dec. 30, 2014;—Am. 2016, Act 467, Eff. Mar. 29, 2017;—Am. 2017, Act 134, Eff. Jan. 24, 2018.

Compiler's note: Enacting section 1 of Act 390 of 2004 provides:

"Enacting section 1. The provisions of this amendatory act relating to the extension and collection of the regulatory fee provided for under this part and the obligation to pay the fee shall be applied retroactively. The requirement to impose and collect the regulatory fee and the obligation to pay the fee shall not be considered to have ceased at any time since the date the requirement and obligation were originally enacted into law. The requirement that this enacting section be applied retroactively extends to any regulatory fee imposed or collected even if it is alleged or determined that sufficient regulatory fees were collected to pay in full bonds or notes issued by the Michigan underground storage tank financial assurance authority.

Popular name: Act 451

Popular name: NREPA

324.21506b Underground storage tank cleanup fund; creation; bond proceeds account; receipt of money or other assets; investment; money remaining at close of fiscal year; authority as administrator; expenditures.

Sec. 21506b. (1) The underground storage tank cleanup fund is created within the state treasury. The state treasurer shall establish a bond proceeds account within the fund and may establish procedures for accounting for deposits and expenditures from the bond proceeds account.

(2) The state treasurer may receive money or other assets from any source for deposit into the fund. The state treasurer shall direct the investment of the fund. The state treasurer shall credit to the fund interest and earnings from fund investments.

(3) Money in the fund at the close of the fiscal year shall remain in the fund and shall not lapse to the general fund.

(4) The authority shall be the administrator of the fund for auditing purposes.

(5) The authority and the finance authority shall expend money from the fund, upon appropriation, only for the following purposes:

(a) As a first priority, to pay principal and interest due on bonds or notes issued by the finance authority pursuant to this part, plus any amount necessary to maintain a fully funded debt reserve or other reserve intended to secure the principal and interest on the bonds or notes as may be required by resolution, indenture, or other agreement of the finance authority.

(b) For the reasonable administrative cost of implementing this part incurred by the department, the department of treasury, the department of attorney general, and the finance authority. Administrative costs include the actual and necessary expenses incurred by the finance authority and its members in carrying out the duties imposed by this part. Total administrative costs expended under this subdivision shall not exceed 7% of the fund's projected revenues in any year. Costs incurred by the finance authority for the issuance of bonds or notes which may also be payable from the proceeds of the bonds or notes shall not be considered administrative costs.

(c) To pay approved claims as provided for in this part.

History: Add. 2014, Act 416, Imd. Eff. Dec. 30, 2014.

Popular name: Act 451

Popular name: NREPA

324.21507 Repealed. 1995, Act 252, Eff. Dec. 22, 1998.

Compiler's note: The repealed section pertained to creation, investment, and disposition of the emergency response fund.

Popular name: Act 451

Popular name: NREPA

324.21508 Environmental protection regulatory fee; imposition; precollection; collection; exemption; deposit of fees; audit, enforcement, collection, and assessment of fees by

department of treasury.

Sec. 21508. (1) An environmental protection regulatory fee is imposed on all refined petroleum products sold for resale in this state or consumption in this state. The regulatory fee shall be charged for capacity utilization of refined petroleum underground storage tanks measured on a per gallon basis. The regulatory fee shall be charged against all refined petroleum products sold for resale in this state or consumption in this state so as to not exclude any products that may be stored in a refined petroleum underground storage tank at any point after the petroleum is refined. The regulatory fee shall be 1 cent per gallon for each gallon of refined petroleum sold for resale in this state or consumption in this state, with the per gallon charge being a direct measure of capacity utilization of a refined petroleum underground storage tank system. The regulatory fee shall not be imposed on a bulk transfer of or a 2-party exchange involving refined petroleum or refined petroleum products.

(2) The department of treasury shall precollect regulatory fees from persons who refine petroleum in this state for resale in this state or consumption in this state and persons who import refined petroleum into this state for resale in this state or consumption in this state. The department of treasury shall collect regulatory fees that can be collected at the same time as the sales tax under section 6a of the general sales tax act, 1933 PA 167, MCL 205.56a. The remainder of the regulatory fees shall be collected in the manner determined by the state treasurer.

(3) A public utility with more than 500,000 customers in this state is exempt from any fee or assessment imposed under this part if that fee or assessment is imposed on petroleum used by that public utility for the generation of steam or electricity.

(4) All regulatory fees collected pursuant to this part during each state fiscal year shall be deposited as follows:

(a) The first $20,000,000.00 that is collected shall be deposited into the fund.

(b) Following the deposit under subdivision (a), all money collected shall be deposited into the refined petroleum fund.

(5) The department of treasury may audit, enforce, collect, and assess the fee imposed by this part in the same manner and subject to the same requirements as revenues collected pursuant to 1941 PA 122, MCL 205.1 to 205.31.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1995, Act 269, Imd. Eff. Jan. 8, 1996;—Am. 2004, Act 390, Imd. Eff. Oct. 12, 2004;—Am. 2014, Act 416, Imd. Eff. Dec. 30, 2014;—Am. 2016, Act 380, Eff. Mar. 22, 2017;—Am. 2016, Act 467, Eff. Mar. 29, 2017.

Compiler's note: Enacting section 1 of Act 390 of 2004 provides:

"Enacting section 1. The provisions of this amendatory act relating to the extension and collection of the regulatory fee provided for under this part and the obligation to pay the fee shall be applied retroactively. The requirement to impose and collect the regulatory fee and the obligation to pay the fee shall not be considered to have ceased at any time since the date the requirement and obligation were originally enacted into law. The requirement that this enacting section be applied retroactively extends to any regulatory fee imposed or collected even if it is alleged or determined that sufficient regulatory fees were collected to pay in full bonds or notes issued by the Michigan underground storage tank financial assurance authority.

Subsection 2 of MCL 324.21550, as amended by 2012 PA 113, and which repeals this section, provides:

"(2) The authority's obligation to pay off any bonds or notes issued pursuant to this part shall survive the repeal of section 21508."

Popular name: Act 451

Popular name: NREPA

324.21509 Calculation and payment of regulatory fees; collection of regulatory fees under product exchange agreement; definition.

Sec. 21509. (1) Notwithstanding any other provision in this part, regulatory fees shall be calculated and paid upon gross or metered gallons with respect to all "light" petroleum products. With respect only to "heavy" petroleum products (No. 4, No. 5, No. 6 residual oils), regulatory fees shall be calculated and paid upon net or temperature-corrected gallons.

(2) Notwithstanding any other provision in this part, until January 1, 2015, if a person receives refined petroleum products in this state for resale in this state or consumption in this state pursuant to a product exchange agreement, the department of treasury shall collect the regulatory fees from that person. As used in this subsection, "product exchange agreement" means an agreement between buyers and sellers of refined petroleum products in which refined petroleum products in bulk quantity are made available to a person solely in consideration of that person making available a like volume of refined petroleum products to the other party at some other location.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 2014, Act 416, Imd. Eff. Dec. 30, 2014.

Popular name: Act 451

Popular name: NREPA

324.21510 Eligibility of owner or operator to receive money from authority for corrective action or indemnification.

Sec. 21510. (1) An owner or operator is eligible to receive money from the authority for corrective action or indemnification due to a release from a refined petroleum underground storage tank system only if all of the following requirements are satisfied and the owner or operator otherwise complies with this part:

(a) The release from which the corrective action or indemnification arose was discovered and reported on or after December 30, 2014.

(b) The refined petroleum underground storage tank from which the release occurred was, at the time of discovery of the release, and is presently, in compliance with the registration and fee requirements of part 211.

(c) The owner or operator reported the release within 24 hours after its discovery as required by part 211 and the rules promulgated under that part.

(d) The owner or operator is not the United States government.

(e) The claim is not for a release from a refined petroleum underground storage tank closed prior to January 1, 1974, in compliance with the fire prevention code, 1941 PA 207, MCL 29.1 to 29.33, and the rules promulgated under that act.

(f) The owner or operator was in compliance with the financial responsibility requirements of part 211 and the rules promulgated under that part at the time of the discovery of the release or releases for which the claim is filed.

(g) The owner or operator is otherwise eligible to receive money from the authority under this part.

(h) The total amount of expenditures, including the deductible amount, does not exceed the claims limit or the claim period aggregate limit applicable to the claim.

(2) The owner or operator may receive money from the authority for corrective action or indemnification due to a release that originates from an aboveground piping and dispensing portion of a refined petroleum underground storage tank system if all of the following requirements are satisfied:

(a) The owner or operator is otherwise in compliance with this part and the rules promulgated under this part.

(b) The release is sudden and immediate.

(c) The release is of a quantity exceeding 25 gallons and is released into groundwater, surface water, or soils.

(d) The owner or operator reported the release to the department within 24 hours after its discovery.

(3) Either the owner or the operator may receive money from the authority under this part for an occurrence, but not both.

(4) An owner or operator that is a public utility with more than 500,000 customers in this state is ineligible to receive money from the authority for corrective action or indemnification associated with a release from a refined petroleum underground storage tank system used to supply refined petroleum for the generation of steam electricity.

(5) If an owner or operator has received money from the authority under this part for a release at a location, the owner and operator are not eligible to receive money from the authority for a subsequent release at the same location unless the owner or operator has done either or both of the following:

(a) Discovered the subsequent release pursuant to corrective action being taken on a confirmed release and included this subsequent release as part of the corrective action for the confirmed release.

(b) Upgraded, replaced, removed, or properly closed in place all refined petroleum underground storage tank systems at the location of the release so as to meet the requirements of part 211 and the rules promulgated under that part.

(6) An owner or operator that discovers a subsequent release at the same location as an initial release pursuant to subsection (5)(a) may receive money from the authority to perform corrective action on the subsequent release, if the owner or operator otherwise complies with the requirements of this part and the rules promulgated under this part. However, the subsequent release shall be considered as part of the claim for the initial release for purposes of determining the total amount of expenditures for corrective action and indemnification under subsection (1)(h).

(7) An owner or operator that discovers a subsequent release at the same location as an initial release following compliance with subsection (5)(b) may receive money from the authority to perform corrective action on the subsequent release, if there have been not more than 2 releases at the location, and if the owner or operator otherwise complies with the requirements of this part and the rules promulgated under this part. The subsequent release shall be considered a separate claim for purposes of determining the total amount of expenditures for corrective action and indemnification under subsection (1)(h).

(8) An owner or operator that seeks to receive money from the authority for corrective action shall submit to the administrator the cleanup fund claim submittal form created by the authority containing the information required by the administrator to determine compliance with this part. The administrator shall determine whether the claim complies with this part and shall notify the owner or operator. The administrator may consult with the department of licensing and regulatory affairs to make the determination required in this subsection.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1995, Act 12, Imd. Eff. Mar. 31, 1995;—Am. 1995, Act 252, Eff. Jan. 8, 1996;—Am. 2012, Act 113, Imd. Eff. May 1, 2012;—Am. 2014, Act 416, Imd. Eff. Dec. 30, 2014;—Am. 2016, Act 380, Eff. Mar. 22, 2017.

Popular name: Act 451

Popular name: NREPA

324.21510a Responsibility of owner or operator for deductible amount.

Sec. 21510a. (1) An owner or operator is responsible for a deductible amount as follows:

(a) If the owner or operator or its affiliate owns or operates fewer than 8 refined petroleum underground storage tanks, $2,000.00 per claim.

(b) If the owner or operator or its affiliate owns or operates 8 or more refined petroleum underground storage tanks, $10,000.00 per claim.

(c) The deductible amount under subdivisions (a) and (b) is retroactive to all claims filed for releases discovered and reported on or after December 30, 2014.

(2) The deductible amount applies to each claim. However, 2 or more claims arising out of the same, interrelated, associated, repeated, or continuous releases or a series of related releases shall be considered a single claim and are subject to 1 deductible amount. Any claim that takes place over 2 or more claim periods is subject to 1 deductible amount.

(3) An owner or operator that submits a work invoice under section 21515 is responsible for the deductible amount described in subsection (1). The expenses toward meeting the deductible amount shall be documented and shall comply with the following:

(a) Expenses for items listed in the schedule of costs shall be at or below the allowable reimbursement amount listed in the schedule of costs.

(b) Expenses for items that are not listed in the schedule of costs shall be reasonable and necessary considering conditions at the site based upon a competitive bidding process established by the authority.

History: Add. 2014, Act 416, Imd. Eff. Dec. 30, 2014;—Am. 2016, Act 380, Eff. Mar. 22, 2017.

324.21510b Itemized corrective actions; schedule of costs.

Sec. 21510b. (1) The authority shall establish a schedule of costs that itemizes corrective actions that are generally conducted at a site and lists an allowable reimbursement amount that may be paid for each corrective action as part of a claim under this part. If the authority determines that costs for particular corrective actions vary in different regions of the state, the authority may establish allowable reimbursement amounts that reflect regional differences.

(2) The authority shall annually review and update the schedule of costs as necessary or appropriate.

(3) The department shall post the schedule of costs and any updates to the schedule of costs on the department's website.

History: Add. 2014, Act 416, Imd. Eff. Dec. 30, 2014.

Popular name: Act 451

Popular name: NREPA

324.21510c Approval of claim; prohibitions.

Sec. 21510c. A claim shall not be approved by the authority for any of the following:

(a) A release that was expected or intended by an owner or operator, or an employee of an owner or operator.

(b) Punitive, exemplary, or multiplied damages, fines, taxes, penalties, assessments, punitive or statutory assessments, or any civil, administrative, or criminal fines, sanctions, or penalties.

(c) A claim made by an owner or operator against any other person that is also an owner or operator of the refined petroleum underground storage tank system.

(d) A release caused by, based upon, resulting from, or attributable to the owner's or operator's intentional, knowing, willful, or deliberate noncompliance with any statute, regulation, ordinance, administrative

complaint, notice of violation, notice letter, executive order, or instruction of any governmental agency or body.

(e) A release arising from the ownership, maintenance, use, or entrustment to others of any aircraft, auto, rolling stock, or watercraft, including loading and unloading.

(f) Costs, charges, or expenses incurred by the owner or operator for goods supplied by the owner or operator or services performed by the staff or employees of the owner or operator, or its parent, subsidiary, or affiliate, unless the costs, charges, or expenses are incurred with the prior written approval of the authority.

(g) A release arising from any consequence, whether direct or indirect, of war, invasion, act of a foreign enemy, act of terrorists, hostilities, whether war has been declared or not, civil war, rebellion, revolution, insurrection or military or usurped power, strike, riot, or civil commotion.

(h) Costs arising out of the reconstruction, repair, replacement, upgrading of a refined petroleum underground storage tank system, or any other improvements and any site enhancements or routine maintenance on, within, or under a location.

(i) Costs arising out of the removing, replacing, or recycling of a refined petroleum underground storage tank system or its contents.

(j) Costs, charges, or expenses incurred to investigate or verify that a confirmed release has taken place.

(k) Costs related to the injury of an employee of the owner or operator or its parent, subsidiary, or affiliate arising out of and in the course of employment by the owner or operator or its parent, subsidiary, or affiliate or performing duties related to the conduct of the business of the owner or operator or its parent, subsidiary, or affiliate by a spouse, child, parent, brother, or sister of that employee. This subdivision applies whether the owner or operator may be liable as an employer or in any other capacity and to any obligation to share damages with or repay someone else who must pay damages because of the injury.

(*l*) Any obligation of the owner or operator under worker's compensation, unemployment compensation, or disability benefits law or similar law.

(m) Any liability or claim for liability of others assumed by the owner or operator under any contract or agreement, unless the owner or operator would have been liable in the absence of the contract or agreement.

(n) A release on, within, under, or emanating from a location if the release commenced subsequent to the time the location was sold, given away, or abandoned.

(o) Costs that have been or will be submitted to or that have been paid pursuant to an insurance policy or policies.

(p) Costs arising from corrective actions performed in excess of the corrective actions required to obtain a restricted closure based on then current land use.

(q) Costs incurred after the closure date of the release or releases for which the claim was filed except for costs for monitoring well abandonment or remediation system decommissioning, or both, performed within 1 year of the closure date.

324.21510d Reliance of owner or operator on fund to meet financial responsibility requirements; submission of request for determination; notice.

Sec. 21510d. If an owner or operator intends to rely on the fund to meet financial responsibility requirements, the owner or operator shall submit to the authority a request for a determination that the owner or operator would be eligible for funding under this part in the event of a release from a refined petroleum underground storage tank system. Upon receipt of a request under this subsection, the authority shall make a determination and provide notice of that determination, in writing, to the owner or operator. The notice may contain conditions for maintenance of that eligibility. A determination under this section is based upon a demonstration of all of the following:

(a) The owner or operator is not ineligible for funding under section 21510(4) and (5).

(b) The refined petroleum underground storage tank or tanks are presently in compliance with the registration and fee requirements of part 211.

(c) The owner or operator is not the United States government.

(d) The owner or operator has financial responsibility for the deductible amount. In order to demonstrate that the owner or operator has financial responsibility for the deductible amount under this section and section 21510(1)(f), the owner or operator may rely upon any financial assurance mechanism listed in 40 CFR 280.95 to 280.107 or either of the following:

(*i*) A financial test of self-insurance. To pass the financial test of self-insurance, the owner or operator must

submit, on a form developed by the authority, financial information certified as accurate by the chief financial officer or comparable position that demonstrates a tangible net worth of at least 3 times the deductible amount required under this part.

(*ii*) A deposit account in the amount of the deductible amount required under this part in a financial institution as defined in section 1202 of the banking code of 1999, 1999 PA 276, MCL 487.11202, if access to the deposit account is restricted by a deposit account control agreement or similar restriction as approved by the authority that requires the approval of the administrator for a withdrawal from the deposit account.

324.21511 Repealed. 2014, Act 416, Imd. Eff. Dec. 30, 2014.

Compiler's note: The repealed section pertained to eligibility of financial institution, land contract vendor, or local unit of government to receive money from fund for corrective action or indemnification.

324.21512 Repealed. 2014, Act 416, Imd. Eff. Dec. 30, 2014.

Compiler's note: The repealed section pertained to approval of expenditures on behalf of owner or operator.

324.21513 Repealed. 2014, Act 416, Imd. Eff. Dec. 30, 2014.

Compiler's note: The repealed section pertained to duties of fund administrator.

324.21514 Repealed. 2014, Act 416, Imd. Eff. Dec. 30, 2014.

Compiler's note: The repealed section pertained to payment of co-payment amount by owner or operator.

324.21515 Receiving money from authority for corrective action; procedures.

Sec. 21515. (1) To receive money from the authority for corrective action, an owner or operator that has received notice from the administrator that its claim has been approved pursuant to section 21510(8) shall follow the procedures outlined in this section and shall submit work invoices to the administrator containing information required by the administrator relevant to determining compliance with this part.

(2) Within 45 days of receipt of work invoices submitted pursuant to subsection (1) using forms created by the authority, the administrator shall make all of the following determinations:

(a) Whether the owner or operator is eligible to receive funding under this part.

(b) Whether the work performed or proposed to be performed is consistent with part 213, and whether those activities are consistent with achieving site closure.

(c) Whether the owner or operator has paid the deductible amount.

(d) Whether the corrective action performed is reasonable and necessary considering conditions at the site of the release.

(e) Whether the cost of performing the corrective action work is at or below the allowable reimbursement amount in the schedule of costs or, if the corrective action work is not a listed item, whether the cost is reasonable and necessary, and whether the cost was based upon a competitive bidding process established by the authority.

(3) The administrator may consult with the department and the department of licensing and regulatory affairs to make the determination required in subsection (2).

(4) If the administrator determines under subsection (2) that the work invoice is reasonable and necessary considering conditions at the site of the release and reasonable in terms of cost and the owner or operator is eligible for funding under this part, the administrator shall approve the work invoice and notify the owner or operator that submitted the work invoice of the approval. If the administrator determines that the work described on the work invoices submitted was not reasonable and necessary or the cost of the work is not reasonable, or that the owner or operator is not eligible for funding under this part, the administrator shall deny the work invoice or any portion of the work invoice submitted and give notice of the denial to the owner or operator that submitted the work invoice.

(5) The owner or operator may submit work invoices to the administrator that are related to a claim only after initial approval of the claim under section 21510(8) and if the aggregate amount of work invoices in the submission is $5,000.00 or more. This limitation does not apply to the final work invoice submission related to the approved claim.

(6) If the administrator determines that a work invoice does not meet the requirements of subsection (2) or (5), the administrator shall deny reimbursement for the work invoice and give written notice of the denial to the owner or operator who submitted the work invoice.

(7) The administrator shall approve a reimbursement for a work invoice that was submitted by an owner or

operator for corrective action taken if the work invoice meets the requirements of this part for an approved claim and an approved work invoice.

(8) Except as provided in subsection (9) and section 21519, the authority shall make a joint payment to the owner or operator and the contractor that performed the work listed in the approved work invoices within 45 days after the date of the administrator's approval under subsection (4) if sufficient money exists in the fund. Once payment has been made under this section, the authority is not liable for any claim on the basis of that payment.

(9) The authority may withhold partial payment of money on payment vouchers if there is reasonable cause to suspect that there are violations of section 21548 or if necessary to assure acceptable completion of the proposed work.

(10) The authority shall prepare and make available to owners and operators standardized claim and work invoice forms.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1995, Act 269, Imd. Eff. Jan. 8, 1996;—Am. 1996, Act 181, Imd. Eff. May 3, 1996;—Am. 2012, Act 113, Imd. Eff. May 1, 2012;—Am. 2014, Act 416, Imd. Eff. Dec. 30, 2014;—Am. 2016, Act 380, Eff. Mar. 22, 2017.

Popular name: Act 451

324.21516 Assignment or transfer of approved claim; notice.

Sec. 21516. (1) An owner or operator with a claim approved pursuant to section 21510 for which corrective action is in progress who sells or transfers the property that is the subject of the approved claim to another person may assign or transfer the approved claim to that other person. The person to whom the assignment or transfer is made is eligible to receive money from the authority as an owner or operator for the release which is the subject of the approved claim. Allowable, outstanding approved or paid work invoices of the owner or operator making the assignment or transfer may be counted toward the deductible amount of the person to whom the assignment or transfer is made.

(2) An owner or operator assigning or transferring an approved claim pursuant to this section shall notify the administrator of the proposed assignment or transfer at least 10 days before the effective date of the assignment or transfer.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 2014, Act 416, Imd. Eff. Dec. 30, 2014;—Am. 2016, Act 380, Eff. Mar. 22, 2017.

324.21517 Repealed. 2014, Act 416, Imd. Eff. Dec. 30, 2014.

Compiler's note: The repealed section pertained to responsibilities of owner or operator and compliance with certain requirements.

324.21518 Receiving money from authority for indemnification; request for indemnification; approval by attorney general; records; payment.

Sec. 21518. (1) To receive money from the authority for indemnification, the owner or operator shall submit to the administrator a request for indemnification containing the information required by the administrator, including a copy of the judgment obtained by a third party from a court of law against the owner or operator or the settlement entered into between the owner or operator and the third party, all documentation supporting the reasonableness of and justification for the judgment or settlement, and work invoices which conform to the requirements of this part. If the administrator determines that the owner or operator is eligible for funding under this part, is eligible for the amount requested, has paid the deductible amount, and has not exceeded the allowable amount of expenditure provided in section 21510(1)(i), and that the work invoices are payable under this part, the administrator shall forward a copy of the request for indemnification along with all supporting documentation to the attorney general. The attorney general shall approve the request for indemnification if there is a legally enforceable judgment against, or settlement with, the owner or operator that was caused by an accidental release and that is reasonable and consistent with the purposes of this part. The attorney general may raise as a defense to the request any rights or defenses that were or are available to the owner or operator and, in the case of a judgment, that were not heard and ruled upon by the court. If a request for indemnification is approved by the attorney general, the authority shall pay the indemnification amount.

(2) The administrator shall keep records of all approved requests for indemnification.

(3) The authority shall make a payment to an owner or operator for an approved indemnification request within 30 days if sufficient money is available to make the payment.

324.21519 Order of payment; insufficient money available; liability of authority and state.

Sec. 21519. (1) The authority shall make payments on claims in the order in which they are received. However, if there is insufficient money available to make payments on all approved claims, the authority shall give notice to each owner that is eligible to submit a claim under this part advising the owners of the financial situation and the authority shall prioritize payments based upon the risks at the site to the public health, safety, or welfare or the environment. Payments on claims that are not funded shall be paid if revenues subsequently become available.

(2) The authority and the state are not liable for work invoices or requests for indemnification if revenues of the authority are insufficient to meet these claims.

324.21519a Legacy release program; establishment; administration; reimbursement; conditions; request for reimbursement; form; approval by authority; "eligible person" defined.

Sec. 21519a. (1) The department shall establish and the authority shall administer a legacy release program as provided in this section to reimburse eligible persons for costs of corrective actions for certain historic releases from refined petroleum underground storage tank systems. An eligible person may be reimbursed for corrective action costs incurred if the eligible person demonstrates all of the following:

(a) The release from which the corrective action or indemnification arose was discovered and reported prior to December 30, 2014.

(b) The release upon which the request for reimbursement is based has not been closed pursuant to part 213 prior to December 30, 2014.

(c) Any refined petroleum underground storage tank systems that are operating at the location from which the release occurred are currently in compliance with the registration requirements of part 211.

(d) The request for reimbursement does not include reimbursement for money that was reimbursed from any other source, including insurance policies.

(e) A claim submitted to the legacy release program shall not be approved by the authority for any of the prohibitions listed under section 21510c.

(f) The request for reimbursement is for corrective action performed on or after December 30, 2014.

(2) An eligible person that seeks to be reimbursed under the legacy release program established under this section shall submit to the authority a request for reimbursement on a form provided by the authority containing the documentation required by the authority.

(3) The authority shall approve a request for reimbursement under this section only as follows:

(a) The amount approved for reimbursement shall be 50% of the aggregate indemnification and corrective action costs incurred, but not more than 50% of the reasonable and necessary eligible costs as determined by the administrator pursuant to section 21515(2) to (10).

(b) The total amount approved for reimbursement shall not exceed a total of $50,000.00 for all releases from refined petroleum underground storage tank systems at a single location.

(c) An owner or operator may request a review of a denied claim or work invoice per section 21521.

(4) As used in this section, "eligible person" means the owner or operator of a refined petroleum underground storage tank system at the time of the reporting of the release.

324.21520 Repealed. 2014, Act 416, Imd. Eff. Dec. 30, 2014.

Compiler's note: The repealed section pertained to establishment of audit program to monitor compliance.

324.21521 Denial of claim, invoice, request for indemnification, or request for eligibility determination; review; negotiated resolution; appeal.

Sec. 21521. (1) If the administrator denies a claim, work invoice, request for indemnification, or request for an eligibility determination under section 21510(8), the owner or operator who submitted the claim, work invoice, request for indemnification, or request for an eligibility determination under section 21510(8) may,

within 14 days following the denial, request review by the board. However, if the administrator believes the dispute may be able to be resolved without the board's review, the administrator may contact the owner or operator regarding the issues in dispute and may negotiate a resolution of the dispute prior to the board's review. The board shall conduct a review of the denial to determine whether the claim, work invoice, or request for indemnification is payable under this part.

(2) A person who is denied approval by the board after review under subsection (1) may appeal the decision directly to the circuit court.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 2014, Act 416, Imd. Eff. Dec. 30, 2014;—Am. 2016, Act 380, Eff. Mar. 22, 2017.

Compiler's note: The repealed section pertained to appointment, terms, and duties of board of directors of Michigan underground storage tank financial assurance authority.

324.21523 Underground storage tank authority; creation; handling of funds.

Sec. 21523. The underground storage tank authority is created as a body corporate within the department and shall exercise its prescribed statutory power, financial duties, and financial functions independently of the director of the department or any other department. Funds of the authority shall be handled in the same manner and subject to the same provisions of law applicable to state funds or in a manner specified in a resolution of the authority authorizing the issuance of bonds or notes.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 2014, Act 416, Imd. Eff. Dec. 30, 2014.

324.21524 Authority; appointment, terms, and duties of members; vacancy; conduct of business; meetings open to public; quorum; voting; designation of representative; election of chairperson and other officers.

Sec. 21524. (1) The authority shall be governed by a board of directors consisting of the director of the department and 6 residents of the state appointed by the governor with the advice and consent of the senate as follows:

(a) An individual representing petroleum refiners.

(b) An individual representing independent petroleum marketers.

(c) An individual from a statewide motor fuel retail association.

(d) An individual from a statewide business association that includes owners or operators of refined petroleum underground storage tanks.

(e) An individual from a statewide environmental organization.

(f) A member of the general public.

(2) The 6 appointed members of the board shall serve terms of 3 years. However, in making the initial appointments, the governor shall designate 2 appointed members to serve for 3 years, 2 appointed members to serve for 2 years, and 2 appointed members to serve for 1 year.

(3) Upon appointment to the board of directors under subsection (1), and upon the taking and filing of the constitutional oath of office, a member of the board of directors shall enter office and exercise the duties of the office to which he or she is appointed.

(4) A vacancy on the board of directors shall be filled in the same manner as the original appointment. A vacancy shall be filled for the balance of the unexpired term. A member of the board of directors shall hold office until a successor is appointed and qualified.

(5) Members of the board of directors and officers and employees of the authority are subject to 1968 PA 317, MCL 15.321 to 15.330, and 1968 PA 318, MCL 15.301 to 15.310, as applicable. A member of the board of directors or an officer, employee, or agent of the authority shall discharge the duties of his or her position in a nonpartisan manner, with good faith, and with the degree of diligence, care, and skill that an ordinarily prudent person would exercise under similar circumstances in a like position. In discharging his or her duties, a member of the board of directors or an officer, employee, or agent of the authority, when acting in good faith, may rely upon any of the following:

(a) The opinion of counsel for the authority.

(b) The report of an independent appraiser selected with reasonable care by the board of directors.

(c) Financial statements of the authority represented to the member of the board of directors, officer, employee, or agent to be correct by the officer of authority having charge of its books or account, or stated in a written report by the auditor general or a certified public accountant or the firm of the accountant to fairly reflect the financial condition of the authority.

(6) The board of directors shall organize and make its own policies and procedures. The board of directors shall conduct all business at public meetings held in compliance with the open meetings act, 1976 PA 267, MCL 15.261 to 15.275. Public notice of the time, date, and place of each meeting shall be given in the manner required by 1976 PA 267, MCL 15.261 to 15.275. Four members of the board of directors constitute a quorum for the transaction of business. An action of the board of directors shall be by a majority of the votes cast. The director of the department may designate a representative from his or her department to serve as a voting member of the board of directors for 1 or more meetings.

(7) The board of directors shall elect a chairperson from among its members and may elect any other officers the board of directors considers appropriate.

324.21525 Appointment of administrator; employment of experts, other officers, agents, or employees; contract with department; report; audit.

Sec. 21525. (1) The board shall appoint an administrator of the authority and may delegate to the administrator responsibilities for acting on behalf of the authority. The authority may employ on a permanent or temporary basis legal and technical experts, and other officers, agents, or employees, to be paid from the funds of the authority. The authority shall determine the qualifications, duties, and compensation of those it employs, but an employee shall not be paid a higher salary than the director of the department. The authority may delegate to 1 or more members, officers, agents, or employees any of the powers or duties of the authority as the authority considers proper.

(2) The authority may contract with the department for the purpose of maintaining and improving the rights and interests of the authority.

(3) The authority shall annually file with the legislature a written report on its activities of the last year. This report shall be submitted not later than 270 days following the end of the fiscal year. This report shall specify the amount and source of revenues received, the status of investments made, and money expended with proceeds of bonds or notes issued by the finance authority under this part.

(4) The accounts of the authority are subject to annual audits by the state auditor general or a certified public accountant appointed by the auditor general. Records shall be maintained according to generally accepted accounting principles.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 2014, Act 416, Imd. Eff. Dec. 30, 2014.

324.21526 Board of directors; powers.

Sec. 21526. Except as otherwise provided in this part, the board of directors may do all things necessary or convenient to implement this part and the purposes, objectives, and powers delegated to the board of directors by other laws or executive orders, including, but not limited to, all of the following:

(a) Adopt an official seal and bylaws for the regulation of its affairs and alter the seal or bylaws.

(b) Sue and be sued in its own name and plead and be impleaded.

(c) Enter into contracts and other instruments necessary, incidental, or convenient to the performance of its duties and the exercise of its powers.

(d) With the prior consent of the director of the department, solicit and accept gifts, grants, loans, and other aid from any person or the federal, state, or local government or any agency of the federal, state, or local government, or participate in any other way in a federal, state, or local government program.

(e) Procure insurance against loss in connection with the property, assets, or activities of the authority.

(f) Contract for goods and services and engage personnel as necessary and engage the services of private consultants, managers, legal counsel, and auditors for rendering professional financial assistance and advice, payable out of any money of the authority.

(g) Indemnify and procure insurance indemnifying members of the board of directors from personal loss or accountability from liability asserted by a person on bonds or notes of the authority, or from any personal liability or accountability by reason of the issuance of the bonds or notes, or by reason of any other action taken or the failure to act by the authority.

(h) Do all other things necessary or convenient to achieve the objectives and purposes of the authority, this part, rules promulgated under this part, or other laws that relate to the purposes and responsibilities of the authority.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 2014, Act 416, Imd. Eff. Dec. 30, 2014;—Am. 2016, Act 380, Eff. Mar. 22, 2017.

324.21527 Assessment; bonds or notes; issuance; indebtedness, liability, or obligations of state not created; payment; expenses.

Sec. 21527. (1) The authority shall assess the potential demand for payment of claims under this part and shall provide the results of the assessment to the finance authority. Upon review of the results of the assessment, if the finance authority determines that it is prudent to do so, the finance authority may issue bonds or notes.

(2) The finance authority may authorize and issue its bonds or notes payable solely from the revenues or funds available to the fund under section 21508. Bonds or notes of the finance authority are not a debt or liability of the state, do not create or constitute any indebtedness, liability, or obligation of the state, and do not constitute a pledge of the faith and credit of the state. All finance authority bonds and notes are payable solely from revenues or funds pledged or available for their payment as authorized in this part. Each bond and note shall contain on its face a statement to the effect that the authority is obligated to pay the principal of and the interest on the bond or note only from revenues or from funds of the finance authority pledged for such payment and that the state is not obligated to pay that principal or interest and that neither the faith and credit nor the taxing power of the state is pledged to the payment of the principal of or the interest on the bond or note.

(3) All expenses incurred in implementing this part are payable solely from revenues or funds provided or to be provided under this part. This part does not authorize the finance authority to incur any indebtedness or liability on behalf of or payable by the state.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 2014, Act 416, Imd. Eff. Dec. 30, 2014.

Popular name: Act 451

324.21528 Bonds or notes; issuance; amount; purpose; payment; provisions; validity of signatures; sale; bonds or notes subject to other acts.

Sec. 21528. (1) The finance authority may issue from time to time bonds or notes in principal amounts the finance authority considers necessary to provide funds for any purpose, including, but not limited to, all of the following:

(a) The payment of approved claims under this part.

(b) The payment, funding, or refunding of the principal of, interest on, or redemption premiums on bonds or notes issued by the finance authority whether the bonds or notes or interest to be funded or refunded have or have not become due.

(c) The establishment or increase of reserves to secure or to pay finance authority bonds or notes or interest on those bonds or notes.

(d) The payment of interest on the bonds or notes for a period determined by the finance authority.

(e) The payment of all other costs or expenses of the finance authority incident to and necessary or convenient to implement its purposes and powers.

(2) The bonds or notes of the finance authority are not a general obligation of the finance authority but are payable solely from the revenues or funds, or both, pledged to the payment of the principal of and interest on the bonds or notes as provided in the resolution authorizing the bond or note.

(3) The bonds or notes of the finance authority:

(a) Shall be authorized by resolution of the finance authority.

(b) Shall bear the date or dates of issuance.

(c) May be issued as either tax-exempt bonds or notes or taxable bonds or notes for federal income tax purposes.

(d) Shall be serial bonds, term bonds, or term and serial bonds.

(e) Shall mature at such time or times not exceeding 20 years from the date of issuance.

(f) May provide for sinking fund payments.

(g) May provide for redemption at the option of the finance authority for any reason or reasons.

(h) May provide for redemption at the option of the bondholder for any reason or reasons.

(i) Shall bear interest at a fixed or variable rate or rates of interest per annum or at no interest.

(j) Shall be registered bonds, coupon bonds, or both.

(k) May contain a conversion feature.

(*l*) May be transferable.

(m) Shall be in the form, denomination or denominations, and with such other provisions and terms as is determined necessary or beneficial by the finance authority.

(4) If a member of the board of directors or any officer of the finance authority whose signature or facsimile of his or her signature appears on the note, bond, or coupon ceases to be a member or officer before the delivery of that bond or note, the signature continues to be valid and sufficient for all purposes, as if the member or officer had remained in office until the delivery.

(5) Bonds or notes of the finance authority may be sold at a public or private sale at the time or times, at the price or prices, and at a discount as the finance authority determines. A finance authority bond or note is not subject to the revised municipal finance act, 2001 PA 34, MCL 141.2101 to 141.2821. The bond or note of the finance authority is not required to be filed under the uniform securities act (2002), 2008 PA 551, MCL 451.2101 to 451.2703.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1996, Act 181, Imd. Eff. May 3, 1996;—Am. 2009, Act 98, Imd. Eff. Sept. 24, 2009;—Am. 2014, Act 416, Imd. Eff. Dec. 30, 2014.

324.21529 Bonds or notes; issuance; amounts; purpose; application of proceeds to purchase or retirement at maturity or redemption; investment of escrowed proceeds; use by authority; refunded bonds or notes considered as paid; termination of obligation.

Sec. 21529. (1) The authority may provide for the issuance of bonds or notes in the amounts the authority considers necessary for the purpose of refunding bonds or notes of the authority then outstanding, including the payment of any redemption premium and interest accrued or to accrue to the earliest or subsequent date of redemption, purchase, or maturity of these bonds or notes. The proceeds of bonds or notes issued for the purpose of refunding outstanding bonds or notes may be applied by the authority to the purchase or retirement at maturity or redemption of outstanding bonds or notes either on the earliest or subsequent redemption date, and, pending such applications, may be placed in escrow to be applied to the purchase or retirement at maturity or redemption on the date or dates determined by the authority. Pending such application and subject to agreements with noteholders or bondholders, the escrowed proceeds may be invested and reinvested in the manner the authority determines, maturing at the date or times as appropriate to assure the prompt payment of the principal, interest, and redemption premium, if any, on the outstanding bonds or notes to be refunded. After the terms of the escrow have been fully satisfied and carried out, the balance of the proceeds and interest, income, and profits, if any, earned or realized on the investment of the proceeds shall be returned to the authority for use by the authority in any lawful manner authorized under this part.

(2) In the resolution authorizing bonds or notes to refund bonds or notes, the authority may provide that the bonds or notes to be refunded are considered paid when there has been deposited in escrow money or investment obligations that would provide payments of principal and interest adequate to pay the principal and interest on the bonds to be refunded, as that principal and interest become due whether by maturity or prior redemption and that, upon the deposit of the money or investment obligations, the obligations of the authority to the holders of the bonds or notes to be refunded are terminated except as to the rights to the money or investment obligations deposited in trust.

History: 1994, Act 451, Eff. Mar. 30, 1995.

Popular name: Act 451

324.21530 Bonds or notes; assurance of timely payments; costs of issuance.

Sec. 21530. (1) The authority may authorize and approve an insurance contract, an agreement for a line of

credit, a letter of credit, a commitment to purchase bonds or notes, an agreement to remarket bonds or notes, an agreement to manage payment, revenue or interest rate exposure, and any other transaction to provide security to assure timely payment of a bond or note.

(2) The authority may authorize payment from the proceeds of the bonds or notes, or other funds available, of the cost of issuance including, but not limited to, fees for placement, charges for insurance, letters of credit, lines of credit, remarketing agreements, agreements to manage payment, revenue or interest rate exposure, reimbursement agreements, or purchase or sales agreements or commitments, or agreements to provide security to assure timely payment of bonds or notes.

Popular name: NREPA

324.21531 Members of board of directors, executive director, or other officer; powers.

Sec. 21531. Within limitations that are contained in the issuance or authorization resolution of the finance authority, the finance authority may authorize a member of the board of directors, the executive director, or any other officer of the finance authority to do 1 or more of the following:

(a) Sell and deliver and receive payment for bonds or notes.

(b) Refund bonds or notes by the delivery of new bonds or notes whether or not the bonds or notes to be refunded are mature or subject to redemption.

(c) Deliver bonds or notes, partly to refund bonds or notes and partly for any other authorized purpose.

(d) Buy issued bonds or notes and resell those bonds or notes.

(e) Approve interest rates or methods for fixing interest rates, prices, discounts, maturities, principal amounts, denominations, dates of issuance, interest payment dates, redemption rights at the option of the authority or the holder, the place of delivery and payment, and other matters and procedures necessary to complete the transactions authorized.

(f) Direct the investment of any and all funds of the finance authority.

(g) Approve the terms of an insurance contract, an agreement for a line of credit, a letter of credit, a commitment to purchase notes or bonds, an agreement to remarket bonds or notes, or any other transaction to provide security to assure timely payment of a bond or note or an agreement to manage payment, revenue, or interest rate exposure.

(h) Execute any power, duty, function, or responsibility of the finance authority.

324.21532 Contract with holders of bonds or notes; provisions.

Sec. 21532. A resolution authorizing bonds or notes may provide for all or any portion of the following that shall be part of the contract with the holders of the bonds or notes:

(a) A pledge to any payment or purpose of all or any part of the fund or authority revenues or assets to which its right then exists or may later come to exist, and of money derived from the revenues or assets, and of the proceeds of bonds or notes or of an issue of bonds or notes, subject to any existing agreements with bondholders or noteholders.

(b) A pledge of a loan, grant, or contribution from the federal or state government.

(c) The establishment and setting aside of reserves or sinking funds and the regulation and disposition of reserves or sinking funds subject to this part.

(d) Authority for and limitations on the issuance of additional bonds or notes for the purposes provided for in the resolution and the terms upon which additional bonds or notes may be issued and secured.

(e) The procedure, if any, by which the terms of a contract with noteholders or bondholders may be amended or abrogated, the number of noteholders or bondholders who are required to consent to the amendment or abrogation, and the manner in which the consent may be given.

(f) A contract with the bondholders as to the custody, collection, securing, investment, and payment of any money of the authority. Money of the authority and deposits of money may be secured in the manner determined by the authority. Banks and trust companies may give security for such deposits.

(g) A provision to vest in a trustee, or a secured party, property, income, revenues, receipts, rights, remedies, powers, and duties in trust or otherwise that the authority determines necessary or appropriate to adequately secure and protect noteholders and bondholders or to limit or abrogate the right of the holders of bonds or notes of the authority to appoint a trustee under this part or to limit the rights, powers, and duties of

the trustee.

(h) A provision to provide to a trustee or the noteholders or bondholders remedies that may be exercised if the authority fails or refuses to comply with this part or defaults in an agreement made with the holders of an issue of bonds or notes, which may include any of the following:

(*i*) By mandamus or other suit, action, or proceeding to enforce the rights of the bondholders or noteholders, and require the authority to implement any other agreements with the holders of those bonds or notes and to perform the authority's duties under this part.

(*ii*) Bring suit upon the bonds or notes.

(*iii*) By action or suit, require the authority to account as if it were the trustee of an express trust for the holders of the bonds or notes.

(*iv*) By action, suit, or proceeding, enjoin any act or thing that may be unlawful or in violation of the rights of the holders of the bonds or notes.

(*v*) Declare the bonds or notes due and payable, and if all defaults are made good, then, as permitted by the resolution, to annul that declaration and its consequences.

(i) Any other matters of like or different character that in any way affect the security of protection of the bonds or notes.

324.21533 Pledge as valid and binding; lien.

Sec. 21533. A pledge made by the authority is valid and binding from the time the pledge is made. The money or property pledged by the authority is immediately subject to the lien of the pledge without a physical delivery or further act. The lien of a pledge is valid and binding against parties having claims of any kind in tort, contract, or otherwise against the authority, and is valid and binding as against the transfers of the money or property pledged, irrespective of whether parties have notice. Neither the resolution, the trust agreement, nor any other instrument by which a pledge is created is required to be recorded to establish and perfect a lien or security interest in the pledged property.

Compiler's note: The repealed section pertained to promulgation of administrative rules.

324.21546 Liability; constitutionality of part.

Sec. 21546. (1) This part does not create any liability on behalf of the state. This part shall not be construed as making the state the guarantor of the fund.

(2) This part does not relieve any person who may be eligible to submit a claim to the authority from any liability that he or she may incur as the owner or operator of a refined petroleum underground storage tank system. The state is not assuming the liability of an owner or operator eligible for funding under this part; it is only providing assistance to such owners or operators in meeting the financial responsibility requirements.

(3) If all bonds or notes of the finance authority payable from the fund have been fully paid or provided for and if any provision of this part is found to be unconstitutional by a court of competent jurisdiction and the allowable time for filing an appeal has expired or the appellant has exhausted all of his or her avenues of appeal, this whole part shall be considered unconstitutional and invalid.

History: 1994, Act 451, Eff. Mar. 30, 1995;—Am. 1996, Act 181, Imd. Eff. May 3, 1996;—Am. 2004, Act 390, Imd. Eff. Oct. 12, 2004;—Am. 2014, Act 416, Imd. Eff. Dec. 30, 2014.

324.21548 Knowledge of false, misleading, or fraudulent request for payment as felony or subject to civil fine; retroactive application; "fraudulent" or "fraudulent practice" defined; action brought by attorney general or county prosecutor; money owed as claim and lien; prosecutions under other laws not precluded; apportionment of fines.

Sec. 21548. (1) A person who makes or submits or causes to be made or submitted either directly or indirectly any statement, report, affidavit, application, claim, bid, work invoice, or other request for payment or indemnification under this part knowing that the statement, report, application, claim, bid, work invoice, or other request for payment or indemnification is false or misleading is guilty of a felony punishable by imprisonment for not more than 5 years or a fine of not more than $50,000.00, or both. In addition to any penalty imposed under this subsection, a person convicted under this subsection shall pay restitution to the authority for the amount received in violation of this subsection.

(2) A person who makes or submits or causes to be made or submitted either directly or indirectly any statement, report, application, claim, bid, work invoice, or other request for payment or indemnification under this part knowing that the statement, report, affidavit, application, claim, bid, work invoice, or other request for payment or indemnification is false, misleading, or fraudulent, or who commits a fraudulent practice, is subject to a civil fine of not more than $50,000.00 or twice the amount submitted, whichever is greater. In addition to any civil fine imposed under this subsection, a person found responsible under this subsection shall pay restitution to the authority for the amount received in violation of this subsection. The legislature intends that this subsection be given retroactive application.

(3) As used in subsection (2), "fraudulent" or "fraudulent practice" includes, but is not limited to, the following:

(a) Submitting a work invoice for the excavation, hauling, disposal, or provision of soil, sand, or backfill for an amount greater than the legal capacity of the carrying vehicle or greater than was actually carried, excavated, disposed, or provided.

(b) Submitting paperwork for services or work provided that was not in fact provided or that was not directly provided by the individual indicated on the paperwork.

(c) Contaminating an otherwise clean resource or site with contaminated soil or product from a contaminated resource or site.

(d) Returning any load of contaminated soil to its original site for reasons other than remediation of the soil.

(e) Causing damage intentionally or as the result of gross negligence to a refined petroleum underground storage tank system, which damage results in a release at a site.

(f) Placing a refined petroleum underground storage tank system at a contaminated site where no refined petroleum underground storage tank system previously existed for purposes of disguising the source of contamination or to obtain funding under this part.

(g) Submitting a work invoice for the excavation of soil from a site that was removed for reasons other than removal of the refined petroleum underground storage tank system or remediation.

(h) Any intentional act or act of gross negligence that causes or allows contamination to spread at a site.

(i) Registration of a nonexistent refined petroleum underground storage tank system with the department.

(j) Loaning to an owner or operator the deductible amount and then submitting or causing to be submitted inflated claims or invoices designed to recoup the deductible amount.

(k) Confirming a release without simultaneously providing notice to the owner or operator.

(*l*) Inflating bills or work invoices, or both, by adding charges for work that was not performed.

(m) Submitting a false or misleading laboratory report.

(n) Submitting bills or work invoices, or both, for sampling, testing, monitoring, or excavation that are not justified by the site condition.

(o) Falsely characterizing the contents of a refined petroleum underground storage tank system for purposes of obtaining funding under this part.

(p) Submitting or causing to be submitted bills or work invoices by or from a person who did not directly provide the service.

(q) Characterizing legal services as consulting services for purposes of obtaining funding under this part.

(r) Misrepresenting or concealing the identity, credentials, affiliation, or qualifications of principals or persons seeking, either directly or indirectly, funding or approval for participation under this part.

(s) Falsifying a signature on a claim application or a work invoice.

(t) Failing to accurately disclose the actual amount and carrier of unencumbered insurance coverage available for new environmental impairment or professional liability claims.

(u) Any other act or omission of a false, fraudulent, or misleading nature undertaken in order to obtain funding under this part.

(4) The attorney general or county prosecutor may conduct an investigation of an alleged violation of this section and bring an action for a violation of this section.

(5) If the attorney general or county prosecutor has reasonable cause to believe that a person has information or is in possession, custody, or control of any document or records, however stored or embodied, or tangible object which is relevant to an investigation of a violation or attempted violation of this part or a crime or attempted crime against the fund, the attorney general or county prosecutor may, before bringing any action, make an ex parte request to a magistrate for issuance of a subpoena requiring that person to appear and be examined under oath or to produce the document, records, or object for inspection and copying, or both. Service may be accomplished by any means described in the Michigan court rules. Requests made by the attorney general may be brought in Ingham county.

(6) If a person objects to or otherwise fails to comply with a subpoena served under subsection (5), an action may be brought in district court to enforce the demand. Actions filed by the attorney general may be brought in Ingham county.

(7) The attorney general or county prosecutor may apply to the district court for an order granting immunity to any person who refuses to provide or objects to providing information, documents, records, or objects sought pursuant to this section. If the judge is satisfied that it is in the interest of justice that immunity be granted, he or she shall enter an order granting immunity to the person and requiring the person to appear and be examined under oath or to produce the document, records, or object for inspection and copying, or both.

(8) A person who fails to comply with a subpoena issued pursuant to subsection (5) or a requirement to appear and be examined pursuant to subsection (7) is subject to a civil fine of not more than $25,000.00 for each day of continued noncompliance.

(9) In addition to any civil fines or criminal penalties imposed under this part or the criminal laws of this state, the person found responsible shall repay any money obtained directly or indirectly under this part.

Money owed pursuant to this section constitutes a claim and lien by the authority upon any real or personal property owned either directly or indirectly by the person. This lien shall attach regardless of whether the person is insolvent and may not be extinguished or avoided by bankruptcy. The lien imposed by this section has the force and effect of a first in time and right judgment lien.

(10) Subsection (1) does not preclude prosecutions under other laws of the state including, but not limited to, section 157a, 218, 248, 249, 280, or 422 of the Michigan penal code, 1931 PA 328, MCL 750.157a, 750.218, 750.248, 750.249, 750.280, and 750.422.

(11) All civil fines collected pursuant to this section shall be apportioned in the following manner:

(a) Fifty percent shall be deposited in the general fund and shall be used by the department to fund fraud investigations under this part.

(b) Twenty-five percent shall be paid to the office of the county prosecutor or attorney general, whichever office brought the action.

(c) Twenty-five percent shall be paid to a local police department or sheriff's office, or a city or county health department, if investigation by that office or department led to the bringing of the action. If more than 1 office or department is eligible for payment under this subsection, division of payment shall be on an equal basis. If there is not a local office or department that is entitled to payment under this subdivision, the money shall be forwarded to the state treasurer for deposit into the refined petroleum fund.

324.21563 Repealed. 2014, Act 416, Imd. Eff. Dec. 30, 2014.

Compiler's note: The repealed section pertained to cessation of temporary reimbursement program.

ARTICLE III

NATURAL RESOURCES MANAGEMENT

CHAPTER 1

HABITAT PROTECTION

INLAND WATERS

PART 301

INLAND LAKES AND STREAMS

324.30101 Definitions.

Sec. 30101. As used in this part:

(a) "Bottomland" means the land area of an inland lake or stream that lies below the ordinary high-water mark and that may or may not be covered by water.

(b) "Bulkhead line" means a line that is established pursuant to this part beyond which dredging, filling, or construction of any kind is not allowed without a permit.

(c) "Dam" means an artificial barrier, including dikes, embankments, and appurtenant works, that impounds, diverts, or is designed to impound or divert water.

(d) "Department" means the department of environmental quality.

(e) "Expand" means to occupy a larger area of an inland lake or stream than authorized by a permit issued under this part for marina mooring structures and watercraft moored at the marina.

(f) "Fund" means the land and water management permit fee fund created in section 30113.

(g) "Height of the dam" means the difference in elevation measured vertically between the natural bed of an inland lake or stream at the downstream toe of the dam, or, if it is not across a stream channel or watercourse, from the lowest elevation of the downstream toe of the dam, to the design flood elevation or to the lowest point of the top of the dam, whichever is less.

(h) "Impoundment" means water held back by a dam, dike, floodgate, or other barrier.

(i) "Inland lake or stream" means either of the following:

(*i*) An artificial or natural lake, pond, or impoundment that is a water of the United States as that term is used in section 502(7) of the federal water pollution control act, 33 USC 1362.

(*ii*) A natural or artificial lake, pond, or impoundment; a river, stream, or creek which may or may not be serving as a drain as defined by the drain code of 1956, 1956 PA 40, MCL 280.1 to 280.630; or any other body of water that has definite banks, a bed, and visible evidence of a continued flow or continued occurrence of water, including the St. Marys, St. Clair, and Detroit Rivers.

Inland lake or stream does not include the Great Lakes, Lake St. Clair, or a lake or pond that has a surface area of less than 5 acres.

(j) "Marina" means a facility that is owned or operated by a person, extends into or over an inland lake or stream, and offers service to the public or members of the marina for docking, loading, or other servicing of recreational watercraft.

(k) "Minor offense" means either of the following violations of this part if the project involved in the offense is a minor project or the department determines that restoration of the affected property is not required:

(*i*) The failure to obtain a permit under this part.

(*ii*) A violation of a permit issued under this part.

(*l*) "Mooring structures" means structures used to moor watercraft, including, but not limited to, docks,

piers, pilings, mooring anchors, lines and buoys, and boat hoists.

(m) "Ordinary high-water mark" means the line between upland and bottomland that persists through successive changes in water levels, below which the presence and action of the water is so common or recurrent that the character of the land is marked distinctly from the upland and is apparent in the soil itself, the configuration of the surface of the soil, and the vegetation. On an inland lake that has a level established by law, it means the high established level. Where water returns to its natural level as the result of the permanent removal or abandonment of a dam, it means the natural ordinary high-water mark.

(n) "Project" means an activity that requires a permit pursuant to section 30102.

(o) "Property owners' association" means any group of organized property owners publishing a directory of their membership, the majority of which are riparian owners and are located on the inland lake or stream that is affected by the proposed project.

(p) "Reconfigure" means to, without expanding the marina, do either of the following:

(*i*) Change the location of the dock or docks and other mooring structures at the marina to occupy an area of the inland lake or stream that was not previously authorized by a permit issued under this part.

(*ii*) Decrease the distance available for ingress and egress to an outside slip as described in section 30106a.

(q) "Riparian interest area" means that portion of an inland lake or stream over which a riparian owner has an ownership interest.

(r) "Riparian owner" means a person who has riparian rights.

(s) "Riparian rights" means those rights which are associated with the ownership of the bank or shore of an inland lake or stream.

(t) "Seasonal structure" includes any type of dock, boat hoist, ramp, raft, or other recreational structure that is placed into an inland lake or stream and removed at the end of the boating season.

(u) "Seawall" means a vertically sloped wall constructed to break the force of waves and retain soil for the purpose of shore protection.

(v) "Structure" includes a wharf, dock, pier, seawall, dam, weir, stream deflector, breakwater, groin, jetty, sewer, pipeline, cable, and bridge.

(w) "Upland" means the land area that lies above the ordinary high-water mark.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 1999, Act 106, Imd. Eff. July 7, 1999;—Am. 2006, Act 275, Imd. Eff. July 7, 2006;—Am. 2009, Act 139, Imd. Eff. Nov. 4, 2009;—Am. 2014, Act 351, Eff. Jan. 16, 2015;—Am. 2018, Act 631, Eff. Mar. 29, 2019.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Land and Water Management Division, with the exception of the farmland and open space preservation program, natural rivers program, and Michigan information resource inventory system, to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

Popular name: Act 451

Popular name: NREPA

324.30101a Applicability of powers and duties of department to "navigable waters" and "waters of the United States" as defined in federal law.

Sec. 30101a. For the purposes of this part, the powers, duties, functions, and responsibilities exercised by the department because of federal approval of Michigan's permit program under section 404(g) and (h) of the federal water pollution control act, 33 USC 1344, apply only to "navigable waters" and "waters of the United States" as defined under section 502(7) of the federal water pollution control act, 33 USC 1362, and further refined by federally promulgated rules and court decisions that have the full effect and force of federal law. Determining whether additional regulation is necessary to protect Michigan waters beyond the scope of federal law is the responsibility of the Michigan legislature based on its determination of what is in the best interest of the citizens of this state.

History: Add. 2013, Act 98, Imd. Eff. July 2, 2013.

Popular name: Act 451

Popular name: NREPA

324.30102 Operations prohibited without permit; exception.

Sec. 30102. (1) Except as provided in this part, a person without a permit from the department shall not do any of the following:

(a) Dredge or fill bottomland.

(b) Construct, enlarge, extend, remove, or place a structure on bottomland.

(c) Construct, reconfigure, or expand a marina.

(d) Create, enlarge, or diminish an inland lake or stream.

(e) Structurally interfere with the natural flow of an inland lake or stream.

(f) Construct, dredge, commence, extend, or enlarge an artificial canal, channel, ditch, lagoon, pond, lake, or similar waterway where the purpose is ultimate connection with an existing inland lake or stream, or where any part of the artificial waterway is located within 500 feet of the ordinary high-water mark of an existing inland lake or stream.

(g) Connect any natural or artificially constructed waterway, canal, channel, ditch, lagoon, pond, lake, or similar water with an existing inland lake or stream for navigation or any other purpose.

(2) A person shall not remove submerged logs from rivers or streams for the purpose of submerged log recovery. This subsection does not prohibit the department from issuing a permit under this part for other purposes, including removing logjams or removing logs that interfere with navigation of the river or stream.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 2009, Act 139, Imd. Eff. Nov. 4, 2009;—Am. 2011, Act 218, Imd. Eff. Nov. 10, 2011.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Land and Water Management Division, with the exception of the farmland and open space preservation program, natural rivers program, and Michigan information resource inventory system, to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

Popular name: Act 451

Popular name: NREPA

324.30103 Exceptions; "water withdrawal" and "agricultural drain" defined.

Sec. 30103. (1) A permit is not required under this part for any of the following:

(a) Any fill or structure existing before April 1, 1966, in waters covered by former 1965 PA 291, and any fill or structures existing before January 9, 1973, in waters covered for the first time by former 1972 PA 346.

(b) A seasonal structure placed on bottomland to facilitate private noncommercial recreational use of the water if it does not unreasonably interfere with the use of the water by others entitled to use the water or interfere with water flow.

(c) Reasonable sanding of beaches to the existing water's edge by the riparian owner or a person authorized by the riparian owner.

(d) Maintenance of an agricultural drain, regardless of outlet, if all of the following requirements are met:

(*i*) The maintenance includes only activities that maintain the location, depth, and bottom width of the drain as constructed or modified at any time before July 1, 2014.

(*ii*) The maintenance is performed by the landowner or pursuant to the drain code of 1956, 1956 PA 40, MCL 280.1 to 280.630.

(e) Maintenance and operation of a waste collection or treatment facility either ordered to be constructed or approved for operation under a state or a federal water pollution control law and this part. For purposes of this subdivision, "operation" includes dredging, filling, or construction and placement of structures in the waste collection or treatment facility in compliance with this act.

(f) Construction and maintenance of minor drainage structures and facilities that are identified by rule promulgated by the department under section 30110. Before a rule is promulgated pursuant to this subsection, the rule must be approved by the majority of a committee consisting of the director of the department, the director of the department of agriculture and rural development, and the director of the state transportation department or their designated representatives. The rules shall be reviewed at least annually.

(g) Maintenance of a drain that either was legally established and constructed before January 1, 1973, pursuant to the drain code of 1956, 1956 PA 40, MCL 280.1 to 280.630, except those legally established drains constituting mainstream portions of certain natural watercourses identified in rules promulgated by the department under section 30110, or was constructed or modified under a permit issued pursuant to this part. As used in this subdivision, "maintenance of a drain" means the physical preservation of the location, depth, and bottom width of a drain and appurtenant structures to restore the function and approximate capacity of the drain as constructed or modified at any time before July 1, 2014, and includes, but is not limited to, the following activities if performed with best management practices:

(*i*) Excavation of accumulated sediments back to original contours.

(*ii*) Reshaping of the side slopes.

(*iii*) Bank stabilization where reasonably necessary to prevent erosion. Materials used for stabilization must be compatible with existing bank or bed materials.

(*iv*) Armoring, lining, or piping if a previously armored, lined, or piped section is being repaired and all work occurs within the footprint of the previous work.

(*v*) Replacement of existing control structures, if the original function of the drain is not changed and the original approximate capacity of the drain is not increased.

(*vi*) Repair of stabilization structures.

(*vii*) Culvert replacement, including culvert extensions of not more than 24 additional feet per culvert.

(*viii*) Emergency reconstruction of recently damaged parts of the drain. Emergency reconstruction must occur within a reasonable period of time after damage occurs in order to qualify for this exemption.

(h) Projects constructed under the watershed protection and flood prevention act, 16 USC 1001 to 1012.

(i) Construction and maintenance of privately owned cooling or storage ponds used in connection with a public utility except at the interface with public waters.

(j) Maintenance of a structure constructed under a permit issued pursuant to this part and identified by rule promulgated under section 30110, if the maintenance is in place and in kind with no design or materials modification.

(k) A water withdrawal.

(*l*) Annual installation of a seasonal dock or docks, pilings, mooring buoys, or other mooring structures previously authorized by and in accordance with a permit issued under this part.

(m) Controlled access of livestock to streams for watering or crossing if constructed in accordance with applicable practice standards set by the United States Department of Agriculture, Natural Resources Conservation Service.

(n) Temporary drawdowns of impoundments at hydroelectric projects licensed by the federal energy regulatory commission (FERC) and subject to FERC's authority if both of the following apply:

(*i*) The FERC licensee has consulted this state during the drawdown plan development and this state's concerns have been addressed in the drawdown plan as FERC considers appropriate.

(*ii*) Adverse environmental impacts, including stream flow, aquatic resources, and timing, have been avoided and minimized to the extent practical.

(o) Removal, by the riparian owner or a person authorized by the riparian owner, of plants that are an aquatic nuisance as defined in section 3301, if the removal is accomplished by hand-pulling without using a powered or mechanized tool and all plant fragments are removed from the water and properly disposed of on land above the ordinary high-water mark as defined in section 30101.

(p) Raking of lake bottomlands by the riparian owner or a person authorized by the riparian owner. To minimize effects on the lake bottomlands, the areas raked shall be unvegetated before raking and predominantly composed of sand or pebbles, and the raking shall be performed without using a powered or mechanized tool. For the purposes of this subdivision, the pulling of a nonpowered, nonmechanized tool with a boat is not the use of a powered or mechanized tool.

(2) As used in this section, "water withdrawal" means the removal of water from its source for any purpose.

(3) As used in this part, "agricultural drain" means a human-made conveyance of water that meets all of the following requirements:

(a) Does not have continuous flow.

(b) Flows primarily as a result of precipitation-induced surface runoff or groundwater drained through subsurface drainage systems.

(c) Serves agricultural production.

(d) Was constructed before January 1, 1973, or was constructed in compliance with this part or former 1979 PA 203.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 2006, Act 33, Imd. Eff. Feb. 28, 2006;—Am. 2009, Act 139, Imd. Eff. Nov. 4, 2009;—Am. 2013, Act 98, Imd. Eff. July 2, 2013;—Am. 2014, Act 253, Imd. Eff. June 30, 2014;—Am. 2018, Act 163, Eff. Aug. 21, 2018.

Popular name: Act 451

Administrative rules: R 281.811 et seq. of the Michigan Administrative Code.

Popular name: NREPA

324.30104 Application for permit; fees; refund.

Sec. 30104. (1) A person shall not undertake a project subject to this part except as authorized by a permit issued by the department pursuant to part 13. An application for a permit must include any information that may be required by the department. If a project includes activities at multiple locations, 1 application may be filed for the combined activities.

(2) Except as provided in subsections (3) and (4), until October 1, 2025, an application for a permit must be accompanied by an application fee based on an administrative cost in accordance with the following schedule:

(a) For an initial permit for a seasonal drawdown or associated reflooding, or both, of a dam or impoundment for the purpose of weed control that is issued for the first time after October 9, 1995, a fee of

$500.00, but for subsequent permits for the same purpose a fee of $50.00.

(b) For activities included in a minor project category established under section 30105(7), a fee of $100.00.

(c) For activities included in a general permit category established under section 30105(8), a fee of $50.00.

(d) For construction or expansion of a marina, a fee as follows:

(*i*) $50.00 for an expansion of 1-10 marina slips to an existing permitted marina.

(*ii*) $100.00 for a new marina with 1-10 proposed marina slips.

(*iii*) $250.00 for an expansion of 11-50 marina slips to an existing permitted marina, plus $10.00 for each marina slip over 50.

(*iv*) $500.00 for a new marina with 11-50 proposed marina slips, plus $10.00 for each marina slip over 50.

(*v*) $1,500.00 if an existing permitted marina proposes maintenance dredging of 10,000 cubic yards or more, unless the dredge material is determined through testing to be 90% or more sand, or the addition of seawalls, bulkheads, or revetments of 500 feet or more.

(e) For major projects other than a project described in subdivision (d)(*v*), involving any of the following, a fee of $2,000.00:

(*i*) Dredging of 10,000 cubic yards or more, unless the dredge material is determined through testing to be 90% or more sand.

(*ii*) Filling of 10,000 cubic yards or more.

(*iii*) Seawalls, bulkheads, or revetments of 500 feet or more.

(*iv*) Filling or draining of 1 acre or more of wetland contiguous to a lake or stream.

(*v*) New dredging or upland boat basin excavation in areas of suspected contamination.

(*vi*) Shore projections, such as groins and underwater stabilizers, that extend 150 feet or more into a lake or stream.

(*vii*) New commercial docks or wharves of 300 feet or more in length.

(*viii*) Stream enclosures 100 feet or more in length.

(*ix*) Stream relocations 500 feet or more in length.

(*x*) New golf courses.

(*xi*) Subdivisions.

(*xii*) Condominiums.

(f) For the removal of submerged logs from bottomland of an inland lake, a $500.00 fee.

(g) For all other projects not listed in subdivisions (a) to (f), a fee of $500.00.

(3) A project that requires review and approval under this part and 1 or more of the following acts or parts of acts is subject to only the single highest fee required under this part or the following acts or parts of acts:

(a) Section 3104.

(b) Part 303.

(c) Part 323.

(d) Part 325.

(e) Section 117 of the land division act, 1967 PA 288, MCL 560.117.

(4) If work has been done in violation of a permit requirement under this part and restoration is not ordered by the department, the department may accept an application for a permit if the application is accompanied by a fee equal to 2 times the permit fee required under this section.

(5) If the department denies an application for a permit under this part, the department shall promptly refund the application fee paid under this section.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 1995, Act 171, Imd. Eff. Oct. 9, 1995;—Am. 1996, Act 97, Imd. Eff. Feb. 28, 1996;—Am. 1999, Act 106, Imd. Eff. July 7, 1999;—Am. 2003, Act 163, Imd. Eff. Aug. 12, 2003;—Am. 2004, Act 325, Imd. Eff. Sept. 10, 2004;—Am. 2006, Act 275, Imd. Eff. July 7, 2006;—Am. 2006, Act 531, Imd. Eff. Dec. 29, 2006;—Am. 2008, Act 276, Imd. Eff. Sept. 29, 2008;—Am. 2009, Act 139, Imd. Eff. Nov. 4, 2009;—Am. 2011, Act 90, Imd. Eff. July 15, 2011;—Am. 2011, Act 218, Imd. Eff. Nov. 10, 2011;—Am. 2013, Act 13, Imd. Eff. Mar. 27, 2013;—Am. 2013, Act 98, Imd. Eff. July 2, 2013;—Am. 2015, Act 76, Eff. Oct. 1, 2015;—Am. 2019, Act 84, Imd. Eff. Sept. 30, 2019;—Am. 2021, Act 91, Imd. Eff. Oct. 20, 2021.

Popular name: Act 451

Popular name: NREPA

324.30104b Applicability of MCL 324.30306b to proposed project or proposed permit application.

Sec. 30104b. Section 30306b applies to a proposed project or a proposed permit application under this part.

History: Add. 2006, Act 592, Imd. Eff. Jan. 3, 2007;—Am. 2010, Act 179, Imd. Eff. Sept. 30, 2010;—Am. 2015, Act 76, Eff. Oct. 1, 2015.

Popular name: Act 451

Popular name: NREPA

324.30105 Pending applications; posting on website; public hearing; review of application; statement; final inspection and certification; notice of hearing; conditional permit in emergency; provisions applicable to minor project; issuance of general permits; minor project category; general permit for activities in drains; definitions.

Sec. 30105. (1) The department shall post on its website all of the following under this part:

(a) A list of pending applications.

(b) Public notices.

(c) Public hearing schedules.

(2) The department may hold a public hearing on pending applications.

(3) Except as otherwise provided in this section, upon receiving an application, the department shall submit copies for review to the director of the department of community health or the local health department designated by the director of the department of community health, to the city, village, or township and the county where the project is to be located, to the local conservation district, to the watershed council established under part 311, if any, to the local port commission, if any, and to the persons required to be included in the application pursuant to section 30104. Each copy of the application shall be accompanied by a statement that unless a written request is filed with the department within 20 days after the submission for review, the department may grant the application without a public hearing where the project is located. The department may hold a public hearing upon the written request of the applicant or a riparian owner or a governmental unit or other person that is entitled to receive a copy of the application pursuant to this subsection.

(4) After completion of a project for which an application is approved, the department may cause a final inspection to be made and certify to the applicant that the applicant has complied with the department's permit requirements.

(5) At least 10 days' notice of a hearing to be held under this section shall be given by publication in a newspaper circulated in the county where the project is to be located, to the person requesting the hearing, and to the governmental units and other persons that are entitled to receive a copy of the application pursuant to subsection (3).

(6) In an emergency, the department may issue a conditional permit before the expiration of the 20-day period referred to in subsection (3).

(7) After providing notice and an opportunity for a public hearing, the department shall establish minor project categories of activities and projects that are similar in nature, have minimal adverse environmental effects when performed separately, and will have only minimal cumulative adverse effects on the environment. The department may act upon an application received pursuant to section 30104 for an activity or project within a minor project category without providing notices pursuant to subsection (3). The department shall develop a minor project category under this subsection for repair or replacement of a failed seawall. All other provisions of this part, except provisions applicable only to general permits, are applicable to a minor project.

(8) The department, after notice and an opportunity for a public hearing, shall issue general permits on a statewide basis or within a local unit of government for projects that are similar in nature, that will cause only minimal adverse environmental effects when performed separately, and that will only have minimal cumulative adverse effects on the environment. Before authorizing a specific project to proceed under a general permit, the department may provide notice pursuant to subsection (3) but shall not hold a public hearing and shall not typically require a site inspection. A general permit issued under this subsection shall not be valid for more than 5 years. Among the activities the department may consider for general permit eligibility under this subsection are the following:

(a) The removal of qualifying small dams.

(b) The maintenance or repair of an existing pipeline, if the pipeline is maintained or repaired in a manner to ensure that any adverse effects on the inland lake or stream will be minimized.

(9) The department may issue, deny, or impose conditions on project activities authorized under a minor project category or a general permit if the conditions are designed to remove an impairment to the inland lake or stream, to mitigate the effects of the project, or to otherwise improve water quality. The department may also establish a reasonable time when the proposed project is to be completed or terminated.

(10) If the department determines that activity in a proposed project, although within a minor project category or a general permit, is likely to cause more than minimal adverse environmental effects, the department may require that the application be processed according to subsection (3) and reviewed for compliance with section 30106.

(11) The department shall develop by December 31, 2013 and maintain a general permit for activities in

drains legally established pursuant to the drain code of 1956, 1956 PA 40, MCL 280.1 to 280.630. The general permit is subject to all of the following:

(a) The general permit shall cover installation and replacement of culverts, clear span bridges, and end sections; culvert extensions; drain realignments; installation of bank stabilization structures and grade stabilization structures; spoil placement; and other common drain activities that use best management practices.

(b) A drain commissioner or drainage board may submit an application for an authorization under the general permit on a countywide basis. The department of agriculture and rural development may submit an application for an authorization under the general permit on behalf of an intercounty drainage board on a drainage-district-wide basis.

(c) The department shall grant or deny an authorization under the general permit by March 1 if the drain commissioner or drainage board applies for the authorization by the preceding January 20. An authorization under the general permit is valid until March 30 of the year after the year in which the authorization is granted.

(d) By December 31 of each year, the drain commissioner or drainage board shall submit a report to the department that includes the names of the drains on which activities were performed under the general permit during that calendar year, the locations and nature of the activities, and plans and other documentation demonstrating that those activities met the general permit requirements.

(e) A drain commissioner or drainage board is not eligible to be granted a new authorization under the general permit if significant violations of the general permit under a previous authorization granted to that drain commissioner or drainage board have not been corrected.

(12) As used in this section:

(a) "Failed seawall" means a seawall that has deteriorated to the point that it no longer effectively breaks the force of waves or retains soil for the purpose of shore protection and meets either or both of the following:

(*i*) The seawall is currently breaking the force of waves and retaining soil across a minimum of 50% of its length and there is evidence of a previous seawall along the other 50% of its length.

(*ii*) The seawall was breaking the force of waves and retaining soil but was damaged by a single catastrophic event which occurred within the 2 years prior to the repair or replacement of the seawall.

(b) "Qualifying small dam" means a dam that meets all of the following conditions:

(*i*) The height of the dam is less than 2 feet.

(*ii*) The impoundment from the dam covers less than 2 acres.

(*iii*) The dam does not serve as the first dam upstream from the Great Lakes or their connecting waterways.

(*iv*) The dam is not serving as a sea lamprey barrier.

(*v*) There are no threatened or endangered species that have been identified in the area that will be affected by the project.

(*vi*) There are no known areas of contaminated sediments in the area that will be affected by the project.

(*vii*) The department has received written permission for the removal of the dam from all riparian property owners adjacent to the dam's impoundment.

Compiler's note: Enacting section 1 of Act 120 of 2009 provides:

"Enacting section 1. This amendatory act does not take effect unless both of the following requirements are met:

"(a) $4,000,000.00 from the cleanup and redevelopment trust fund created in section 3e of 1976 IL 1, MCL 445.573e, and $4,000,000.00 from the community pollution prevention fund created in section 3f of 1976 IL 1, MCL 445.573f, is appropriated by the legislature to the environmental protection fund created in section 503a of the natural resources and environmental protection act, 1994 PA 451, MCL 324.503a.

"(b) $2,000,000.00 is appropriated by the legislature from the environmental protection fund to support the program under part 303 of the natural resources and environmental protection act, 1994 PA 451, MCL 324.30301 to 324.30329."

Popular name: Act 451

Popular name: NREPA

Administrative rules: R 281.811 et seq. of the Michigan Administrative Code.

324.30106 Prerequisite to issuance of permit; specification in permit.

Sec. 30106. The department shall issue a permit if it finds that the structure or project will not adversely affect the public trust or riparian rights. In passing upon an application, the department shall consider the possible effects of the proposed action upon the inland lake or stream and upon waters from which or into which its waters flow and the uses of all such waters, including uses for recreation, fish and wildlife,

aesthetics, local government, agriculture, commerce, and industry. The department shall not grant a permit if the proposed project or structure will unlawfully impair or destroy any of the waters or other natural resources of the state. This part does not modify the rights and responsibilities of any riparian owner to the use of his or her riparian water. A permit shall specify that a project completed in accordance with this part shall not cause unlawful pollution as defined by part 31.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30106a Construction, expansion, or reconfiguration of marina; issuance of permit; conditions; definitions.

Sec. 30106a. (1) The department shall issue a permit to construct, expand, or reconfigure a marina if the department determines that the marina meets the conditions of section 30106 and all of the following conditions:

(a) The marina extends from riparian property of the applicant.

(b) The marina does not unreasonably interfere with navigation.

(c) The marina is located and designed to be operated consistently with the correlative rights of other riparians, including the rights of adjacent riparians.

(2) In order to be designed consistently with the correlative rights of other riparians as required under subsection (1), the marina shall be configured so that all boat mooring under any wind condition will occur solely within the marina's riparian interest area. Additionally, boat mooring and ingress and egress for an outside slip shall require a minimum maneuvering distance of 1.5 times the length of the slip. This minimum distance shall be measured from the end of the slip or, for broadside moorage, the outside beam of a watercraft moored at the slip, to the boundary of the marina's riparian interest area.

(3) In order to support the determinations under this section, the department may require the applicant to do either of the following:

(a) Submit a riparian interest area estimate survey, sealed by a licensed surveyor. In making its determination on the need for a riparian interest area estimate survey, the department shall consider factors such as the shape of the water body, the location of the marina on the water body, how much frontage is available to locate the marina, and the dock and mooring configurations.

(b) Obtain an easement from any affected adjacent riparian owner authorizing an incursion and record the easement with the register of deeds for the county in which the marina is located.

(4) The owner or operator of a marina existing on the effective date of the amendatory act that added this section that has not been authorized by a permit issued under this part shall obtain a permit under this section before expanding or reconfiguring the marina, or by January 1, 2012, whichever comes first. The owner or operator of a marina existing on the effective date of the amendatory act that added this section that has been authorized by a construction permit under this part does not need to obtain a new construction permit except to expand or reconfigure.

(5) As used in this section:

(a) "Marina's riparian interest area" means the riparian interest area of an applicant for a permit under subsection (1) and any adjacent area for which the applicant has secured written authorization from the riparian owner whose interest is or may be affected.

(b) "Outside slip" means a slip that is accessed from a location between the boundary of the marina's riparian interest area and the mooring structure.

(c) "Slip length" means the longer of either of the following:

(*i*) The total length of all mooring structures, including the docks and pilings.

(*ii*) The total length of the vessel moored in the slip, including, but not limited to, outboard engines, boat hoists, bowsprits, and swim platforms.

324.30106b Dredging or placing dredged spoils on bottomland; permit; conditions.

Sec. 30106b. A permit under this part to dredge or place dredged spoils on bottomland is subject to both of the following:

(a) The permit shall be valid for a period of 5 years.

(b) During the term of the permit, the department shall not require additional environmental studies or surveys unless an act of God results in significant geological or ecological changes to the permitted area.

History: Add. 2013, Act 87, Imd. Eff. June 28, 2013.

Popular name: Act 451

324.30107 Duration, terms, and revocation of permit; hearing; modification or revocation of general permit.

Sec. 30107. (1) A permit is effective until revoked for cause but not beyond its term and may be subject to renewal. A permit may specify the term and conditions under which the work is to be carried out. A permit may be revoked after a hearing for violation of any of its provisions, any provision of this part, any rule promulgated under this part, or any misrepresentation in application.

(2) A general permit may be modified or revoked if, after opportunity for a public hearing, the department determines that the activities authorized by the general permit have more than a minimal adverse impact on the environment on an individual or cumulative basis, or the activities generally would be more appropriately processed according to section 30105(3) and reviewed for compliance with section 30106.

324.30108 Bulkhead line; establishment; application; jurisdiction; duties.

Sec. 30108. The department may establish by permit a bulkhead line on its own application or on the application of a local unit of government. The application shall be filed as provided in section 30104(1) with public notice and hearings as provided in section 30105. Upon acceptance of the bulkhead line by the affected units of government, the area landward of the bulkhead line shall after that acceptance be under the jurisdiction of those units of government as to the placement of structures and fills in the waters unless jurisdiction is returned to the state. In establishing a bulkhead line, the department shall provide for local requirements and ensure the public trust in the adjacent waters against unreasonable interferences.

324.30109 Ordinary high-water mark agreement with riparian owner; agreement as proof of location; fee.

Sec. 30109. Upon the written request of a riparian owner and upon payment of a service fee, the department may enter into a written agreement with the riparian owner establishing the location of the ordinary high-water mark for his or her property. In the absence of substantially changed conditions, the agreement is conclusive proof of the location in all matters between this state and the riparian owner and his or her successors in interest. Until October 1, 2025, the service fee provided for in this section is $500.00. The department shall forward service fees collected under this section to the state treasurer for deposit into the fund.

324.30110 Rules; promulgation and enforcement; hearing; review; proceeding by riparian owner.

Sec. 30110. (1) The department may promulgate and enforce rules to implement this part.

(2) If a person is aggrieved by any action or inaction of the department, he or she may request a formal hearing on the matter involved. The hearing shall be conducted by the commission in accordance with the provisions for contested cases in the administrative procedures act of 1969, Act No. 306 of the Public Acts of 1969, being sections 24.201 to 24.328 of the Michigan Compiled Laws.

(3) A determination, action, or inaction by the commission following the hearing is subject to judicial review as provided in Act No. 306 of the Public Acts of 1969.

(4) This section does not limit the right of a riparian owner to institute proceedings in any circuit court of the state against any person when necessary to protect his or her rights.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

324.30111b Public road end; prohibited use; violation as misdemeanor; fine; civil action; definitions.

Sec. 30111b. (1) A public road end shall not be used for any of the following unless a recorded deed, recorded easement, or other recorded dedication expressly provides otherwise:

(a) Construction, installation, maintenance, or use of boat hoists or boat anchorage devices.

(b) Mooring or docking of a vessel between 12 midnight and sunrise.

(c) Any activity that obstructs ingress to or egress from the inland lake or stream.

(2) A public road end shall not be used for the construction, installation, maintenance, or use of a dock or wharf other than a single seasonal public dock or wharf that is authorized by the local unit of government, subject to any permit required under this part. This subsection does not prohibit any use that is expressly authorized by a recorded deed, recorded easement, or other recorded dedication. This subsection does not permit any use that exceeds the uses authorized by a recorded deed, recorded easement, other recorded dedication, or a court order.

(3) A local unit of government may prohibit a use of a public road end if that use violates this section.

(4) A person who violates subsection (1) or (2) is guilty of a misdemeanor punishable by a fine of not more than $500.00. Each 24-hour period in which a violation exists represents a separate violation of this section. A peace officer may issue an appearance ticket as authorized by sections 9c to 9g of chapter IV of the code of criminal procedure, 1927 PA 175, MCL 764.9c to 764.9g, to a person who violates subsection (1) or (2).

(5) This section does not prohibit a person or agency from commencing a civil action for conduct that violates this section.

(6) As used in this section:

(a) "Local unit of government" means a township, city, or village in which the public road end is located.

(b) "Public road end" means the terminus at an inland lake or stream of a road that is lawfully open for use by the public.

****** 324.30111d.added THIS ADDED SECTION IS EFFECTIVE 91 DAYS AFTER ADJOURNMENT OF THE 2024 REGULAR SESSION SINE DIE ******

324.30111d.added Issuance of written emergency order; violation of Part 301.

Sec. 30111d. (1) The director of the department may issue a written emergency order that requires any person that the department determines to be in violation of this part to take emergency action necessary to prevent significant harm to public health, safety, welfare, property, or natural resources or the public trust in natural resources. The emergency action may include, but is not limited to, immediate repair or removal of a structure or fill owned by the person and located on bottomlands. This subsection does not expand the department's authority under part 315 as limited by section 31506(2)(a). If a person fails to comply with an order under this subsection, or is unavailable or unable to be contacted, the department may take the action necessary and may recover the costs incurred from that person in a civil action in a court of competent jurisdiction. The director of the department may modify an emergency order. The director of the department may terminate an emergency order upon a determination in writing that all necessary emergency actions have been completed and that an emergency no longer exists.

(2) Within 15 days after the director of the department issues an emergency order to a person under subsection (1), the department shall provide the person with an opportunity for a hearing pursuant to chapter 4

of the administrative procedures act of 1969, 1969 PA 306, MCL 24.271 to 24.288. At the hearing, the director of the department shall determine, based on information and fact, if the emergency order must be continued, modified, suspended, or terminated as necessary for or consistent with the protection of public health, safety, welfare, property, or natural resources or the public trust in natural resources.

(3) Before taking action to recover costs incurred under subsection (1), the department shall consider any evidence, provided by the person liable for the costs, that the person is unable to pay the costs.

324.30112 Civil action; commencement by department; fine; violation as misdemeanor; penalty; civil sanction as appropriate to violation.

Sec. 30112. (1) The department may commence a civil action in the circuit court of the county in which a violation occurs to enforce compliance with this part, to restrain violation of this part or any action contrary to an order of the department denying a permit, to enjoin the further performance of, or order the removal of, any project that is undertaken contrary to this part or after denial of a permit by the department, or to order the restoration of the affected area to its prior condition.

(2) In a civil action commenced under this part, the circuit court, in addition to any other relief granted, may assess a civil fine of not more than $5,000.00 per day for each day of violation.

(3) Except as provided in subsection (4), a person who violates this part or a permit issued under this part is guilty of a misdemeanor, punishable by a fine of not more than $10,000.00 per day for each day of violation.

(4) A person who commits a minor offense is guilty of a misdemeanor, punishable by a fine of not more than $500.00 for each violation. A law enforcement officer may issue and serve an appearance ticket upon a person for a minor offense pursuant to sections 9c to 9g of chapter IV of the code of criminal procedure, 1927 PA 175, MCL 764.9c to 764.9g.

(5) A person who knowingly makes a false statement, representation, or certification in an application for a permit or in a notice or report required by a permit, or a person who knowingly renders inaccurate any monitoring device or method required to be maintained by a permit, is guilty of a misdemeanor, punishable by a fine of not more than $10,000.00 per day for each day of violation.

(6) Any civil sanction assessed, sought, or agreed to by the department shall be appropriate to the violation.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 2018, Act 631, Eff. Mar. 29, 2019.

324.30113 Land and water management permit fee fund.

Sec. 30113. (1) The land and water management permit fee fund is created within the state treasury.

(2) The state treasurer may receive money or other assets from any source for deposit into the fund. The state treasurer shall direct the investment of the fund. The state treasurer shall credit to the fund interest and earnings from fund investments. The state treasurer shall annually present to the department an accounting of the amount of money in the fund. The department shall be the administrator of the fund for auditing purposes.

(3) Money in the fund at the close of the fiscal year shall remain in the fund and shall not lapse to the general fund.

(4) The department shall expend money from the fund, upon appropriation, only to implement this part and the following:

(a) Sections 3104, 3107, and 3108.

(b) Part 303.

(c) Part 315.

(d) Part 323.

(e) Part 325.

(f) Part 339.

(g) Part 353.

(h) Section 117 of the land division act, 1967 PA 288, MCL 560.117.

(5) The department shall annually report to the legislature how money in the fund was expended during the previous fiscal year.

PART 303
WETLANDS PROTECTION

***** *324.30301 THIS SECTION IS REPEALED BY ACT 98 OF 2013 EFFECTIVE 160 DAYS AFTER THE EFFECTIVE DATE, AS PUBLISHED IN THE FEDERAL REGISTER, OF AN ORDER BY THE ADMINISTRATOR OF THE UNITED STATES ENVIRONMENTAL PROTECTION AGENCY UNDER 40 CFR 233.53(c)(8)(vi) WITHDRAWING APPROVAL OF THE STATE PROGRAM UNDER 33 USC 1344(g) AND (h). (See enacting section 2 of Act 98 of 2013.)* *****

324.30301 Definitions; technical wetland delineation standards.

Sec. 30301. (1) As used in this part:

(a) "Department" means the department of environmental quality.

(b) "Director" means the director of the department.

(c) "Exceptional wetland" means wetland that provides physical or biological functions essential to the natural resources of this state and that may be lost or degraded if not preserved through an approved site protection and management plan for the purposes of providing compensatory wetland mitigation.

(d) "Fill material" means soil, rocks, sand, waste of any kind, or any other material that displaces soil or water or reduces water retention potential.

(e) "Hydric soil" means a soil that formed under conditions of saturation, flooding, or ponding long enough during the growing season to develop anaerobic conditions in the upper part.

(f) "Landscape level wetland assessment" means the use of aerial photographs, maps, and other remotely sensed information to predict and evaluate wetland characteristics and functions in the context of all of the following:

(*i*) The wetland's landscape position and hydrologic characteristics.

(*ii*) The surrounding landscape.

(*iii*) The historic extent and condition of the wetland.

(g) "Minor drainage" includes ditching and tiling for the removal of excess soil moisture incidental to the planting, cultivating, protecting, or harvesting of crops or improving the productivity of land in established use for agriculture, horticulture, silviculture, or lumbering.

(h) "Nationwide permit" means a nationwide permit issued by the United States Army Corps of Engineers under 72 FR 11091 to 11198 (March 12, 2007), including all general conditions, regional conditions, and conditions imposed by this state pursuant to a water quality certification under section 401 of title IV of the federal water pollution control act, 33 USC 1341, or a coastal zone management consistency determination under section 307 of the coastal zone management act of 1972, 16 USC 1456.

(i) "Ordinary high-water mark" means the ordinary high-water mark as specified in section 32502.

(j) "Person" means an individual, sole proprietorship, partnership, corporation, association, municipality, this state, an instrumentality or agency of this state, the federal government, an instrumentality or agency of the federal government, or other legal entity.

(k) "Rapid wetland assessment" means a method for generally assessing the functions, values, and condition of individual wetlands based on existing data and field indicators.

(*l*) "Rare and imperiled wetland" means any of the following:

(*i*) Great Lakes marsh.

(*ii*) Southern wet meadow.

(*iii*) Inland salt marsh.

(*iv*) Coastal plain marsh.

(*v*) Interdunal wetland.

(*vi*) Lakeplain wet prairie.

(*vii*) Lakeplain wet-mesic prairie.

(*viii*) Coastal fen.

(*ix*) Wet-mesic prairie.

(*x*) Wet prairie.

(*xi*) Prairie fen.

(*xii*) Northern fen.

(*xiii*) Patterned fen.

(*xiv*) Poor fen.

(*xv*) Muskeg.

(*xvi*) Relict conifer swamp.

(*xvii*) Southern floodplain forest.

(m) "Water dependent" means requiring access or proximity to or siting within an aquatic site to fulfill its basic purpose.

(n) "Wetland" means a land or water feature, commonly referred to as a bog, swamp, or marsh, inundated or saturated by water at a frequency and duration sufficient to support, and that under normal circumstances does support, hydric soils and a predominance of wetland vegetation or aquatic life. A land or water feature is not a wetland unless it meets any of the following:

(*i*) Is a water of the United States as that term is used in section 502(7) of the federal water pollution control act, 33 USC 1362.

(*ii*) Is contiguous to the Great Lakes, Lake St. Clair, an inland lake or pond, or a stream. As used in this subparagraph, "pond" does not include a farm or stock pond constructed consistent with the exemption under section 30305(2)(g).

(*iii*) Is more than 5 acres in size.

(*iv*) Has the documented presence of an endangered or threatened species under part 365 or the endangered species act of 1973, Public Law 93-205.

(*v*) Is a rare and imperiled wetland.

(2) In 2019 and every 5 years thereafter, the department of natural resources may make recommendations to the legislature for changes in the list of rare and imperiled wetlands to reflect the status of each type of wetland to be included on the list as rare and imperiled throughout this state.

(3) As used in section 30312f:

(a) "Altered or degraded wetland" means wetland that meets any of the following criteria:

(*i*) Has been partially or fully drained, such as by ditching, tiling, or pumping.

(*ii*) Has been partially or fully filled by direct placement of material in the wetland or significant sedimentation.

(*iii*) Invasive plant species dominate in a majority of the vegetated surface area of the wetland.

(*iv*) Has undergone land use conversion or alteration to vegetation, soil, or hydrology that currently affects the wetland functions and services.

(b) "Former wetland" means land that was wetland but that has been modified to the point that it no longer has the hydrologic characteristics of wetland.

(c) "Net increase in wetland functions and services" means an increase in 1 or more wetland functions and services with not more than a minimal decrease in other wetland functions and services.

(d) "Voluntary wetland restoration project", subject to subdivision (e), means any of the following:

(*i*) Activities that are voluntarily undertaken to restore, reestablish, rehabilitate, or enhance altered or degraded wetland or former wetland and that result in a net increase in wetland functions and services.

(*ii*) Activities to maintain or manage sites where activities described in subparagraph (*i*) have taken place, including sites restored before October 1, 1980, the effective date of former 1979 PA 203.

(e) Voluntary wetland restoration project does not include an activity undertaken to fulfill, currently or in the future, a federal, state, or local wetland permit mitigation requirement.

(f) "Wetland functions and services" means any of the following:

(*i*) Wetland hydrology that approximates the predisturbance condition or that emulates the natural condition of the wetland.

(*ii*) Fish and wildlife habitat quality or quantity.

(*iii*) Plant community quality, characterized by native vegetation types and diversity.

(*iv*) Water- and soil-related functions of the wetland, such as nutrient removal, sediment retention, flood control, or groundwater recharge.

(*v*) Recreational use of the wetland, including, but not limited to, fishing, hunting, trapping, and birdwatching.

(4) The department and local units of government shall apply the technical wetland delineation standards set forth in the United States Army Corps of Engineers January, 1987, Wetland Delineation Manual, technical report Y-87-1, and appropriate regional United States Army Corps of Engineers supplements, in identifying wetland boundaries under this part, including, but not limited to, section 30307.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Land and Water Management Division, with the exception of the farmland and open space preservation program, natural rivers program, and Michigan information

resource inventory system, to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

Enacting section 1 of Act 120 of 2009 provides:

"Enacting section 1. This amendatory act does not take effect unless both of the following requirements are met:

"(a) $4,000,000.00 from the cleanup and redevelopment trust fund created in section 3e of 1976 IL 1, MCL 445.573e, and $4,000,000.00 from the community pollution prevention fund created in section 3f of 1976 IL 1, MCL 445.573f, is appropriated by the legislature to the environmental protection fund created in section 503a of the natural resources and environmental protection act, 1994 PA 451, MCL 324.503a.

"(b) $2,000,000.00 is appropriated by the legislature from the environmental protection fund to support the program under part 303 of the natural resources and environmental protection act, 1994 PA 451, MCL 324.30301 to 324.30329."

****** 324.30302 THIS SECTION IS REPEALED BY ACT 98 OF 2013 EFFECTIVE 160 DAYS AFTER THE EFFECTIVE DATE, AS PUBLISHED IN THE FEDERAL REGISTER, OF AN ORDER BY THE ADMINISTRATOR OF THE UNITED STATES ENVIRONMENTAL PROTECTION AGENCY UNDER 40 CFR 233.53(c)(8)(vi) WITHDRAWING APPROVAL OF THE STATE PROGRAM UNDER 33 USC 1344(g) AND (h). (See enacting section 2 of Act 98 of 2013.) ******

324.30302 Legislative findings; criteria to be considered in administration of part.

Sec. 30302. (1) The legislature finds that:

(a) Wetland conservation is a matter of state concern since a wetland of 1 county may be affected by acts on a river, lake, stream, or wetland of other counties.

(b) A loss of a wetland may deprive the people of the state of some or all of the following benefits to be derived from the wetland:

(*i*) Flood and storm control by the hydrologic absorption and storage capacity of the wetland.

(*ii*) Wildlife habitat by providing breeding, nesting, and feeding grounds and cover for many forms of wildlife, waterfowl, including migratory waterfowl, and rare, threatened, or endangered wildlife species.

(*iii*) Protection of subsurface water resources and provision of valuable watersheds and recharging ground water supplies.

(*iv*) Pollution treatment by serving as a biological and chemical oxidation basin.

(*v*) Erosion control by serving as a sedimentation area and filtering basin, absorbing silt and organic matter.

(*vi*) Sources of nutrients in water food cycles and nursery grounds and sanctuaries for fish.

(c) Wetlands are valuable as an agricultural resource for the production of food and fiber, including certain crops which may only be grown on sites developed from wetland.

(d) That the extraction and processing of nonfuel minerals may necessitate the use of wetland, if it is determined pursuant to section 30311 that the proposed activity is dependent upon being located in the wetland and that a prudent and feasible alternative does not exist.

(2) In the administration of this part, the department shall consider the criteria provided in subsection (1).

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Land and Water Management Division, with the exception of the farmland and open space preservation program, natural rivers program, and Michigan information resource inventory system, to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

324.30303 Studies regarding wetland resources; contracts; study as public record for distribution at cost; identification of land suitable for cranberry production activities.

Sec. 30303. (1) The department may enter into an agreement to make contracts with the federal government, other state agencies, local units of government, private agencies, or persons for the purposes of making studies for the efficient preservation, management, protection, and use of wetland resources. A study

shall be available as a public record for distribution at cost as provided in section 4 of the freedom of information act, 1976 PA 442, MCL 15.234.

(2) Within 180 days after the effective date of the 2009 amendatory act that added this subsection, the commission of agriculture in consultation with the department of environmental quality shall identify at least 2,500 acres of land suitable for cranberry production activities. Priority shall be given to upland sites, sites that have been drained for agricultural use and are no longer wetland, and sites that have been drained for agricultural use and continue to be wetland. The department and the department of agriculture shall make available to the public a map of the areas identified as provided in this section. The map is for informational purposes and does not constitute a regulatory determination for purposes of this part.

(3) After 2,000 acres of sites identified under subsection (2) have been developed for cranberry production activities, at least an additional 2,500 acres shall be identified as provided in subsection (2).

****** 324.30304b THIS SECTION IS REPEALED BY ACT 98 OF 2013 EFFECTIVE 160 DAYS AFTER THE EFFECTIVE DATE, AS PUBLISHED IN THE FEDERAL REGISTER, OF AN ORDER BY THE*

*ADMINISTRATOR OF THE UNITED STATES ENVIRONMENTAL PROTECTION AGENCY UNDER 40 CFR 233.53(c)(8)(vi) WITHDRAWING APPROVAL OF THE STATE PROGRAM UNDER 33 USC 1344(g) AND (h). (See enacting section 2 of Act 98 of 2013.) ******

324.30304b Issuance of state programmatic general permits; agreement with United States army corps of engineers; applicability of subsections (2) and (3).

Sec. 30304b. (1) The department shall pursue an agreement with the United States army corps of engineers for the corps to issue state programmatic general permits under section 404(e) of title IV of the federal water pollution control act, 33 USC 1344, for activities regulated under this part in waters over which the corps retains jurisdiction under section 404(g)(1) of title IV of the federal water pollution control act, 33 USC 1344.

(2) This subsection applies beginning January 1, 2011. This subsection applies to an application for a permit under this part only if the application is for an activity or use in waters over which the corps retains jurisdiction under section 404(g)(1) of title IV of the federal water pollution control act, 33 USC 1344, and if the corps has not issued a state programmatic general permit for the activity or use. In such a case, if requested by the applicant in the application, all of the following apply:

(a) The department shall approve or deny the application for a permit under this part not more than 30 days after the corps grants or denies an application for a permit for the project under section 404(a) of title IV of the federal water pollution control act, 33 USC 1344, or by the end of the processing period otherwise provided for in section 1301, whichever is later. If a project proposed in a permit application processed under this subsection also requires authorization under 1 or more of parts 31, 301, 315, 323, 325, or 353, the requirements of this subdivision also apply to the department's decision under that part or parts.

(b) Subject to subsection (3), if the corps grants a permit for the project, the department shall grant a permit under this part without conditions or limitations other than those imposed by the corps unless any of the following apply:

(*i*) The wetland is a rare and imperiled wetland.

(*ii*) The wetland is regionally significant for the protection of fisheries, wildlife, or migratory birds.

(*iii*) The site is described in section 30309(a), (e), or (g).

(*iv*) The proposed project involves a use or activity not regulated under section 404(a) of title IV of the federal water pollution control act, 33 USC 1344.

(3) The department shall inform the applicant in writing of the basis for a finding that the requirements of subsection (2)(b)(*i*), (*ii*), (*iii*), or (*iv*) are met and the specific reasons why denial of the permit or the imposition of additional conditions or limitations on the permit is consistent with this part and rules promulgated under this part.

(4) Subsections (2)(b) and (3) apply only to the department's decision under this part notwithstanding that the project proposed in the application also requires authorization under 1 or more of parts 31, 301, 315, 323, 325, and 353.

History: Add. 2009, Act 120, Eff. Nov. 6, 2009.

Compiler's note: Enacting section 1 of Act 120 of 2009 provides:

"Enacting section 1. This amendatory act does not take effect unless both of the following requirements are met:

"(a) $4,000,000.00 from the cleanup and redevelopment trust fund created in section 3e of 1976 IL 1, MCL 445.573e, and $4,000,000.00 from the community pollution prevention fund created in section 3f of 1976 IL 1, MCL 445.573f, is appropriated by the legislature to the environmental protection fund created in section 503a of the natural resources and environmental protection act, 1994 PA 451, MCL 324.503a.

"(b) $2,000,000.00 is appropriated by the legislature from the environmental protection fund to support the program under part 303 of the natural resources and environmental protection act, 1994 PA 451, MCL 324.30301 to 324.30329."

****** 324.30305 THIS SECTION IS REPEALED BY ACT 98 OF 2013 EFFECTIVE 160 DAYS AFTER THE EFFECTIVE DATE, AS PUBLISHED IN THE FEDERAL REGISTER, OF AN ORDER BY THE ADMINISTRATOR OF THE UNITED STATES ENVIRONMENTAL PROTECTION AGENCY UNDER 40 CFR 233.53(c)(8)(vi) WITHDRAWING APPROVAL OF THE STATE PROGRAM UNDER 33 USC 1344(g) AND (h). (See enacting section 2 of Act 98 of 2013.) ******

324.30305 Activities not requiring permit under part; uses allowed without permit; farming operation in wetland not requiring permit; incidental creation of wetland; area created as result of commercial excavation; activities not subject to regulation; subsection (6) inapplicable to certain lands; "agricultural drain" defined.

Sec. 30305. (1) Activities that require a permit under part 325 or part 301 or a discharge that is authorized by a discharge permit under section 3112 or 3113 do not require a permit under this part.

(2) The following uses are allowed in a wetland without a permit subject to other laws of this state and the owner's regulation:

(a) Fishing, trapping, or hunting.

(b) Swimming or boating.

(c) Hiking.

(d) Grazing of animals, including fencing and post placement if the fence is designed to control livestock, does not exceed 11 feet in height, and utilizes an amount of material that does not exceed that of a woven wire fence utilizing 6-inch vertical spacing and posts.

(e) Farming, horticulture, silviculture, lumbering, and ranching activities, including plowing, irrigation, irrigation ditching, seeding, cultivating, minor drainage, harvesting for the production of food, fiber, and forest products, or upland soil and water conservation practices. All of the following apply for the purposes of this subdivision:

(*i*) Beginning October 1, 2013, to be allowed in a wetland without a permit, these activities shall be part of an established ongoing farming, ranching, horticultural, or silvicultural operation. Farming and silvicultural activities on areas lying fallow as part of a conventional rotational cycle are part of an established ongoing operation, unless modifications to the hydrological regime or mechanized land clearing are necessary to resume operation. Activities that bring into farming, ranching, horticultural, or silvicultural use an area not in any of these uses, or that convert an area from a forested or silvicultural use to a farming, ranching, or horticultural use, are not part of an established ongoing operation.

(*ii*) Minor drainage does not include drainage associated with the immediate or gradual conversion of a wetland to a nonwetland, or conversion from 1 wetland use to another. Minor drainage does not include the construction of a canal, ditch, dike, or other waterway or structure that drains or otherwise significantly modifies a stream, lake, or wetland.

(*iii*) Wetland altered under this subdivision shall not be used for a purpose other than a purpose described in this section without a permit from the department.

(f) Maintenance or operation of serviceable structures in existence on October 1, 1980 or constructed pursuant to this part or former 1979 PA 203.

(g) Construction or maintenance of farm or stock ponds.

(h) Maintenance of an agricultural drain, regardless of outlet, if all of the following requirements are met:

(*i*) The maintenance includes only activities that maintain the location, depth, and bottom width of the drain as constructed or modified at any time before July 1, 2014.

(*ii*) The maintenance is performed by the landowner or pursuant to the drain code of 1956, 1956 PA 40, MCL 280.1 to 280.630.

(*iii*) The maintenance does not include any modification that results in additional wetland drainage or conversion of a wetland to a use to which it was not previously subject.

(i) Maintenance of a drain that was legally established and constructed pursuant to the drain code of 1956, 1956 PA 40, MCL 280.1 to 280.630, if the drain was constructed before January 1, 1973 or under a permit issued pursuant to this part. As used in this subdivision, "maintenance of a drain" means the physical preservation of the location, depth, and bottom width of a drain and appurtenant structures to restore the function and approximate capacity of the drain as constructed or modified at any time before July 1, 2014, including the placement of spoils removed from the drain in locations along that drain where spoils have been previously placed. Maintenance of a drain under this subdivision does not include any modification that results in additional wetland drainage or conversion of a wetland to a use to which it was not previously subject.

(j) Construction or maintenance of farm roads, forest roads, or temporary roads for moving mining or forestry equipment, if the roads are constructed and maintained in a manner to ensure that any adverse effect on the wetland will be minimized. Borrow material for road construction or maintenance shall be taken from upland sources if feasible. In determining whether an alternative will minimize any adverse effect on the wetland, the department shall consider cost, existing technology, and logistics in light of overall project purposes.

(k) Maintenance of public streets, highways, or roads that meets all of the following requirements:

(*i*) Does not include any modification that changes the original location or footprint.

(*ii*) Is done in a manner that minimizes any adverse effect on the wetland.

(*l*) Maintenance or repair of utility lines and associated support structures that meets all of the following requirements:

(*i*) Is done in a manner that minimizes any adverse effect on the wetland.

(*ii*) Does not include any modification to the character, scope, or size of the originally constructed design.

(*iii*) Does not convert a wetland area to a use to which it was not previously subject.

For the purposes of this subdivision and subdivision (m), "utility line" means any pipe or pipeline used for the transportation of any gaseous, liquid, liquescent, or slurry substance, for any purpose, and any cable, line, or wire for the transmission for any purpose of electrical energy, telephone or telegraph messages, or radio or television communication.

(m) Installation of utility lines having a diameter of 6 inches or less using directional drilling or boring, or knifing-in, and the placement of poles with minimal (less than 1 cubic yard) structure support, if the utility lines and poles are installed in a manner that minimizes any adverse effect on the wetland. Directional drilling or boring under this subdivision shall meet all of the following requirements:

(*i*) The top of the utility line is at least 4 feet below the soil surface of the wetland. However, if the presence of rock prevents the placement of the utility line at the depth otherwise required by this subparagraph, the bottom of the utility line is not placed higher than the top of the rock.

(*ii*) The entry and exit holes are located a sufficient distance from the wetland to ensure that disturbance of the wetland does not occur.

(*iii*) The operation does not result in the eruption or release of any drilling fluids up through the ground and into the wetland and there is an adequate plan to respond to any release of drilling mud or other fill material.

(n) Operation or maintenance, including reconstruction of recently damaged parts, of serviceable dikes and levees in existence on October 1, 1980 or constructed pursuant to this part or former 1979 PA 203.

(o) Placement of biological residuals from activities, including the cutting of woody vegetation or the in-place grinding of tree stumps, performed under this section within a wetland, if all the biological residuals originate within that wetland.

(3) An activity in a wetland that was effectively drained for farming before October 1, 1980 and that on and after October 1, 1980 has continued to be effectively drained as part of an ongoing farming operation is not subject to regulation under this part.

(4) A wetland that is incidentally created as a result of 1 or more of the following activities is not subject to regulation under this part:

(a) Excavation as part of commercial sand, gravel, or mineral mining, if the area was not a wetland before excavation. This exemption from regulation applies until the property on which the wetland is located meets both of the following requirements:

(*i*) Is no longer used for excavation as part of commercial sand, gravel, or mineral mining.

(*ii*) Is being used for another purpose unrelated to excavation as part of commercial sand, gravel, or mineral mining.

(b) Construction and operation of a water treatment pond, lagoon, or storm water facility in compliance with the requirements of state or federal water pollution control laws.

(c) A diked area associated with a landfill if the landfill complies with the terms of the landfill construction permit and if the diked area was not a wetland before diking.

(d) Construction of drains in upland for the sole purpose of removing excess soil moisture from upland areas that are primarily in agricultural use.

(e) Construction of roadside ditches in upland for the sole purpose of removing excess soil moisture from upland.

(f) An agricultural soil and water conservation practice designed, constructed, and maintained for the purpose of enhancing water quality.

(5) An area that becomes contiguous to a water body created as a result of commercial excavation for sand, gravel, or mineral mining is not subject to regulation under this part solely because it is contiguous to the created water body. This exemption from regulation applies until the property on which the wetland is located meets both of the following requirements:

(a) Is no longer used for excavation as part of commercial sand, gravel, or mineral mining.

(b) Is being used for another purpose unrelated to excavation as part of commercial sand, gravel, or mineral mining.

(6) Except as provided in subsection (7), the following activities are not subject to regulation under this part:

(a) Leveling of sand, removal of vegetation, grooming of soil, or removal of debris, in an area of unconsolidated material predominantly composed of sand, rock, or pebbles, located between the ordinary high-water mark and the water's edge.

(b) Mowing of vegetation between the ordinary high-water mark and the water's edge.

(7) Subsection (6) does not apply to lands included in the survey of the delta of the St. Clair River, otherwise referred to as the St. Clair flats, located within Clay township, St. Clair county, as provided for in

1899 PA 175.

(8) As used in this part, "agricultural drain" means a human-made conveyance of water that meets all of the following requirements:

(a) Does not have continuous flow.

(b) Flows primarily as a result of precipitation-induced surface runoff or groundwater drained through subsurface drainage systems.

(c) Serves agricultural production.

(d) Was constructed before January 1, 1973, or was constructed in compliance with this part or former 1979 PA 203.

324.30305b Cranberry beds.

Sec. 30305b. (1) The department shall consider construction of cranberry beds, including associated dikes and water control structures associated with dikes, such as headgates, weirs, and drop inlet structures, to be a water dependent activity.

(2) The following activities associated with cranberry operations are not considered to be water dependent:

(a) The construction of roads, ditches, reservoirs, and pump houses that are used during the cultivation of cranberries.

(b) The construction of secondary support facilities for shipping, storage, packaging, parking, and similar purposes.

(3) The demonstration by an applicant under section 30311 that there is no feasible and prudent alternative to the construction of cranberry beds, including dikes and water control structures associated with dikes, is not subject to either of the following presumptions:

(a) That feasible and prudent alternatives that do not involve a wetland are available.

(b) That a feasible and prudent alternative that does not affect a wetland will have less adverse effects on the aquatic ecosystem.

History: Add. 2009, Act 120, Eff. Nov. 6, 2009.

Compiler's note: Enacting section 1 of Act 120 of 2009 provides:

324.30306 Permit for use or development listed in MCL 324.30304; filing, form, and contents of application; proposed use or development as single permit application; fee; work done in violation of permit requirement; fee refund; conditional permit.

Sec. 30306. (1) Except as provided in section 30307(6), to obtain a permit for a use or development listed in section 30304, a person shall file an application with the department on a form provided by the department. The application shall include all of the following:

(a) The person's name and address.

(b) The location of the wetland.

(c) A description of the wetland.

(d) A statement and appropriate drawings describing the proposed use or development.

(e) The wetland owner's name and address.

(f) An environmental assessment of the proposed use or development if requested by the department. The assessment shall include the effects upon wetland benefits and the effects upon the water quality, flow, and levels, and the wildlife, fish, and vegetation within any contiguous inland lake or stream.

(2) For the purposes of subsection (1), a proposed use or development of a wetland shall be covered by a single permit application under this part if the scope, extent, and purpose of a use or development are made known at the time of the application for the permit.

(3) Except as provided in subsections (4) and (5), an application for a permit submitted under subsection (1) shall be accompanied by the following application fee, as applicable:

(a) For a project in a category of activities for which a general permit is issued under section 30312(2), a fee of $50.00.

(b) For activities included in a minor project category established under section 30312(1), a fee of $100.00.

(c) For a major project, including any of the following, a fee of $2,000.00:

(*i*) Filling or draining of 1 acre or more of coastal or inland wetland.

(*ii*) 10,000 cubic yards or more of wetland fill.

(*iii*) A new golf course affecting wetland.

(*iv*) A subdivision affecting wetland.

(*v*) A condominium affecting wetland.

(d) For all other projects, a fee of $500.00.

(4) A project that requires review and approval under this part and 1 or more of the following is subject to only the single highest fee required under this part or the following:

(a) Section 3104.

(b) Part 301.

(c) Part 323.

(d) Part 325.

(e) Section 117 of the land division act, 1967 PA 288, MCL 560.117.

(5) If work has been done in violation of a permit requirement under this part, the department shall consider accepting and may accept an application for a permit if the application is accompanied by a fee equal to twice the application fee otherwise required under this section.

(6) If the department determines that a permit is not required under this part or denies an application for a permit under this part, the department shall promptly refund the application fee paid under this section.

(7) The department may issue a conditional permit before the expiration of the 20-day period referred to in section 30307 if emergency conditions warrant a project to protect property or the public health, safety, or welfare.

324.30306b Preapplication meeting; fee; withdrawal of request; refund of fee; duration of written agreement.

Sec. 30306b. (1) If a preapplication meeting is requested in writing by the landowner or another person who is authorized in writing by the landowner, the department shall meet with the person or his or her representatives to review a proposed project or a proposed permit application in its entirety. The preapplication meeting shall take place at the department's district office for the district that includes the project site or at the project site itself, as specified in the request.

(2) Except as provided in this subsection, the request shall be accompanied by a fee. The fee for a preapplication meeting at the district office is $150.00. The fee for a preapplication meeting at the project site is $250.00 for the first acre or portion of an acre of project area, plus $50.00 for each acre or portion of an acre in excess of the first acre, but not to exceed a fee of $1,000.00. However, both of the following apply:

(a) If the location of the project is a single family residential lot that is less than 1 acre in size, there is no fee for a preapplication meeting at the district office, and the fee for a preapplication meeting at the project site is $100.00.

(b) There is no fee for a preapplication meeting for cranberry and blueberry production activities, whether at the district office or project site.

(3) If the person withdraws the request at least 24 hours before the preapplication meeting, the department may agree with the person to reschedule the meeting or shall promptly refund the fee and need not meet as provided in this section. Otherwise, if, after agreeing to the time and place for a preapplication meeting, the person requesting the meeting is not represented at the meeting, the person shall forfeit the fee for the meeting. If, after agreeing to the time and place for a preapplication meeting, the department is not represented at the meeting, the department shall refund the fee and send a representative to a rescheduled meeting to be held within 10 days after the first scheduled meeting date.

(4) Any written agreement provided by the department as a result of the preapplication meeting regarding the need to obtain a permit is binding on the department for 2 years after the date of the agreement.

History: Add. 2006, Act 435, Imd. Eff. Oct. 5, 2006;—Am. 2009, Act 120, Eff. Nov. 6, 2009;—Am. 2010, Act 180, Imd. Eff. Sept. 30, 2010;—Am. 2013, Act 98, Imd. Eff. July 2, 2013.

Compiler's note: Enacting section 1 of Act 120 of 2009 provides:

"Enacting section 1. This amendatory act does not take effect unless both of the following requirements are met:

"(a) $4,000,000.00 from the cleanup and redevelopment trust fund created in section 3e of 1976 IL 1, MCL 445.573e, and $4,000,000.00 from the community pollution prevention fund created in section 3f of 1976 IL 1, MCL 445.573f, is appropriated by the legislature to the environmental protection fund created in section 503a of the natural resources and environmental protection act, 1994 PA 451, MCL 324.503a.

"(b) $2,000,000.00 is appropriated by the legislature from the environmental protection fund to support the program under part 303 of the natural resources and environmental protection act, 1994 PA 451, MCL 324.30301 to 324.30329."

****** 324.30307 THIS SECTION IS REPEALED BY ACT 98 OF 2013 EFFECTIVE 160 DAYS AFTER THE EFFECTIVE DATE, AS PUBLISHED IN THE FEDERAL REGISTER, OF AN ORDER BY THE ADMINISTRATOR OF THE UNITED STATES ENVIRONMENTAL PROTECTION AGENCY UNDER 40 CFR 233.53(c)(8)(vi) WITHDRAWING APPROVAL OF THE STATE PROGRAM UNDER 33 USC 1344(g) AND (h). (See enacting section 2 of Act 98 of 2013.) ******

324.30307 Hearing; location; notice; approval or disapproval of permit application; appeal; legal action; website and electronic notification of pending permit applications, public notices, and public hearing schedules; effect of ordinance regulating wetlands; review of permit application by local unit of government; effect of failure to approve or disapprove within time period; recommendations; notice of permit issuance.

Sec. 30307. (1) Within 60 days after receipt of the completed application and fee, the department may hold a hearing. If a hearing is held, it shall be held in the county where the wetland to which the permit is to apply is located. Notice of the hearing shall be given in the same manner as for the promulgation of rules under the administrative procedures act of 1969, 1969 PA 306, MCL 24.201 to 24.328. The department may approve or disapprove a permit application without a public hearing unless a person requests a hearing in writing within 20 days after the mailing of notification of the permit application as required by subsection (3) or unless the

department determines that the permit application is of significant impact so as to warrant a public hearing.

(2) The action taken by the department on a permit application under this part or part 13 may be appealed pursuant to the administrative procedures act of 1969, 1969 PA 306, MCL 24.201 to 24.328. A property owner may, after exhaustion of administrative remedies, bring appropriate legal action in a court of competent jurisdiction.

(3) The department shall post on its website, and shall have a process to provide electronic mail notification of, all of the following under this part:

(a) A list of pending applications.

(b) Public notices.

(c) Public hearing schedules.

(4) A local unit of government may regulate wetland within its boundaries, by ordinance, only as provided under this part. This subsection is supplemental to the existing authority of a local unit of government. An ordinance adopted by a local unit of government pursuant to this subsection shall comply with all of the following:

(a) The ordinance shall not provide a different definition of wetland than is provided in this part, except that a wetland ordinance may regulate wetland of less than 5 acres in size.

(b) If the ordinance regulates wetland that is smaller than 2 acres in size, the ordinance shall comply with section 30309.

(c) The ordinance shall comply with sections 30308 and 30310.

(d) The ordinance shall not require a permit for uses that are authorized without a permit under section 30305, and shall otherwise comply with this part.

(5) A local unit of government that adopts an ordinance regulating wetlands under subsection (4) shall notify the department.

(6) A local unit of government that adopts an ordinance regulating wetlands shall use an application form supplied by the department, and each person applying for a permit shall make application directly to the local unit of government. Upon receipt, the local unit of government shall forward a copy of each application along with any state fees that may have been submitted under section 30306 to the department. The department shall begin reviewing the application as provided in this part. The local unit of government shall review the application pursuant to its ordinance and shall modify, approve, or deny the application within 90 days after receipt. If a local unit of government does not approve or disapprove the permit application within the time period provided by this subsection, the permit application shall be considered approved, and the local unit of government shall be considered to have made the determinations as listed in section 30311. The denial of a permit shall be accompanied by a written statement of all reasons for denial. The failure to supply complete information with a permit application may be reason for denial of a permit. If requested, the department shall inform a person whether or not a local unit of government has an ordinance regulating wetlands. If the department receives an application with respect to a wetland located in a local unit of government that has an ordinance regulating wetlands, the department immediately shall forward the application to the local unit of government, which shall modify, deny, or approve the application under this subsection. The local unit of government shall notify the department of its decision. The department shall proceed as provided in this part.

(7) If a local unit of government does not have an ordinance regulating wetlands, the department shall promptly send a copy of the permit application to the local unit of government where the wetland is located. The local unit of government may review the application; may hold a hearing on the application; may recommend approval, modification, or denial of the application to the department or may notify the department that the local unit of government declines to make a recommendation. The recommendation of the local unit of government, if any, shall be made and returned to the department within 45 days after the local unit of government's receipt of the permit application.

(8) In addition to the requirements of subsection (7), the department shall notify the local unit of government that the department has issued a permit under this part pertaining to wetland located within the jurisdiction of that local unit of government within 15 days of issuance of the permit. The department shall enclose a copy of the permit with the notice.

****** 324.30308 THIS SECTION IS REPEALED BY ACT 98 OF 2013 EFFECTIVE 160 DAYS AFTER THE*

*EFFECTIVE DATE, AS PUBLISHED IN THE FEDERAL REGISTER, OF AN ORDER BY THE ADMINISTRATOR OF THE UNITED STATES ENVIRONMENTAL PROTECTION AGENCY UNDER 40 CFR 233.53(c)(8)(vi) WITHDRAWING APPROVAL OF THE STATE PROGRAM UNDER 33 USC 1344(g) AND (h). (See enacting section 2 of Act 98 of 2013.) ******

324.30308 Adoption of wetlands ordinance by local unit of government; availability of wetland inventory; completion of inventory map; notice; enforceable presumptions not created; processing wetland use applications.

Sec. 30308. (1) Prior to the effective date of an ordinance authorized under section 30307(4), a local unit of government that wishes to adopt such an ordinance shall complete and make available to the public at a reasonable cost an inventory of all wetland within the local unit of government, except that a local unit of government located in a county that has a population of less than 100,000 is not required to include public lands on its map. A local unit of government shall make a draft of the inventory map available to the public, shall provide for public notice and comment opportunity prior to finalizing the inventory map, and shall respond in writing to written comments received by the local unit of government regarding the contents of the inventory. A local unit of government that has a wetland ordinance on December 18, 1992 has until June 18, 1994 to complete an inventory map and to otherwise comply with this part, or the local unit of government shall not continue to enforce that ordinance. Upon completion of an inventory map or upon a subsequent amendment of an inventory map, the local unit of government shall notify each record owner of property on the property tax roll of the local unit of government that the inventory maps exist or have been amended, where the maps may be reviewed, that the owner's property may be designated as a wetland on the inventory map, and that the local unit of government has an ordinance regulating wetland. The notice shall also inform the property owner that the inventory map does not necessarily include all of the wetlands within the local unit of government that may be subject to the wetland ordinance. The notice may be given by including the required information with the annual notice of the property owner's property tax assessment. A wetland inventory map does not create any legally enforceable presumptions regarding whether property that is or is not included on the inventory map is or is not a wetland.

(2) A local unit of government that adopts a wetland ordinance shall process wetland use applications in a manner that ensures that the same entity makes decisions on site plans, plats, and related matters, and wetland determinations, and that the applicant is not required to submit to a hearing on the application before more than 1 local unit of government decision making body. This requirement does not apply to either of the following:

(a) A preliminary review by a planning department, planning consultant, or planning commission, prior to submittal to the decision making body if required by an ordinance.

(b) An appeal process that is provided for appeal to the legislative body or other body designated to hear appeals.

(See enacting section 2 of Act 98 of 2013.) ******

324.30309 Regulation by local unit of government of wetland less than 2 acres; permit application; determination.

Sec. 30309. A local unit of government that has adopted an ordinance under section 30307(4) that regulates wetland within its jurisdiction that is less than 2 acres in size shall comply with this section. Upon application for a wetland use permit in a wetland that is less than 2 acres in size, the local unit of government shall approve the permit unless the local unit of government determines that the wetland is essential to the preservation of the natural resources of the local unit of government and provides these findings, in writing, to the permit applicant stating the reasons for this determination. In making this determination, the local unit of government must find that 1 or more of the following exist at the particular site:

(a) The site supports state or federal endangered or threatened plants, fish, or wildlife appearing on a list specified in section 36505.

(b) The site represents what is identified as a locally rare or unique ecosystem.

(c) The site supports plants or animals of an identified local importance.

(d) The site provides groundwater recharge documented by a public agency.

(e) The site provides flood and storm control by the hydrologic absorption and storage capacity of the wetland.

(f) The site provides wildlife habitat by providing breeding, nesting, or feeding grounds or cover for forms of wildlife, waterfowl, including migratory waterfowl, and rare, threatened, or endangered wildlife species.

(g) The site provides protection of subsurface water resources and provision of valuable watersheds and recharging groundwater supplies.

(h) The site provides pollution treatment by serving as a biological and chemical oxidation basin.

(i) The site provides erosion control by serving as a sedimentation area and filtering basin, absorbing silt and organic matter.

(j) The site provides sources of nutrients in water food cycles and nursery grounds and sanctuaries for fish.

324.30310 Regulation by local unit of government of wetland less than 2 acres; revaluation for assessment purposes; protest and appeal; judicial review; right to initiate proceedings not limited by section.

Sec. 30310. (1) A local unit of government that adopts an ordinance authorized under section 30307(4) shall include in the ordinance a provision that allows a landowner to request a revaluation of the affected property for assessment purposes to determine its fair market value under the use restriction if a permit is denied by a local unit of government for a proposed wetland use. A landowner who is aggrieved by a determination, action, or inaction under this subsection may protest and appeal that determination, action, or inaction pursuant to the general property tax act, Act No. 206 of the Public Acts of 1893, being sections 211.1 to 211.157 of the Michigan Compiled Laws.

(2) If a permit applicant is aggrieved by a determination, action, or inaction by the local unit of government regarding the issuance of a permit, that person may seek judicial review in the same manner as provided in the administrative procedures act of 1969, Act No. 306 of the Public Acts of 1969, being sections 24.201 to 24.328 of the Michigan Compiled Laws.

(3) This section does not limit the right of a wetland owner to institute proceedings in any circuit of the circuit court of the state against any person when necessary to protect the wetland owner's rights.

(See enacting section 2 of Act 98 of 2013.) ******

324.30311 Permit for activity listed in MCL 324.30304; approval conditioned on certain determinations; criteria; findings of necessity; criteria for determining unacceptable disruption to aquatic resources; additional showing; feasible and prudent alternatives; determination of unreasonable costs.

Sec. 30311. (1) A permit for an activity listed in section 30304 shall not be approved unless the department determines that the issuance of a permit is in the public interest, that the permit is necessary to realize the benefits derived from the activity, and that the activity is otherwise lawful.

(2) In determining whether the activity is in the public interest, the benefit which reasonably may be expected to accrue from the proposal shall be balanced against the reasonably foreseeable detriments of the activity. The decision shall reflect the national and state concern for the protection of natural resources from pollution, impairment, and destruction. The following general criteria shall be considered:

(a) The relative extent of the public and private need for the proposed activity.

(b) The availability of feasible and prudent alternative locations and methods to accomplish the expected benefits from the activity.

(c) The extent and permanence of the beneficial or detrimental effects that the proposed activity may have on the public and private uses to which the area is suited, including the benefits the wetland provides.

(d) The probable effects of each proposal in relation to the cumulative effects created by other existing and anticipated activities in the watershed.

(e) The probable effects on recognized historic, cultural, scenic, ecological, or recreational values and on the public health or fish or wildlife.

(f) The size of the wetland being considered.

(g) The amount of remaining wetland in the general area.

(h) Proximity to any waterway.

(i) Economic value, both public and private, of the proposed land change to the general area.

(3) In considering a permit application, the department shall give serious consideration to findings of necessity for the proposed activity which have been made by other state agencies.

(4) A permit shall not be issued unless it is shown that an unacceptable disruption will not result to the aquatic resources. In determining whether a disruption to the aquatic resources is unacceptable, the criteria set forth in section 30302 and subsection (2) shall be considered. A permit shall not be issued unless the applicant also shows either of the following:

(a) The proposed activity is primarily dependent upon being located in the wetland.

(b) A feasible and prudent alternative does not exist.

(5) If it is otherwise a feasible and prudent alternative, a property not presently owned by the applicant which could reasonably be obtained, utilized, expanded, or managed in order to fulfill the basic purpose of the proposed activity may be considered. If all of the following requirements are met, there is a rebuttable presumption that alternatives located on property not presently owned by the applicant are not feasible and prudent:

(a) The activity is described in section 30304(a) or (b).

(b) The activity will affect not more than 2 acres of wetland.

(c) The activity is undertaken for the construction or expansion of a single-family home and attendant features, the construction or expansion of a barn or other farm building, or the expansion of a small business facility.

(d) The activity is not covered by a general permit.

(6) Consideration of feasible and prudent alternatives regarding the size of a proposed structure shall be based on the footprint of the structure and not the square footage of the structure.

(7) The choice of and extent of the proposed activity within a proposed structure shall not be considered in determining feasible and prudent alternatives.

(8) An alternative that entails higher costs, as described in R 281.922a(11) of the Michigan administrative code, is not feasible and prudent if those higher costs are unreasonable. In determining whether such costs are unreasonable, the department shall consider both of the following:

(a) The relation of the increased cost to the overall scope and cost of the project.

(b) Whether the projected cost is substantially greater than the costs normally associated with the particular type of project.

324.30311d Compensatory wetland mitigation; methods; submission of mitigation plan; financial assurance.

Sec. 30311d. (1) The department may impose as a condition on any permit, other than a general permit, under this part a requirement for compensatory wetland mitigation. The department may approve 1 or more of the following methods of compensatory wetland mitigation:

(a) The acquisition of approved credits from a wetland mitigation bank. The department shall not require a permit applicant to provide compensatory wetland mitigation under subdivision (b), (c), or (d) if the applicant prefers and qualifies to use approved credits from the wetland mitigation bank to provide required compensatory wetland mitigation under this subdivision.

(b) The restoration of previously existing wetland. The restoration of previously existing wetland is preferred over the creation of new wetland where none previously existed.

(c) The creation of new wetlands, if the permit applicant demonstrates that ecological conditions necessary for establishment of a self-sustaining wetland ecosystem exist or will be created.

(d) The preservation of exceptional wetlands.

(2) If compensatory wetland mitigation under subsection (1)(b), (c), or (d) is required, a permit applicant shall submit a mitigation plan to the department for approval. In approving a compensatory mitigation plan, the department shall consider how the location and type of wetland mitigation supports the sustainability or improvement of aquatic resources in the watershed where the activity is permitted. The permit applicant shall provide for permanent protection of the wetland mitigation site. The department may accept a conservation easement to protect wetland mitigation and associated upland.

(3) If a permittee carries out compensatory wetland mitigation under subsection (1)(b), (c), or (d) in cooperation with public agencies, private organizations, or other parties, the permittee remains responsible for the compensatory wetland mitigation to the extent otherwise provided by law.

(4) The department may require financial assurance to ensure that compensatory wetland mitigation is accomplished as specified. To ensure that wetland benefits are replaced by compensatory wetland mitigation, the department may release financial assurance only after the permit applicant or mitigation bank sponsor has completed monitoring of the mitigation site and demonstrated compliance with performance standards in accordance with a schedule in the permit or mitigation banking agreement.

(5) If compensatory wetland mitigation is required, in setting the mitigation ratio the department shall consider the method of compensatory mitigation, the likelihood of success, differences between the functions lost at the impacted site and the functions expected to be produced by the compensatory mitigation project, temporary losses of aquatic resource functions, the difficulty of restoring or establishing the desired aquatic resource type and functions, and the distance between the affected aquatic resource and the mitigation site.

(6) For agricultural activities, a permit applicant may provide for protection and restoration of the impacted site under a conservation easement with the department as part of mitigation requirements. A permit applicant may make a payment into the stewardship fund, if established under subsection (7), as part of mitigation requirements, as an alternative to providing financial assurances required under subsection (4).

(7) The department may establish a stewardship fund in the state treasury. The state treasurer may receive money or other assets from any source for deposit into the fund. The state treasurer shall direct the investment of the fund. The state treasurer shall credit to the fund interest and earnings from fund investments. Money in the fund at the close of the fiscal year shall remain in the fund and shall not lapse to the general fund. The department shall be the administrator of the fund for auditing purposes. The department shall expend money from the fund, upon appropriation, only to develop mitigation for impacted sites or as an alternative to financial assurance required under subsection (4).

(8) By 1 year after the effective date of the amendatory act that added this subsection, the department shall submit to the office of regulatory reform for informal review revised administrative rules on mitigation that do all of the following:

(a) Reduce the preference for on-site mitigation.

(b) Allow flexibility in mitigation ratios for uses of wetlands.

(c) Allow a reduction of mitigation ratios when approved credits from a wetland mitigation bank are used.

(d) Allow consideration of additional ecologically beneficial features.

(e) Allow any excess mitigation for any project to be credited to another project at a later date.

(9) The department shall submit revised administrative rules that encourage the development of wetland mitigation banks to the office of regulatory reform for informal review within 1 year after the effective date of the amendatory act that added this subsection. The rules shall do all of the following:

(a) Enlarge mitigation bank service areas. However, a service area shall be located within the same watershed or ecoregion as the permitted project or activity, ensure no net loss of the wetland resources, and

protect the predominant wetland functions of the service area. The department shall consider enlarging the size of ecoregions for mitigation bank service areas.

(b) Allow earlier release of credits if the benefits of a mitigation bank have been properly established and the credits are revocable or covered by a financial assurance.

(c) Allow wetland preservation to be used in areas where wetland restoration opportunities do not exist, if an unacceptable disruption of the aquatic resources will not result.

(10) The department shall establish a wetland mitigation bank funding program under part 52 that provides grants and loans to eligible municipalities for the purposes of establishing mitigation banks.

Popular name: Wetland Protection Act

****** 324.30312 THIS SECTION IS REPEALED BY ACT 98 OF 2013 EFFECTIVE 160 DAYS AFTER THE EFFECTIVE DATE, AS PUBLISHED IN THE FEDERAL REGISTER, OF AN ORDER BY THE ADMINISTRATOR OF THE UNITED STATES ENVIRONMENTAL PROTECTION AGENCY UNDER 40 CFR 233.53(c)(8)(vi) WITHDRAWING APPROVAL OF THE STATE PROGRAM UNDER 33 USC 1344(g) AND (h). (See enacting section 2 of Act 98 of 2013.) ******

324.30312 Minor project categories of activities; general permit for category of activities; notice and public hearing; determinations; requirements and standards; duration of general permit; determination of more than minimal adverse effects; coordination of general permit and minor project categories; conversion to blueberry farming or certain other agriculture.

Sec. 30312. (1) After providing notice and an opportunity for a public hearing, the department shall establish minor project categories of activities that are similar in nature, have minimal adverse environmental effects when performed separately, and will have only minimal cumulative adverse effects on the environment. The department may act upon an application received pursuant to section 30306 for an activity within a minor project category without holding a public hearing or providing notice pursuant to section 30307(1) or (3). A minor project category shall not be valid for more than 5 years, but may be reestablished. All other provisions of this part, except provisions applicable only to general permits, are applicable to a minor project.

(2) The department, after notice and opportunity for a public hearing, shall issue general permits on a statewide basis or within a local unit of government for a category of activities if the department determines that the activities are similar in nature, will cause only minimal adverse environmental effects when performed separately, and will have only minimal cumulative adverse effects on the environment. A general permit shall be based on the requirements of this part and the rules promulgated under this part, and shall set forth the requirements and standards that shall apply to an activity authorized by the general permit. A general permit shall not be valid for more than 5 years, but may be reissued.

(3) Before authorizing a specific project to proceed under a general permit, the department may provide notice pursuant to section 30307(3) but shall not hold a public hearing and shall not typically require a site inspection. The department shall issue an authorization under a general permit if the conditions of the general permit and the requirements of section 30311 are met. However, in determining whether to issue an authorization under a general permit, the department shall not consider off-site alternatives to be feasible and prudent alternatives.

(4) If the department determines that activity in a proposed project, although within a minor project category or a general permit, is likely to cause more than minimal adverse effects on aquatic resources, including high-value aquatic habitats, the department may require that the application be processed under section 30307.

(5) The department shall coordinate general permit and minor project categories under this part and parts 301 and 325 and may develop and maintain new general permit and minor project categories consistent with

nationwide permits, as appropriate. The department may alter the scope of the activities covered under general permit and minor project categories corresponding to nationwide permits if any adverse environmental effects will be minimal.

(6) The department shall develop by October 1, 2013 and maintain a general permit for alteration of wetland for blueberry farming that includes minimal drainage and earth moving if all of the following requirements are met:

(a) The wetland will be restored when farming activities in the wetland cease.

(b) The farmed wetland is placed under conservation easement protection until the wetland is restored when farming activities cease.

(c) Activities that convert the wetland to a nonwetland are prohibited.

(d) Roads, ditches, reservoirs, pump houses, and secondary support facilities for shipping, storage, packaging, parking, and similar purposes are prohibited unless authorized under section 30305.

(7) By December 31, 2013, the department shall propose new general permits or minor project categories for conversion of wetland to blueberry farming or other agriculture that includes more than minimal drainage or earth moving.

324.30312f Voluntary wetland restoration program; permit applications; exceptions; eligible applicants; review and approval process; joint agency restoration committee; qualified activities; applicability to former wetlands.

Sec. 30312f. (1) The legislature finds that voluntary restoration of altered or degraded wetland or former wetland by qualified agencies and organizations helps to restore lost wetland functions and services, and is therefore valuable to the people of this state. Accordingly, the department shall develop a program to facilitate voluntary wetland restoration projects in coordination with state, federal, tribal, and nongovernmental agencies and organizations specializing in wetland restoration and conservation. The program shall include, but not be limited to, enhancing coordination, consistency, and operational procedures and improving and streamlining the permitting process, to facilitate a net increase in wetland functions and services. The department shall convene these agencies and organizations at least quarterly to review the program, suggest and develop improvements, and provide training and guidance in voluntary wetland restoration.

(2) The department and the department of natural resources shall develop and lead a voluntary wetland restoration group to simplify and streamline the permit process for voluntary wetland restoration projects with the intent of giving greater credence and flexibility to agencies and organizations specializing in wetland restoration and conservation. The voluntary wetland restoration group shall consist of designated staff from the department and the department of natural resources, working in collaboration on the review of permit applications. The group shall, after seeking input from agencies and organizations specializing in wetland restoration and conservation, develop voluntary wetland restoration permit applications and guidelines to implement a voluntary wetland restoration permit program consistent with this section.

(3) A permit is not required for voluntary wetland restoration activities that meet any of the following:

(a) The section 30305(2)(f) exemption for maintenance or operation of serviceable structures. Operation of serviceable structures as used in section 30305(2)(f) includes management of water levels using serviceable structures.

(b) The section 30305(2)(n) exemption for operation or maintenance of serviceable dikes and levees.

(4) There is no fee for a preapplication meeting under section 30306b with the voluntary wetland restoration group for a voluntary wetland restoration project conducted with a person described in subsection (5). The purpose of such a preapplication meeting is an outcome-based assessment of a project made by evaluating overall net increases in wetland functions and services and acreage. Such a preapplication meeting may include, but is not limited to, any of the following:

(a) Presentation of project outcomes related to net increases in wetland functions and services and project purposes and justifications.

(b) Suggestions that will minimize permitting delays, including information needed for permit application review.

(c) Options for maximizing net increases in wetland functions and services while minimizing other impacts.

(d) Coordination with the United States Environmental Protection Agency, United States Army Corps of Engineers, and United States Fish and Wildlife Service, if applicable.

(5) Any of the following persons may apply for a permit under this part, including authorization to proceed under a general permit, for a voluntary wetland restoration project:

(a) A state or federal agency, including the department of natural resources, the United States Fish and Wildlife Service, the United States Forest Service, or the United States Department of Agriculture, Natural Resources Conservation Service.

(b) A tribal agency.

(c) A nongovernmental organization whose stated primary mission, purpose, or programs include wetland conservation.

(d) A person that is in partnership through a written agreement with an entity described in subdivision (a), (b), or (c).

(6) Voluntary wetland restoration applications shall be processed subject to all of the following:

(a) Not more than 30 days after submission of an application for a permit for a voluntary wetland restoration project, the voluntary wetland restoration group shall review the application and do 1 of the following:

(*i*) Notify the applicant of the status of the application.

(*ii*) Recommend issuance of a permit to the department.

(*iii*) If the application is not administratively complete, request additional information from the applicant to

make the application administratively complete as provided in part 13.

(b) If the department has not made a permit decision within 60 days after an application for a permit is considered administratively complete, at the request of the applicant, any conflict shall be mediated by the joint agency restoration committee created under subsection (9).

(c) The department, voluntary wetland restoration group, and the joint agency restoration committee shall expedite permit review for voluntary wetland restoration projects to the extent possible.

(d) Except for sections 1313 to 1317, part 13 applies to a voluntary wetland restoration permit application. Applicable time periods under part 13 and this section run concurrently.

(7) In reviewing a permit application for a voluntary wetland restoration project, the voluntary wetland restoration group shall evaluate the net increase in wetland functions and services from the project. An applicant shall provide justification for the asserted net increase in wetland functions and services based on federal or state agency programmatic authority, published research, case studies, ecological reference, demonstration projects, or federal, regional, or statewide wetland or wildlife restoration and management plans.

(8) The department shall issue a permit for a voluntary wetland restoration project if the project contributes to a net increase in wetland functions and services and meets the requirements of this part and section 404 of title IV of the federal water pollution control act, 33 USC 1344.

(9) The department shall create a joint agency restoration committee comprised of the directors or their designees of the department, the department of natural resources, and the office of the Great Lakes to mediate permit conflicts regarding voluntary wetland restoration projects and make a recommendation to the department. The department shall give serious consideration to recommendations of the joint agency restoration committee in its permit decision. The applicant may further request review under the administrative procedures act of 1969, 1969 PA 306, MCL 24.201 to 24.328.

(10) The department shall not require compensatory mitigation for voluntary wetland restoration project activities that result in a net increase in wetland functions and services.

(11) The department, in cooperation with the department of natural resources and voluntary wetland restoration agencies and organizations, shall develop new or modified general permit or minor project categories for voluntary wetland restoration projects that address the scope and intent of this section.

(12) A voluntary wetland restoration project may include, but is not limited to, any of the following activities in altered or degraded wetland or previously restored wetland if the activity results in a net increase in wetland functions and services:

(a) The removal of accumulated sediments.

(b) The installation, removal, and maintenance of water control structures, dikes, and berms; as well as discharges of dredged or fill material to restore appropriate grade configuration after water control structures, dikes, and berms are removed.

(c) The installation of water supply devices.

(d) The removal of existing drainage structures, such as drain tiles, and the filling, blocking, grading, or reshaping of drainage ditches to restore wetland hydrology.

(e) The installation of structures or fills necessary to restore or enhance wetland hydrology.

(f) The construction of open water areas.

(g) Activities needed to establish or reestablish native vegetation, including plowing or disking for seedbed preparation and the planting of appropriate species.

(h) The reestablishment of submerged aquatic vegetation.

(i) Mechanized land clearing or other activities to remove nonnative or invasive vegetation.

(j) The installation of nesting structures and islands, micro and macro topography reestablishment, dredging, soil manipulation, controlling, disking, and other activities related to a specific wetland habitat or species conservation practices.

(k) The installation and removal of temporary coffer dams, soil mats, and other devices used during voluntary wetland restoration construction activities.

(*l*) Construction of ancillary facilities that increase recreational access, such as a parking lot or boat ramp. However, such ancillary facilities and their use, alone, do not constitute an increase in wetland functions and services.

(13) All of the following apply to a voluntary wetland restoration project:

(a) A change in wetland plant communities that occurs when wetland hydrology is more fully restored during voluntary wetland restoration activities is not considered a conversion to another aquatic habitat type.

(b) The placement of fill in an area of altered or degraded wetland is not considered a loss of wetland if that area continues to sustain the characteristics of wetland as described in section 30301(1)(m).

(c) Voluntary wetland restoration projects or activities are not considered a major discharge as defined in

the memorandum of agreement between the United States Environmental Protection Agency and the department under section 404 of title IV of the federal water pollution control act, 33 USC 1344, upon approval by the United States Environmental Protection Agency of an amendment to the memorandum so providing.

(14) Former wetland is not regulated under this part unless the wetland was modified in violation of this part or former 1979 PA 203.

324.30313 Grounds for revocation or modification of general permit; grounds for termination or modification for cause of general permit.

Sec. 30313. (1) A general permit may be revoked or modified if, after opportunity for a public hearing or a contested case hearing under the administrative procedures act of 1969, Act No. 306 of the Public Acts of 1969, being sections 24.201 to 24.328 of the Michigan Compiled Laws, the department determines that the activities authorized by the general permit have an adverse impact on the environment or the activities would be more appropriately authorized by an individual permit.

(2) A permit may be terminated or modified for cause, including:

(a) A violation of a condition of the permit.

(b) Obtaining a permit by misrepresentation or failure to fully disclose relevant facts.

(c) A change in a condition that requires a temporary or permanent change in the activity.

324.30313b Minor permit revisions.

Sec. 30313b. (1) The department may make minor revisions in a permit issued under this part if all of the following apply:

(a) The project is in compliance with the permit and this part.

(b) The minor revisions are requested by the permittee in writing.

(c) The request is accompanied by a fee of $250.00.

(d) If the request is for a transfer of the permit, the request is accompanied by a written agreement between the current and new owners or operators containing a specific date for transfer of responsibility, coverage, and liability under the permit.

(2) The department shall approve or deny the request within 20 business days. However, if the only minor revision requested is a transfer under subsection (4)(a), the department shall approve or deny the request within 10 business days. If the department fails to approve or deny the request within the time required by this subsection, the department shall refund the fee.

(3) If the department determines that none of the changes requested are minor revisions, the department shall retain the fee but the permittee may apply the fee toward a new permit for a project at that site.

(4) As used in this section, "minor revision" means either of the following with respect to a permit issued under this part:

(a) A transfer.

(b) A revision that does not increase the overall impact of a project on wetlands and that is within the scope

of the project as described in the original permit.

324.30316 Civil action; commencement; request; venue; jurisdiction; violations; civil fines and penalties; restoration of wetland; award of attorney fees.

Sec. 30316. (1) The attorney general may commence a civil action for appropriate relief, including

injunctive relief upon request of the department under section 30315(1). An action under this subsection may be brought in the circuit court for the county of Ingham or for a county in which the defendant is located, resides, or is doing business. The court has jurisdiction to restrain the violation and to require compliance with this part. In addition to any other relief granted under this section, the court may impose a civil fine of not more than $10,000.00 per day of violation. A person who violates an order of the court is subject to a civil fine not to exceed $10,000.00 for each day of violation.

(2) A person who violates this part is guilty of a misdemeanor punishable by a fine of not more than $2,500.00.

(3) A person who willfully or recklessly violates a condition or limitation in a permit issued by the department under this part, or a corporate officer who has knowledge of or is responsible for a violation, is guilty of a misdemeanor punishable by a fine of not less than $2,500.00 or more than $25,000.00 per day of violation or by imprisonment for not more than 1 year, or both. A person who commits a violation described in this section a second or subsequent time is guilty of a felony punishable by a fine of not more than $50,000.00 for each day of violation or by imprisonment for not more than 2 years, or both.

(4) In addition to the civil fines and penalties provided under subsections (1), (2), and (3), the court may order a person who violates this part to restore as nearly as possible the wetland that was affected by the violation to its original condition immediately before the violation. The restoration may include the removal of fill material deposited in the wetland or the replacement of soil, sand, or minerals.

(5) The award of attorney fees in a civil action under this part is subject to applicable provisions of chapter 24 of the revised judicature act of 1961, 1961 PA 235, MCL 600.2401 to 600.2461. However, regardless of whether this state's position was substantially justifiable, reasonable expert professional witness fees, as determined by the court, shall be awarded to a landowner that prevails against this state on the issue of whether the landowner's property is wetland.

324.30317 Disposition of fees and civil fines; expenditures; report.

Sec. 30317. (1) The civil fines collected under this part shall be forwarded to the state treasurer for deposit in the general fund of the state. The fees collected under this part shall be deposited in the land and water management permit fee fund created in section 30113.

(2) Subsection (1) does not apply to fines or fees collected under an ordinance adopted under section 30307(4).

(3) Subject to section 30113, the department shall expend money from the land and water management permit fee fund, upon appropriation, to support guidance for property owners and applicants, permit processing, compliance inspections, and enforcement activities under this part. Not more than 90 days after the end of each state fiscal year, the department shall prepare a report describing how money from the land and water management permit fee fund was expended during that fiscal year and shall submit the report to the standing committees of the house of representatives and the senate that primarily address issues pertaining to the protection of natural resources and the environment, and the appropriations committees in the house of representatives and the senate. Other than civil fines and costs, the disposition of which is governed by section 8379 of the revised judicature act of 1961, 1961 PA 236, MCL 600.8379, or criminal fines, funds collected by a local unit of government under an ordinance authorized under section 30307(4) shall be deposited in the general fund of the local unit of government.

324.30319 Rules; hearing; award of costs; judicial review; proceedings to protect wetland owner's rights.

Sec. 30319. (1) The department shall promulgate and enforce rules to implement this part.

(2) If a person is aggrieved by any action or inaction of the department, the person may request a formal hearing on the matter involved. The hearing shall be conducted by the department pursuant to the administrative procedures act of 1969, 1969 PA 306, MCL 24.201 to 24.328.

(3) The award of costs in a contested case under this part and the administrative procedures act of 1969, 1969 PA 306, MCL 24.201 to 24.328, is subject to chapter 8 of the administrative procedures act of 1969, 1969 PA 306, MCL 24.321 to 24.328. However, regardless of whether the department's position was substantially justifiable, reasonable expert professional witness fees, as determined by the presiding officer, shall be awarded to a landowner that prevails on the issue of whether the landowner's property is wetland.

(4) A determination, action, or inaction by the department following the hearing is subject to judicial review as provided in the administrative procedures act of 1969, 1969 PA 306, MCL 24.201 to 24.328.

(5) This section does not limit the right of a wetland owner to institute proceedings in any circuit of the circuit court of the state against any person if necessary to protect the wetland owner's rights.

324.30321 Basis and filing of preliminary inventory of wetland; assessment of property; report; determination; agricultural drain; culvert, ditch, or channel; assessment; fee; providing copy of delineation forms.

Sec. 30321. (1) The department shall make or cause to be made a preliminary inventory of all wetland in this state on a county by county basis and file the inventory with the agricultural extension office, register of deeds, and county clerk.

(2) A person who owns or leases a parcel of property may request that the department of environmental quality assess whether the parcel of property or a portion of the parcel is wetland. The request shall satisfy all of the following requirements:

(a) Be made on a form provided by the department.

(b) Be signed by the person who owns or leases the property.

(c) Contain a legal description of the parcel and, if only a portion of the parcel is to be assessed, a description of the portion to be assessed.

(d) Include a map showing the location of the parcel.

(e) Grant the department or its agent permission to enter on the parcel for the purpose of conducting the assessment.

(3) The department shall assess the parcel within a reasonable time after the request is made. The department may enter upon the parcel to conduct the assessment. Upon completion of the assessment, the department shall provide the person with a written assessment report. The assessment report shall do all of the following:

(a) Identify in detail the location of any wetland in the area assessed.

(b) If wetland is present in the area assessed, describe the types of activities that require a permit under this part.

(c) If the assessment report determines that the area assessed or part of the area assessed is not wetland, state that the department lacks jurisdiction under this part as to the area that the report determines is not wetland and that this determination is binding on the department for 3 years from the date of the assessment.

(d) Contain the date of the assessment.

(e) Advise that the person may request the department to reassess the parcel or any part of the parcel that the person believes was erroneously determined to be wetland if the request is accompanied by evidence pertaining to wetland vegetation, soils, or hydrology that is different from or in addition to the information relied upon by the department.

(f) Advise that the assessment report does not constitute a determination of wetland that may be regulated under local ordinance or wetland areas that may be regulated under federal law and advise how a determination of wetland areas regulated under federal law may be obtained.

(g) List regulatory programs that may limit land use activities on the parcel, advise that the list is not exhaustive, and advise that the assessment report does not constitute a determination of jurisdiction under those programs. The regulatory programs listed shall be those under the following parts:

(*i*) Part 31, with respect to floodplains and floodways.

(*ii*) Part 91.

(*iii*) Part 301.

(*iv*) Part 323.

(*v*) Part 325.

(*vi*) Part 353.

(4) A wetland is not contiguous to the Great Lakes or Lake St. Clair, an inland lake or pond, or a river or stream if the department determines that there is no direct physical contact and no surface water or interflowing groundwater connection to such a body of water.

(5) A person may request that, as part of an assessment, the department make a determination whether a wetland is contiguous to the Great Lakes, Lake St. Clair, an inland lake or pond, or a stream. The department shall make the determination in writing within 30 days after an on-site evaluation. As used in this subsection, "pond" does not include a farm or stock pond constructed consistent with the exemption under section 30305(2)(g).

(6) The department shall not consider an agricultural drain, as defined in section 30305, in determining whether a wetland is contiguous to the Great Lakes or Lake St. Clair, an inland lake or pond, or a river or stream.

(7) A drainage structure such as a culvert, ditch, or channel, in and of itself, is not a wetland. A temporary obstruction of drainage, in and of itself, is not a wetland until the presence of water is of sufficient frequency and duration to be identified as wetland pursuant to section 30301(4).

(8) A person may request the department to reassess any area assessed under subsections (2) and (3) that the person believes the department erroneously determined to be wetland. The requirements of subsections (2) and (3) apply to the request, assessment, and assessment report. However, the request shall be accompanied by evidence pertaining to wetland vegetation, soils, or hydrology that is different from or in addition to the information relied upon by the department. The assessment report shall not contain the information required by subsection (3)(e).

(9) If an assessment report determines that the area assessed or part of the area assessed is not a wetland regulated by the department under this part, then the area determined by the assessment report not to be a wetland is not a wetland regulated by the department under this part for a period of 3 years after the date of the assessment.

(10) The department may charge a fee for an assessment requested under subsection (2) based upon the cost to the department of conducting an assessment.

(11) There shall be no fee for an assessment under the blueberry production assistance program.

(12) The department shall, upon request of the applicant and without charge, provide to the applicant a copy of any delineation forms completed by the department associated with a permit application.

324.30323 Legal rights or authority not abrogated; action to determine if property taken without just compensation; court order; limitation on value of property.

Sec. 30323. (1) This part shall not be construed to abrogate rights or authority otherwise provided by law.

(2) For the purposes of determining if there has been a taking of property without just compensation under state law, an owner of property who has sought and been denied a permit from the state or from a local unit of government that adopts an ordinance pursuant to section 30307(4), who has been made subject to modifications or conditions in the permit under this part, or who has been made subject to the action or inaction of the department pursuant to this part or the action or inaction of a local unit of government that adopts an ordinance pursuant to section 30307(4) may file an action in a court of competent jurisdiction.

(3) If the court determines that an action of the department or a local unit of government pursuant to this part or an ordinance authorized pursuant to section 30307(4) constitutes a taking of the property of a person, then the court shall order the department or the local unit of government, at the department's or the local unit of government's option, as applicable, to do 1 or more of the following:

(a) Compensate the property owner for the full amount of the lost value.

(b) Purchase the property in the public interest as determined before its value was affected by this part or the local ordinance authorized under section 30307(4) or the action or inaction of the department pursuant to this part or the local unit of government pursuant to its ordinance.

(c) Modify its action or inaction with respect to the property so as to minimize the detrimental affect to the property's value.

(4) For the purposes of this section, the value of the property may not exceed that share of the state equalized valuation of the total parcel that the area in dispute occupies of the total parcel of land, multiplied by 2, as determined by an inspection of the most recent assessment roll of the township or city in which the parcel is located.

PART 305
NATURAL RIVERS

324.30501 Definitions.

Sec. 30501. As used in this part:

(a) "Free flowing" means existing or flowing in natural condition without impoundment, diversion, straightening, riprapping, or other modification.

(b) "Natural river" means a river that has been designated by the department for inclusion in the wild, scenic, and recreational rivers system.

(c) "River" means a flowing body of water or a portion or tributary of a flowing body of water, including streams, creeks, or impoundments and small lakes thereon.

(d) "System" means all of those rivers or portions of rivers designated under this part.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30502 Natural river; designation; purpose; long-range plans; publicity; cooperation.

Sec. 30502. The department, in the interest of the people of the state and future generations, may designate a river or portion of a river as a natural river area for the purpose of preserving and enhancing its values for water conservation, its free flowing condition, and its fish, wildlife, boating, scenic, aesthetic, floodplain, ecologic, historic, and recreational values and uses. The area shall include adjoining or related lands as appropriate to the purposes of the designation. The department shall prepare and adopt a long-range comprehensive plan for a designated natural river area that sets forth the purposes of the designation, proposed uses of lands and waters, and management measures designed to accomplish the purposes. State land within the designated area shall be administered and managed in accordance with the plan, and state management of fisheries, streams, waters, wildlife, and boating shall take cognizance of the plan. The department shall publicize and inform private and public landowners or agencies as to the plan and its purposes, so as to encourage their cooperation in the management and use of their land in a manner consistent with the plan and the purposes of the designation. The department shall cooperate with federal agencies administering any federal program concerning natural river areas, and with any watershed council established under part 311, when such cooperation furthers the interest of the state.

324.30506 Public hearings; notice.

Sec. 30506. Before designating a river as a natural river area, the department shall conduct public hearings in the county seat of any county in which a portion of the designated natural river area is located. Notices of the hearings shall be advertised at least twice, not less than 30 days before the hearing, in a newspaper having general circulation in each such county and in at least 1 newspaper having general circulation in the state and 1 newspaper published in the Upper Peninsula.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30507 Land uses; zoning; local ordinances; state rule.

Sec. 30507. After designation of a river or portion of a river as a natural river area and following the preparation of the long-range comprehensive plan, the department may determine that the uses of land along the river, except within the limits of an incorporated municipality, shall be controlled by zoning contributing to accomplishment of the purposes of this part and the natural river plan. County and township governments are encouraged to establish these zoning controls and additional controls as may be appropriate, including, but not limited to, building and subdivision controls. The department may provide advisory, planning, and cooperative assistance in the drafting of ordinances to establish these controls. If the local unit does not, within 1 year after notice from the department, have in full force and effect a zoning ordinance or interim zoning ordinance established under authority of the acts cited in section 30510, the department, on its own motion, may promulgate a zoning rule in accordance with section 30512. A zoning rule may also be promulgated if the department finds that an adopted or existing zoning ordinance fails to meet adequately

guidelines consistent with this part as provided by the department and transmitted to the local units concerned, does not take full cognizance of the purposes and objectives of this part, or is not in accord with the purposes of designation of the river as established by the department.

Popular name: Act 451

Popular name: NREPA

324.30509 Zoning ordinance or rule; establishment of districts; powers; distance.

Sec. 30509. The ordinance or rule shall establish zoning districts within which such uses of land as for agriculture, forestry, recreation, residence, industry, commerce, and additional uses may be encouraged, regulated, or prohibited. It may limit or prohibit the placement of structures of any class or designate their location with relation to the water's edge, to property or subdivision lines, and to flood flows and may limit the subdivision of lands for platting purposes. It may control the location and design of highways and roads and of public utility transmission and distribution lines, except on lands or other interests in real property owned by the utility on January 1, 1971. It may prohibit or limit the cutting of trees or other vegetation, but such limits shall not apply for a distance of more than 100 feet from the river's edge. It may specifically prohibit or limit mining and drilling for oil and gas, but such limits shall not apply for a distance of more than 300 feet from the river's edge. It may contain other provisions necessary to accomplish the objectives of this part. A zoning rule promulgated by the department shall not control lands more than 400 feet from the river's edge.

324.30512 Rules; enforcement; promulgation; variance; existing use.

Sec. 30512. (1) The department shall prescribe administrative procedures and rules and provide personnel as it considers necessary for the enforcement of a zoning ordinance or rule enacted in accordance with this part. A circuit court, upon petition and a showing by the department that there exists a violation of a rule properly promulgated under this part, shall issue any necessary order to the defendant to correct the violation or to restrain the defendant from further violation of the rule.

(2) The department shall promulgate a zoning rule to implement this part. The rule shall include procedures for receiving and acting upon applications from local units of government or landowners for change of boundaries or change in permitted uses in accordance with chapter 4 of the administrative procedures act of 1969, 1969 PA 306, MCL 24.271 to 24.287. An aggrieved party may seek judicial review under chapter 6 of the administrative procedures act of 1969, 1969 PA 306, MCL 24.301 to 24.306.

(3) A variance from a zoning rule promulgated by the department to implement this part may be applied for and granted pursuant to section 4 of the uniform condemnation procedures act, 1980 PA 87, MCL 213.54, and the variance provisions of the zoning rule.

(4) The lawful use of any building or structure and of any land or premise as existing and lawful at the time of enactment of a zoning ordinance or rule or of an amendment of a zoning ordinance or rule may be continued although the use does not conform with the ordinance, rule, or amendment. The ordinance or rule shall provide for the completion, restoration, reconstruction, extension, or substitution of nonconforming uses upon reasonable terms as set forth in the zoning ordinance or rule.

Popular name: Act 451

Popular name: NREPA

324.30514 Area plans; approval; rules.

Sec. 30514. The department shall approve preliminary and final plans for site or route location, construction, or enlargement of utility transmission lines, publicly provided recreation facilities, access sites, highways, roads, bridges, or other structures and for publicly developed water management projects, within a designated natural river area, except within the limits of a city or incorporated village. The department may require any measure necessary to control damaging erosion or flow alteration during or in consequence of construction. The department shall promulgate rules concerning the approvals and requirements provided for in this section.

PART 307
INLAND LAKE LEVELS

****** 324.30701 THIS SECTION IS AMENDED EFFECTIVE 91 DAYS AFTER ADJOURNMENT OF THE 2024 REGULAR SESSION SINE DIE: See 324.30701.amended ******

324.30701 Definitions.

Sec. 30701. As used in this part:

(a) "Commissioner" means the county drain commissioner or the county road commission in counties not having a drain commissioner, and, if more than 1 county is involved, each of the drain commissioners or drain commissioner and road commission in counties having no drain commissioner.

(b) "County board" means the county board of commissioners, and if more than 1 county is involved, the boards of commissioners of each of those counties.

(c) "Court" means a circuit court, and if more than 1 judicial circuit is involved, the circuit court designated by the county board or otherwise authorized by law to preside over an action.

(d) "Dam" means an artificial barrier, structure, or facility, and appurtenant works, used to regulate or maintain the level of an inland lake.

(e) "Delegated authority" means the county drain commissioner or any other person designated by the county board to perform duties required under this part.

(f) "Inland lake" means a natural or artificial lake, pond, impoundment, or a part of 1 of those bodies of water. Inland lake does not include the Great Lakes or Lake St. Clair.

(g) "Interested person" means the department and a person who has a record interest in the title to, right of ingress to, or reversionary right to land that would be affected by a permanent change in the natural or normal level of an inland lake.

(h) "Normal level" means the level or levels of the water of an inland lake that provide the most benefit to the public; that best protect the public health, safety, and welfare; that best preserve the natural resources of the state; and that best preserve and protect the value of property around the lake. A normal level shall be measured and described as an elevation based on national geodetic vertical datum.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Land and Water Management Division, with the exception of the farmland and open space preservation program, natural rivers program, and Michigan information resource inventory system, to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

Popular name: Act 451

Popular name: NREPA

****** 324.30701.amended THIS AMENDED SECTION IS EFFECTIVE 91 DAYS AFTER ADJOURNMENT OF THE 2024 REGULAR SESSION SINE DIE ******

324.30701.amended Definitions.

Sec. 30701. As used in this part:

(a) "Commissioner" means the county drain commissioner, or the board of county road commissioners in counties not having a drain commissioner. However, if more than 1 county is involved, commissioner means the drain commissioner or board of county road commissioners, as applicable, for each county.

(b) "County board" means the county board of commissioners. However, if more than 1 county is involved, county board means the county board of commissioners of each of those counties.

(c) "Court" means a circuit court. However, if more than 1 judicial circuit is involved, court means the circuit court designated by the county board or otherwise authorized by law to preside over an action.

(d) "Dam" means an artificial barrier, structure, or facility, and appurtenant works, used to regulate or maintain the level of an inland lake.

(e) "Delegated authority" means the county drain commissioner or any other person designated by the county board to perform duties required under this part.

(f) "Department" means the department of environment, Great Lakes, and energy.

(g) "Inland lake" means a natural or artificial lake, pond, impoundment, or a part of 1 of those bodies of water. Inland lake does not include the Great Lakes or Lake St. Clair.

(h) "Interested person" means the department and a person who has a record interest in the title to, a right of ingress to, or a reversionary right to land that would be affected by a permanent change in the natural or normal level of an inland lake.

(i) "Normal level" means the target level or levels of the water of an inland lake, around which actual levels may fluctuate, that provide the most benefit to the public; that best protect the public health, safety, and welfare; that best preserve the natural resources of this state; and that best preserve and protect the value of property around the inland lake. A normal level shall be measured and described as an elevation or elevations based on a geodetic vertical datum including ranges based on tolerance, operational or weather conditions, seasonality, or other similar natural and regional considerations. An inland lake shall be considered to be maintained at its normal level during temporary water level fluctuations resulting from weather or natural events, during construction activities authorized by the department, or if a county or its delegated authority

operates lake level infrastructure in a manner that may affect water levels but is reasonably intended to maintain a normal level. The application of this definition includes, but is not limited to, all normal levels established before the effective date of the amendatory act of the 2023-2024 legislative session that amended this section.

(j) "Normal level project" means a project to establish or maintain a normal level.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 2024, Act 112, Eff. (sine die).

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Land and Water Management Division, with the exception of the farmland and open space preservation program, natural rivers program, and Michigan information resource inventory system, to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

Popular name: Act 451

Popular name: NREPA

324.30702 Determination of normal inland lake level; motion or petition to initiate action; delegation of powers and duties by county board; maintenance.

Sec. 30702. (1) The county board of a county in which an inland lake is located may upon the board's own motion, or shall within 45 days following receipt of a petition to the board of 2/3 of the owners of lands abutting the inland lake, initiate action to take the necessary steps to cause to be determined the normal level of the inland lake.

(2) Unless required to act by resolution as provided in this part, the county board may delegate powers and duties under this part to that county's commissioner, road commission, or other delegated authority.

(3) If a court-determined normal level is established pursuant to this part, the delegated authority of the county or counties in which the lake is located shall maintain that normal level.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Land and Water Management Division, with the exception of the farmland and open space preservation program, natural rivers program, and Michigan information resource inventory system, to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

Popular name: Act 451

Popular name: NREPA

324.30703 Preliminary study; costs; contents of study.

Sec. 30703. (1) Before proceeding on a motion made or a petition filed under section 30702, the county board may require that a preliminary study be conducted by a licensed professional engineer. The county board, by resolution, may require a cash payment from the petitioners sufficient to cover the actual preliminary study costs or of $10,000.00, whichever is less.

(2) A preliminary study shall include all of the following:

(a) The feasibility of a project to establish and maintain a normal level of the inland lake.

(b) The expediency of the normal level project.

(c) Feasible and prudent alternative methods and designs for controlling the normal level.

(d) The estimated costs of construction and maintenance of the normal level project.

(e) A method of financing initial costs.

(f) The necessity of a special assessment district and the tentative boundaries if a district is necessary.

(g) Other information that the county board resolves is necessary.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30704 Initiating proceeding for determining normal inland lake level and establishing special assessment district; required finding; multicounty lake; joinder permitted.

Sec. 30704. (1) If the county board, based on the preliminary study, finds it expedient to have and resolves to have determined and established the normal level of an inland lake, the county board shall direct the prosecuting attorney or other legal counsel of the county to initiate a proceeding by proper petition in the court of that county for determination of the normal level for that inland lake and for establishing a special assessment district if the county board determines by resolution that one is necessary as provided in section 30711.

(2) If the waters of an inland lake are located in 2 or more counties, the normal level of the lake may be determined in the same manner if the county boards of all counties involved, by resolution, direct the

prosecuting attorney or other legal counsel of 1 or more of the counties to institute proceedings. All counties may make a single preliminary study.

(3) The department may join a proceeding initiated under this section.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30705 Special assessment bonds or notes; lake level orders; proceedings; full faith and credit.

Sec. 30705. (1) A special assessment district provided for in section 30704 may issue any of the following in anticipation of the collection of special assessments:

(a) Bonds or notes, subject to section 30716.

(b) Lake level orders.

(2) Bonds or notes issued under subsection (1) shall have a final maturity date not more than 40 years after the date of original issuance.

(3) All proceedings relating to the making, levying, and collection of special assessments authorized by this part and the issuance of bonds, notes, or lake level orders in anticipation of the collection of the special assessments shall conform as nearly as possible to the proceedings for levying special assessments and issuing special assessment bonds as set forth in the drain code of 1956, 1956 PA 40, MCL 280.1 to 280.630.

(4) A county board by a vote of 2/3 of its members may pledge the full faith and credit of the county for payment of bonds or notes issued by a special assessment district under subsection (1).

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 2002, Act 215, Imd. Eff. Apr. 29, 2002;—Am. 2020, Act 221, Imd. Eff. Oct. 16, 2020.

Popular name: Act 451

Popular name: NREPA

324.30706 Initiation of proceedings by director of department.

Sec. 30706. If the department finds it expedient to have the normal level of an inland lake determined, the department may initiate by civil action on behalf of the state, in the court of any county in which the lake is located, a proceeding for determination of the normal level.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30707 Hearing; notice; service; powers and duties of court.

Sec. 30707. (1) Upon filing of a civil action under this part, the court shall set a day for a hearing. The prosecuting attorney or other legal counsel of the county or counties or the department shall give notice of the hearing by publication in 1 or more newspapers of general circulation in the county and, if the waters of the inland lake are situated in 2 or more counties, in 1 or more newspapers of general circulation in each of the counties in which the inland lake is located. The notice shall be published at least once each week for 3 successive weeks before the date set for the hearing.

(2) The commissioner shall serve a copy of the published notice of hearing by first-class mail at least 3 weeks prior to the date set for the hearing to each person whose name appears upon the latest city or township tax assessment roll as owning land within a tentative special assessment district at the address shown on the roll; to the governing body of each political subdivision of the state in which the lake is located; and to the governing body of each affected political subdivision of the state. If an address does not appear on the roll, then a notice need not be mailed to the person. The commissioner shall make an affidavit of mailing. The failure to receive a notice properly mailed shall not constitute a jurisdictional defect invalidating proceedings under this part.

(3) The prosecuting attorney or the legal counsel of the county shall serve notice on the department at least 21 days prior to the date of the hearing.

(4) In a determination of the normal level of an inland lake, the court shall consider all of the following:

(a) Past lake level records, including the ordinary high-water mark and seasonal fluctuations.

(b) The location of septic tanks, drain fields, sea walls, docks, and other pertinent physical features.

(c) Government surveys and reports.

(d) The hydrology of the watershed.

(e) Downstream flow requirements and impacts on downstream riparians.

(f) Fisheries and wildlife habitat protection and enhancement.

(g) Upstream drainage.
(h) Rights of riparians.
(i) Testimony and evidence offered by all interested persons.
(j) Other pertinent facts and circumstances.

(5) The court shall determine the normal level to be established and maintained, shall have continuing jurisdiction, and may provide for departure from the normal level as necessary to accomplish the purposes of this part. The court shall confirm the special assessment district boundaries within 60 days following the lake level determination. The court may determine that the normal level shall vary seasonally.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30708 Maintenance of normal level; acquisition by gift, grant, purchase, or condemnation; contract for operation and maintenance of existing dam; dam in adjoining county; operation of pumps and wells.

Sec. 30708. (1) After the court determines the normal level of an inland lake in a proceeding initiated by the county, the delegated authority of any county or counties in which the inland lake is located shall provide for and maintain that normal level.

(2) A county may acquire, in the name of the county, by gift, grant, purchase, or condemnation proceedings, an existing dam that may affect the normal level of the inland lake, sites for dams, or rights in land needed or convenient in order to implement this part. A county may enter into a contract for operation and maintenance of an existing dam. The county may construct and maintain a dam that is determined by the delegated authority to be necessary for the purpose of maintaining the normal level. A dam may be acquired, constructed, or maintained in a county adjoining the county in which the lake is located.

(3) For the purpose of maintaining the normal level, a delegated authority may drill wells or pump water from another source to supply an inland lake with additional water, may lower the level of the lake by pumping water from the lake, and may purchase power to operate pumps, wells, or other devices installed as part of a normal level project.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30709 Powers of department.

Sec. 30709. (1) After the court determines the normal level of an inland lake in a proceeding initiated by the department, the department may provide for and maintain that normal level.

(2) In a proceeding initiated by the department, the department has the same powers in connection with a normal level project as a county has under sections 30708, 30713, and 30718.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

324.30711 Defraying project costs by special assessment; special assessment roll; reassessment.

Sec. 30711. (1) The county board may determine by resolution that the whole or a part of the cost of a project to establish and maintain a normal level for an inland lake shall be defrayed by special assessments against the following that are benefited by the project: privately owned parcels of land, political subdivisions

of the state, and state owned lands under the jurisdiction and control of the department. If the county board determines that a special assessment district is to be established, the delegated authority shall compute the cost of the project and prepare a special assessment roll.

(2) If the revenues raised pursuant to the special assessment are insufficient to meet the computation of cost included in section 30712, or if these revenues are insufficient to meet bond obligations, the special assessment district may be reassessed without hearing using the same apportioned percentage used for the original assessment.

324.30712 Computation of project costs.

Sec. 30712. (1) Computation of the cost of a normal level project shall include the cost of all of the following:

(a) The preliminary study.

(b) Surveys.

(c) Establishing a special assessment district, including preparation of assessment rolls and levying assessments.

(d) Acquiring land and other property.

(e) Locating, constructing, operating, repairing, and maintaining a dam or works of improvement necessary for maintaining the normal level.

(f) Legal fees, including estimated costs of appeals if assessments are not upheld.

(g) Court costs.

(h) Interest on bonds and other financing costs for the first year, if the project is so financed.

(i) Any other costs necessary for the project which can be specifically itemized.

(2) The delegated authority may add as a cost not more than 15% of the sum calculated under subsection (1) to cover contingent expenses.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30713 Contract with agency or corporation; provisions.

Sec. 30713. The delegated authority of a county in which an inland lake is located may contract with a state or federal government agency or a public or private corporation in connection with a project for the establishment and maintenance of a normal level. The contract may specify that the agency or corporation will pay the whole or a part of the cost of the project or will perform the whole or a part of the work connected with the project. The contract may provide that payment made or work done relieves the agency or corporation in whole or in part from assessment for the cost of establishment and construction of the project.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

324.30714 Special assessment roll; public hearing; notice; approval; appeal.

Sec. 30714. (1) A special assessment roll shall describe the parcels of land to be assessed, the name of the owner of each parcel, if known, and the dollar amount of the assessment against each parcel.

(2) The delegated authority shall set a time and place for a public hearing or hearings on the project cost and the special assessment roll. Notice of a hearing shall be by both of the following:

(a) By publication of notice at least twice prior to the hearing in a newspaper that circulates in the special assessment district, the first publication to be at least 10 days before the hearing.

(b) As provided in Act No. 162 of the Public Acts of 1962, being sections 211.741 to 211.746 of the Michigan Compiled Laws.

(3) At or after a public hearing, the delegated authority may approve or revise the cost of the project or the special assessment roll. Before construction of a project is begun, the county board shall approve the cost and the special assessment roll by resolution.

(4) The special assessment roll with the assessments listed shall be final and conclusive unless appealed in a court within 15 days after county board approval.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30715 Assessment payments; installments; amount; interest, penalty, and collection; lien; preliminary study payment credited.

Sec. 30715. (1) The county board may provide that assessments under this part are payable in installments.

(2) Assessment payments shall be sufficient to meet bond and note obligations of the special assessment district.

(3) Special assessments under this part shall be spread upon the county tax rolls, and shall be subject to the same interest and penalty charges and shall be collected in the same manner as county taxes.

(4) From the date of approval of the special assessment roll by the county board, a special assessment under this part shall constitute a lien on the parcel assessed. The lien shall be of the same character and effect as a lien created for county taxes.

(5) A payment for the cost of the preliminary study under section 30703 shall be credited against an assessment for the amount of the payment made by the person assessed.

(a) Costs of easement and land acquisition.

(b) Engineering fees.

(c) Financing costs.

(d) Legal fees.

(e) Costs of a preliminary, feasibility, practicability, environmental assessment, or impact study.

(f) Any other permissible costs under this part.

(2) The special assessment district shall pay or provide reimbursement for the obligations under subsection (1), with or without interest as may be agreed, when funds are available. The obligation of the special assessment district under this subsection may be evidenced by a contract or note. The contract or note may pledge the full faith and credit of the special assessment district and may be made payable out of any of the following:

(a) Assessments made or to be made against public corporations at large or against lands in the special assessment district.

(b) The proceeds of lake level orders, notes, or bonds issued by the special assessment district pursuant to this act.

(c) Any other available funds.

(3) A contract or note described in subsection (2) is not subject to the revised municipal finance act, 2001 PA 34, MCL 141.2101 to 141.2821, unless the principal amount of the obligation is more than $600,000.00. However, if the principal amount of the obligation is $600,000.00 or less, the contract or note is subject to the agency financing reporting act, 2002 PA 470, MCL 129.171 to 129.177. Projects in which advances or loans are made by any public corporation, the federal government, or any agency of the federal government are not subject to either the revised municipal finance act, 2001 PA 34, MCL 141.2101 to 141.2821, or the agency financing reporting act, 2002 PA 470, MCL 129.171 to 129.177.

(4) The county board of commissioners by a majority vote of its members may pledge the full faith and credit of the county for the payment of a contract or note of the special assessment district.

(5) All notes previously issued under this section shall be considered to have been validly issued.

324.30718 Dam construction or maintenance; plans and specifications; approval by department; bids; work relief project.

Sec. 30718. Plans and specifications for a dam constructed or maintained under this part shall be prepared by a licensed professional engineer under the direction of the delegated authority. The plans and specifications shall be approved by the department before construction begins. The department shall review and approve or reject the plans and specifications within 30 days after they are received by the department. If the plans and specifications are rejected, the department shall propose changes in the plans and specifications that would result in their approval by the department. Bids for doing the work may be advertised in the manner the delegated authority directs. The contract shall be let to the lowest responsible bidder giving adequate security for the performance of the contract, but the delegated authority may reserve the right to reject any and all bids. The county may erect and maintain a dam as a work relief project in accordance with the law applicable to a work relief project.

324.30719 Dam construction; underspill device; fish ladder.

Sec. 30719. (1) The department may require that a new dam that is proposed to be constructed be equipped with an underspill device for the release of cold bottom waters for the protection of downstream fish habitats.

(2) The department may require the installation of a fish ladder or other device to permit the free passage of fish.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30720 Unauthorized change of level; penalty.

Sec. 30720. A person who is not authorized by a delegated authority or the department to operate a dam or other normal level control facility and who changes, or causes to change, the level of an inland lake, the normal level of which has been established under this part or any previous act governing lake levels, and for which the delegated authority or the department has taken steps to maintain the normal level, is guilty of a misdemeanor punishable by a fine of not more than $1,000.00 or imprisonment for not more than 1 year, or both, and shall be required to pay the actual cost of restoration or replacement of the dam and any other property including any natural resource that is damaged or destroyed as a result of the violation.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30721 Establishment of normal inland lake level prohibited in certain cases.

Sec. 30721. A normal level shall not be established for an inland lake in either of the following cases:

(a) The inland lake is used as a reservoir for a municipal water supply system, unless a normal level determination is petitioned for by the governing body of the municipality.

(b) The state has title, flowage rights, or easements to all riparian land surrounding the inland lake, unless a normal level determination is petitioned for by the department.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30722 Inspection; report; repairs; penalty; expenditure.

Sec. 30722. (1) The delegated authority of a county shall cause an inspection to be made of each dam on an inland lake within the county which has a normal level established under this part or under any previous act governing lake levels. The inspection shall be conducted by a licensed professional engineer. The inspection shall take place every third year from the date of completion of a new dam or every third year from the determination of a normal level for an existing dam. An inspection report shall be submitted promptly to the department in the form and manner the department prescribes.

(2) If a report discloses a need for repairs or a change in condition of the dam that relates to the dam's safety or danger to natural resources, the department shall conduct an inspection to confirm the report. If the report is confirmed and the public safety or natural resources are endangered by the risk of failure of the dam, the department may require the county either to repair or to replace the dam. Plans and specifications for the

repairs or replacement shall be prepared by a licensed professional engineer under the direction of the delegated authority. The plans and specifications shall be approved by the department before construction begins. The department shall review and approve or reject the plans and specifications within 30 days after they are received by the department. If the plans and specifications are rejected, the department shall propose changes in the plans and specifications that would result in their approval by the department. If the dam is in imminent danger of failure, the department may order an immediate lowering of the lake level until necessary repair or replacement is complete.

(3) A person failing to comply with this section, or falsely representing dam conditions, is guilty of misconduct in office.

(4) If an inspection discloses the necessity for maintenance or repair, the delegated authority, without approval of the county board, may spend not more than $10,000.00 annually for maintenance and repair of each lake level project. An expenditure of more than $10,000.00 annually shall be approved by resolution of the county board.

PART 309
INLAND LAKE IMPROVEMENTS

324.30901 Definitions.

Sec. 30901. As used in this part:

(a) "Benefit" or "benefits" means advantages resulting from a project to public corporations, the inhabitants of public corporations, the inhabitants of this state, and property within public corporations. Benefit includes benefits that result from elimination of pollution and elimination of flood damage, elimination of water conditions that jeopardize the public health or safety; increase of the value or use of lands and property arising from improving a lake or lakes as a result of the lake project and the improvement or development of a lake for conservation of fish and wildlife and the use, improvement, or development of a lake for fishing, wildlife, boating, swimming, or any other recreational, agricultural, or conservation uses.

(b) "Inland lake" means a public inland lake or a private inland lake.

(c) "Interested person" means a person who has a record interest in the title to, right of ingress to, or reversionary right to a piece or parcel of land that would be affected by a permanent change in the bottomland of a natural or artificial, public or private inland lake, or adjacent wetland. In all cases, whether having such an interest or not, the department is an interested person.

(d) "Local governing body" means the legislative body of a local unit of government.

(e) "Preliminary costs" includes costs of the engineering feasibility report, economic study, estimate of total cost, and cost of setting up the assessment district.

(f) "Private inland lake" means an inland lake other than a public inland lake.

(g) "Public inland lake" means a lake that is accessible to the public by publicly owned lands or highways contiguous to publicly owned lands or by the bed of a stream, except the Great Lakes and connecting waters.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30902 Petition for improvement of lake or wetland; local governing bodies' powers; lake boards.

Sec. 30902. (1) The local governing body of any local unit of government in which the whole or any part of the waters of any public inland lake is situated, upon its own motion or by petition of 2/3 of the freeholders owning lands abutting the lake, for the protection of the public health, welfare, and safety and the conservation of the natural resources of this state, or to preserve property values around a lake, may provide for the improvement of a lake, or adjacent wetland, and may take steps necessary to remove and properly dispose of undesirable accumulated materials from the bottom of the lake or wetland by dredging, ditching,

digging, or other related work.

(2) Upon receipt of the petition or upon its own motion, the local governing body within 60 days shall set up a lake board as provided in section 30903 that shall proceed with the necessary steps for improving the lake or to void the proposed project.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30903 Lake board; composition; election of chairperson, treasurer, and secretary; quorum; concurrence of majority required; technical data; recommendations.

Sec. 30903. (1) The lake board shall consist of all of the following:

(a) A member of the county board of commissioners appointed by the chairperson of the county board of commissioners of each county affected by the lake improvement project; 1 representative of each local unit of government, other than a county, affected by the project, or, if there is only 1 such local unit of government, 2 representatives of that local unit of government, appointed by the legislative body of the local unit of government; and the county drain commissioner or his or her designee, or a member of the county road commission in counties not having a drain commissioner.

(b) A member elected by the members of the lake board serving pursuant to subdivision (a) at the first meeting of the board or at any time a vacancy exists under this subdivision. Only a person who has an interest in a land contract or a record interest in the title to a piece or parcel of land that abuts the lake to be improved is eligible to be elected and to serve under this subdivision. An organization composed of and representing the majority of lakefront property owners on the affected lake may submit up to 3 names to the board, from which the board shall make its selection. The terms served by this member shall be 4 years in length.

(2) The lake board shall elect a chairperson, treasurer, and secretary. The secretary shall attend meetings of the lake board and shall keep a record of the proceedings and perform other duties delegated by the lake board. A majority of the members of the lake board constitutes a quorum. The concurrence of a majority in any matter within the duties of the board is required for the determination of a matter.

(3) The department, upon request of the lake board, shall provide whatever technical data it has available and make recommendations in the interests of conservation.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 2004, Act 522, Eff. Mar. 1, 2005.

324.30906 Institution of proceedings for lake improvement; conflicts with local ordinances and charters.

Sec. 30906. (1) Whenever a local governing body, in accordance with section 30902, considers it expedient to have a lake improved, it, by resolution, shall direct the lake board to institute proceedings as prescribed in this part.

(2) When the waters of any inland lake are situated in 2 or more local units of government, the improvement of the lake may be determined jointly in the same manner as provided in this part, if the local

governing bodies of all local units of government involved determine it to be expedient in accordance with section 30902 and, by resolution, direct the lake board to institute proceedings as prescribed in this part. Where local ordinances and charters conflict, this part shall govern.

Popular name: Act 451

Popular name: NREPA

324.30908 Lake board; determination of scope of project; establishment of special assessment districts; ministerial duties.

Sec. 30908. The lake board, when instructed by resolution of the local governing body, shall determine the scope of the project and shall establish a special assessment district, including within the special assessment district all parcels of land and local units which will be benefited by the improvement of the lake. The local governing body may delegate to the lake board other ministerial duties including preparation, assembling, and computation of statistical data for use by the board and the superintending, construction, and maintenance of any project under this part, as the local governing body considers necessary.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30909 Engineering and economic reports; cost estimates.

Sec. 30909. (1) The lake board shall retain a licensed professional engineer to prepare an engineering feasibility report, an economic study report, and an estimate of cost. The report shall include, when applicable, recommendations for normal lake levels and the methods for maintaining those levels.

(2) The engineering feasibility report shall include the methods proposed to implement the recommended improvements, such as dredging, removal, disposal, and disposal areas for undesirable materials from the lake. The report shall include an investigation of the groundwater conditions and possible effects on lake levels from removal of bottom materials. A study of existing nutrients and an estimate of possible future conditions shall be included. Estimate of costs of right-of-way shall be included.

(3) The estimate of cost prepared under subsection (1) shall show probable assessments for the project. The economic report shall analyze the existing local tax structure and the effects of the proposed assessments on the local units of government involved. A copy of the report shall be furnished to each member of the lake board.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30910 Review of reports by board; determinations of practicability; public hearings; notice; determination.

Sec. 30910. Within 60 days after his or her receipt of the reports, the chairperson shall hold a meeting of the lake board to review the reports required under section 30909 and to determine the practicability of the project. The hearing shall be public, and notice of the hearing shall be published twice in a newspaper of general circulation in each local unit of government to be affected. The first publication shall be not less than 20 days prior to the time of the hearing. The board shall determine the practicability of the project within 10 days after the hearing unless it is determined at the hearing that more information is needed before the determination can be made. Immediately upon receipt of the additional information, the board shall make its determination.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

324.30911 County contributions toward costs of improvement.

Sec. 30911. The county board of commissioners may provide up to 25% of the cost of a lake improvement project on any public inland lake.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30912 Approval of plans and cost estimates; sufficiency of petition; resolution; publication; assessment roll.

Sec. 30912. If the lake board passes a resolution in which it determines the project to be practicable, the lake board shall determine to proceed with the project, shall approve the plans and estimate of costs as originally presented or as revised, corrected, amended, or changed, and shall determine the sufficiency of the petition for the improvement. The resolution shall be published once in a newspaper of general circulation in each local unit of government to be affected. After the resolution has been published, the sufficiency of the petition shall not be subject to attack except in an action brought in a court of competent jurisdiction within 30 days after publication. The lake board, after finally accepting the special assessment district, shall prepare an assessment roll based upon the benefits to be derived from the proposed lake improvement, and the lake board shall direct the assessing official of each local unit of government to be affected to join in making an assessment roll in which shall be entered and described all the parcels of land to be assessed, with the names of the respective owners of the parcels of land, if known, and the total amount to be assessed against each parcel of land and against each local unit of government to be affected, which amount shall be such relative portion of the whole sum to be levied against all parcels of land and local units of government in the special assessment district as the benefit to such parcel of land and local unit of government bears to the total benefit to all parcels of land and local units of government in the special assessment district. When the assessment roll has been completed, each assessing official shall affix to the assessment roll his or her certificate stating that it was made pursuant to a resolution of the lake board adopted on a specified date, and that in making the assessment roll he or she has, according to his or her best judgment, conformed in all respects to the directions contained in the resolution and the statutes of the state.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30913 Report of assessment to lake board; review; notice and hearing; confirmation.

Sec. 30913. The assessment roll shall be reported to the lake board by the assessing official of the local unit or units of government initiating the proceeding and filed in the office of the clerk of each local unit of government to be affected. Before confirming the assessment roll, the lake board shall appoint a time and place when it will meet and review the assessment roll and hear any objections to the assessment roll, and shall publish notice of the hearing and the filing of the assessment roll twice prior to the hearing in a newspaper of general circulation in each local unit of government to be affected, the first publication to be at least 10 days before the hearing. Notice of the hearing shall also be given in accordance with Act No. 162 of the Public Acts of 1962, being sections 211.741 to 211.746 of the Michigan Compiled Laws. The hearing may be adjourned from time to time without further notice. Any person or local unit of government objecting to the assessment roll shall file his or her objection in writing with the chairperson before the close of the hearing or within such further time period as the lake board may grant. After the hearing, the lake board may confirm the special assessment roll as reported to it or as amended or corrected by it, may refer it back to the assessing officials for revision, or may annul it and direct a new roll to be made. When a special assessment roll has been confirmed, the clerk of each local unit of government shall endorse on the assessment roll the date of the confirmation. After confirmation, the special assessment roll and all assessments on the assessment roll shall be final and conclusive unless attacked in a court of competent jurisdiction within 30 days after notice of confirmation has been published in the same manner as the notice of hearing.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30914 Special assessments; installments; interest; penalties.

Sec. 30914. Upon the confirmation of the assessment roll, the lake board may provide that the assessments

be payable in 1 or more approximately equal annual installments, not exceeding 30. The amount of each installment, if more than 1, need not be extended upon the special assessment roll until after confirmation. The first installment of a special assessment shall be due on or before such time after confirmation as the board shall establish, and the several subsequent installments shall be due at intervals of 12 months from the due date of the first installment or from such other date as the board shall establish. All unpaid installments, prior to their transfer to the tax roll of each local unit of government involved, shall bear interest, payable annually on each installment due date, at a rate to be set by the board, not exceeding 6% per annum, from such date as established by the board. Future due installments of an assessment against a parcel of land may be paid to the treasurer of each local unit of government at any time in full, with interest accrued to the due date of the next installment. If any installment of a special assessment is not paid when due, then it shall be considered to be delinquent and there shall be collected on the installment, in addition to interest as above provided, a penalty at the rate of 1/2 of 1% for each month or fraction of a month that it remains unpaid before being reported to the township board for reassessment upon the tax roll.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30915 Special assessments; liens.

Sec. 30915. All special assessments contained in any special assessment roll, including any part of the special assessment payment that is deferred, constitute a lien, from the date of confirmation of the roll, upon the respective parcels of land assessed. The lien shall be of the same character and effect as the lien created for taxes in each local unit of government and shall include accrued interest and penalties. A judgment, decree, or any act of the board vacating a special assessment does not destroy or impair the lien upon the premises assessed for the amount of the assessment as may be equitably charged against the premises, or as by a regular mode of proceeding might be lawfully assessed on the premises.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30916 Special assessments; collections.

Sec. 30916. When any special assessment roll is confirmed, the lake board shall direct the assessments made in the roll to be collected. The clerk of each local unit of government involved shall then deliver to the treasurer of each local unit of government the special assessment roll, to which he or she shall attach his or her warrant commanding the treasurer to collect the assessments in the roll in accordance with the directions of the lake board. The warrant shall further require the treasurer, on September 1 following the date when any assessments or any part of an assessment have become due, to submit to the lake board a sworn statement setting forth the names of delinquent persons, if known, a description of the parcels of land upon which there are delinquent assessments, and the amount of the delinquency, including accrued interest and penalties computed to September 1 of the year. Upon receiving the special assessment roll and warrant, the treasurer shall collect the amounts assessed as they become due.

Popular name: Act 451

Popular name: NREPA

324.30917 Delinquent assessments; reassessment.

Sec. 30917. If the treasurer reports as delinquent any assessment or part of an assessment, the lake board shall certify the delinquency to the assessing official of each local unit of government, who shall reassess, on the annual tax roll of the local unit of government of that year, in a column headed "special assessments", the delinquent sum, with interest and penalties to September 1 of that year, and an additional penalty of 6% of the total amount. Thereafter, the statutes relating to taxes shall be applicable to the reassessments in each local unit of government.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30918 Division of land parcels; uncollected assessment apportioned.

Sec. 30918. If any parcel of land is divided after a special assessment on the land has been confirmed and before the collection of the assessment, the lake board may require the assessment official to apportion the

uncollected amounts between the divisions of the parcel of land, and the report of the apportionment when confirmed by the lake board shall be conclusive upon all parties. If the interested parties do not agree in writing to the apportionment, then, before confirmation, notice of hearing shall be given to all the interested parties, either by personal service or by publication as provided in the case of an original assessment roll.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30919 Additional special assessments.

Sec. 30919. If the assessments in any special assessment roll prove insufficient for any reason, including the noncollection of the assessment, to pay for the improvement for which they were made or to pay the principal and interest on the bonds issued in anticipation of the collection of the assessment, then the lake board shall make additional pro rata assessments to supply the deficiency, but the total amount assessed against any parcel of land shall not exceed the value of the benefits received from the improvement.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30920 Special assessments; invalidity and new assessments.

Sec. 30920. Whenever, in the opinion of the lake board, any special assessment is invalid by reason of irregularities or informalities in the proceedings, or if any court of competent jurisdiction adjudges such assessment illegal, the lake board, whether the improvement has been made or not and whether any part of the assessment has been paid or not, may proceed from the last step at which the proceedings were legal and cause a new assessment to be made for the same purpose for which the former assessment was made. All proceedings on that reassessment and for the collection of the assessment shall be conducted in the same manner as provided for the original assessment. Whenever an assessment or any part of an assessment levied upon any premises has been set aside, if the assessment or part of an assessment has been paid and not refunded, the payment shall be applied upon the reassessment.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30921 Special assessments; exempt lands.

Sec. 30921. The governing body of any department of the state or any of its political subdivisions, municipalities, school districts, townships, or counties, whose lands are exempt by law, may by resolution agree to pay the special assessments against the lands, in which case the assessment, including all the installments of the assessment, shall be a valid claim against the local unit of government.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30922 Borrowing; issuance of lake level orders and bonds.

Sec. 30922. The lake board may borrow money and issue lake level orders or the bonds of the special assessment district in anticipation of the collection of special assessments to defray the cost of any improvement made under this part after the special assessment roll has been confirmed. The bonds or lake level orders shall not exceed the amount of the special assessments in anticipation of the collection of which they are issued. Collections on special assessments to the extent pledged for the payment of bonds or lake level orders shall be set aside in a special fund for the payment of the bonds or lake level orders. The issuance of special assessments bonds or lake level orders shall be governed by the general laws of this state applicable to the issuance of special assessments bonds or lake level orders and in accordance with the revised municipal finance act, 2001 PA 34, MCL 141.2101 to 141.2821. Bonds or lake level orders may be issued in anticipation of the collection of special assessments levied in respect to 2 or more public improvements, but no special assessment district shall be compelled to pay the obligation of any other special assessment district. The local governing body may pledge the full faith and credit of a local unit of government for the prompt payment of the principal of and interest on the bonds or lake level orders as they become due. The pledge of full faith and credit of the local unit of government shall be included within the total limitation prescribed by the revised municipal finance act, 2001 PA 34, MCL 141.2101 to 141.2821. Bonds and lake level orders issued under this part shall be executed by the chairperson and secretary of the lake board, and the interest

coupons to be attached to the bonds and orders shall be executed by the officials causing their facsimile signatures to be affixed to the bonds and orders.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 2002, Act 218, Imd. Eff. Apr. 29, 2002.

324.30923 Condemnation; commencement and conduct of proceedings.

Sec. 30923. Whenever the lake board determines by proper resolution that it is necessary to condemn private property for the purpose of this part, the condemnation proceedings shall be commenced and conducted in accordance with Act No. 149 of the Public Acts of 1911, being sections 213.21 to 213.25 of the Michigan Compiled Laws.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30924 Gifts and grants-in-aid; acceptance by lake board; contract or agreement.

Sec. 30924. (1) The lake board may receive and accept gifts or grants-in-aid for the purpose of implementing this part.

(2) The lake board may contract or make agreement with the federal government or any agency of the federal government whereby the federal government will pay the whole or any part of the costs of a project or will perform all or any part of the work connected with the project. The contract or agreement may include any specific terms required by act of congress or federal regulation as a condition for the participation of the federal government.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30925 Gifts and grants-in-aid; acceptance by department.

Sec. 30925. The department in carrying out the purposes of this part may receive and accept, on behalf of the state, gifts and grants-in-aid.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30926 Advertising for bids; letting of contracts; work relief project.

Sec. 30926. (1) Except as provided in subsection (2), the chairperson of the lake board shall advertise for bids. A contract shall be let to the lowest bidder giving adequate security for the performance of the contract, but the lake board shall reserve the right to reject any and all bids.

(2) The lake board may let a contract with a local, incorporated, nonprofit homeowner association, the membership of which is open on a nondiscriminatory basis to all residents within the geographic area to be assessed or serviced, without advertising for public bids. The homeowner association shall give adequate security for the performance of the contract.

(3) The local governing body may improve a lake as a work relief project pursuant to applicable provisions of law.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.30927 Costs of projects; computation; expenditures; representation by attorney.

Sec. 30927. (1) Within 10 days after the letting of contracts or, in case of an appeal, immediately after the appeal has been decided, the lake board shall make a computation of the entire cost of a project under this part that includes all preliminary costs and engineering and inspection costs incurred and all of the following:

(a) The fees and expenses of special commissioners.

(b) The contracts for dredging or other work to be done on the project.

(c) The estimated cost of an appeal if the apportionment made by the lake board is not sustained.

(d) The estimated cost of inspection.

(e) The cost of publishing all notices required.

(f) All costs of the circuit court.

(g) Any legal expenses incurred in connection with the project, including litigation expenses, the costs of any judgments or orders entered against the lake board or special assessment district, and attorney fees.

(h) Fees for any permits required in connection with the project.

(i) Interest on bonds for the first year, if bonds are to be issued.

(j) Any other costs necessary for the administration of lake board proceedings, including, but not limited to, compensation of the members of the lake board, record compilation and retention, and state, county, or local government professional staff services.

(2) In addition to the amounts computed under subsection (1), the lake board may add not less than 10% or more than 15% of the gross sum to cover contingent expenses, including additional necessary hydrological studies by the department. The sum of the amounts computed under subsection (1) plus the amount added under this subsection is considered to be the cost of the lake improvement project.

(3) A lake board shall not expend money for improvements, services, or other purposes unless the lake board has adopted an annual budget.

(4) A lake board may retain an attorney to advise the lake board in the proper performance of its duties. The attorney shall represent the lake board in actions brought by or against the lake board.

Popular name: Act 451

Popular name: NREPA

324.30929 Lake board for inland lake; dissolution.

Sec. 30929. A lake board for an inland lake is dissolved if all of the following requirements are met:

(a) The governing body of each local unit of government in which all or part of the lake is located holds a public hearing on the proposed dissolution, determines that the lake board is no longer necessary for the improvement of the lake because the reasons for the establishment of the lake board no longer exist, and approves the dissolution of the lake board. For a public inland lake, the governing body of each local unit of government in which all or part of the lake is located may hold the public hearing on the dissolution of the lake board on its own initiative. For a public or private inland lake, the governing body of each local unit of government in which all or part of the lake is located shall hold a public hearing on the dissolution of the lake board upon petition of at least 2/3 of the property owners owning land abutting the lake or upon petition of the property owners who have been assessed at least 2/3 of the cost of the most recent improvements, excluding the amount assessed to local units at large. Notice of the public hearing shall be published twice in a newspaper of general circulation in each local unit of government in which all or part of the lake is located. The first notice shall be published not less than 10 days before the date of the hearing.

(b) All outstanding indebtedness and expenses of the lake board are paid in full.

(c) Any excess funds of the lake board are refunded based on the last approved special assessment roll. However, if the amount of excess funds is de minimis, the excess funds shall be distributed to the local units of government in which all or part of the lake is located, apportioned based on the amounts assessed against each local unit of government and lands in that local unit on the last approved special assessment roll.

(d) The lake board determines that it is no longer necessary for the improvement of the lake, because the reasons for its establishment no longer exist, and adopts an order approving its dissolution.

PART 311
LOCAL RIVER MANAGEMENT

324.31101 Definitions.

Sec. 31101. As used in this part:

(a) "Board" means a river management board created as the governing body of a river management district in accordance with this part.

(b) "Council" means a watershed council created under this part.

(c) "District" means a river management district established under this part.

(d) "Level of stream flow" means a measure of water quantity including the amount of water passing a designated point over a designated period and the levels of lakes that are an integral part of the surface drainage system of the watershed.

(e) "Local agencies" means local units of government, special districts, or other legally constituted agencies of local units of government exercising powers that may affect water resources.

(f) "River management" means the control of river flow by the operation of dams, reservoirs, conduits, and other human-made devices in order to improve and expand the uses of the river for those who depend upon it for a variety of private and public benefits.

(g) "Watershed" means the drainage area of a stream.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31102 Watershed council; petition; contents; organizational meeting; notice.

Sec. 31102. (1) To promote cooperation among local units of government in river management, a watershed council shall be established by the department upon a petition from 3 or more local units of government lying wholly or partially in the watershed as defined in the petition. The petition shall provide a statement of necessity, a description of general purposes and functions to be performed, a description of the area, including a map, and a list of all local units of government lying wholly or partly within the watershed, which shall be eligible for membership on the watershed council.

(2) Upon finding that the petition is in conformance with this part, the department shall establish the council, schedule an organizational meeting, and notify all local units of government eligible for membership by registered mail. The date for the meeting shall be not less than 60 or more than 90 days after the date of mailing the notice.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31103 Watershed council; membership; voting rights; term; river management board.

Sec. 31103. (1) The watershed council shall be composed of representatives of local units of government within the watershed who are appointed to and maintain membership in the council in the following manner:

(a) Each local unit of government using the river for water supply or waste disposal shall appoint 1 representative for each 20,000 population or fraction thereof. The governing body of each local unit of government shall determine the method by which its representatives are selected.

(b) Each county having 15% or more of its area in the watershed shall appoint 1 representative, and 1 additional representative for each 20,000 population or fraction thereof, which aggregate total shall be computed from the population of eligible townships not otherwise represented. These townships shall be eligible under this section if they have 15% or more of their respective areas in the basin. The methods by which the county representatives are selected shall be determined by the county board of commissioners.

(c) Any local agency wholly or partly within the basin may appoint a representative to the council upon a finding by the council that the agency is so affected by or concerned with the use and development of water resources in the basin as to warrant representation. If any township is represented under this subdivision, its population shall not be counted in determining the eligible total representatives of its county.

(2) Representatives on the watershed council shall be appointed for 2 years, but are subject to replacement at the pleasure of the appointing authority. A representative is not eligible to vote on the council unless the local government he or she represents has met its financial obligations to the council.

(3) Representatives to the watershed council may also represent their local units of government, if so designated by their local units of government, on river management boards established in accordance with this part.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31104 Watershed council; duties.

Sec. 31104. In carrying out its authorized functions, the council shall do all of the following:

(a) Adopt bylaws that govern its operations.

(b) Prepare an annual operating budget, including apportionment of costs to member governments.

(c) Hold an annual meeting at which time it shall elect a chairperson, vice-chairperson, and secretary-treasurer, submit an annual report to the member governments, and adopt an annual budget that constitutes the council's authorization of activities for the year.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31105 Watershed council; powers.

Sec. 31105. A watershed council may do 1 or more of the following:

(a) Conduct, or cause to be conducted, studies of the water resources of the watershed, including investigations of water uses, water quality, and the reliability of the water resource.

(b) Prepare periodic reports concerning, among other things, trends in water use and availability, emerging water problems, and recommendations for appropriate public policies and programs necessary to maintain adequate water resources for the watershed area.

(c) Request the department to survey the watershed for the purpose of determining minimum levels of stream flow necessary for health, welfare, and safety as provided in sections 31112 through 31117.

(d) Recommend the creation of a river management district or districts under the provisions of sections 31106 through 31111 when the need for river management seems to warrant such an action.

(e) Advise agencies of federal, state, and local units of government as to the council's view of the watershed's problems and needs.

(f) Cooperate with federal, state, and local agencies in providing stream gauges, water quality sampling stations, or other water resource data-gathering facilities or programs that aid the council in its responsibility for studying and reporting on water conditions.

(g) Employ an executive secretary and such other professional, administrative, or clerical staff, including consultants, as may be provided for in an approved budget.

(h) Establish such subcommittees or advisory committees as are considered helpful in the discharge of its functions.

(i) Establish special project funds as needed to finance special studies outside its annual budget capacity. For this purpose, the council may accept gifts and grants from any person.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31106 River management district; establishment; powers; consolidation; coordination.

Sec. 31106. (1) The governing bodies of 2 or more local units of government may petition the department to establish a river management district in order to provide an agency for the acquisition, construction, operation, and financing of water storage and other river control facilities necessary for river management. The petition shall be accompanied by a statement of necessity, a description of the district purposes, functions, and operating procedures, which shall include methods of financing capital improvements and of apportioning benefit charges, and a general plan of development. Not later than 60 days following receipt of such a petition, the department shall establish the time and place for a public hearing on the petition and shall publish notice of the hearing. The notice shall be published twice in each county involved in at least 1 newspaper of general circulation in the county. At the hearing, the applicant and any other interested party may appear, present witnesses, and submit evidence. Following the hearing, the department may establish the district and publish notice of the establishment in the manner provided for publication of notice of hearing, upon finding the following conditions:

(a) That the proposal is consistent with the public interest in the conservation, development, and use of water resources, and the proposed district is geographically suitable to effectuation of the district purposes.

(b) That the establishment and operation of the district will not unreasonably impair the interests of the public or of riparians in lands or waters or the beneficial public use of lands or waters, and will not endanger public health or safety.

(2) A management district shall not be created that affects any city now or hereafter having a population of more than 1,500,000, except with the concurrence of the governing body of that city.

(3) Prior to approving the establishment of a district consisting of a portion of a river basin, the department shall determine the feasibility of establishing the district to include the entire river basin or as large a portion of the basin as possible. Approval of districts consisting of a portion of a river basin shall be on the basis that when in the judgment of the department it becomes feasible to form a district including the entire river basin,

the river management boards shall initiate proceedings to combine the smaller districts into larger districts or into an entire watershed-wide district.

(4) Any plans for a river management district shall be coordinated with plans of adjacent river basins, organizations, or agencies and with any comprehensive regional master programs for river management.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31107 River management district; organizational meeting; notice; date; board; membership; term; voting rights.

Sec. 31107. (1) Within 60 days after establishing a district, the department shall schedule an organizational meeting of the district board and shall provide notice of the meeting by registered mail to the governing bodies of all local units of government comprising the district. The date for the meeting shall be not less than 60 or more than 90 days after the date of mailing the notice. At the meeting, the department shall serve as temporary chairperson. The board shall elect a chairperson, vice-chairperson, secretary, and treasurer and adopt bylaws.

(2) A district shall be governed by a river management board composed of representatives of local units of government within the district. The representation of each local unit of government on the board may be provided as part of the operating procedures submitted to the department in the petition of local units of government made in accordance with section 31106. If the composition of the board is not so designated, representation shall be established under section 31103.

(3) Representatives on the river management board shall be appointed for 2 years but are subject to replacement at the pleasure of the appointing authority. A representative is not eligible to vote on the board unless the local government he or she represents has met its financial obligations to the district.

(4) Representatives to the river management board may also serve as representatives of their local units of government, if so designated by their local units of government, on the watershed council.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31108 River management board; powers.

Sec. 31108. A river management board may do any of the following:

(a) Conduct a continuing study of river use requirements and needs for river management within its area of jurisdiction; analyze alternative methods of meeting needs; and develop and adopt a river management program, including plans for constructing, operating, and financing water storage and river control structures and negotiating coordinated policies and programs relating to river use among local units of government within the district.

(b) Impound and control the waters of the river system within the district, subject to minimum levels of stream flow established pursuant to sections 31112 and 31113, through acquisition, construction, maintenance, and/or operation of water storage reservoirs, dams, or other river control structures as necessary to assure adequate quantity, quality, and stability of river flow to protect the public health, welfare, and safety. A river management district shall not release water in such an amount as to produce or increase flooding or otherwise damage downstream interests.

(c) Contract with or enter into agreement with the federal government or any agency or department of the federal government or with other governmental agencies or with private individuals or corporations that may maintain and operate reservoirs and control structures or that may construct, maintain, and operate new reservoirs and control structures as necessary to carry out the purposes of this part.

(d) Perform, with respect to the area within the district, the functions assigned to a watershed council by sections 31102 through 31105 whenever a relevant watershed council has not been formed, or if the appropriate watershed council's failure to act impairs the functions and programs of a district.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31109 River management district; body corporate; powers; taxing power.

Sec. 31109. A district formed under this part is a body corporate with powers to contract; to sue and be sued; to exercise the right of eminent domain; to apportion administrative costs and benefit charges for river management and related facilities among the local units of government members, which costs shall be

payable from general funds or taxes raised by the local units of government; to collect revenues for services rendered by the exercise of its functions; to issue bonds; to apply for and receive grants, gifts, and other devises from any governmental agency or from the federal government; and to exercise other powers as necessary to implement this part. The river management district shall not have direct taxing power.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31110 River management board; duties.

Sec. 31110. A river management board shall do all of the following:

(a) Adopt bylaws to govern its operations.

(b) Prepare an annual operating budget and levy an annual assessment of local unit of government members to cover costs of organizing, developing plans, and maintaining general overhead administration.

(c) Adopt and maintain a schedule of benefit assessments upon local units of government in the district levied to help defray the costs of capital improvements, which schedule constitutes a legal obligation upon those assessed.

(d) Hold an annual meeting at which it shall report to its members and to the watershed council, elect officers, and adopt an annual budget.

(e) Maintain a public record of its transactions.

(f) Do all other things necessary for the operation of the district.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31111 Executive secretary; additional staff.

Sec. 31111. The executive secretary of a watershed council may serve as executive secretary to the river management board. If a relevant watershed council does not exist, or if the executive secretary of a watershed council is otherwise unavailable, the board may employ an executive secretary. In addition, the board may employ additional staff as it determines appropriate within its approved budget.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31112 Minimum level of stream flow; industrial use of water.

Sec. 31112. Upon request of a council or a board, the department shall determine, within the watershed subject to the council, the minimum level of stream flow necessary to safeguard the public health, welfare, and safety, but a determination or order shall not prevent any industry along the stream from using water from the stream for industrial use sufficient for the industry's requirement if all the water used is returned to the stream within 72 hours of the taking.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31113 Minimum level of stream flow; order of determination; notice; publication; review.

Sec. 31113. In carrying out its authority to determine minimum levels of stream flow, the department, after public hearing, shall issue an order of determination setting forth minimum levels at locations as necessary to carry out the purposes of this part. Notice of the order of determination shall be published and the order may be reviewed in the circuit court in accordance with the administrative procedures act of 1969, Act No. 306 of the Public Acts of 1969, being sections 24.201 to 24.328 of the Michigan Compiled Laws, upon petition filed by any person within 15 days following the last date of the publication.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31114 Minimum level of stream flow; determination by watershed council or department; request.

Sec. 31114. A river management board may request a watershed council to seek a determination of minimum levels of stream flow in accordance with sections 31112 and 31113, or the board may request the

department to make the determinations if a watershed council has not been formed for the larger watershed of which the district is a part, or when an appropriately established council fails to act within 90 days upon the district's request.

Popular name: NREPA

324.31115 Measurement of stream flow, lake levels, and water quality; gauges and sampling devices; entering public property.

Sec. 31115. The department may maintain gauges and sampling devices to measure stream flow, lake levels, and water quality as necessary to implement this part, and may enter at all reasonable times in or upon any public property for the purpose of inspecting and investigating conditions relating to implementing this part.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31116 Preparation of river management plan; advice, assistance, and supervision by department.

Sec. 31116. The department may cooperate and negotiate with any person in establishing and maintaining gauges and sampling devices to measure stream flow, lake levels, or water quality or in implementing any other provision of this part. When requested by a council or board, the department shall provide technical advice and assistance in the preparation of a river management plan of the district. A river management plan shall not be placed into effect until it has been approved by the department as conforming to the stated objectives of the petition. The department shall maintain supervision over the functioning of the district to the extent it considers necessary for the purpose of ensuring conformance with the plan in the public interest.

PART 312
WATERSHED ALLIANCES

324.31201 Definitions.

Sec. 31201. As used in this part:

(a) "County agency" means an agency created or controlled by a county board of commissioners or a

county executive, a board of county road commissioners, or an office of the county drain commissioner.

(b) "Member" means a municipality, county, county agency, public school district, public college or university, or other local or regional public agency that is a member of a watershed alliance as provided for in this part.

(c) "Watershed" means a geographic area in the state within which surface water drains into a common river, stream, or body of water.

(d) "Watershed alliance" means an organization established under section 31202.

(e) "Watershed management plan" means a written document prepared and approved by a watershed alliance that identifies water management issues and problems, proposes goals and objectives, and outlines actions to achieve the goals and objectives identified by members of a watershed alliance.

History: Add. 2004, Act 517, Imd. Eff. Jan. 3, 2005.

Popular name: Act 451

Popular name: NREPA

324.31202 Watershed alliance; establishment by municipalities; purpose; resolution; bylaws; voluntary membership.

Sec. 31202. (1) Two or more municipalities, by resolution of their respective governing bodies, may establish a watershed alliance for the purpose of studying problems and planning and implementing activities designed to address surface water quality or water flow issues of mutual concern within the portion of a watershed located within their boundaries, including 1 or more of the following:

(a) Preparation of watershed management plans and other required documents as part of state or federal requirements to obtain water discharge permits or grant funding.

(b) Monitoring, sampling, and analyses of data necessary to manage the watershed, including, but not limited to, surface water quality, water quantity and flows, ecosystem health, recreational use, and the publication of results.

(c) Conducting public surveys, preparing and distributing informational and educational materials, and organizing activities involving the public.

(d) Designing and implementing projects and conducting activities to protect or enhance water quality and related beneficial uses, or manage flows to protect or reduce damage to riparian property and aquatic habitat.

(e) Designing and implementing other actions consistent with watershed management plans adopted by a watershed alliance, or required to protect public health, and maintain and restore beneficial public uses of the surface water resources of the watershed.

(2) A resolution under subsection (1) establishing a watershed alliance shall include bylaws that identify, at a minimum, all of the following:

(a) The structure of the organization and decision-making process.

(b) The geographic boundaries of the watershed.

(c) The municipalities, counties, county agencies, public school districts, and other local or regional public agencies eligible for membership in the watershed alliance as provided under subsection (3).

(d) The basis for assessing costs to members.

(e) A mechanism to be used for adoption of an annual budget to support projects and activities.

(3) A watershed alliance shall provide an equitable basis for all municipalities, counties, and county agencies within the geographic boundaries of the watershed to voluntarily join as members. In addition, at its discretion, the watershed alliance may authorize the voluntary membership of any local public school district, public college or university, or any other local or regional public agency that has water management responsibilities. Following establishment of a watershed alliance under subsection (1), by resolution of its governing body, a municipality, county, county agency, public school district, public college or university, or other local or regional public agency established under state law with surface water management responsibility may voluntarily join a watershed alliance as provided for in this subsection.

History: Add. 2004, Act 517, Imd. Eff. Jan. 3, 2005.

Popular name: Act 451

Popular name: NREPA

324.31203 Watershed alliance as body corporate; powers and authority.

Sec. 31203. A watershed alliance is a body corporate with power to sue and be sued in any court of this state and with the authority to carry out its responsibilities under this part and as otherwise provided by law.

History: Add. 2004, Act 517, Imd. Eff. Jan. 3, 2005.

Popular name: Act 451

Popular name: NREPA

324.31204 Watershed alliance; powers and authority; report; assessment or collection of fees or taxes.

Sec. 31204. (1) A watershed alliance, consistent with the purposes identified in section 31202 and its bylaws, may do 1 or more of the following:

(a) Employ personnel to coordinate and implement actions.

(b) Enter into agreements or contracts with public or private entities to coordinate or implement actions.

(c) Assess and collect fees from members with approval of the governing bodies of the members.

(d) Solicit grants, gifts, and contributions from federal, state, regional, or local public agencies and from private sources.

(e) Expend funds provided by members, or through grants, gifts, and contributions.

(f) Represent members of the watershed alliance before other bodies considering issues affecting water quality or flow management issues within the designated watershed, including obtaining local, state, or federal permits or authorizations that may be required to carry out activities as may be authorized by its members.

(2) A watershed alliance shall prepare and deliver to its members on or before April 1 of each year a report detailing the revenue received and expenditures by the watershed alliance during the immediately prior January 1 through December 31 period.

(3) A watershed alliance shall have no independent authority to assess or collect any fees or taxes directly from individuals or property owners. A watershed alliance member may allocate the use of public funds from fees, taxes, or assessments generated under the provisions of other state laws for use by a watershed alliance.

History: Add. 2004, Act 517, Imd. Eff. Jan. 3, 2005.

Popular name: Act 451

Popular name: NREPA

324.31205 Audit.

Sec. 31205. (1) A watershed alliance shall obtain an audit of its financial records, accounts, and procedures at least every other year.

(2) A watershed alliance shall submit the results of an audit under subsection (1) to the governing bodies of its members and to the state treasurer.

(3) An audit under subsection (1) shall satisfy all audit requirements set under the uniform budgeting and accounting act, 1968 PA 2, MCL 141.421 to 141.440a.

History: Add. 2004, Act 517, Imd. Eff. Jan. 3, 2005.

Popular name: NREPA

Popular name: Act 451

324.31206 Additional authority prohibited.

Sec. 31206. This part does not provide a watershed alliance or any of its members with any additional authority not otherwise provided by law.

History: Add. 2004, Act 517, Imd. Eff. Jan. 3, 2005.

Popular name: Act 451

Popular name: NREPA

PART 313
SURPLUS WATERS

324.31301 Definitions.

Sec. 31301. As used in this part:

(a) "Board" means the county board of commissioners.

(b) "Dams" means dams, embankments, dikes, pumps, weirs, locks, gates, tubes, ditches, or any other devices or construction to impound or release water.

(c) "Local unit" means any city, village, township, or soil conservation district acting through its governing body.

(d) "Optimum flow" means that rate and quantity of flow in any stream as determined in accordance with this part.

(e) "Plan" means a plan adopted by the board or boards and approved by an order of the department for the best development, utilization, and conservation of the surplus water of the state.

(f) "Surplus water" means water that may be impounded without decreasing the flow of a river or stream below its optimum flow.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31302 Request for surveys; utilization of reports.

Sec. 31302. Any board or group of boards or local unit or units acting singly or in concert may request the department to undertake a survey of the water in a river basin or watershed located or partially located in the county or counties or in the local unit or units of government to determine whether there is surplus water that may be available and, if so, how it may be best impounded, utilized, and conserved. All studies, surveys, and reports made by public and other competent authorities may be utilized by the department in making this determination.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31303 Request for surveys; involvement of other boards.

Sec. 31303. If it appears to the department, after a review of the request, that a feasible plan for the impoundment, utilization, and conservation of surplus water will involve the water in counties or local units other than those making the request, the department shall so inform the requestors. If the request was originally made by a local unit only, the board of the county in which the local unit is situated shall be informed of the decision of the department; and unless the board joins in the request and becomes an originator of the request, the department shall discontinue any further work on the survey. The requesting board may then request the other boards to join in the request so that a complete survey of the surplus water located in all affected counties may be made. Refusal on the part of any of the other boards to join in the request shall be reported to the department, and if the department believes that the plan can be effectuated without the cooperation of the refusing boards, the department shall enter a decision to that effect and the boards requesting the survey may proceed in accordance with this part.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31304 Request for surveys; determination of optimum flow; plan for improvement, utilization, and conservation of surplus water; factors; limitations.

Sec. 31304. (1) Upon receipt of a request, the department shall determine the optimum flow for the rivers and streams that may be substantially affected by the impounding and releasing of surplus water and upon its completion shall require the boards to prepare and submit to the department a plan for the impoundment, best utilization, and conservation of the surplus water in accordance with this part. The department shall cooperate and collaborate with the boards in the preparation of the plan. The plan shall specify the persons who may make use of the water and the terms, conditions, and restrictions under which the water may be used.

(2) In making the determination of optimum flow and in preparing the plan, the department and boards shall consider the following factors:

(a) The range of stream flow variation.

(b) The uses that are being made of the water from the stream or that may be made in the foreseeable future by any riparian owner.

(c) The stream's waste assimilation capacity and its practical utility for domestic use, fish and wildlife habitat, recreation, municipal and industrial water supply, commercial and recreational navigation, including portages, public and private utilities, and water storage purposes.

(d) Other factors that appear to the department to be necessary to adequately protect and preserve the rights of riparians on the streams involved.

(3) A plan shall not permit the impounding of water if the flow is below the optimum flow. This part does not authorize the diversion of water from 1 watershed to another.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31305 Public hearing; determination of optimum flow; notice; order; review.

Sec. 31305. (1) Before making a determination of optimum flow, the department shall hold a public hearing on the issue. The department shall set the time and place for the public hearing and shall publish notice of the hearing. The hearing shall be held not less than 180 days after the date of the first publication. The notice shall be published once during each of 2 separate weeks in at least 1 newspaper of general circulation in each county that requested the survey or later joined in the survey. Notice shall be given by first-class mail to each owner or party in interest of upper and lower riparian property that will be affected by the determination and whose name appears upon the most recent local tax assessment records. The notice shall be mailed at least 60 days prior to the date of the hearing to the address shown on the tax records. At the hearing, any interested person may appear, present witnesses, and submit evidence.

(2) Upon the completion of the public hearing pursuant to subsection (1), the department, if it believes it to further the public interest, shall enter an order making a determination of optimum flow. The order shall become final 30 days after the mailing of a copy of it by certified mail to those interested persons who appeared and testified or filed a written statement at the hearing. The order is subject to review as to questions of law only by a writ of superintending control in an action in the nature of certiorari brought before the order becomes final. Only an owner or party in interest of upper or lower riparian property affected by the order who appeared, testified, or filed a written statement at the hearing, who considers himself or herself aggrieved by the order, has the right to file a petition for a writ of superintending control in the nature of certiorari in the circuit court for the county of Ingham or in the circuit court for any county that requested the survey or joined in the survey.

(3) After the order of determination becomes final, the department shall hold a public hearing on the proposed plan as submitted by the board. The department shall set the time and place for the public hearing and shall publish notice in the manner provided in subsection (1). The hearing shall be held not less than 30 days after the date of the first publication. Notice shall be given by first-class mail to the persons and in the manner provided in subsection (1) and shall be mailed at least 30 days prior to the date of the hearing. At the hearing, any interested person may appear, present witnesses, and submit evidence. If the department finds that the proposed plan is in the public interest and in compliance with this part, it shall enter an order approving the plan. The order shall become final 30 days after the mailing of a copy of it by certified mail to those interested persons who appeared and testified or filed a written statement at the hearing. The order is subject to review as is provided in subsection (2).

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31306 Transmission of plans to boards; adoption; dams; supervision.

Sec. 31306. (1) When the order has become final, the department shall transmit the plan to all of the boards involved, and, if the plan is adopted by the boards involved, the boards may construct, operate, and maintain, either singly or jointly, the dams necessary to impound the surplus waters and to make use or disposition of the surplus water in accordance with the plan. The department shall maintain supervision over the execution of the plan to the extent it considers necessary to protect the public interest of the state.

(2) For the implementation and effectuation of the plan, the boards, either singly or jointly, may establish a governmental agency or commission as may be necessary, may hire employees or assistants as may be required, and may enter into contracts with each other and any person as may be necessary to implement this part. The boards constructing, maintaining, or operating the dams shall be responsible for the proper construction, maintenance, and operation of the dams, and they shall be in full and complete charge of the dams and of the impoundments created by the dams.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31307 Gifts and grants; buying, selling, exchanging, or condemning land; restrictions on financing dams.

Sec. 31307. For the purpose of implementing this part, the boards may receive and accept in the name of the county gifts and grants of land and other property and grants-in-aid from any person, and may buy, sell, exchange, or condemn land and other property or property interests, including the rights of riparian owners to surplus waters, in any county where the land and property are located. The department, if direct acceptance by the boards is not possible, may accept the gifts or grants on their behalf. The boards shall not use any money of the county to implement the terms and provisions of this part, but shall finance the construction, operation, and maintenance of the dams wholly and solely from gifts or grants-in-aid that may be received and from fees

and charges as may be made for the use of the surplus water.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31308 Gifts and grants-in-aid; acceptance by department.

Sec. 31308. The department, in carrying out the purposes of this part, may receive and accept on behalf of the state gifts and grants-in-aid from any person.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31309 Use of increased flowage; waste assimilation; rates for usage.

Sec. 31309. All increased flowage resulting from operation of a plan shall be available for nonconsumptive use to all riparians. A person shall not utilize for waste assimilation, or divert from the stream, any surplus water created by release from dams operated under this part, except in accordance with the plan. The amount of surplus water released from any impoundment shall be determined by the department by the use of well-recognized engineering computations. The boards may charge users of the surplus water for waste assimilation or consumptive use, except those making an incidental, noncommercial, or recreational use, a reasonable fee or rate for the quantity of water or for the benefits they receive. Those users who contribute to the construction, maintenance, or operation of the dams may be charged a reduced fee or no fee, but the fees and rates charged by the boards shall be sufficient at all times to defray all costs, expenses, and other financial burdens assumed by the boards in the construction, maintenance, and operation of the dams.

Popular name: Act 451

Popular name: NREPA

324.31310 Permits granted by department not affected by part.

Sec. 31310. This part does not abridge the authority of the department as it presently exists. Permits granted by the department in accordance with part 35 are not affected by this part. The granting of future permits under part 35 shall proceed without regard to anything contained in this part.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31311 Rules.

Sec. 31311. The department shall promulgate rules to implement this part.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31312 Redetermination of optimum flow; modification of plan; hearings.

Sec. 31312. After a determination or plan has been in effect for 5 years, any riparian owner may petition the department for a redetermination of the optimum flow or modification of the plan, and upon a showing of substantial changes in conditions, the department shall hold hearings as provided in section 31305 and may redetermine the optimum flow or modify the plan.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31313 Violation as misdemeanor.

Sec. 31313. Any person knowingly violating this part, or any rule promulgated under this part, or any written order of the department in pursuance of this part, is guilty of a misdemeanor.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

PART 315
DAM SAFETY

324.31501 Meanings of words and phrases.

Sec. 31501. For purposes of this part, the words and phrases defined in sections 31502 to 31505 have the meanings ascribed to them in those sections.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31502 Definitions; A to D.

Sec. 31502. (1) "Abandonment" means an affirmative act on the part of an owner to discontinue maintenance or operation of a dam.

(2) "Administrative procedures act of 1969" means Act No. 306 of the Public Acts of 1969, being sections 24.201 to 24.328 of the Michigan Compiled Laws.

(3) "Alteration" means a change in the design of an existing dam that directly affects or may directly affect the structural integrity of a dam.

(4) "Appurtenant works" means the structure or machinery incident to or annexed to a dam that is built to operate and maintain a dam, including spillways, either in a dam or separate from the dam; low level outlet works; and water conduits such as tunnels, pipelines, or penstocks, located either through the dam or through the abutments of the dam.

(5) "Auxiliary spillway" means a secondary spillway which is operational at all times and does not require stoplog removal or gate manipulation.

(6) "Dam" means an artificial barrier, including dikes, embankments, and appurtenant works, that impounds, diverts, or is designed to impound or divert water or a combination of water and any other liquid or material in the water; that is or will be when complete 6 feet or more in height; and that has or will have an impounding capacity at design flood elevation of 5 surface acres or more. Dam does not include a storage or processing tank or standpipe constructed of steel or concrete, a roadway embankment not designed to impound water, or a dug pond where there is no impoundment of water or waste materials containing water at levels above adjacent natural grade levels.

(7) "Days" means calendar days, including Sundays and holidays.

(8) "Design flood" means the design flow rate for spillway capacity and dam height design.

(9) "Design flood elevation" means the maximum flood elevation that is considered in the design of the spillway capacity and freeboard for a dam.

(10) "Downstream toe elevation" means the elevation of the lowest point of intersection between the downstream slope of an earthen embankment and the natural ground.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31503 Definitions; E to H.

Sec. 31503. (1) "Emergency action plan" means a plan developed by the owner that establishes procedures for notification of the department, public off-site authorities, and other agencies of the emergency actions to be taken prior to and following an impending or actual failure of a dam.

(2) "Enlargement" means any change in or addition to an existing dam which raises or may raise the design flood elevation of the water impounded by the dam.

(3) "Failed dam" means a dam not capable of impounding water at its intended level due to a structural deficiency.

(4) "Failure" means an incident resulting in an unplanned or uncontrolled release of water from a dam.

(5) "Flood of record" means the greatest flow rate determined by the department to have occurred at a particular location.

(6) "Freeboard" means the vertical distance between the design flood elevation and the lowest point of the

top of the dam.

(7) "Half probable maximum flood" means the largest flood that may reasonably occur over a watershed, and is derived from the combination of hydrologic runoff parameters and the half probable maximum storm that produces the maximum runoff.

(8) "Half probable maximum storm" means the spatial and temporal distribution of the probable maximum precipitation, divided by 2, that produces the maximum volume of precipitation over a watershed.

(9) "Hazard potential classification" means a reference to the potential for loss of life, property damage, and environmental damage in the area downstream of a dam in the event of failure of the dam or appurtenant works.

(10) "Height" means the difference in elevation measured vertically between the natural bed of a stream or watercourse at the downstream toe of the dam, or, if it is not across a stream channel or watercourse, from the lowest elevation of the downstream toe of the dam, to the design flood elevation or to the lowest point of the top of the dam, whichever is less.

(11) "High hazard potential dam" means a dam located in an area where a failure may cause serious damage to inhabited homes, agricultural buildings, campgrounds, recreational facilities, industrial or commercial buildings, public utilities, main highways, or class I carrier railroads, or where environmental degradation would be significant, or where danger to individuals exists with the potential for loss of life.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31504 Definitions; I to P.

Sec. 31504. (1) "Impoundment" means the water held back by a dam.

(2) "Low hazard potential dam" means a dam located in an area where failure may cause damage limited to agriculture, uninhabited buildings, structures, or township or county roads, where environmental degradation would be minimal, and where danger to individuals is slight or nonexistent.

(3) "Maintenance" means the upkeep of a dam and its appurtenant works but does not include alterations or repairs.

(4) "One-hundred year flood" means a flood that has a 1% chance of being equaled or exceeded in any given year.

(5) "Owner" means a person who owns, leases, controls, operates, maintains, manages, or proposes to construct a dam.

(6) "Probable maximum precipitation" means the theoretically greatest depth of precipitation for a given duration that is physically possible over a given size storm area at a particular geographic location at a certain time of year.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31505 Definitions; R to T.

Sec. 31505. (1) "Removal" means the physical elimination of a dam or impoundment.

(2) "Repair" means to substantially restore a dam to its original condition and includes only such restoration as may directly affect the structural integrity of the dam.

(3) "Riparian owner" means a person who has riparian rights.

(4) "Riparian rights" means rights which accrue by operation of law to a landowner on the banks of an inland lake or stream.

(5) "Significant hazard potential dam" means a dam located in an area where its failure may cause damage limited to isolated inhabited homes, agricultural buildings, structures, secondary highways, short line railroads, or public utilities, where environmental degradation may be significant, or where danger to individuals exists.

(6) "Spillway" means a waterway in or about a dam designed for the discharge of water.

(7) "Spillway capacity" means the maximum rate of discharge that will pass through a spillway at design flood elevation.

(8) "Two-hundred year flood" means a flood that has a 0.5% chance of being equaled or exceeded in any given year.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31506 Jurisdiction of dams and impoundments; exemptions.

Sec. 31506. (1) Except as otherwise provided in subsections (2) and (3), dams and impoundments in the state are under the jurisdiction of the department.

(2) The following are exempt from this part:

(a) Projects licensed, projects that have preliminary permits, or projects for which an application for licensure has been filed under the federal power act, chapter 285, 41 Stat. 1063, 16 U.S.C. 791a to 793, 796 to 797, 798 to 818, 820 to 824a, and 824b to 825r, if federal dam safety inspection provisions apply during the license period and the inspection reports are provided to the department.

(b) Projects located on boundary waters under the jurisdiction and supervision of the United States army corps of engineers.

(c) Impoundments licensed pursuant to part 115 that contain or are designed to contain type III wastes as defined in rules promulgated under that part.

(3) Until January 1, 1998, a permit shall not be required under this part for the repair, reconstruction, or improvement of a dam, a portion of which is at least 75 years old, was damaged or destroyed by an act of God and is located in a county that has a per capita income of less than $8,500.00. However, a person who is performing a project for the repair, reconstruction, or improvement of a dam that is exempt from obtaining a permit under this subsection shall submit to the department and the joint capital outlay committee plans and specifications for the project. These plans and specifications shall be prepared by a licensed professional engineer and shall meet acceptable standards in the industry in order for a dam to be repaired, reconstructed, or improved. In reviewing plans and specifications for the project, the joint capital outlay committee may recommend environmental considerations to protect water quality such as underspill devices, minimum flow releases and removal of contaminated sediments that may be resuspended in the water column upon impoundment. Such contaminated sediments shall be disposed of in accordance with state law.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 1995, Act 100, Imd. Eff. June 22, 1995.

Popular name: Act 451

Popular name: NREPA

324.31507 Prohibited conduct; exception.

Sec. 31507. (1) A person shall not construct, enlarge, repair, reconstruct, alter, remove, or abandon any dam except in a manner provided for in this part.

(2) This section does not apply to maintenance performed on a dam that does not affect the structural integrity of the dam.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31508 Preparation of plans and specifications; licensed professional engineer required; exceptions.

Sec. 31508. (1) Except as otherwise provided in subsection (2), a licensed professional engineer shall prepare all plans and specifications, except for minor projects undertaken pursuant to section 31513.

(2) A person who is not a licensed professional engineer may prepare plans and specifications only for repairs or alterations to a dam where the application is made by a nonprofit organization under the following circumstances:

(a) The nonprofit organization has assets of less than $30,000.00, is exempt from taxation under section 501(c)(3) of the internal revenue code of 1986, 26 U.S.C. 501, and is not composed primarily of the owners of property adjacent to or contiguous to an impoundment.

(b) The proposed repairs or alterations have a projected total cost of less than $25,000.00.

(c) The impoundment is open to the public and a notice of public access is posted.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31509 Activities requiring permit; application for permit; fees; waiver and disposition of fees.

Sec. 31509. (1) Except as otherwise provided in this part or as authorized by a permit issued by the department pursuant to part 13, a person shall not undertake any of the following activities:

(a) Construction of a new dam.
(b) Enlargement of a dam or an impoundment.
(c) Repair of a dam.
(d) Alteration of a dam.
(e) Removal of a dam.
(f) Abandonment of a dam.
(g) Reconstruction of a failed dam.

(2) An application for a permit shall include information that the department determines is necessary for the administration of this part. If a project includes activities at multiple locations, 1 application may be filed for the combined activities.

(3) An application for a permit for construction of a new dam, reconstruction of a failed dam, or enlargement of a dam shall be accompanied by the following fees:

(a) For a dam with a height of 6 feet or more but less than 10 feet, $500.00.
(b) For a dam with a height of 10 feet or more but less than 20 feet, $1,000.00.
(c) For a dam with a height of 20 feet or more, $3,000.00.

(4) An application for a permit for the repair, alteration, removal, or abandonment of a dam shall be accompanied by a fee of $200.00, and an application for a permit for a minor project pursuant to section 31513(1) shall be accompanied by a fee of $100.00.

(5) The department shall waive the fees under this section for applications from state agencies, department sponsored projects located on public lands, and organizations of the type described in section 31508(2)(a) through (c).

(6) The department shall forward fees collected under this section to the state treasurer for deposit in the land and water management permit fee fund created in section 30113.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 2004, Act 325, Imd. Eff. Sept. 10, 2004.

Popular name: Act 451

Popular name: NREPA

324.31510 Request for notification of pending applications for permits; annual fee; biweekly list of applications; copies; contents.

Sec. 31510. (1) A person who wants to be notified of pending applications for permits issued under this part may make a written request to the department, accompanied by an annual fee of $25.00. The fee shall be deposited in the state treasury and credited to the general fund.

(2) The department shall prepare a biweekly list of the applications made during the previous biweekly period and shall promptly mail copies of the list for the remainder of the calendar year to the persons who have requested notice and paid the fee under this section.

(3) The biweekly list shall state the name and address of each applicant, the legal description of the lands included in the applicant's project, and a summary statement of the purpose of the project.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31511 Copies of application and statement; submission; public hearing; notice.

Sec. 31511. (1) Upon receipt of an application for a permit under this part, the department shall submit copies of the application accompanied by a statement indicating that the department may act upon the application without a public hearing unless a written request is filed with the department within 20 days after the submission for review. The department shall submit copies of the application to all of the following:

(a) The local unit of government where the project is to be located.
(b) The adjacent riparian owners.
(c) Any person considered appropriate by the department.
(d) Any person who requests copies.
(e) A watershed council, organized pursuant to part 311, of the watershed within which the project is located or is to be located.

(2) The department may hold a public hearing upon the written request of any of the following:

(a) An applicant.
(b) A riparian owner.
(c) A person or local unit of government that is entitled to receive a copy of the application pursuant to subsection (1).

(3) A public hearing held pursuant to this section shall be held in compliance with the open meetings act, Act No. 267 of the Public Acts of 1976, being sections 15.261 to 15.275 of the Michigan Compiled Laws. Public notice of the time, date, and place of the hearing shall be given in the manner provided by that act. Additionally, the department shall mail copies of the public notice to the persons who have requested the biweekly list pursuant to section 31510, the person requesting the hearing, and the persons and local units of government that are entitled to receive a copy of the application pursuant to subsection (1).

324.31512 Necessity for immediate action; emergency conditions; application for permit to reconstruct failed dam.

Sec. 31512. (1) When immediate action is necessary to protect the structural integrity of a dam, the department may issue a permit before the expiration of the 20-day period referred to in section 31511(1). This subsection does not prohibit an owner from taking action necessary to mitigate emergency conditions if imminent danger of failure exists.

(2) A person applying for a permit to reconstruct a failed dam shall file a complete application not less than 1 year after the date of the failure. If such an application is filed more than 1 year after the date of the failure, the department shall consider the application to be an application to construct a new dam.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 2004, Act 325, Imd. Eff. Sept. 10, 2004.

Popular name: Act 451

Popular name: NREPA

324.31513 Minor project categories; rules.

Sec. 31513. (1) The department shall promulgate rules to establish minor project categories for alterations and repairs that have minimal effect on the structural integrity of a dam. The department may act upon an application and grant a permit for an activity or project within a minor project category, after an on-site inspection of the dam, without providing public notice.

(2) All other provisions of this part shall be applicable to minor projects, except that a final inspection by the department or certification of the project by a licensed professional engineer shall not be required for a project completed under a permit granted pursuant to subsection (1).

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31514 Effect of proposed activity on public health, safety, welfare, property, or natural resources.

Sec. 31514. The department shall not issue a permit to construct a new dam, reconstruct a failed dam for which a complete application to reconstruct has been submitted more than 1 year after the date of the failure, or enlarge the surface area of an impoundment by more than 10% unless it determines, after a review of the application submitted, that the proposed activity for which a permit is requested will not have a significant adverse effect on public health, safety, welfare, property, or natural resources or the public trust in those natural resources.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31515 Approval of plans and specifications; completion of permitted activity; time; extension; approval of changes; duration and renewal of permit; terms and conditions; mitigating measures; recommendations; performance bond; suspension, revocation, annulment, withdrawal, recall, cancellation, or amendment of permit; hearings.

Sec. 31515. (1) Except as otherwise provided in this section, a permit issued by the department under this part shall require that plans and specifications be approved by the department before construction begins. The department shall approve or reject complete plans and specifications within 60 days after their receipt. The permitted activity shall be completed within a specified time not to exceed 2 years after the date of issuance of the permit. Upon the written application of the permittee, and for good cause shown, the department may extend the time for completing construction. The permittee shall notify the department at least 10 days before

beginning construction and shall otherwise notify the department as the department may require.

(2) A change in approved plans and specifications shall not be implemented unless the department gives its prior approval. The department shall approve or reject changes in plans and specifications within 30 days after the request for the changes.

(3) A permit is effective for the length of time specified in the permit unless it is revoked pursuant to this part. The department may renew a permit.

(4) A permit to alter, repair, or construct a new dam, reconstruct a failed dam, or enlarge the surface area of an impoundment by more than 10% may specify the terms and conditions including, but not limited to, requirements for minimum flows, cold water release, impoundment fluctuations, portage, contingency plans, and conditions under which the work is to be performed. The terms and conditions of a permit shall be effective for the life of the project. The department may consider, in issuing a permit, any mitigating measures in conjunction with the permitted activities and may make recommendations as to fish passage that may be required by part 483.

(5) A permit to construct a new dam or reconstruct a failed dam may require a performance bond to assure completion of the project or to provide for complete or partial restoration of the project site, as determined by the department in rules promulgated by the department.

(6) A permit may be suspended, revoked, annulled, withdrawn, recalled, canceled, or amended after a hearing for a violation of any of its provisions, a violation of this part, a violation of a rule promulgated under this part, or any misrepresentation contained in the application. Hearings shall be conducted by the department in accordance with the provisions for contested cases in the administrative procedures act of 1969.

324.31516 Spillway capacity; minimum criteria; freeboard; auxiliary spillway; duty of owner.

Sec. 31516. (1) Spillway capacity shall meet the following minimum criteria:

(a) Low hazard potential dams shall be capable of passing the 100-year flood, or the flood of record, whichever is greater.

(b) Significant hazard potential dams shall be capable of passing the 200-year flood, or the flood of record, whichever is greater.

(c) High hazard potential dams, less than 40 feet in height, as measured from the 200-year design flood elevation to the lowest downstream toe elevation, shall be capable of passing the 200-year flood, or the flood of record, whichever is greater.

(d) High hazard potential dams, 40 feet or greater in height, as measured from the 200-year design flood elevation to the lowest downstream toe elevation, shall be capable of passing the half probable maximum flood. The half probable maximum flood criterion may be reduced to not less than the 200-year flood, with proper documentation evidencing a failure of a dam under half probable maximum flood conditions will not cause additional flood damage or loss of life.

(e) Spillway design capacity shall not be less than the flood of record.

(2) Freeboard shall be considered when determining spillway capacity.

(3) If a dam cannot pass the design flood, an auxiliary spillway must be provided. The owner must document, to the satisfaction of the department, that the dam has sufficient spillway capacity, and that proper means are available to operate the spillway or spillways during the design flood.

Popular name: Act 451

Popular name: NREPA

324.31517 Duties of owner; inspection; notice of final approval; notice of project not completed in accordance with plans, specifications, or conditions; enforcement action.

Sec. 31517. (1) Except for minor projects authorized pursuant to section 31513, the owner shall do both of the following:

(a) Within 10 days after the completion of a new, reconstructed, enlarged, repaired, or altered dam, notify the department of its completion.

(b) Within 20 days after submitting the notice of completion, file with the department as-built plans and a statement signed by a licensed professional engineer certifying that the project was constructed in conformance with plans and specifications approved by the department.

(2) The department shall inspect the project and shall provide the owner with written notice of final approval if the project is determined to have been completed in accordance with approved plans,

specifications, and permit conditions.

(3) If the project is determined not to be completed in accordance with plans and specifications approved by the department and permit conditions, the department shall provide notice to the permittee as to the specific reasons the department determines the project not to be completed in accordance with those plans, specifications, or conditions. The department may then take enforcement action as provided in this part.

324.31518 Inspection reports; determination of hazard potential classification; inspection schedule; notice; additional inspection reports; contents of inspection report; visual inspection and report; detailed investigation or evaluation; life or property threatened by breach of dam; cause of action; ordering actions to alleviate danger.

Sec. 31518. (1) An owner shall submit to the department inspection reports prepared by a licensed professional engineer that evaluate the condition of the dam. The inspection report shall be submitted as follows:

(a) Not less than once every 3 years for high hazard potential dams.

(b) Not less than once every 4 years for significant hazard potential dams.

(c) Not less than once every 5 years for low hazard potential dams.

(2) The department shall determine the hazard potential classification of all dams and shall establish an inspection schedule. The inspection schedule shall require annual submission of inspection reports for approximately 1/3 of all high hazard potential dams, 1/4 of all significant hazard potential dams, and 1/5 of all low hazard potential dams. The department shall notify owners in writing when inspection reports are due. The department may order additional inspection reports following an event or change in condition that could threaten a dam.

(3) An inspection report required by this section shall include, at a minimum, all of the following:

(a) An evaluation of the dam's condition, spillway capacity, operational adequacy, and structural integrity.

(b) A determination of whether deficiencies exist that could lead to the failure of the dam.

(c) Recommendations for maintenance, repair, and alterations of a dam as are necessary to eliminate any deficiencies.

(4) Instead of engaging a licensed professional engineer to prepare an inspection report, local units of government or an organization of the type described in section 31508(2)(a) through (c) may request the department to conduct a visual inspection of a dam owned by that local unit of government and prepare a report on the condition of the dam in accordance with subsection (3). The department shall notify a requesting local unit of government as to when the inspection is to occur.

(5) If an inspection report discloses the need for a more detailed investigation or evaluation of certain dam features for the purpose of determining the condition of the dam, the department may order the completion and submission of that detailed investigation or evaluation at the expense of the owner. An investigation or evaluation required under this subsection shall be conducted under the supervision of a licensed professional engineer.

(6) If an owner does not submit an inspection report as required by subsection (1) or conduct additional investigations if required by subsection (5), the department or any person who would have life or property threatened by a breach of the dam may have a report prepared and recover the costs of preparing the report in a civil action commenced in a court of competent jurisdiction. This subsection does not limit the right of any person to bring a cause of action in a court of proper jurisdiction to compel an owner to comply with the requirements of this part.

(7) If, based on the findings and recommendations of the inspection report and an inspection by the department, the department finds that a condition exists which endangers a dam, it shall order the owner to take actions that the department considers necessary to alleviate the danger.

324.31519 Order to limit dam operations; order to remove dam; hearing.

Sec. 31519. (1) Where significant damage to the public health, safety, welfare, property, and natural resources or the public trust in those natural resources or damage to persons or property occurs or is anticipated to occur due to the operation of a dam, the department may order the owner to limit dam

operations. These orders may include, but are not limited to, cold water release, minimum flow releases from dams, impoundment fluctuation restrictions, or requirements for run-of-the-river operation. In issuing these orders, the department shall take into account social, economic, and public trust values.

(2) Where significant damage to persons, property, or natural resources or the public trust in those natural resources occurs as a result of the condition or existence of a dam, the department may order the removal of the dam following a determination by the department that, due to the continued condition or existence of the dam, the dam is likely to continue to cause significant damage. In issuing a removal order, the department shall take into account social and economic values, the natural resources, and the public trust in those natural resources and shall not issue a removal order when those factors exceed adverse impacts on natural resources or present danger to persons or property. The department shall not issue a removal order involving a dam subject to the regulatory authority of the Michigan public service commission or the federal energy regulatory commission unless that commission has concurred in writing with the order.

(3) Prior to finalizing an order under this section, the department shall provide an owner an opportunity for a hearing pursuant to the administrative procedures act of 1969.

324.31520 Sudden or unprecedented flood; unusual or alarming circumstance or occurrence; emergency drawdowns, repairs, breaching, or other action; notice.

Sec. 31520. (1) The owner or his or her agent shall advise the department and the affected off-site public authorities and safety agencies of any sudden or unprecedented flood or unusual or alarming circumstance or occurrence existing or anticipated that may affect the safety of the dam within 24 hours of the flood, circumstance, or occurrence.

(2) The owner shall notify the department as soon as possible of any necessary emergency drawdowns, repairs, breaching, or other action being taken in response to an emergency condition.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

324.31521 Emergency orders.

Sec. 31521. (1) The department may issue emergency orders as provided in this section. The department may, by written notice, order an owner to immediately repair, draw down, breach, or cease operation of a dam where a dam is in imminent danger of failure and is causing or threatening to cause harm to public health, safety, welfare, property, or the natural resources or the public trust in those natural resources. If an owner fails to comply with an order, or is unavailable or unable to be contacted, then the department may undertake immediate repair, drawdown, breaching, or cessation of operation, as may be necessary to alleviate the danger, and may recover from the owner the costs incurred in a civil action commenced in a court of competent jurisdiction. The department may terminate an emergency order upon a determination in writing that all necessary emergency actions have been complied with by the owner and that an emergency no longer exists.

(2) When ordering emergency actions under subsection (1), the department may specify maximum drawdown level and discharge rates and require sediment surveys, water quality sampling, monitoring, or any other action determined necessary by the department to ensure adequate protection of the public health, safety, welfare, property, or natural resources or the public trust in those natural resources. The department may modify the requirements of an emergency order if, during the conduct of ordered actions, it determines that the modification is necessary to protect the public health, safety, welfare, property, or natural resources or the public trust in those natural resources.

(3) Upon the issuance of an emergency order, the department shall provide the owner with an opportunity for a hearing pursuant to the administrative procedures act of 1969 within 15 days of the date of its issuance. At the hearing, the department shall determine, based on information and fact, if the emergency order shall be continued, modified, or suspended as necessary to protect public health, safety, welfare, property, or natural resources or the public trust in those natural resources.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.31523 Emergency action plans; submissions; review; consistency with other plans; contents of plans.

Sec. 31523. (1) An owner shall prepare, and keep current, emergency action plans for all high and significant hazard potential dams owned by that person.

(2) Emergency action plans shall be submitted to the department.

(3) The applicable county or local emergency management coordinators shall review for consistency emergency action plans with the county or local emergency operations plan prior to submission of those plans to the department.

(4) An emergency action plan shall be consistent with the applicable provisions of the affected county or local emergency operations plans and the Michigan emergency preparedness plan as developed pursuant to the emergency preparedness act, Act No. 390 of the Public Acts of 1976, being sections 30.401 to 30.420 of the Michigan Compiled Laws.

(5) Emergency action plans shall include, but not be limited to, the name, address, and telephone number of the person, and of an alternate person, responsible for operation of the dam; the name and telephone number of local emergency management coordinators; and a listing of occupied facilities, buildings, and residences that may be threatened with flooding due to a failure of the dam.

324.31524 Violation; order; suspension, modification, or revocation of permit; remedies cumulative; civil action.

Sec. 31524. (1) If the department determines that a person is in violation of this part, a rule promulgated under this part, or a condition set forth in a permit issued under this part, the department may issue an order requiring the person to comply with the conditions or to restore the site affected by the violation as nearly as practicable to its original condition. Restoration may include, but is not limited to, removing fill material deposited or replacing soil, sand, or minerals.

(2) An order shall state the nature of the violation and the required remedial action, and shall specify a time for compliance that the department determines is reasonable, taking into account the seriousness of the violation and the nature of any threat to public health, safety, welfare, property, or natural resources, or the public trust in those natural resources, that may be involved.

(3) If the department determines that a person is in violation of this part, a rule promulgated under this part, an order issued by the department, or a permit, the department, after notice and opportunity for hearing pursuant to the administrative procedures act of 1969, may suspend, modify, or revoke a permit. The remedies under this section and section 31525 are cumulative and do not prevent the department from imposing other penalties available under this part, a rule promulgated under this part, or an order of the department.

(4) If the department determines that a person is in violation of this part, a rule promulgated under this part, an order issued by the department pursuant to this part, or a permit issued pursuant to this part, the department may bring a civil action in the circuit court.

324.31525 Commencement of civil action; request; place; civil fine; contempt; willful or reckless violation as misdemeanor; penalty; subsequent violations; fine for failure to obtain permit; restoration of site; schedule of administrative monetary penalties for minor violations.

Sec. 31525. (1) The attorney general may commence a civil action for appropriate relief, including injunctive relief, upon request of the department under section 31524.

(2) Any civil action under this section may be brought in the circuit court for the county of Ingham or for the county in which the dam is located.

(3) In addition to any other relief granted under this section, the court may impose a civil fine of not more than $10,000.00 for each day of violation of this part, a rule promulgated under this part, or a permit issued under this part.

(4) A person found guilty of contempt of court for the violation of an order of the court shall be subject to a civil fine not to exceed $10,000.00 for each day of violation.

(5) A person who willfully or recklessly violates this part, a rule promulgated under this part, an order issued by the department, or a condition in a permit issued under this part, which violation places or may place a person in imminent danger of death or serious bodily injury or may cause serious property damage or serious damage to natural resources, or a person who has knowledge of or is responsible for such a violation, is guilty of a misdemeanor, punishable by imprisonment for not more than 1 year or a fine of not less than $2,500.00 or more than $25,000.00 for each day of violation, or both. A person who violates this section a second or subsequent time is guilty of a felony, punishable by imprisonment for not more than 2 years or a fine of not less than $10,000.00 for each day of violation, or both.

(6) A person required to obtain a permit for activity regulated under this part who does not obtain that permit shall be fined not less than twice the fee charged for the appropriate permit application.

(7) In addition to the orders of compliance and penalties provided under this part, the court may order a person who violates this part, a rule promulgated under this part, or a permit issued under this part to restore the site affected by the violation as nearly as practicable to its original condition. Restoration may include, but is not limited to, removing fill material deposited or replacing soil, sand, or minerals.

(8) The department may establish, by rule, a schedule of administrative monetary penalties for minor violations of this part, a rule promulgated under this part, a permit issued pursuant to this part, or an order issued by the department pursuant to this part.

324.31526 Person aggrieved by action or inaction of department; hearing; determination; judicial review.

Sec. 31526. (1) A person aggrieved by any action or inaction of the department under this part or rules promulgated under this part may request a hearing on the matter involved. The hearing shall be conducted by the department in accordance with the provisions for contested cases in the administrative procedures act of 1969.

(2) A determination of action or inaction by the department following the hearing may be subject to judicial review as provided in the administrative procedures act of 1969.

PART 317

AQUIFER PROTECTION AND DISPUTE RESOLUTION

324.31701 Definitions.

Sec. 31701. As used in this part:

(a) "Agricultural well" means a high-capacity well that is located on a farm and is used for an agricultural purpose as that term is defined in section 32701.

(b) "Complaint" means a complaint submitted under section 31702 alleging a potential groundwater dispute.

(c) "Construction" means the process of building a building, road, utility, or another structure, including all of the following:

(*i*) Assembling materials.

(*ii*) Disassembling and removing a structure.

(*iii*) Preparing the construction site.

(*iv*) Work related to any of the items described in subparagraphs (*i*) to (*iii*).

(d) "Department" means the department of environmental quality.

(e) "Dewatering well" means a well or pump that is used to remove water from a mining operation or that is used for a limited time period as part of a construction project to remove or pump water from a surface or subsurface area and ceases to be used upon completion of the construction project or shortly after completion of the construction project.

(f) "Director" means the director of the department or his or her designee.

(g) "Farm" means that term as it is defined in section 2 of the Michigan right to farm act, 1981 PA 93, MCL 286.472.

(h) "Fund" means the aquifer protection revolving fund created in section 31710.

(i) "Groundwater" means the water in the zone of saturation that fills all of the pore spaces of the subsurface geologic material.

(j) "Groundwater dispute" means a groundwater dispute declared by order of the director or the director of the department of agriculture and rural development under section 31703.

(k) "High-capacity well" means 1 or more water wells associated with an industrial or processing facility, an irrigation facility, or a farm that, in the aggregate from all sources and by all methods, have the capability of withdrawing 100,000 or more gallons of groundwater in 1 day.

(*l*) "Local health department" means that term as it is defined in section 1105 of the public health code, 1978 PA 368, MCL 333.1105.

(m) "Owner of a high-capacity well" means the person that owns or controls the parcel of property where a high-capacity well is located.

(n) "Owner of a small-quantity well" means the person that owns or controls the parcel of property where a small-capacity well is located.

(o) "Person" means an individual, partnership, corporation, association, governmental entity, or other legal entity.

(p) "Potable water" means water that at the point of use is acceptable for human consumption.

(q) "Small-quantity well" means 1 or more water wells of a person at the same location that, in the aggregate from all sources and by all methods, do not have the capability of withdrawing 100,000 or more gallons of groundwater in 1 day.

(r) "Water well" means an opening in the surface of the earth, however constructed, that is used for the purpose of withdrawing groundwater. Water well does not include a drain as defined in section 3 of the drain code of 1956, 1956 PA 40, MCL 280.3.

(s) "Well drilling contractor" means a well drilling contractor registered under part 127 of the public health code, 1978 PA 368, MCL 333.12701 to 333.12771.

History: Add. 2012, Act 602, Imd. Eff. Jan. 9, 2013;—Am. 2013, Act 86, Imd. Eff. June 28, 2013.

Compiler's note: Former MCL 324.31701, which pertained to definitions used in part, was repealed by Act 176 of 2009, Imd. Eff. Dec. 15, 2009.

Popular name: Act 451

Popular name: NREPA

324.31702 Allegation of potential groundwater dispute; submission of complaint by small-quantity well owner; investigation; on-site evaluation; inability to resolve complaint; toll-free facsimile and telephone line; duties of director of department of environmental quality and director of department of agriculture and rural development; unverified complaints; other resolutions.

Sec. 31702. (1) The owner of a small-quantity well may submit a complaint alleging a potential groundwater dispute if the small-quantity well has failed to furnish the well's normal supply of water or the well has failed to furnish potable water and the owner has credible reason to believe that the well's problems have been caused by a high-capacity well. A complaint shall be submitted to the director or to the director of the department of agriculture and rural development if the complaint involves an agricultural well. The complaint shall be in writing and shall be submitted in person, via certified mail, via the toll-free facsimile telephone number provided in subsection (6), or via other means of electronic submittal as developed by the department. However, the director or the director of the department of agriculture and rural development may refuse to accept an unreasonable complaint. The complaint shall include all of the following information:

(a) The name, address, and telephone number of the owner of the small-quantity well.

(b) The location of the small-quantity well, including the county, township, township section, and address of the property on which the small-quantity well is situated, and all other available information that indicates the location of that well.

(c) A written assessment by a well drilling contractor that the small-quantity well failure was not the result of well design or equipment failure. The assessment shall include a determination of the static water level in the well at the time of the assessment, if the static water level determination will not result in the well being damaged or decommissioned, and, if readily available, the type of pump and equipment.

(d) An explanation of why the small-quantity well owner believes that a high-capacity well has interfered with the proper function of the small-quantity well and any information available to the small-quantity well owner about the location and operation of the high-capacity well.

(e) The date or dates on which the interference by a high-capacity well occurred.

(f) Sufficient evidence to establish a reasonable belief that the interference was caused by a high-capacity well.

(2) The owner of a small-quantity well may call the toll-free telephone line provided for in subsection (6) to request a complaint form or other information regarding the dispute resolution process provided in this part.

(3) Within 2 business days after receipt of a complaint under subsection (1), the director or the director of the department of agriculture and rural development, as appropriate, shall contact the complainant and the owner of each high-capacity well identified in the complaint, shall provide actual notice of the complaint to the owner of each high-capacity well identified in the complaint, and shall begin an investigation.

(4) Within 5 business days after the owner of each high-capacity well has been provided with actual notice of the complaint under subsection (3), the director or the director of the department of agriculture and rural development, as appropriate, shall conduct an on-site evaluation. If the well is an agricultural well, the department shall consult with and provide technical assistance to the department of agriculture and rural development regarding the on-site evaluation. However, if the complaint is for a small-quantity well that is in close proximity to other small-quantity wells for which documented complaints have been received and investigated during the previous 60 days, the department or the department of agriculture and rural development, as appropriate, need not conduct an on-site evaluation unless it determines that an on-site evaluation is necessary. The director or the director of the department of agriculture and rural development, as appropriate, shall give affected persons an opportunity to contribute to the investigation of a complaint. In conducting the investigation, the director or the director of the department of agriculture and rural development, as appropriate, shall consider whether the owner of the high-capacity well is using industry-recognized water conservation management practices.

(5) After conducting an investigation, the director or the director of the department of agriculture and rural development, as appropriate, shall make a diligent effort to resolve the complaint. In attempting to resolve a complaint, the director or the director of the department of agriculture and rural development, as appropriate, may propose a remedy that he or she believes would equitably resolve the complaint.

(6) The director shall provide for the use of a toll-free facsimile line to receive complaints and a toll-free telephone line for owners of small-quantity wells to request complaint forms and to obtain other information

regarding the dispute resolution process provided in this part.

(7) The director and the director of the department of agriculture and rural development shall do both of the following:

(a) Publicize the toll-free facsimile line and the toll-free telephone line provided for in subsection (6).

(b) Enter into a memorandum of understanding that describes the process that will be followed by each director when a complaint involves an agricultural well.

(8) A complainant who submits more than 2 unverified complaints under this section within 1 year may be ordered by the director or the director of the department of agriculture and rural development to pay for the full costs of investigation of any third or subsequent unverified complaint. As used in this subsection, "unverified complaint" means a complaint in response to which the director or the director of the department of agriculture and rural development determines that there is not reasonable evidence to declare a groundwater dispute.

(9) If an owner of a high-capacity well that is not an agricultural well does not wish to participate in the dispute resolution process under this part, that dispute shall be resolved as otherwise provided by law.

History: Add. 2012, Act 602, Imd. Eff. Jan. 9, 2013;—Am. 2013, Act 86, Imd. Eff. June 28, 2013.

Compiler's note: Former MCL 324.31702, which pertained to complaints alleging potential groundwater disputes, was repealed by Act 176 of 2009, Imd. Eff. Dec. 15, 2009.

Popular name: Act 451

Popular name: NREPA

324.31702a Informal meeting between parties.

Sec. 31702a. (1) If a complaint regarding an agricultural well is not resolved under section 31702, the director of the department of agriculture and rural development shall schedule and provide written notice of an informal meeting between the parties to the dispute. The informal meeting shall be scheduled at least 10 business days prior to the issuance of an order declaring a groundwater dispute under section 31703. The participants at the informal meeting shall include the director of the department of agriculture and rural development, the owner of the agricultural well, and the owner or owners of the small-quantity wells that are alleged to be impacted by the agricultural well who wish to attend. However, upon written notice provided to the director of the department of agriculture and rural development, the owner of the agricultural well may waive the informal meeting.

(2) At the informal meeting held pursuant to subsection (1), the director of the department of agriculture and rural development shall present the information that he or she has obtained regarding the items listed in section 31703(1)(a) through (f) and (2). The owner of the agricultural well shall be given an opportunity to challenge the department's assertions and may submit information that the problems associated with the small-quantity well or wells are not being caused by the agricultural well. The owner or owners of the small-quantity wells alleged to be impacted may also submit additional information regarding the complaint.

324.31703 Duties of director or director of department of agriculture and rural development in groundwater dispute.

Sec. 31703. (1) The director or the director of the department of agriculture and rural development, as appropriate, shall, by order, declare a groundwater dispute if an investigation of a complaint discloses all of the following, based upon reasonable scientifically based evidence, and within a reasonable amount of time the director or the director of the department of agriculture and rural development, as appropriate, is unable to resolve the complaint:

(a) That the small-quantity well has failed to furnish the well's normal supply of water or failed to furnish potable water.

(b) That the small-quantity well and the well's equipment were functioning properly at the time of the failure. The determination under this subdivision shall be made based upon an assessment from a well drilling contractor that is provided by the owner of the small-quantity well.

(c) That the failure of the small-quantity well was caused by the lowering of the groundwater level in the area.

(d) That the lowering of the groundwater level exceeds normal seasonal water level fluctuations and substantially impairs continued use of the groundwater resource in the area.

(e) That the lowering of the groundwater level was caused by at least 1 high-capacity well.

(f) That the owner of the small-quantity well did not unreasonably reject a remedy proposed by the director

or the director of the department of agriculture and rural development under section 31702(5).

(2) In addition to the authority under subsection (1) to declare a groundwater dispute, if the director or the director of the department of agriculture and rural development, as appropriate, has clear and convincing scientifically based evidence that indicates that continued groundwater withdrawals from a high-capacity well will exceed the recharge capability of the groundwater resource of the area, the director or the director of the department of agriculture and rural development, as appropriate, by order, may declare a groundwater dispute.

(3) The director or the director of the department of agriculture and rural development, as appropriate, may amend or terminate an order declaring a groundwater dispute at any time. Prior to amending an order declaring a groundwater dispute regarding an agricultural well under this subsection, the director of the department of agriculture and rural development shall schedule an informal meeting and provide notice of the informal meeting in the manner provided under section 31702a.

Compiler's note: Former MCL 324.31703, which pertained to declaration of groundwater dispute by order of director, was repealed by Act 176 of 2009, Imd. Eff. Dec. 15, 2009.

Popular name: Act 451

Popular name: NREPA

324.31704 Order declaring groundwater dispute.

Sec. 31704. (1) Subject to subsections (2) and (4), an order declaring a groundwater dispute is effective when a copy of the order is served upon the owner of a high-capacity well that is reasonably believed to have caused the failure of the complainant's small-quantity well.

(2) If a groundwater dispute requires action before service can be completed under subsection (1), oral notification in person by the director or the director of the department of agriculture and rural development, as appropriate, is sufficient until service can be completed. Oral notification is effective for not more than 96 hours.

(3) As soon as possible after an order declaring a groundwater dispute has been issued, the director or the director of the department of agriculture and rural development, as appropriate, shall provide copies of the order to the local units of government in which the high-capacity well and the small-quantity well are located and to the local health departments with jurisdiction over those wells.

(4) Within 14 days after service of an order under subsection (1), the owner of an agricultural well may contest the order by submitting an appeal to the commission of agriculture and rural development. The appeal shall be submitted on a form provided by the department of agriculture and rural development and shall outline the basis for the appeal. Upon receipt of an appeal under this subsection, the commission of agriculture and rural development shall schedule the appeal for consideration at the next scheduled meeting of the commission. Except for the provision of an adequate supply of potable water under section 31705(1), the terms of the order are stayed until a determination is made by the commission of agriculture and rural development regarding the appeal. At the commission's meeting, the commission shall review the order and consider any testimony or other documentation contesting the order and shall make a determination to affirm the order or dismiss the order. If the commission of agriculture and rural development dismisses the order, the department of agriculture and rural development shall reimburse the appellant for the cost of providing potable water under section 31705.

History: Add. 2012, Act 602, Imd. Eff. Jan. 9, 2013;—Am. 2013, Act 86, Imd. Eff. June 28, 2013.

Compiler's note: Former MCL 324.31704, which pertained to service of order declaring groundwater dispute and effectiveness of oral notification, was repealed by Act 176 of 2009, Imd. Eff. Dec. 15, 2009.

324.31705 Declaration of groundwater dispute; temporary provision at point of use of adequate supply of potable water; extraction of groundwater; restriction; impact on viability of certain businesses; public water supply owned or operated by local government.

Sec. 31705. (1) Upon declaration of a groundwater dispute, the director or the director of the department of agriculture and rural development, as appropriate, shall, by order, require the immediate temporary provision at the point of use of an adequate supply of potable water.

(2) Except as provided in subsections (3), (4), and (5), if the director or the director of the department of agriculture and rural development, as appropriate, issues an order declaring a groundwater dispute, the director or the director of the department of agriculture and rural development, as appropriate, may, by order,

restrict the quantity of groundwater that may be extracted from a high-capacity well under either of the following conditions:

(a) If the high-capacity well is reasonably believed to have caused the failure of the complainant's small-quantity well and an immediate temporary provision of an adequate supply of potable water has not been provided to the complainant by the owner of the high-capacity well.

(b) If there is clear and convincing scientifically based evidence that continued groundwater withdrawals from the high-capacity well will exceed the recharge capability of the groundwater resource of the area.

(3) In issuing an order under subsection (2), the director or the director of the department of agriculture and rural development, as appropriate, shall consider the impact the order will have on the viability of a business associated with the high-capacity well or other use of the high-capacity well.

(4) If an operator of a high-capacity well withdraws water by a means other than pumping, the director or the director of the department of agriculture and rural development, as appropriate, may, by order, temporarily restrict the quantity of groundwater that may be extracted only if the conditions of subsection (2)(a) or (b) have not been met.

(5) The director or the director of the department of agriculture and rural development, as appropriate, shall not issue an order that diminishes the normal supply of drinking water or the capability for fire suppression of a public water supply system owned or operated by a local unit of government.

324.31706 Compensation; conditions.

Sec. 31706. If a groundwater dispute has been declared, the owner of a high-capacity well shall, subject to an order of the director or the director of the department of agriculture and rural development, as appropriate, provide timely and reasonable compensation as provided in section 31707 if there is a failure or substantial impairment of a small-quantity well and the following conditions exist:

(a) The failure or substantial impairment was caused by the groundwater withdrawals of the high-capacity well.

(b) The small-quantity well was constructed prior to February 14, 1967 or, if the small-quantity well was constructed on or after February 14, 1967, the well was constructed in compliance with part 127 of the public health code, 1978 PA 368, MCL 333.12701 to 333.12771.

History: Add. 2012, Act 602, Imd. Eff. Jan. 9, 2013;—Am. 2013, Act 86, Imd. Eff. June 28, 2013.

Compiler's note: Former MCL 324.31706, which pertained to duty of owner of high-capacity well to provide compensation if there is substantial impairment of small-quantity well and certain other conditions exist, was repealed by Act 176 of 2009, Imd. Eff. Dec. 15, 2009.

Popular name: Act 451

Popular name: NREPA

324.31707 Compensation; requirements.

Sec. 31707. (1) Timely and reasonable compensation under section 31706 consists of and is limited to either or both of the following:

(a) The reimbursement of expenses reasonably incurred by the complainant beginning 30 days prior to the date on which a complaint was made under section 31702 in doing the following:

(*i*) Paying for the cost of conducting a well assessment to determine that the small-quantity well and the well's equipment were functioning properly at the time of the failure.

(*ii*) Paying for the cost of obtaining an immediate temporary provision at the prior point of use of an adequate supply of potable water.

(*iii*) Obtaining 1 of the following:

(A) The restoration of the affected small-quantity well to the well's normal supply of water.

(B) The permanent provision at the point of use of an alternative potable supply of equal quantity.

(b) If an adequate remedy is not achievable under subdivision (a), the restriction or scheduling of the groundwater withdrawals of the high-capacity well so that the affected small-quantity well continues to produce either of the following:

(*i*) The well's normal supply of water.

(*ii*) The normal supply of potable water if the well normally furnishes potable water.

(2) The refusal of an owner of an affected small-quantity well to accept timely and reasonable

compensation described in subsection (1) is sufficient grounds for the director to terminate an order imposed on the owner of a high-capacity well.

History: Add. 2012, Act 602, Imd. Eff. Jan. 9, 2013.

Compiler's note: Former MCL 324.31707, which pertained to limitations to timely and reasonable compensation and the effect of small-quantity well owner's refusal to accept compensation, was repealed by Act 176 of 2009, Imd. Eff. Dec. 15, 2009.

324.31710 Aquifer protection revolving fund.

Sec. 31710. (1) The aquifer protection revolving fund is created in the state treasury.

(2) The fund may receive money or other assets from any source for deposit into the fund. The state treasurer shall direct the investment of the fund. The state treasurer shall credit to the fund interest and earnings from fund investments.

(3) Money in the fund at the close of the fiscal year shall remain in the fund and shall not lapse to the general fund.

(4) The department shall be the administrator of the fund for auditing purposes.

(5) Money in the fund shall be expended by the department only to implement this part and to reimburse the department of agriculture and rural development for its actual costs incurred in implementing this part.

(6) If money in the fund is used to conduct hydrogeological studies or other studies to gather data on the nature of aquifers or groundwater resources in the state, the department shall include this information in the groundwater inventory and map prepared under section 32802.

324.31711 Report.

Sec. 31711. (1) Not later than April 1, 2013, and every 2 years thereafter, the department shall prepare and submit to the legislature a report that includes both of the following:

(a) An analysis of the department's costs of implementing this part.

(b) Recommendations on modifications to this part that would improve the overall effectiveness of this part.

(2) The department shall file with the secretary of the senate and the clerk of the house of representatives a report that evaluates the effectiveness of the dispute resolution process during the 5-year period beginning on the effective date of the amendatory act that added this subsection. The report shall be filed within 90 days after the expiration of that 5-year period.

324.31712 Violation of order; civil fine or costs; default; deposit; action to enforce order.

Sec. 31712. (1) A person who violates an order issued under this part is responsible for a civil fine of not more than $1,000.00 for each day of violation, but not exceeding a total of $50,000.00.

(2) A default in the payment of a civil fine or costs ordered under this section or an installment of the fine or costs may be remedied by any means authorized under the revised judicature act of 1961, 1961 PA 236, MCL 600.101 to 600.9947.

(3) All civil fines recovered under this section shall be forwarded to the state treasurer for deposit into the fund.

(4) The director or the director of the department of agriculture and rural development, as appropriate, may bring an action in a court of competent jurisdiction to enforce an order under this part, including injunctive or other equitable relief.

History: Add. 2012, Act 602, Imd. Eff. Jan. 9, 2013;—Am. 2013, Act 86, Imd. Eff. June 28, 2013.

THE GREAT LAKES

PART 321
THE GREAT LAKES COMPACT AUTHORIZATION

324.32101 Great Lakes compact; cooperation with Ontario and bordering states; agreement authority.

Sec. 32101. So that the state of Michigan can consult and cooperate with the other states bordering on the Great Lakes and the province of Ontario in regard to all matters and things affecting the rights and interests of this state and such other states and province, in the management, control and supervision of the waters of the Great Lakes including the marine life therein, the governor of the state of Michigan is hereby authorized and empowered for and in the name of the state of Michigan to execute an agreement or agreements with any or all the other states bordering on the Great Lakes and the province of Ontario, in conformity with the terms, conditions and provisions contained in this part.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.32102 Compact; ratification.

Sec. 32102. Such compact shall become operative whenever, in addition to Michigan, any 3 of the states of Wisconsin, Illinois, Indiana, Ohio, Pennsylvania, New York and Minnesota shall have ratified it and congress has given its consent, if needed. The province of Ontario may become a party to this compact by taking such action as its laws and the laws of the Dominion of Canada may prescribe for ratification.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.32103 Compact; terms; conditions; provisions.

Sec. 32103. In addition to other pertinent and necessary provisions which are in consonance with the expressed purposes of the compact as herein provided, such a compact shall contain the following terms, conditions and provisions: Said compact shall authorize the compacting parties to do all things reasonably

necessary for carrying out the purposes of this part but such a compact shall be entered into solely for the purpose of empowering the duly appointed representatives of said states and the province of Ontario to meet, consult with and make recommendations to their respective governors, legislative bodies or governmental agencies and to the international joint commission established under the treaty of 1909 between the United States and Great Britain with respect to the management, control and supervision of the waters of the Great Lakes including the marine life therein. However, it is distinctly provided that any such recommendation and any decision or agreement arrived at among the compacting parties shall at no time have any force of law or be binding on any compacting party.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.32104 Compact commission; memberships.

Sec. 32104. Each compacting party shall have the right to designate 5 representatives to such interstate compact commission to be known as the Great Lakes compact commission. The representatives from this state shall be as provided in section 32202.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.32105 Compact; effective date; commission meetings; officers; duties; quorum.

Sec. 32105. The compact herein provided shall become effective upon the adoption of laws by the states referred to in section 2 in conformity with the provisions of this part. When, in addition to Michigan, any 3 of the states of Wisconsin, Illinois, Indiana, Ohio, Pennsylvania, New York, and Minnesota have adopted such laws and the congress of the United States has given its consent, if needed, the designated representatives of the Great Lakes compact commission shall meet upon the call of any governor of any of the ratifying states or the legally designated governmental official of the province of Ontario. At such meeting or at any subsequent meeting the duly designated representatives shall adopt a compact agreement not inconsistent in any way with this part and containing the necessary provisions for enabling the commission to carry out the purposes of this part. At such meeting or at subsequent meetings, the representatives composing such commission shall select a chairman and a secretary from among their numbers and such other officers as to them may seem expedient and shall prescribe the duties of such officers. A 2/3 majority of all representatives designated shall be sufficient to form a quorum for the transaction of business. Said commission shall meet from time to time or at such places or locations as it shall seem necessary and proper or shall meet upon the call of the chairman and such call shall designate the time and place of meeting and the purpose thereof.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.32106 Compact; commission; records of meetings and proceedings; reports.

Sec. 32106. Said commission shall keep a written record of its meetings and proceedings and shall annually make a report thereof to be submitted to the duly designated official of each compacting party.

Popular name: NREPA

324.32107 Compact commission; expenses.

Sec. 32107. Each compacting party shall pay for the expenses of its representatives on said commission and each compacting party shall pay to the secretary of the commission a pro rata share of the expenses of said commission. No expenditures shall be authorized under the provisions of this part unless and until moneys shall be appropriated therefor by the legislature.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

PART 322
GREAT LAKES BASIN COMPACT

324.32201 Great Lakes basin compact; ratification; contents.

Sec. 32201. The great lakes basin compact is hereby ratified, enacted into law, and entered into by this state as a party thereto with any other state or province which, pursuant to article II of said compact, has legally joined therein in the form substantially as follows:

GREAT LAKES BASIN COMPACT

The party states solemnly agree:

Article I. Purpose

The purposes of this compact are, through means of joint or cooperative action:

1. To promote the orderly, integrated, and comprehensive development, use, and conservation of the water resources of the Great Lakes Basin (hereinafter called the Basin).

2. To plan for the welfare and development of the water resources of the Basin as a whole as well as for those portions of the Basin which may have problems of special concern.

3. To make it possible for the states of the Basin and their people to derive the maximum benefit from utilization of public works, in the form of navigational aids or otherwise, which may exist or which may be constructed from time to time.

4. To advise in securing and maintaining a proper balance among industrial, commercial, agricultural, water supply, residential, recreational, and other legitimate uses of the water resources of the Basin.

5. To establish and maintain an intergovernmental agency to the end that the purposes of this compact may be accomplished more effectively.

Article II. Enactment and Effective Date

A. This compact shall enter into force and become effective and binding when it has been enacted by the legislatures of any 4 of the states of Illinois, Indiana, Michigan, Minnesota, New York, Ohio, Pennsylvania, and Wisconsin and thereafter shall enter into force and become effective and binding as to any other of said states when enacted by the legislature thereof.

B. The Province of Ontario and the Province of Quebec, or either of them, may become states party to this compact by taking such action as their laws and the laws of the government of Canada may prescribe for adherence thereto. For the purpose of this compact the word "state" shall be construed to include a Province of Canada.

Article III. The Basin

The Great Lakes Commission created by Article IV of this compact shall exercise its powers and perform its functions in respect to the Basin which, for the purposes of this compact, shall consist of so much of the following as may be within the party states:

1. Lakes Erie, Huron, Michigan, Ontario, St. Clair, Superior, and the St. Lawrence River, together with any and all natural or man-made water interconnections between or among them.

2. All rivers, ponds, lakes, streams, and other watercourses which, in their natural state or in their prevailing condition, are tributary to Lakes Erie, Huron, Michigan, Ontario, St. Clair, and Superior or any of them or which comprise part of any watershed draining into any of said lakes.

Article IV. The Commission

A. There is hereby created an agency of the party states to be known as The Great Lakes Commission (hereinafter called the Commission). In that name the Commission may sue and be sued, acquire, hold and convey real and personal property and any interest therein. The Commission shall have a seal with the words "The Great Lakes Commission" and such other design as it may prescribe engraved thereon by which it shall authenticate its proceedings. Transactions involving real or personal property shall conform to the laws of the state in which the property is located, and the Commission may by bylaws provide for the execution and acknowledgment of all instruments in its behalf.

B. The Commission shall be composed of not less than 3 commissioners nor more than 5 commissioners from each party state designated or appointed in accordance with the law of the state which they represent and serving and subject to removal in accordance with such law.

C. Each state delegation shall be entitled to 3 votes in the Commission. The presence of commissioners from a majority of the party states shall constitute a quorum for the transaction of business at any meeting of the Commission. Actions of the Commission shall be by a majority of the votes cast except that any recommendations made pursuant to Article VI of this compact shall require an affirmative vote of not less than a majority of the votes cast from each of a majority of the states present and voting.

D. The commissioners of any 2 or more party states may meet separately to consider problems of particular interest to their states but no action taken at any such meeting shall be deemed an action of the Commission unless and until the Commission shall specifically approve the same.

E. In the absence of any commissioner, his or her vote may be cast by another representative or

commissioner of his or her state provided that said commissioner or other representative casting said vote shall have a written proxy in proper form as may be required by the Commission.

F. The Commission shall elect annually from among its members a chairman and vice-chairman. The Commission shall appoint an Executive Director who shall also act as secretary-treasurer, and who shall be bonded in such amount as the Commission may require. The Executive Director shall serve at the pleasure of the Commission and at such compensation and under such terms and conditions as may be fixed by it. The Executive Director shall be custodian of the records of the Commission with authority to affix the Commission's official seal and to attest to and certify such records or copies thereof.

G. The Executive Director, subject to the approval of the Commission in such cases as its bylaws may provide, shall appoint and remove or discharge such personnel as may be necessary for the performance of the Commission's functions. Subject to the aforesaid approval, the Executive Director may fix their compensation, define their duties, and require bonds of such of them as the Commission may designate.

H. The Executive Director, on behalf of, as trustee for, and with the approval of the Commission, may borrow, accept, or contract for the services of personnel from any state or government or any subdivision or agency thereof, from any intergovernmental agency, or from any institution, person, firm or corporation; and may accept for any of the Commission's purposes and functions under this compact any and all donations, gifts, and grants of money, equipment, supplies, materials, and services from any state or government or any subdivision or agency thereof or intergovernmental agency or from any institution, person, firm or corporation and may receive and utilize the same.

I. The Commission may establish and maintain 1 or more offices for the transacting of its business and for such purposes the Executive Director, on behalf of, as trustee for, and with the approval of the Commission, may acquire, hold and dispose of real and personal property necessary to the performance of its functions.

J. No tax levied or imposed by any party state or any political subdivision thereof shall be deemed to apply to property, transactions, or income of the Commission.

K. The Commission may adopt, amend and rescind bylaws, rules and regulations for the conduct of its business.

L. The organization meeting of the Commission shall be held within 6 months from the effective date of this compact.

M. The Commission and its Executive Director shall make available to the party states any information within its possession and shall always provide free access to its records by duly authorized representatives of such party states.

N. The Commission shall keep a written record of its meetings and proceedings and shall annually make a report thereof to be submitted to the duly designated official of each party state.

O. The Commission shall make and transmit annually to the legislature and governor of each party state a report covering the activities of the Commission for the preceding year and embodying such recommendations as may have been adopted by the Commission. The Commission may issue such additional reports as it may deem desirable.

Article V. Finance

A. The members of the Commission shall serve without compensation, but the expenses of each commissioner shall be met by the state which he or she represents in accordance with the law of that state. All other expenses incurred by the Commission in the course of exercising the powers conferred upon it by this compact unless met in some other manner specifically provided by this compact, shall be paid by the Commission out of its own funds.

B. The Commission shall submit to the executive head or designated officer of each party state a budget of its estimated expenditures for such period as may be required by the laws of that state for presentation to the legislature thereof.

C. Each of the Commission's budgets of estimated expenditures shall contain specific recommendations of the amount or amounts to be appropriated by each of the party states. Detailed commission budgets shall be recommended by a majority of the votes cast, and the costs shall be allocated equitably among the party states in accordance with their respective interests.

D. The Commission shall not pledge the credit of any party state. The Commission may meet any of its obligations in whole or in part with funds available to it under Article IV (H) of this compact, provided that the Commission takes specific action setting aside such funds prior to the incurring of any obligations to be met in whole or in part in this manner. Except where the Commission makes use of funds available to it under Article IV (H) hereof, the Commission shall not incur any obligations prior to the allotment of funds by the party states adequate to meet the same.

E. The Commission shall keep accurate accounts of all receipts and disbursements. The receipts and disbursements of the Commission shall be subject to the audit and accounting procedures established under

the bylaws. However, all receipts and disbursements of funds handled by the Commission shall be audited yearly by a qualified public accountant and the report of the audit shall be included in and become a part of the annual report of the Commission.

F. The accounts of the Commission shall be open at any reasonable time for inspection by such agency, representative or representatives of the party states as may be duly constituted for that purpose and by others who may be authorized by the Commission.

Article VI. Powers of Commission

The Commission shall have power to:

A. Collect, correlate, interpret, and report on data relating to the water resources and the use thereof in the Basin or any portion thereof.

B. Recommend methods for the orderly, efficient, and balanced development, use, and conservation of the water resources of the Basin or any portion thereof to the party states and to any other governments or agencies having interests in or jurisdiction over the Basin or any portion thereof.

C. Consider the need for and desirability of public works and improvements relating to the water resources in the Basin or any portion thereof.

D. Consider means of improving navigation and port facilities in the Basin or any portion thereof.

E. Consider means of improving and maintaining the fisheries of the Basin or any portion thereof.

F. Recommend policies relating to water resources including the institution and alteration of flood plain and other zoning laws, ordinances and regulations.

G. Recommend uniform or other laws, ordinances, or regulations relating to the development, use and conservation of the Basin's water resources to the party states or any of them and to other governments, political subdivisions, agencies, or intergovernmental bodies having interests in or jurisdiction sufficient to affect conditions in the Basin or any portion thereof.

H. Consider and recommend amendments or agreements supplementary to this compact to the party states or any of them, and assist in the formulation and drafting of such amendments or supplementary agreements.

I. Prepare and publish reports, bulletins, and publications appropriate to this work and fix reasonable sale prices therefor.

J. With respect to the water resources of the Basin or any portion thereof, recommend agreements between the governments of the United States and Canada.

K. Recommend mutual arrangements expressed by concurrent or reciprocal legislation on the part of Congress and the Parliament of Canada including but not limited to such agreements and mutual arrangements as are provided for by Article XIII of the Treaty of 1909 Relating to Boundary Waters and Questions Arising Between the United States and Canada. (Treaty Series, No. 548).

L. Cooperate with the governments of the United States and of Canada, the party states and any public or private agencies or bodies having interests in or jurisdiction sufficient to affect the Basin or any portion thereof.

M. At the request of the United States, or in the event that a Province shall be a party state, at the request of the government of Canada, assist in the negotiation and formulation of any treaty or other mutual arrangement or agreement between the United States and Canada with reference to the Basin or any portion thereof.

N. Make any recommendation and do all things necessary and proper to carry out the powers conferred upon the Commission by this compact; provided that no action of the Commission shall have the force of law in, or be binding upon, any party state.

Article VII. State Action

Each party state agrees to consider the action the Commission recommends in respect to:

A. Stabilization of lake levels.

B. Measures for combating pollution, beach erosion, floods, and shore inundation.

C. Uniformity in navigation regulations within the constitutional powers of the states.

D. Proposed navigation aids and improvements.

E. Uniformity or effective coordinating action in fishing laws and regulations and cooperative action to eradicate destructive and parasitical forces endangering the fisheries, wild life and other water resources.

F. Suitable hydroelectric power developments.

G. Cooperative programs for control of soil and bank erosion for the general improvement of the Basin.

H. Diversion of waters from and into the Basin.

I. Other measures the Commission may recommend to the states pursuant to Article VI of this compact.

Article VIII. Renunciation

This compact shall continue in force and remain binding upon each party state until renounced by act of the legislature of such state, in such form and manner as it may choose and as may be valid and effective to repeal a statute of said state; provided that such renunciation shall not become effective until 6 months after

notice of such action shall have been officially communicated in writing to the executive head of the other party states.

Article IX. Construction and Severability

It is intended that the provisions of this compact shall be reasonably and liberally construed to effectuate the purposes thereof. The provisions of this compact shall be severable and if any phrase, clause, sentence or provision of this compact is declared to be contrary to the constitution of any party state or of the United States, or in the case of a Province, to the British North America Act of 1867 as amended, or the applicability thereof to any state, agency, person or circumstance is held invalid, the constitutionality of the remainder of this compact and the applicability thereof to any state, agency, person or circumstance shall not be affected thereby, provided further that if this compact shall be held contrary to the constitution of the United States, or in the case of a Province, to the British North America Act of 1867 as amended, or of any party state, the compact shall remain in full force and effect as to the remaining states and in full force and effect as to the state affected as to all severable matters.

324.32202 Great Lakes commission; membership; oath; expenses; voting rights.

Sec. 32202. (1) For purposes of this section through section 32206, "commission" means the Great Lakes commission established in the compact entered into by this part.

(2) In pursuance of article IV of the compact, there shall be 5 commissioners on the Great Lakes commission from this state. Each commissioner shall have all of the powers conferred on a commissioner by the compact or which shall be necessary or incidental to the performance of his or her functions as a commissioner. For this state, the governor, or the governor's designee, the attorney general, or the attorney general's designee, an appointee of the majority leader of the senate, and an appointee of the speaker of the house of representatives shall be members of the Michigan representation. In addition, the governor shall appoint, with the advice and consent of the senate, the remaining 1 member who shall come from groups or organizations interested in or affected by the Great Lakes, which member shall serve at the governor's pleasure. The appointees of the governor, the majority leader of the senate, and of the speaker of the house of representatives, before entering upon the performance of their office, shall take and subscribe to the constitutional oath of office. Each commissioner shall receive necessary expenses incurred in the performance of his or her duties. Each commissioner shall have the right to cast 3/5 of a vote whenever a vote is required by the terms of the compact.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Compiler's note: For the designation of the director of the department of environment, Great Lakes, and energy as a commissioner on the Great Lakes commission, see E.R.O. 2019-1, compiled at MCL 324.99923.

324.32203 Commission; cooperation by state officers.

Sec. 32203. All officers of this state are hereby authorized and directed to do all things falling within their respective jurisdictions necessary to or incidental to the carrying out of said compact in every particular, it being hereby declared to be the policy of this state to perform and carry out the said compact and to accomplish the purposes thereof. All officers, bureaus, departments, and persons of and in the state government or administration of this state are hereby authorized and directed at reasonable times and upon request of said commission to furnish the said commission with information and data possessed by them or any of them and to aid said commission by loan of personnel or other means lying within their legal powers respectively.

PART 323
SHORELANDS PROTECTION AND MANAGEMENT

324.32301 Definitions.

Sec. 32301. As used in this part:

(a) "Connecting waterway" means the St. Marys river, Detroit river, St. Clair river, or Lake St. Clair.

(b) "Environmental area" means an area of the shoreland determined by the department on the basis of studies and surveys to be necessary for the preservation and maintenance of fish and wildlife.

(c) "High-risk area" means an area of the shoreland that is determined by the department on the basis of studies and surveys to be subject to erosion.

(d) "Land to be zoned or regulated" or "land to be zoned" means the land in this state that borders or is adjacent to a Great Lake or a connecting waterway and that, except for flood risk areas, is situated within 1,000 feet landward from the ordinary high-water mark as defined in section 32501, land bordering or adjacent to waters affected by levels of the Great Lakes landward of the ordinary high-water mark as defined by section 30101, and land between the ordinary high-water mark and the water's edge.

(e) "Shoreland" means the land, water, and land beneath the water that is in close proximity to the shoreline of a Great Lake or a connecting waterway.

(f) "Shoreline" means that area of the shorelands where land and water meet.

(g) "Flood risk area" means the area of the shoreland that is determined by the department on the basis of studies and surveys to be subject to flooding from effects of levels of the Great Lakes and is not limited to 1,000 feet.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 2018, Act 631, Eff. Mar. 29, 2019.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Land and Water Management Division, with the exception of the farmland and open space preservation program, natural rivers program, and Michigan information resource inventory system, to the Director of the Michigan Department of Environmental Quality, see E.R.O. 324.32302 Shoreland engineering study; determinations.

Sec. 32302. By April 1, 1972, the department shall make or cause to be made an engineering study of the shoreland to determine all of the following:

(a) The high-risk areas.

(b) The areas of the shorelands that are platted or have buildings or structures and that require protection from erosion.

(c) The type of protection that is best suited for an area determined in subdivision (b).

(d) A cost estimate of the construction and maintenance for each type of protection determined in subdivision (c).

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Land and Water Management Division, with the exception of the farmland and open space preservation program, natural rivers program, and Michigan information resource inventory system, to the Director of the Michigan Department of Environmental Quality, see E.R.O. 324.32312 Rules; fee required with permit application or project; disposition of fees; violation; restraining order.

Sec. 32312. (1) To regulate the uses and development of high-risk areas, flood risk areas, and environmental areas and to implement the purposes of this part, the department shall promulgate rules. If permits are required under rules promulgated under this part, the permits must be issued pursuant to the rules and part 13. Except as provided under subsection (2), until October 1, 2025, if permits are required pursuant to rules promulgated under this part, an application for a permit must be accompanied by a fee as follows:

(a) For a commercial or multifamily residential project, $500.00.

(b) For a single-family home construction, $100.00.

(c) For an addition to an existing single-family home or for a project that has a minor impact on fish and wildlife resources in environmental areas as determined by the department, $50.00.

(2) A project that requires review and approval under this part and under 1 or more of the following is subject to only the single highest permit fee required under this part or the following:

(a) Part 301.

(b) Part 303.

(c) Part 325.

(d) Section 3104.

(e) Section 117 of the land division act, 1967 PA 288, MCL 560.117.

(3) The department shall forward fees collected under this section to the state treasurer for deposit in the land and water management permit fee fund created in section 30113.

(4) A circuit court, upon petition and a showing by the department that a rule promulgated under

subsection (1) has been violated, shall issue any necessary order to the defendant to correct the violation or to restrain the defendant from further violation of the rule.

324.32313 Use and management plan; contents; hearings; submission of plan copies to governor and legislature.

Sec. 32313. (1) By October 1, 1972, the department shall, in compliance with the purposes of this part, prepare a plan for the use and management of shoreland. The plan shall include but not be limited to all of the following:

(a) An inventory and identification of the use and development characteristics of the shoreland; the general physical and man-influenced shoreline features; the existing and proposed municipal and industrial water intakes and sewage and industrial waste outfalls; and high-risk areas and environmental areas.

(b) An inventory of existing federal, state, regional, and local plans for the management of the shorelands.

(c) An identification of problems associated with shoreland use, development, conservation, and protection.

(d) A provision for a continuing inventory of shoreland and estuarine resources.

(e) Provisions for further studies and research pertaining to shoreland management.

(f) Identification of the high-risk and environmental areas that need protection.

(g) Recommendations that do all of the following:

(*i*) Provide procedures for the resolution of conflicts arising from multiple use.

(*ii*) Foster the widest variety of beneficial uses.

(*iii*) Provide for the necessary enforcement powers to assure compliance with plans and to resolve conflicts in uses.

(*iv*) Provide criteria for the protection of shorelands from erosion or inundation, for aquatic recreation, for shore growth and cover, for low-lying lands, and for fish and game management.

(*v*) Provide criteria for shoreland layout for residential, industrial, and commercial development, and shoreline alteration control.

(*vi*) Provide for building setbacks from the water.

(*vii*) Provide for the prevention of shoreland littering, blight harbor development, and pollution.

(*viii*) Provide for the regulation of mineral exploration and production.

(*ix*) Provide the basis for necessary future legislation pertaining to efficient shoreland management.

(2) Upon completion of the plan, the department shall hold regional public hearings on the recommendations of the plan. Copies of the plan shall be submitted with the hearing records to the governor and the legislature.

324.32314 Agreements and contracts.

Sec. 32314. The department may enter into an agreement or make contracts with the federal government, other state agencies, local units of government, or private agencies for the purposes of making studies and plans for the efficient use, development, preservation, or management of the state's shoreland resources. Any study, plan, or recommendation shall be available to a local unit of government in this state that has shoreland. The recommendations and policies set forth in the studies or plans shall serve as a basis and guideline for establishing zoning ordinances and developing shoreland plans by local units of government and

the department.

PART 325
GREAT LAKES SUBMERGED LANDS

324.32501 Additional definitions.

Sec. 32501. As used in this part:

(a) "Department" means the department of environmental quality.

(b) "Director" means the director of the department.

(c) "Marina purposes" means an operation making use of submerged bottomlands or filled-in bottomlands of the Great Lakes for the purpose of service to boat owners or operators, which operation may restrict or prevent the free public use of the affected bottomlands or filled-in lands.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 2003, Act 14, Imd. Eff. June 5, 2003;—Am. 2012, Act 247, Imd. Eff. July 2, 2012.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Land and Water Management Division, with the exception of the farmland and open space preservation program, natural rivers program, and Michigan information resource inventory system, to the Director of the Michigan Department of Environmental Quality, see E.R.O. Popular name: Act 451

Popular name: NREPA

324.32502 Unpatented lake bottomlands and unpatented made lands in Great Lakes; construction of part.

Sec. 32502. The lands covered and affected by this part are all of the unpatented lake bottomlands and unpatented made lands in the Great Lakes, including the bays and harbors of the Great Lakes, belonging to the state or held in trust by it, including those lands that have been artificially filled in. The waters covered and affected by this part are all of the waters of the Great Lakes within the boundaries of the state. This part shall be construed so as to preserve and protect the interests of the general public in the lands and waters described in this section, to provide for the sale, lease, exchange, or other disposition of unpatented lands and the private or public use of waters over patented and unpatented lands, and to permit the filling in of patented submerged lands whenever it is determined by the department that the private or public use of those lands and waters will not substantially affect the public use of those lands and waters for hunting, fishing, swimming, pleasure boating, or navigation or that the public trust in the state will not be impaired by those agreements for use, sales, lease, or other disposition. The word "land" or "lands" as used in this part refers to the aforesaid described unpatented lake bottomlands and unpatented made lands and patented lands in the Great Lakes and the bays and harbors of the Great Lakes lying below and lakeward of the natural ordinary high-water mark, but this part does not affect property rights secured by virtue of a swamp land grant or rights acquired by accretions occurring through natural means or reliction. For purposes of this part, the ordinary high-water mark shall be at the following elevations above sea level, international Great Lakes datum of 1955: Lake Superior, 601.5 feet; Lakes Michigan and Huron, 579.8 feet; Lake St. Clair, 574.7 feet; and Lake Erie, 571.6 feet.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Land and Water Management Division, with the exception of the farmland and open space preservation program, natural rivers program, and Michigan information resource inventory system, to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

324.32503 Agreements pertaining to waters over and filling in of submerged patented lands; lease or deed of unpatented lands; terms, conditions, and requirements; reservation of mineral rights; exception; lease or deed allowing drilling operations for exploration of oil or gas purposes; execution of agreement, lease, or deed with United States.

Sec. 32503. (1) Except as otherwise provided in this section, the department, after finding that the public trust in the waters will not be impaired or substantially affected, may enter into agreements pertaining to waters over and the filling in of submerged patented lands, or to lease or deed unpatented lands, after approval of the state administrative board. Quitclaim deeds, leases, or agreements covering unpatented lands may be issued or entered into by the department with any person, and shall contain such terms, conditions, and requirements as the department determines to be just and equitable and in conformance with the public trust. The department shall reserve to the state all mineral rights, including, but not limited to, coal, oil, gas, sand, gravel, stone, and other materials or products located or found in those lands, except where lands are occupied or to be occupied for residential purposes at the time of conveyance.

(2) The department shall not enter into a lease or deed that allows drilling operations beneath unpatented lands for the exploration or production of oil or gas.

(3) An agreement, lease, or deed entered into under this part by the department with the United States shall be entered into and executed pursuant to the property rights acquisition act, 1986 PA 201, MCL 3.251 to 3.262.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 2002, Act 148, Imd. Eff. Apr. 5, 2002;—Am. 2004, Act 325, Imd. Eff. Sept. 10, 2004;—Am. 2012, Act 247, Imd. Eff. July 2, 2012.

Compiler's note: Enrolled House Bill No. 5118 was not signed by the Governor, but, having been presented to him at 3:44 p.m. on March 22, 2002, and not having been returned by him to the House of Representatives within the 14 days prescribed by Const 1963, art IV, sec 33, became law (2002 PA 148) on April 5, 2002, the Legislature having continued in session.

Popular name: NREPA

324.32504 Unpatented lake lands and unpatented made lands; application for conveyance; contents; qualifications of applicant; consent; approval; fee.

Sec. 32504. (1) Application for a deed or lease to unpatented lands or agreement for use of water areas over patented lands shall be on forms provided by the department. An application shall include a surveyed description of the lands or water area applied for, together with a surveyed description of the riparian or littoral property lying adjacent and contiguous to the lands or water area, certified to by a registered land surveyor. The description shall show the location of the water's edge at the time it was prepared and other information that is required by the department. The applicant shall be a riparian or littoral owner or owners of property touching or situated opposite the unpatented land or water area over patented lands applied for or an occupant of that land. The application shall include the names and mailing addresses of all persons in possession or occupancy or having an interest in the adjacent or contiguous riparian or littoral property or having riparian or littoral rights or interests in the lands or water areas applied for, and the application shall be accompanied by the written consent of all persons having an interest in the lands or water areas applied for in the application.

(2) Before an application is acted upon by the department, the applicant shall secure approval of or permission for his or her proposed use of such lands or water area from any federal agency as provided by law, the department with the advice of the Michigan waterways commission, and the legislative body of the local unit or units of government within which such land or water area is or will be included, or to which it is contiguous or adjacent. A deed, lease, or agreement shall not be issued or entered into by the department without such approvals or permission. The department may also require the applicant to furnish an abstract of title and ownership, and a 20-year tax history on the riparian or littoral property that is contiguous or adjacent to the lands or water area applied for, as well as on the lands applied for, if available.

(3) The department shall require the applicant to deposit a fee of not less than $50.00 for each application filed. The fee shall be deposited with the state treasurer to the credit of the state's general fund. If a deed, lease, or other agreement is approved by the department, the applicant is entitled to credit for the fee against the consideration that is paid for the deed, lease, or other agreement.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.32504a Restoration or maintenance of lighthouse; lease or agreement for use of lands;

"approved organization" defined.

Sec. 32504a. (1) The department may accept an application under this part from an approved organization, whether or not the approved organization is a riparian landowner, and may enter into a lease or agreement for the use of lands described in section 32502 on which a lighthouse is located, including the use of water over those lands immediately adjacent to the lighthouse.

(2) As used in this section, "approved organization" means a lawful nonprofit entity as approved by the department, a local unit of government, a federal or state agency or department, an educational agency, or a community development organization, that is seeking to secure a lease or agreement under this section for the purpose of restoring or maintaining a lighthouse.

History: Add. 2002, Act 650, Imd. Eff. Dec. 23, 2002.

Popular name: Act 451

Popular name: NREPA

324.32505 Unpatented lake bottomlands and unpatented made lands; consideration for conveyances or lease.

Sec. 32505. (1) If the department determines that it is in the public interest to grant an applicant a deed or lease to lands or enter into an agreement to allow use and improvements in the waters or to enter into any other agreement in regard thereto, the department shall determine the amount of consideration to be paid to this state by the applicant for the conveyance or lease of unpatented lands.

(2) The department may allow, by lease or agreement, the filling in of patented and unpatented submerged lands and allow permanent improvements and structures after finding that the public trust will not be impaired or substantially injured.

(3) The department may issue deeds or may enter into leases of unpatented lands if the lands have been artificially filled in or are proposed to be changed from the condition that exists on October 14, 1955 by filling, sheet piling, shoring, or by any other means, and the lands are used or to be used or occupied in whole or in part for uses other than existing, lawful riparian or littoral purposes. The consideration to be paid to this state for the conveyance or lease of unpatented lands by the applicant shall be not less than the fair, cash market value of the lands determined as of the date of the filing of the application, minus any improvements placed on the lands, but the sale price shall not be less than 30% of the value of the land. In determining the fair, cash market value of the lands applied for, the department may consider the fact that the lands are connected with the riparian or littoral property belonging to the applicant, and the uses, including residential and commercial, being made or which can be made of the lands.

(4) Agreements for the lands or water area described in section 32502 may be granted to or entered into with local units of government for public purposes. The agreements may contain terms and conditions considered just and equitable given the public trust involved and may grant permission to fill those lands as necessary.

(5) If unpatented lands have not been filled in or in any way substantially changed from their natural character and the application to acquire or lease those lands is filed for the purpose of flood control, shore erosion control, drainage and sanitation control, or to straighten irregular shore lines, then the consideration to be paid to this state by the applicant shall be the fair, cash value of the land, giving due consideration to its being adjacent to and connected with the riparian or littoral property owned by the applicant.

(6) Leases or agreements covering unpatented lands may be granted or entered into with riparian or littoral proprietors for commercial marina purposes or for marinas operated by persons for consideration and containing terms and conditions considered by the department to be just and equitable. The leases may include either filled or unfilled lake bottomlands, or both. Rental shall commence as of the date of use of the unpatented lands for the marina operations. Dockage and other uses by marinas in waters over patented lands on October 14, 1955 shall be considered to be lawful riparian or littoral use.

(7) The department may enter into a lease with the owner of riparian or littoral property, occupied only for single-family residential purposes, to use the abutting unpatented lake bottomlands and waters over those bottomlands for a private harbor if all of the following conditions are met:

(a) The private harbor was formed by a breakwater erected on unpatented lake bottomlands.

(b) The private harbor is used exclusively for private, noncommercial recreational watercraft.

(c) The full-term of the lease is 50 years consisting of two 25-year terms.

(d) The consideration for the lease is as follows:

(*i*) For a lease entered into on or after the effective date of the amendatory act that amended this section, a lump-sum payment at the beginning of the first 25-year term of the agreement of 0.5% of twice the current state equalized value of the lessee's upland riparian or littoral property or payment of the lump sum pursuant

to a schedule as agreed by the department, and a lump-sum payment at the beginning of the second 25-year term of the agreement of 0.5% of twice the current state equalized value of the lessee's upland riparian or littoral property or payment of the lump sum pursuant to a schedule as agreed by the department.

(*ii*) Unless otherwise requested by the lessee and agreed to by the department, for a lease entered into prior to the effective date of the amendatory act that amended this section, the department shall credit any lease payment made in 2016 against the future payments owed under the terms of subparagraph (*i*).

(8) If the department after investigation determines that an applicant to acquire or lease lands has willfully and knowingly filled in or in any way substantially changed the lands with an intent to defraud, or if the applicant has acquired the lands with knowledge of such a fraudulent intent and is not an innocent purchaser, the consideration shall be the fair, cash market value of the land or leasehold. An applicant may request a hearing of a determination made under this subsection. The department shall grant a hearing if requested.

324.32506 Unpatented lands and unpatented made lands; value determination by department; appraisal; decision of court.

Sec. 32506. The fair, cash market value of lands approved for sale under this part shall be determined by the department. Consideration paid to the state shall not be less than $50.00. If the applicant is not satisfied with the value determined by the department, within 30 days after the receipt of the determination he or she may submit a petition in writing to the circuit court of the county in which the lands are located, and the court shall appoint an appraiser or appraisers as the court shall determine for an appraisal of the lands. The decision of the court is final.

324.32507 Receipts; disposition; accounting; employees.

Sec. 32507. (1) All money received by the department from the sale, lease, or other disposition of land and water areas under this part shall be forwarded to the state treasurer and be credited to the land and water management permit fee fund created in section 30113.

(2) The department shall comply with the accounting laws of this state and the requirements with respect to submission of budgets. The department may hire employees, assistants, and services that may be necessary within the appropriation made by the legislature and may delegate this authority as may be necessary to implement this part.

324.32510 Land filled, excavated, or modified without approval; misdemeanor; penalty; issuance or service of appearance ticket; "minor offense" defined.

Sec. 32510. (1) Except as provided in subsection (2), a person who excavates or fills or in any manner

alters or modifies any of the land or waters subject to this part without the approval of the department is guilty of a misdemeanor, punishable by imprisonment for not more than 1 year or a fine of not more than $1,000.00, or both. Land altered or modified in violation of this part shall not be sold to any person convicted under this section at less than fair, cash market value.

(2) A person who commits a minor offense is guilty of a misdemeanor, punishable by a fine of not more than $500.00 for each violation. A law enforcement officer may issue and serve an appearance ticket upon a person for a minor offense pursuant to sections 9a to 9g of chapter IV of the code of criminal procedure, Act No. 175 of the Public Acts of 1927, being sections 764.9a to 764.9g of the Michigan Compiled Laws.

(3) As used in this section, "minor offense" means either of the following violations of this part if the department determines that restoration of the affected property is not required:

(a) The failure to obtain a permit under this part.

(b) A violation of a permit issued under this part.

324.32512 Acts prohibited; exceptions; activities not subject to regulation; applicability of subsection (2) to certain lands.

Sec. 32512. (1) Except as provided in subsection (2), unless a permit has been granted by the department pursuant to part 13 or authorization has been granted by the legislature, or except as to boat wells and slips facilitating private, noncommercial, recreational boat use, not exceeding 50 feet in length where the spoil is not disposed of below the ordinary high-water mark of the body of water to which it is connected, a person shall not do any of the following:

(a) Construct, dredge, commence, or do any work with respect to an artificial canal, channel, ditch, lagoon, pond, lake, or similar waterway where the purpose is ultimate connection of the waterway with any of the Great Lakes, including Lake St. Clair.

(b) Connect any natural or artificially constructed waterway, canal, channel, ditch, lagoon, pond, lake, or similar waterway with any of the Great Lakes, including Lake St. Clair, for navigation or any other purpose.

(c) Dredge or place spoil or other material on bottomland.

(d) Construct a marina.

(2) Except as provided in subsection (3), the following activities are not subject to regulation under this part:

(a) Leveling of sand, removal of vegetation, grooming of soil, or removal of debris, in an area of unconsolidated material predominantly composed of sand, rock, or pebbles, located between the ordinary high-water mark and the water's edge.

(b) Mowing of vegetation between the ordinary high-water mark and the water's edge.

(3) Subsection (2) does not apply to lands included in the survey of the delta of the St. Clair River, otherwise referred to as the St. Clair flats, located within Clay township, St. Clair county, as provided for in 1899 PA 175.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 2003, Act 14, Imd. Eff. June 5, 2003;—Am. 2012, Act 247, Imd. Eff. July 2, 2012.

324.32512a Minor project categories; activities; conditions; application; notice; general permit.

Sec. 32512a. (1) After providing notice and an opportunity for a public hearing, the department shall establish minor project categories of activities that are similar in nature, have minimal adverse environmental

effects when performed separately, and will have only minimal cumulative adverse effects on the environment. The department may act upon an application received pursuant to section 32513 for an activity within a minor project category without providing notice pursuant to section 32514. A minor project category shall not be valid for more than 5 years, but may be reestablished. All other provisions of this part, except provisions applicable only to general permits, are applicable to a minor project.

(2) The department, after notice and opportunity for a public hearing, shall issue general permits on a statewide basis or within a local unit of government for a category of activities if the department determines that the activities are similar in nature, will cause only minimal adverse environmental effects when performed separately, and will have only minimal cumulative adverse effects on the environment. A general permit shall be based on the requirements of this part and the rules promulgated under this part, and shall set forth the requirements and standards that shall apply to an activity authorized by the general permit. Before authorizing a specific project to proceed under a general permit, the department may provide notice pursuant to section 32514 but shall not hold a public hearing and shall not typically require a site inspection. A general permit shall not be valid for more than 5 years, but may be reissued.

History: Add. 2003, Act 14, Imd. Eff. June 5, 2003;—Am. 2009, Act 120, Eff. Nov. 6, 2009;—Am. 2012, Act 247, Imd. Eff. July 2, 2012.

Compiler's note: Enacting section 1 of Act 120 of 2009 provides:

"Enacting section 1. This amendatory act does not take effect unless both of the following requirements are met:

"(a) $4,000,000.00 from the cleanup and redevelopment trust fund created in section 3e of 1976 IL 1, MCL 445.573e, and $4,000,000.00 from the community pollution prevention fund created in section 3f of 1976 IL 1, MCL 445.573f, is appropriated by the legislature to the environmental protection fund created in section 503a of the natural resources and environmental protection act, 1994 PA 451, MCL 324.503a.

"(b) $2,000,000.00 is appropriated by the legislature from the environmental protection fund to support the program under part 303 of the natural resources and environmental protection act, 1994 PA 451, MCL 324.30301 to 324.30329."

Popular name: Act 451

Popular name: NREPA

324.32513 Application for permit; contents; fees; disposition of fees.

Sec. 32513. (1) To obtain a permit for any activity specified in section 32512, a person shall file an application with the department on a form provided by the department. The application must include all of the following:

(a) The name and address of the applicant.

(b) The legal description of the lands included in the project.

(c) A summary statement of the purpose of the project.

(d) A map or diagram showing the proposal on an adequate scale with contours and cross-section profiles of any waterway to be constructed.

(e) Other information required by the department.

(2) Except as provided in subsections (3) and (4), until October 1, 2025, an application for a permit under this section must be accompanied by the following fee, as applicable:

(a) For a project in a category of activities for which a general permit is issued under section 32512a(2), a fee of $50.00.

(b) For activities included in a minor project category established under section 32512a(1), a fee of $100.00.

(c) For construction or expansion of a marina, a fee of:

(*i*) $50.00 for an expansion of 1-10 marina slips to an existing permitted marina.

(*ii*) $100.00 for a new marina with 1-10 proposed marina slips.

(*iii*) $250.00 for an expansion of 11-50 marina slips to an existing permitted marina, plus $10.00 for each marina slip over 50.

(*iv*) $500.00 for a new marina with 11-50 proposed marina slips, plus $10.00 for each marina slip over 50.

(*v*) $1,500.00 if an existing permitted marina proposes maintenance dredging of 10,000 cubic yards or more, unless the dredge material is determined through testing to be 90% or more sand, or the addition of seawalls, bulkheads, or revetments of 500 feet or more.

(d) For major projects other than a project described in subdivision (c)(*v*), involving any of the following, a fee of $2,000.00:

(*i*) Dredging of 10,000 cubic yards or more, unless the dredge material is determined through testing to be 90% or more sand.

(*ii*) Filling of 10,000 cubic yards or more.

(*iii*) Seawalls, bulkheads, or revetment of 500 feet or more.

(*iv*) Filling or draining of 1 acre or more of coastal wetland.

(*v*) New dredging or upland boat basin excavation in areas of suspected contamination.

(*vi*) New breakwater or channel jetty.

(*vii*) Shore protection, such as groins and underwater stabilizers, that extend 150 feet or more on Great Lakes bottomlands.

(*viii*) New commercial dock or wharf of 300 feet or more in length.

(e) For all other projects not listed in subdivisions (a) to (d), $500.00.

(3) A project that requires review and approval under this part and 1 or more of the following is subject to only the single highest permit fee required under this part or the following:

(a) Section 3104.

(b) Part 301.

(c) Part 303.

(d) Part 323.

(e) Section 117 of the land division act, 1967 PA 288, MCL 560.117.

(4) If work is done in violation of a permit requirement under this part and restoration is not ordered by the department, the department may accept an application for a permit if the application is accompanied by a fee equal to 2 times the permit fee otherwise required under this section.

(5) The department shall forward fees collected under this section to the state treasurer for deposit into the land and water management permit fee fund created in section 30113.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 1995, Act 170, Imd. Eff. Oct. 9, 1995;—Am. 1999, Act 106, Imd. Eff. July 7, 1999;—Am. 2003, Act 14, Imd. Eff. 324.32514 Application for permit; copies to department of community health, local units, and adjacent riparian owners; objections; public hearing; notice; conditional permit; additional conditions.

Sec. 32514. (1) Upon receipt of the application, the department shall mail copies of the application to the department of community health, the clerks of the county, city, village, and township, and, if one exists, the drain commissioner of the county, in which the project or body of water affected is located, and to the adjacent riparian owners. Along with the application, the department shall include a statement that unless a written objection is filed with the department within 20 days after the mailing of the copies of the application, the department may take action to grant the application. The department may hold a public hearing on the application. If the department holds a public hearing, the department shall provide notice of the public hearing by publication in a newspaper circulated in the county and by mailing copies of the notice to the persons named in this section at least 10 days prior to the date of the public hearing.

(2) Notwithstanding subsection (1), the department may issue a conditional permit before the expiration of the 20-day period if emergency conditions warrant a project to protect property or public health, safety, or welfare. Following the 20-day period and any public hearing that is held, the department shall take into consideration additional information or objections received and may, consistent with this part, place additional conditions on the final permit.

324.32515 Artificial waterway; permit; issuance; conditions; maintenance.

Sec. 32515. If the department finds that the project will not injure the public trust or interest including fish and game habitat, that the project conforms to the requirements of law for sanitation, and that no material injury to the rights of any riparian owners on any body of water affected will result, the department shall issue

a permit authorizing enlargement of the waterway affected. The permit shall provide that the artificial waterway shall be a public waterway, except intake or discharge canals or channels on property owned, controlled, and used by a public utility. The existing and future owners of land fronting on the artificial waterway are liable for maintenance of the waterway in accordance with the conditions of the permit.

324.32515a Dredging or placing dredged spoils on bottomland; permit; conditions.

Sec. 32515a. A permit under this part to dredge or place dredged spoil on bottomland is subject to all of the following:

(a) The permit shall be valid for a period of 5 years.

(b) During the term of the permit, the department shall not require additional environmental studies or surveys unless an act of God results in significant geological or ecological changes to the permitted area.

(c) The permit shall allow, at the discretion of the applicant, open lake disposal of dredge material that is not contaminated with toxic substances as defined in R 323.1205 of the Michigan administrative code in waters at the 30-meter depth contour or deeper. However, dredge materials shall not be disposed of within a Great Lakes bottomland preserve established under part 761, a permitted submerged log removal area under part 326, or a lake trout or diporeia refuge.

History: Add. 2013, Act 87, Imd. Eff. June 28, 2013.

Popular name: Act 451

Popular name: NREPA

324.32516 Repealed. 2012, Act 247, Imd. Eff. July 2, 2012.

Compiler's note: The repealed section pertained to identification of Great Lakes and Lake St. Clair shoreline where removal of vegetation is allowed.

PART 326
GREAT LAKES SUBMERGED LOGS RECOVERY

324.32601 Definitions.

Sec. 32601. As used in this part:

(a) "Bottomlands" means land in the Great Lakes, and bays and harbors of the Great Lakes, lying below and lakeward of the ordinary high-water mark as described in section 32502.

(b) "Department" means the department of environmental quality.

(c) "Fair market value" means the price based upon the unique historical and physical properties, including, but not limited to, species, growth rates, volume, and condition of the submerged logs as calculated at dockside following delivery to shore.

(d) "Fund" means the submerged log recovery fund created in section 32610.

(e) "Great Lakes" means Lake Superior, Lake Michigan, Lake Huron, and Lake Erie, and includes Lake St. Clair.

(f) "Ordinary high-water mark" means the elevations described in section 32502. When the soil, configuration of the surface, or vegetation has been altered by human activity, the ordinary high-water mark is located where it would have been if this alteration had not occurred.

(g) "Patented lands" means any bottomlands lying within a specific government grant area, including a private claim patent or federal patent.

(h) "Riparian owner" means a person who owns frontage bordering bottomlands.

(i) "Riparian rights" means those rights that are associated with the ownership of frontage bordering bottomlands, subject to the public trust.

(j) "Submerged log" means a portion of the trunk of a felled tree that has not been further processed for any end use and is located on, in, over, or under bottomlands. Submerged log does not include a portion of a tree that is located in the Great Lakes or on, in, over, or under bottomlands that poses a navigational or safety hazard or is of no or little commercial value.

(k) "Unpatented lands" means all bottomlands except patented lands.

History: Add. 2000, Act 278, Imd. Eff. July 10, 2000.

Popular name: Act 451

Popular name: NREPA

324.32602 Submerged logs; reservation of ownership rights.

Sec. 32602. This state reserves to itself title and ownership of all submerged logs lying on or over, embedded in, or buried under unpatented lands.

History: Add. 2000, Act 278, Imd. Eff. July 10, 2000.

Popular name: Act 451

Popular name: NREPA

324.32603 Removal of submerged logs from bottomlands, patented lands, or underwater preserves; permit.

Sec. 32603. (1) A person shall not remove submerged logs from bottomlands except as authorized by a permit issued by the department pursuant to part 13.

(2) The department may issue a permit under this part to a person for the removal of submerged logs from patented lands if permission is received from the lawful owner of the patented lands.

(3) A person shall not recover, alter, or destroy abandoned property as defined in part 761 while engaging in submerged log removal operations under a submerged log removal permit issued under this part.

(4) For submerged log recovery in underwater preserves established under part 761, the department shall place reasonable conditions on submerged log removal permits to prevent damage to abandoned watercraft or other features of archaeological, historical, recreational, or environmental significance and to minimize conflicts between recreational activities within the preserve and the submerged log recovery operation.

History: Add. 2000, Act 278, Imd. Eff. July 10, 2000;—Am. 2011, Act 218, Imd. Eff. Nov. 10, 2011.

Popular name: Act 451

Popular name: NREPA

324.32604 Application for submerged log removal permit; submission; form; information; time period for submission; disposition of fees.

Sec. 32604. (1) Applications for submerged log removal permits shall be submitted before February 1 of each calendar year.

(2) An application for a submerged log removal permit shall be submitted in writing on a form provided by the department and shall include all of the following:

(a) A description of the proposed bottomland log removal area with boundaries delineated by the use of current technology such as a digital global positioning system or other technology approved by the department. The proposed bottomland log removal area shall be a contiguous area of not more than 320 acres. The area proposed shall be square or rectangular in shape, and the length shall not exceed the width by more than a factor of 6.

(b) A description of the methods to be used to raise the submerged logs, the time of year during which submerged logs will be raised, and the procedures to be used for transferring logs to the shore.

(c) Identification of any adverse environmental impacts associated with the proposed submerged log removal method.

(d) Identification of the steps proposed to mitigate any adverse environmental impacts caused by the proposed submerged log removal operation.

(e) Other information that the department considers necessary in evaluating a submerged log removal permit application.

(f) A $500.00 application fee.

(3) An application for a submerged log removal permit is not complete until all information requested on the application form and any other information requested by the department are received. Within 30 days of its receipt of an application, the department shall notify the applicant in writing if the application is deficient. The applicant shall submit the requested information to the department within 30 days after the date the notice is provided. If the applicant fails to respond within the 30-day period, the department shall deny the submerged log removal permit unless the applicant requests and the department approves an extension of time based upon the applicant's reasonable justification for the extension.

(4) Application fees received under this section shall be forwarded to the state treasurer for deposit into the fund.

History: Add. 2000, Act 278, Imd. Eff. July 10, 2000;—Am. 2011, Act 218, Imd. Eff. Nov. 10, 2011.

Popular name: Act 451

Popular name: NREPA

324.32605 Receipt of completed application; review by department; issuance of permit;

conditions.

Sec. 32605. Upon receiving a complete application for a submerged log removal permit, the department shall do both of the following:

(a) Place the application on public notice for a 20-day period for review and comment.

(b) Submit a copy to the department of natural resources and the department of state for their review and comment.

History: Add. 2000, Act 278, Imd. Eff. July 10, 2000.

Popular name: Act 451

Popular name: NREPA

324.32606 Department review of application; issuance; limitation; time period for making decision; conditions; notification of approval or denial; disposition of fees.

Sec. 32606. (1) The department shall review each complete application received for a submerged log removal permit and shall not issue a permit unless the department determines both of the following:

(a) That any adverse impacts, including, but not limited to, impacts to the environment, natural resources, riparian rights, and the public trust are minimal and will be mitigated to the extent practicable.

(b) That the proposed activity will not unreasonably affect the public health, safety, and welfare.

(2) The department may determine that certain areas within a proposed bottomland log removal area described in an application for a submerged log removal permit shall not be authorized for submerged log removal based upon adverse impacts, including, but not limited to, adverse impacts to the environment, natural resources, riparian rights, and the public trust.

(3) The department shall make a decision on whether or not to issue a submerged log removal permit under this part within 90 days after the close of the review and comment period under section 32605 or, if a public hearing is held under section 32608, within 90 days after the date of that public hearing.

(4) If the department issues a submerged log removal permit, the department shall condition the permit on compliance with both of the following:

(a) The permittee has provided the department with a $3,000.00 log recovery fee.

(b) The permittee has provided the department a bond as required in section 32607(7).

(5) The department shall notify the applicant in writing within 10 days after the date the department approves or denies a submerged log removal permit under this section.

(6) The department shall forward log recovery fees received under this subsection to the state treasurer for deposit into the Great Lakes fund created in section 32611.

History: Add. 2000, Act 278, Imd. Eff. July 10, 2000;—Am. 2011, Act 218, Imd. Eff. Nov. 10, 2011.

Popular name: Act 451

Popular name: NREPA

324.32607 Submerged log removal permit; overlaps; expiration; transfer; bond; termination; "bond" defined.

Sec. 32607. (1) The department shall not authorize the same bottomland log removal area in more than 1 submerged log removal permit at any 1 time.

(2) The department may modify the boundaries of a proposed bottomland log removal area in a submerged log removal permit to avoid overlaps with other active submerged log removal permits or adverse impacts, including, but not limited to, impacts to the environment, natural resources, riparian rights, and the public trust.

(3) A submerged log removal plan approved by the department shall be included in each submerged log removal permit.

(4) A submerged log removal permit shall contain terms and conditions that are determined by the department to protect the environment, natural resources, riparian rights, and the public trust.

(5) Each submerged log removal permit shall expire 5 years after the date the permit is issued. However, a submerged log removal permit issued prior to the effective date of the 2011 amendatory act that amended this section expires 5 years after the effective date of the 2011 amendatory act that amended this section. If federal approval is required, an applicant shall notify the department of the date on which the federal government issued its approval for the submerged log removal permit.

(6) A submerged log removal permit issued under this section is not transferrable unless the transfer is approved in writing by the department.

(7) An applicant for a submerged log removal permit shall provide a bond acceptable to the department in the amount of not less than $10,000.00 or more than $100,000.00 as required by the department, based upon

permit conditions including costs of restoration and payments under section 32609. Except as provided in subsection (8), the term of the bond shall extend for 1 year following the expiration of the submerged log removal permit. The bond shall be provided to the department at least 10 days prior to beginning submerged log removal in a bottomland log removal area. The bond shall ensure compliance with the submerged log removal permit and all required payments under section 32609. If a submerged log removal permit is terminated under subsection (8), the department shall issue a written statement releasing the permittee or bonding company, or both, upon satisfaction of the department as to the compliance of the permittee with the terms and conditions of the permit and satisfaction of all payments as required in section 32609.

(8) A permittee may request, in writing, and the department may grant, termination of a submerged log removal permit prior to the expiration date, including release from quarterly reports and bond requirements.

(9) As used in this section, "bond" means a performance bond from a surety company authorized to transact business in this state or an irrevocable letter of credit, in favor of the department.

Popular name: Act 451

Popular name: NREPA

324.32608 Application for submerged log removal permit; hearing.

Sec. 32608. (1) The department may hold a public hearing on an application for a submerged log removal permit if the department desires additional information before making a decision on the permit application, or upon request, if such request is made within the public notice period.

(2) An applicant for a submerged log removal permit or a riparian owner who is aggrieved by an action or inaction of the department under this part may request a formal hearing on the matter, pursuant to the administrative procedures act of 1969, 1969 PA 306, MCL 24.201 to 24.328, within 60 days of the notice of the department's decision.

History: Add. 2000, Act 278, Imd. Eff. July 10, 2000.

Popular name: Act 451

Popular name: NREPA

324.32609 Sawlog stumpage value; reservation of payments; "sawlog stumpage value" defined; report and payments due; disposition of payments; overdue payment.

Sec. 32609. (1) The state reserves a payment of 15% of the sawlog stumpage value of each submerged log that is removed from unpatented lands. As used in this subsection, "sawlog stumpage value" means the price received from recovered submerged logs.

(2) The holder of a submerged log removal permit under this part shall provide the department with a detailed report and all payments due under this section within 30 days after the close of each calendar quarter. The report shall include an accurate scaling at dockside of all submerged logs removed, by species. The permittee shall provide for an independent agent, approved by the department in writing, to conduct the scaling and species determination.

(3) All payments received under this section shall be forwarded to the state treasurer for deposit into the fund.

(4) After a permittee is notified in writing that a payment under this section is overdue, the department may order suspension of the submerged log removal permit until the payment is submitted in full. The permittee shall not resume submerged log removal operations until the department provides written authorization for the operations to resume.

History: Add. 2000, Act 278, Imd. Eff. July 10, 2000;—Am. 2011, Act 218, Imd. Eff. Nov. 10, 2011.

Popular name: Act 451

Popular name: NREPA

324.32610 Submerged log recovery fund.

Sec. 32610. (1) The submerged log recovery fund is created within the state treasury.

(2) The state treasurer may receive money or other assets from any source for deposit into the fund. The state treasurer shall direct the investment of the fund. The state treasurer shall credit to the fund interest and earnings from fund investments.

(3) Money in the fund at the close of the fiscal year shall remain in the fund and shall not lapse to the general fund.

(4) Subject to subsection (5), money from the fund shall be used, upon appropriation, for the administrative costs of the department, the department of natural resources, and the department of state in implementing this

part.

(5) On December 1, 2001 and on December 1 of each following year, the state treasurer shall transfer the balance of the fund as follows:

(a) Fifty percent to the Great Lakes fund created in section 32611.

(b) Fifty percent to the forest development fund established under section 50507.

History: Add. 2000, Act 277, Imd. Eff. July 10, 2000.

Popular name: Act 451

Popular name: NREPA

324.32611 Great Lakes fund.

Sec. 32611. (1) The Great Lakes fund is created within the state treasury.

(2) The state treasurer may receive money or other assets from any source for deposit into the Great Lakes fund. The state treasurer shall direct the investment of the Great Lakes fund. The state treasurer shall credit to the Great Lakes fund interest and earnings from Great Lakes fund investments.

(3) Money in the Great Lakes fund at the close of the fiscal year shall remain in the Great Lakes fund and shall not lapse to the general fund.

(4) The department shall expend money from the Great Lakes fund, upon appropriation, only for environmental projects related to the Great Lakes and areas contiguous to the Great Lakes including, but not limited to, the prevention and management of nonnative species, coastal wetland restoration, contaminated sediment cleanup, and underwater preserve management, and for the administration of this part.

History: Add. 2000, Act 277, Imd. Eff. July 10, 2000;—Am. 2011, Act 218, Imd. Eff. Nov. 10, 2011.

Popular name: Act 451

Popular name: NREPA

324.32612 Violation; civil action; remedies; civil fine.

Sec. 32612. (1) The department may bring a civil action against a person in the circuit court of the county in which a violation occurs or in Ingham county circuit court to do 1 or more of the following:

(a) Enforce compliance with this part and the rules promulgated under this part.

(b) Restrain a violation of this part or the rules promulgated under this part.

(c) Enjoin the further performance of, or order the removal of, any project that is undertaken contrary to this part or the rules promulgated under this part.

(d) Enforce a permit issued under this part.

(e) Order the restoration of an area affected by a violation of this part or the rules promulgated under this part to its prior condition.

(2) In an action brought under this section, the circuit court, in addition to any other relief granted, may assess a civil fine of not more than $5,000.00 per day for each day of violation of this part or the rules promulgated under this part.

(3) Any civil fine or remedy assessed, sought, or agreed to by the department shall be appropriate to the violation.

(4) Civil fines recovered under this section shall be forwarded to the state treasurer for deposit into the fund.

History: Add. 2000, Act 278, Imd. Eff. July 10, 2000.

Popular name: Act 451

Popular name: NREPA

324.32613 Violation as misdemeanor; penalties.

Sec. 32613. (1) A person who does any of the following is guilty of a misdemeanor punishable by a fine of not more than $10,000.00 per day for each day of violation:

(a) Violates this part or a rule promulgated under this part.

(b) Violates a permit issued under this part.

(c) Makes a false statement, representation, or certification in an application for or with regard to a permit or in a notice or report required by a permit.

(d) Renders inaccurate any monitoring device or method required to be maintained by a permit.

(2) In addition to any other penalty provided in this section, a court shall order a person convicted under this section to return to the state any logs removed from bottomlands in violation of this part or the rules promulgated under this part, or to compensate the state for the full market value of the logs. If the person convicted under this section had been issued a permit under this part, the permit is void as of the date of conviction.

PART 327
GREAT LAKES PRESERVATION

324.32701 Definitions; retention of established baseline capacity.

Sec. 32701. (1) As used in this part:

(a) "Adverse resource impact" means any of the following:

(*i*) Until February 1, 2009, decreasing the flow of a river or stream by part of the index flow such that the river's or stream's ability to support characteristic fish populations is functionally impaired.

(*ii*) Beginning February 1, 2009, subject to subparagraph (*vi*), decreasing the flow of a cold river system by part of the index flow as follows:

(A) For a cold stream, the withdrawal will result in a 3% or more reduction in the density of thriving fish populations as determined by the thriving fish curve.

(B) For a cold small river, the withdrawal will result in a 1% or more reduction in the density of thriving fish populations as determined by the thriving fish curve.

(*iii*) Beginning February 1, 2009, subject to subparagraph (*vi*), decreasing the flow of a cold-transitional river system by part of the index flow such that the withdrawal will result in a 5% or more reduction in the density of thriving fish populations as determined by the thriving fish curve.

(*iv*) Beginning February 1, 2009, subject to subparagraph (*vi*), decreasing the flow of a cool river system by part of the index flow as follows:

(A) For a cool stream, the withdrawal will result in a 10% or more reduction in the abundance of characteristic fish populations as determined by the characteristic fish curve.

(B) For a cool small river, the withdrawal will result in a 15% or more reduction in the density of thriving fish populations as determined by the thriving fish curve.

(C) For a cool large river, the withdrawal will result in a 12% or more reduction in the density of thriving fish populations as determined by the thriving fish curve.

(*v*) Beginning February 1, 2009, subject to subparagraph (*vi*), decreasing the flow of a warm river system by part of the index flow as follows:

(A) For a warm stream, the withdrawal will result in a 5% or more reduction in the abundance of characteristic fish populations as determined by the characteristic fish curve.

(B) For a warm small river, the withdrawal will result in a 10% or more reduction in the abundance of characteristic fish populations as determined by the characteristic fish curve.

(C) For a warm large river, the withdrawal will result in a 10% or more reduction in the abundance of characteristic fish populations as determined by the characteristic fish curve.

(*vi*) Beginning February 1, 2009, decreasing the flow of a stream or river by more than 25% of its index flow.

(*vii*) Decreasing the level of a lake or pond with a surface area of 5 acres or more through a direct withdrawal from the lake or pond in a manner that would impair or destroy the lake or pond or the uses made of the lake or pond, including the ability of the lake or pond to support characteristic fish populations, or such that the ability of the lake or pond to support characteristic fish populations is functionally impaired. As used in this subparagraph, lake or pond does not include a retention pond or other artificially created surface water body.

(b) "Agricultural purpose" means the agricultural production of plants and animals useful to human beings and includes, but is not limited to, forages and sod crops, grains and feed crops, field crops, dairy animals and

dairy products, poultry and poultry products, cervidae, livestock, including breeding and grazing, equine, fish and other aquacultural products, bees and bee products, berries, herbs, fruits, vegetables, flowers, seeds, grasses, nursery stock, trees and tree products, mushrooms, and other similar products, or any other product, as determined by the commission of agriculture, that incorporates the use of food, feed, fiber, or fur.

(c) "Assessment tool" means the water withdrawal assessment tool provided for in section 32706a.

(d) "Baseline capacity", subject to subsection (2), means any of the following, which shall be considered the existing withdrawal approval amount under section 4.12.2 of the compact:

(*i*) The following applicable withdrawal capacity as reported to the department or the department of agriculture, as appropriate, by the person making the withdrawal in the annual report submitted under section 32707 not later than April 1, 2009 or in the water use conservation plan submitted under section 32708 not later than April 1, 2009:

(A) Unless reported under a different provision of this subparagraph, for a quarry or mine that holds an authorization to discharge under part 31 that includes a discharge volume, the discharge volume stated in that authorization on February 28, 2006.

(B) The system capacity used or developed to make a withdrawal on February 28, 2006, if the system capacity and a description of the system capacity are included in an annual report that is submitted under this part not later than April 1, 2009.

(*ii*) If the person making the withdrawal does not report under subparagraph (*i*), the highest annual amount of water withdrawn as reported under this part for calendar year 2002, 2003, 2004, or 2005. However, for a person who is required to report by virtue of the 2008 amendments to section 32705(2)(d), baseline capacity means the person's withdrawal capacity as reported in the April 1, 2009 annual report submitted under section 32707.

(*iii*) For a community supply, the total designed withdrawal capacity for the community supply under the safe drinking water act, 1976 PA 399, MCL 325.1001 to 325.1023, on February 28, 2006 as reported to the department in a report submitted not later than April 1, 2009.

(e) "Characteristic fish curve" means a fish functional response curve that describes the abundance of characteristic fish populations in response to reductions in index flow as published in the document entitled "Report to the Michigan Legislature in response to 2006 Public Act 34" by the former groundwater conservation advisory council dated July 2007, which is incorporated by reference.

(f) "Characteristic fish population" means the fish species, including thriving fish, typically found at relatively high densities in stream reaches having specific drainage area, index flow, and summer temperature characteristics.

(g) "Cold river system" means a stream or small river that has the appropriate summer water temperature that, based on statewide averages, sustains a fish community composed predominantly of cold-water fish species, and where small increases in water temperature will not cause a decline in these populations, as determined by a scientific methodology adopted by order of the commission.

(h) "Cold-transitional river system" means a stream or river that has the appropriate summer water temperature that, based on statewide averages, sustains a fish community composed predominantly of cold-water fish species, and where small increases in water temperature will cause a decline in the proportion of cold-water species, as determined by a scientific methodology adopted by order of the commission.

(i) "Community supply" means that term as it is defined in section 2 of the safe drinking water act, 1976 PA 399, MCL 325.1002.

(j) "Compact" means the Great Lakes-St. Lawrence river basin water resources compact provided for in part 342.

(k) "Consumptive use" means that portion of water withdrawn or withheld from the Great Lakes basin and assumed to be lost or otherwise not returned to the Great Lakes basin due to evaporation, incorporation into products or agricultural products, use as part of the packaging of products or agricultural products, or other processes. Consumptive use includes a withdrawal of waters of the Great Lakes basin that is packaged within the Great Lakes basin in a container of 5.7 gallons (20 liters) or less and is bottled drinking water as defined in the food code, 2005 recommendations of the food and drug administration of the United States public health service.

(*l*) "Cool river system" means a stream or river that has the appropriate summer water temperature that, based on statewide averages, sustains a fish community composed mostly of warm-water fish species, but also contains some cool-water species or cold-water species, or both, as determined by a scientific methodology adopted by order of the commission.

(m) "Council" means the Great Lakes-St. Lawrence river basin water resources council created in the compact.

(n) "Department" means the department of environmental quality.

(o) "Designated trout stream" means a trout stream identified on the document entitled "Designated Trout Streams for the State of Michigan", as issued under order of the director of the department of natural resources, FO-210.04, on October 10, 2003.

(p) "Diversion" means a transfer of water from the Great Lakes basin into another watershed, or from the watershed of 1 of the Great Lakes into that of another by any means of transfer, including, but not limited to, a pipeline, canal, tunnel, aqueduct, channel, modification of the direction of a water course, tanker ship, tanker truck, or rail tanker but does not apply to water that is used in the Great Lakes basin or a Great Lake watershed to manufacture or produce a product that is then transferred out of the Great Lakes basin or watershed. Diverted has a corresponding meaning. Diversion includes a transfer of water withdrawn from the waters of the Great Lakes basin that is removed from the Great Lakes basin in a container greater than 5.7 gallons (20 liters). Diversion does not include any of the following:

(*i*) A consumptive use.

(*ii*) The supply of vehicles, including vessels and aircraft, whether for the needs of the persons or animals being transported or for ballast or other needs related to the operation of vehicles.

(*iii*) Use in a noncommercial project on a short-term basis for firefighting, humanitarian, or emergency response purposes.

(*iv*) A transfer of water from a Great Lake watershed to the watershed of its connecting waterways.

(q) "Environmentally sound and economically feasible water conservation measures" means those measures, methods, technologies, or practices for efficient water use and for reduction of water loss and waste or for reducing a withdrawal, consumptive use, or diversion that meet all of the following:

(*i*) Are environmentally sound.

(*ii*) Reflect best practices applicable to the water use sector.

(*iii*) Are technically feasible and available.

(*iv*) Are economically feasible and cost-effective based on an analysis that considers direct and avoided economic and environmental costs.

(*v*) Consider the particular facilities and processes involved, taking into account the environmental impact, the age of equipment and facilities involved, the process employed, energy impacts, and other appropriate factors.

(r) "Farm" means that term as it is defined in section 2 of the Michigan right to farm act, 1981 PA 93, MCL 286.472.

(s) "Flow-based safety factor" means a protective measure of the assessment tool that reduces the portion of index flow available for a withdrawal to 1/2 of the index flow for the purpose of minimizing the risk of adverse resource impacts caused by statistical uncertainty.

(t) "Great Lakes" means Lakes Superior, Michigan and Huron, Erie, and Ontario and their connecting waterways including the St. Marys river, Lake St. Clair, the St. Clair river, and the Detroit river. For purposes of this definition, Lakes Huron and Michigan shall be considered a single Great Lake.

(u) "Great Lakes basin" means the watershed of the Great Lakes and the St. Lawrence river.

(v) "Great Lakes charter" means the document establishing the principles for the cooperative management of the Great Lakes water resources, signed by the governors and premiers of the Great Lakes region on February 11, 1985.

(w) "Great Lakes region" means the geographic region composed of the states of Illinois, Indiana, Michigan, Minnesota, New York, Ohio, and Wisconsin, the commonwealth of Pennsylvania, and the provinces of Ontario and Quebec, Canada.

(x) "Index flow" means the 50% exceedance flow for the lowest summer flow month of the flow regime, for the applicable stream reach, as determined over the period of record or extrapolated from analyses of the United States geological survey flow gauges in Michigan. Beginning on October 1, 2008, index flow shall be calculated as of that date.

(y) "Intrabasin transfer" means a diversion of water from the source watershed of a Great Lake prior to its use to the watershed of another Great Lake.

(z) "Lake augmentation well" means a water well used to withdraw groundwater for the purpose of maintaining or raising water levels of an inland lake or stream as defined in section 30101.

(aa) "Large quantity withdrawal" means 1 or more cumulative total withdrawals of over 100,000 gallons of water per day average in any consecutive 30-day period that supply a common distribution system.

(bb) "Large river" means a river with a drainage area of 300 or more square miles.

(cc) "New or increased large quantity withdrawal" means a new water withdrawal of over 100,000 gallons of water per day average in any consecutive 30-day period or an increase of over 100,000 gallons of water per day average in any consecutive 30-day period beyond the baseline capacity of a withdrawal.

(dd) "New or increased withdrawal capacity" means new or additional water withdrawal capacity to supply

a common distribution system that is an increase from the person's baseline capacity. New or increased capacity does not include maintenance or replacement of existing withdrawal capacity.

(ee) "Online registration process" means the online registration process provided for in section 32706.

(ff) "Preventative measure" means an action affecting a stream or river that prevents an adverse resource impact by diminishing the effect of a withdrawal on stream or river flow or the temperature regime of the stream or river.

(gg) "Registrant" means a person who has registered a water withdrawal under section 32705.

(hh) "River" means a flowing body of water with a drainage area of 80 or more square miles.

(ii) "Site-specific review" means the department's independent review under section 32706c to determine whether the withdrawal is a zone A, zone B, zone C, or zone D withdrawal and whether a withdrawal is likely to cause an adverse resource impact.

(jj) "Small river" means a river with a drainage area of less than 300 square miles.

(kk) "Source watershed" means the watershed from which a withdrawal originates. If water is withdrawn directly from a Great Lake, then the source watershed shall be considered to be the watershed of that Great Lake and its connecting waterways. If water is withdrawn from the watershed of a direct tributary to a Great Lake, then the source watershed shall be considered to be the watershed of that Great Lake and its connecting waterways, with a preference for returning water to the watershed of the direct tributary from which it was withdrawn.

(*ll*) "Stream" means a flowing body of water with a drainage area of less than 80 square miles.

(mm) "Stream reach" means a segment of a stream or river.

(nn) "Thriving fish curve" means a fish functional response curve that describes the initial decline in density of thriving fish populations in response to reductions in index flow as published in the document entitled "Report to the Michigan Legislature in response to 2006 Public Act 34" by the former groundwater conservation advisory council dated July 2007, which is incorporated by reference.

(oo) "Thriving fish population" means the fish species that are expected to flourish at very high densities in stream reaches having specific drainage area, index flow, and summer temperature characteristics.

(pp) "Warm river system" means a stream or river that has the appropriate summer water temperature that, based on statewide averages, sustains a fish community composed predominantly of warm-water fish species, as determined by a scientific methodology adopted by order of the commission.

(qq) "Waters of the Great Lakes basin" means the Great Lakes and all streams, rivers, lakes, connecting channels, and other bodies of water, including groundwater, within the Great Lakes basin.

(rr) "Waters of the state" means groundwater, lakes, rivers, and streams and all other watercourses and waters, including the Great Lakes, within the territorial boundaries of the state. Waters of the state do not include drainage ways and ponds designed and constructed solely for wastewater conveyance, treatment, or control.

(ss) "Withdrawal" means the removal of water from surface water or groundwater.

(tt) "Zone A withdrawal" means the following:

(*i*) For a cold river system, as follows:

(A) For a cold stream, less than a 1% reduction in the density of thriving fish populations as determined by the thriving fish curve.

(B) For a cold small river, less than 50% of the withdrawal that would result in an adverse resource impact.

(*ii*) For a cold-transitional river system, there is not a zone A withdrawal.

(*iii*) For a cool river system, as follows:

(A) For a cool stream, less than a 10% reduction in the density of thriving fish populations as determined by the thriving fish curve.

(B) For a cool small river, less than a 5% reduction in the density of thriving fish populations as determined by the thriving fish curve.

(C) For a cool large river, less than an 8% reduction in the density of thriving fish populations as determined by the thriving fish curve.

(*iv*) For a warm river system, less than a 10% reduction in the density of thriving fish populations as determined by the thriving fish curve.

(uu) "Zone B withdrawal" means the following:

(*i*) There is not a zone B withdrawal for a cold stream or small river.

(*ii*) For a cold-transitional river system, less than a 5% reduction in the density of thriving fish populations as determined by the thriving fish curve.

(*iii*) For a cool river system, as follows:

(A) For a cool stream, a 10% or more but less than a 20% reduction in the density of thriving fish populations as determined by the thriving fish curve.

(B) For a cool small river, a 5% or more but less than a 10% reduction in the density of thriving fish populations as determined by the thriving fish curve.

(C) For a cool large river, an 8% or more but less than a 10% reduction in the density of thriving fish populations as determined by the thriving fish curve.

(*iv*) For a warm river system, as follows:

(A) For a warm stream, a 10% or more but less than a 15% reduction in the density of thriving fish populations as determined by the thriving fish curve.

(B) For a warm small river or a warm large river, a 10% or more but less than a 20% reduction in the density of thriving fish populations as determined by the thriving fish curve.

(vv) "Zone C withdrawal" means the following as long as the withdrawal will not decrease the flow of a stream or river by more than 25% of its index flow:

(*i*) For a cold river system, as follows:

(A) For a cold stream, a 1% or more but less than a 3% reduction in the density of thriving fish populations as determined by the thriving fish curve.

(B) For a cold small river, 50% or more of the withdrawal that would result in an adverse resource impact but less than a 1% reduction in the density of thriving fish populations as determined by the thriving fish curve.

(*ii*) There is not a zone C withdrawal for a cold-transitional river system.

(*iii*) For a cool river system, as follows:

(A) For a cool stream, a 20% or more reduction in the density of thriving fish populations as determined by the thriving fish curve but less than a 10% reduction in the abundance of characteristic fish populations as determined by the characteristic fish curve.

(B) For cool small rivers, a 10% or more but less than a 15% reduction in the density of thriving fish populations as determined by the thriving fish curve.

(C) For cool large rivers, a 10% or more but less than a 12% reduction in the density of thriving fish populations as determined by the thriving fish curve.

(*iv*) For warm river systems, as follows:

(A) For warm streams, a 15% or more reduction in the density of thriving fish populations as determined by the thriving fish curve but less than a 5% reduction in the abundance of characteristic fish populations as determined by the characteristic fish curve.

(B) For warm small rivers and warm large rivers, a 20% or more reduction in the density of thriving fish populations as determined by the thriving fish curve but less than a 10% reduction in the abundance of characteristic fish populations as determined by the characteristic fish curve.

(ww) "Zone D withdrawal" means, beginning February 1, 2009, a withdrawal that is likely to cause an adverse resource impact.

(2) For purposes of determining baseline capacity, a person who replaces his or her surface water withdrawal capacity with the same amount of groundwater withdrawal capacity from the drainage area of the same stream reach may retain the baseline capacity established under this section.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 1996, Act 434, Imd. Eff. Dec. 2, 1996;—Am. 2003, Act 148, Imd. Eff. Aug. 8, 2003;—Am. 2006, Act 33, Imd. Eff. Feb. 28, 2006;—Am. 2008, Act 179, Imd. Eff. July 9, 2008.

Popular name: Act 451

Popular name: NREPA

324.32702 Legislative findings and declarations; authority.

Sec. 32702. (1) The legislature finds and declares that:

(a) A diversion of water out of the basin of the Great Lakes may impair or destroy the Great Lakes. The legislature further finds that a limitation on such diversions is authorized by and is consistent with the mandate of section 52 of article IV of the state constitution of 1963 that the legislature provide for the protection of the air, water, and other natural resources of the state from pollution, impairment, and destruction.

(b) Water use registration and reporting are essential to implementing the principles of the Great Lakes charter and necessary to support the state's opposition to diversion of waters of the Great Lakes basin and to provide a source of information on water use to protect Michigan's rights when proposed water losses affect the level, flow, use, or quality of waters of the Great Lakes basin.

(c) The waters of the state are valuable public natural resources held in trust by the state, and the state has a duty as trustee to manage its waters effectively for the use and enjoyment of present and future residents and for the protection of the environment.

(d) The waters of the Great Lakes basin are a valuable public natural resource, and the states and provinces

of the Great Lakes region and Michigan share a common interest in the preservation of that resource.

(e) Any new diversion of waters of the Great Lakes basin for use outside of the Great Lakes basin will have significant economic and environmental impact adversely affecting the use of this resource by the Great Lakes states and Canadian provinces.

(f) The continued availability of water for domestic, municipal, industrial, and agricultural water supplies, navigation, hydroelectric power and energy production, recreation, and the maintenance of fish and wildlife habitat and a balanced ecosystem are vital to the future economic health of the states and provinces of the Great Lakes region.

(g) Future interbasin diversions and consumptive uses of waters of the Great Lakes basin may have significant adverse impacts upon the environment, economy, and welfare of the Great Lakes region and of this state.

(h) The states and provinces of the Great Lakes region have a duty to protect, conserve, and manage their shared water resources for the use and enjoyment of present and future residents.

(i) The waters of the Great Lakes basin are capable of concurrently serving multiple uses, and such multiple uses of water resources for municipal, public, industrial, commercial, agriculture, mining, navigation, energy development and production, recreation, water quality maintenance, and the maintenance of fish and wildlife habitat and a balanced ecosystem and other purposes are encouraged, recognizing that such uses are interdependent and must be balanced.

(j) The waters of the Great Lakes basin are interconnected and part of a single hydrologic system.

(2) The legislature has the authority under sections 51 and 52 of article IV of the state constitution of 1963 to regulate the withdrawal and uses of the waters of the state, including both surface water and groundwater, to promote the public health, safety, and welfare and to protect the natural resources of the state from pollution, impairment, and destruction, subject to constitutional protections against unreasonable or arbitrary governmental action and the taking of property without just compensation. This authority extends to all waters within the territorial boundaries of the state.

324.32703 Diversion of waters prohibited.

Sec. 32703. Subject to section 32704, a diversion of the waters of the state out of the Great Lakes basin is prohibited.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 2006, Act 33, Imd. Eff. Feb. 28, 2006;—Am. 2008, Act 180, Imd. Eff. July 9, 2008.

Popular name: Act 451

Popular name: NREPA

324.32703a Diversion; authorization; conditions.

Sec. 32703a. (1) If the prohibition in section 32703 is determined to be invalid, the waters of the state shall not be diverted unless authorized by law.

(2) When considering whether to grant legislative approval for a diversion, the legislature shall consider sections 51 and 52 of article IV of the state constitution of 1963 and whether the project serves a public purpose, whether the project will result in no material harm to the waters of the state, the public trust, or related purposes, and whether the project would result in any improvement to the waters of the state or the water dependent natural resources of the state.

324.32704 Applicability of MCL 324.32703.

Sec. 32704. Section 32703 does not apply to a diversion of the waters of the Great Lakes out of the drainage basin of the Great Lakes existing on September 30, 1985.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.32704a Diversion; proposal; comment period; notification; waiver.

Sec. 32704a. The governor shall establish a public comment period with regard to a proposal subject to 42 USC 1962d-20 to divert waters of the Great Lakes basin outside of the Great Lakes basin and shall notify the standing committees of the legislature with jurisdiction over issues primarily pertaining to natural resources and the environment of his or her receipt of the proposal. The governor may waive the comment period under this section if he or she determines that it is necessary to take immediate action to provide humanitarian relief or firefighting capabilities.

324.32705 Registration of withdrawal; use of assessment tool; exception; agricultural purpose; form; calculating total amount of existing or proposed withdrawal; aggregate information; duration of valid registration.

Sec. 32705. (1) Except as otherwise provided in this section, the owner of real property who intends to develop capacity on that property to make a new or increased large quantity withdrawal from the waters of this state shall register the withdrawal with the department after using the assessment tool, if required under this part, and prior to beginning that withdrawal. A registration under this section may be made using the online registration process.

(2) The following persons are not required to register under this section:

(a) Subject to subdivision (c), a person who has previously registered for that property under this part or the owner of real property containing the capacity to make a withdrawal that was previously requested under this part, unless the property owner develops new or increased withdrawal capacity on the property of an additional 100,000 gallons of water per day from the waters of the state.

(b) A community supply required to obtain a permit under the safe drinking water act, 1976 PA 399, MCL 325.1001 to 325.1023.

(c) A person required to obtain a permit under section 32723.

(d) The owner of a noncommercial well located on the following residential property:

(*i*) Single-family residential property unless that well is a lake augmentation well.

(*ii*) Multifamily residential property not exceeding 4 residential units and not more than 3 acres in size unless that well is a lake augmentation well.

(3) Subsection (1) does not limit a property owner's ability to withdraw water from a test well prior to registration if the test well is constructed in association with the development of new or increased withdrawal capacity and used only to evaluate the development of new or increased withdrawal capacity.

(4) A registration under this section by the owner of a farm in which the withdrawal is intended for an agricultural purpose, including irrigation for an agricultural purpose, may be submitted to the department of agriculture instead of the department.

(5) A registration submitted under this section that is not submitted via the online registration process shall be on a form provided by the department or the department of agriculture, as appropriate.

(6) In calculating the total amount of an existing or proposed withdrawal for the purpose of this section, a person shall combine all separate withdrawals that the person makes or proposes to make, whether or not these withdrawals are for a single purpose or are for related but separate purposes.

(7) The department shall aggregate information received by the state related to large quantity withdrawal capacities within the state and reported large quantity withdrawals in the state.

(8) Unless a property owner develops the capacity to make the new or increased large quantity withdrawal within 18 months after the property owner registers under subsection (1), the registration is no longer valid.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 2003, Act 148, Imd. Eff. Aug. 8, 2003;—Am. 2006, Act 35, Imd. Eff. Feb. 28, 2006;—Am. 2008, Act 180, Imd. Eff. July 9, 2008.

Popular name: Act 451

324.32706 Development of internet-based online registration process; registration; required statement and supporting documentation.

Sec. 32706. (1) Not later than 1 year after the effective date of the amendatory act that amended this section, the department shall develop and implement an internet-based online registration process that may be used for registrations under section 32705. The online registration process shall be designed to work in conjunction with the assessment tool.

(2) Each registration under this part shall include both of the following:

(a) A statement and supporting documentation that includes all of the following:

(*i*) The place and source of the proposed withdrawal.

(*ii*) The location of any discharge or return flow associated with the proposed withdrawal.

(*iii*) The location and nature of the proposed water use.

(*iv*) The capacity of the equipment used for making the proposed withdrawal.

(*v*) The estimated average annual and monthly volumes and rate of the proposed withdrawal.

(*vi*) The estimated average annual and monthly volumes and rates of consumptive use from the proposed withdrawal.

(b) Beginning 1 year after the effective date of the amendatory act that added this subdivision, for a new or increased large quantity withdrawal from a stream or river or groundwater, the determination from the use of the assessment tool under section 32706b or the determination from a site-specific review, as appropriate.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 1996, Act 434, Imd. Eff. Dec. 2, 1996;—Am. 2008, Act 180, Imd. Eff. July 9, 2008.

Popular name: Act 451

Popular name: NREPA

324.32706a Internet-based water withdrawal assessment tool; implementation; determination of proposed zone withdrawal; entering and printing data; working in conjunction with online registration process; technical modifications; redesignation of stream or river; report.

Sec. 32706a. (1) On October 1, 2008, the department shall make available for testing and evaluation an internet-based water withdrawal assessment tool based upon the recommendations of the former groundwater conservation advisory council and the requirements of this part. The assessment tool shall contain a flow-based safety factor. Beginning 1 year after the effective date of the amendatory act that added this section, the department shall implement the assessment tool.

(2) The assessment tool shall determine whether a proposed withdrawal is a zone A, zone B, zone C, or zone D withdrawal and whether a proposed withdrawal is likely to cause an adverse resource impact based upon whether the proposed withdrawal is from a cold river system, a cold-transitional river system, a cool river system, or a warm river system. The assessment tool shall account for impacts due to cumulative withdrawals as provided for in section 32706e. The assessment tool shall also distinguish the impact of a proposed withdrawal based upon whether the proposed withdrawal is from a stream, a small river, or a large river, subject to the following:

(a) Cool streams and warm streams with less than 3 square miles of drainage area shall be integrated into the next largest drainage area for purposes of assessment tool determinations.

(b) Cool streams and warm streams with less than 20 square miles of drainage area and less than 1 cubic foot per second of index flow shall be integrated into the next largest drainage area for purposes of assessment tool determinations.

(c) Cool streams and warm streams with a drainage area of more than 3 square miles but less than 6 square miles shall be integrated into the next largest drainage area for purposes of assessment tool determinations for groundwater withdrawals.

(3) The assessment tool shall allow the user to enter into fields the following data related to a proposed withdrawal:

(a) The capacity of the equipment used for making the withdrawal.

(b) The location of the withdrawal.

(c) The withdrawal source, whether surface water or groundwater.

(d) If the source of the withdrawal is groundwater, whether the source of the withdrawal is a glacial stratum or bedrock.

(e) The depth of the withdrawal if from groundwater.

(f) The amount and rate of water to be withdrawn.

(g) Whether the withdrawal will be intermittent.

(4) The assessment tool shall contain a print function that allows the user, upon receipt of the assessment tool's determination, to print the data submitted and the determination returned along with a date and time.

(5) The assessment tool shall work in conjunction with the online registration process and shall also allow operation independent of the online registration process.

(6) On an ongoing basis, the department shall add verified data to the assessment tool's database from reports submitted under sections 32707, water use conservation plans submitted under section 32708, and permits issued under the safe drinking water act, 1976 PA 399, MCL 325.1001 to 325.1023, and other sources

of data regarding the waters of the state. Additionally, the department shall make technical modifications to the assessment tool related to considerations of temperature, hydrology, and stream or river flow based upon a scientific methodology adopted by order of the commission.

(7) If a person disagrees with the designation of a particular stream or river as a cold river system, a cold-transitional river system, a cool river system, or a warm river system for use in the assessment tool or otherwise under this part, the person may petition for a redesignation of that stream or river. The petition shall be submitted to the commission for its review and determination.

(8) The department shall report annually to the standing committees of the legislature with jurisdiction primarily pertaining to natural resources and the environment on the implementation of the assessment tool and this part. This report shall include, but is not limited to, all of the following:

(a) The number of zone C withdrawal site-specific reviews requested by applicants each 12 months after the effective date of the implementation of the assessment tool under section 32706a.

(b) The number of zone C withdrawal site-specific review determinations that resulted in changes from zone C to zone B and the number of changes from zone C to zone A.

(c) The number of zone C withdrawal site-specific review determinations that result in a zone D withdrawal determination.

(d) The number of site-specific review determinations where the department failed to meet statutory timelines.

(e) The number of registered assessment tool determinations for each zone.

(f) The number of voluntary requests for site-specific reviews that were submitted to the department and whether the department failed to meet statutory timelines on these site-specific reviews.

(g) The number of registrations submitted to the department under this part.

History: Add. 2008, Act 185, Imd. Eff. July 9, 2008.

Popular name: Act 451

Popular name: NREPA

324.32706b Utilization of assessment tool; request for site-specific review; designation of proposed withdrawal; registration; rerun of assessment tool; correction of data.

Sec. 32706b. (1) Beginning on the effective date of the implementation of the assessment tool under section 32706a, prior to registering a new or increased large quantity withdrawal under section 32705 for a proposed withdrawal from a stream or river, or from groundwater, the property owner proposing to make the withdrawal shall utilize the assessment tool by entering the data related to the proposed withdrawal into the assessment tool. However, a person who intends to make a new or increased large quantity withdrawal for the purpose of dewatering a mine that has a permit under part 31 and is not regulated under part 631, 632, or 637 may choose to submit a request for a site-specific review rather than utilize the assessment tool.

(2) Upon entry of the relevant data under subsection (1), the assessment tool shall indicate to the user whether or not the proposed withdrawal is likely to cause an adverse resource impact and whether the proposed withdrawal falls into the category of zone A, zone B, zone C, or zone D.

(3) If the assessment tool designates a proposed withdrawal as a zone A withdrawal, or a zone B withdrawal in a cool river system or a warm river system, the property owner may register the withdrawal and proceed to make the withdrawal.

(4) If the assessment tool designates a proposed withdrawal as a zone B withdrawal in a cold-transitional river system, or a zone C or zone D withdrawal, the property owner shall not register the withdrawal or make the withdrawal except in accordance with section 32706c.

(5) After a property owner registers a withdrawal, if, in developing the capacity to make the withdrawal, the conditions of the withdrawal deviate from the specific data that were entered into the assessment tool, the property owner shall rerun the assessment tool and shall enter the corrected data into the assessment tool. The property owner shall notify the department of the corrected data and the corrected results from the assessment tool. If the corrected data do not change the determination of the assessment tool, the property owner may proceed with the withdrawal. If the corrected data change the determination from the assessment tool, the property owner shall proceed under the provisions of this part related to the corrected assessment tool determination.

History: Add. 2008, Act 185, Imd. Eff. July 9, 2008.

Popular name: Act 451

Popular name: NREPA

324.32706c Request for site-specific review; analysis; supporting evidence; conditions;

form; information to be included; completion of review by department; withdrawals; registration; corrected data; disclosure under freedom of information act; definitions.

Sec. 32706c. (1) If the assessment tool determines that a proposed withdrawal with a capacity of 1,000,000 gallons of water or less per day from the waters of the state to supply a common distribution system is a zone B withdrawal in a cold-transitional river system, or a zone C or zone D withdrawal, the property owner may submit to the department the information described in section 32706a(3) and either of the following:

(a) An analysis of the proposed withdrawal by a professional hydrologist or hydrogeologist calculating the streamflow depletion of the proposed withdrawal. The analysis shall be based on an aquifer performance test, streamflow depletion calculations, and geological data consisting of at least 1 of the following, which shall be included with the analysis:

(*i*) Evidence the proposed withdrawal is in the water management unit or units that were part of a regional or watershed based study of water use impacts accepted by the department under this part. The evidence must include an affidavit by the property owner that the proposed withdrawal is located in a river system and aquifer included in the study, and records of applicable data collected in the study.

(*ii*) A hydrogeologic analysis of the water management unit or units that will potentially be affected by the proposed withdrawal, incorporating data from well logs, gamma ray logs, surficial maps of the glacial geology, geologic cross sections, and any other available hydrogeologic data.

(b) An analysis by a professional hydrologist or hydrogeologist of a proposed withdrawal from an aquifer separated from streams by bedrock, calculating streamflow depletion of the proposed withdrawal as described in this subdivision by providing hydrogeologic data demonstrating the bedrock transmissivity for the formation or relying on published estimates of transmissivity for the bedrock formation.

(2) Within 20 working days after the department's actual receipt of the analysis and supporting evidence and data related to the proposed withdrawal under subsection (1), the department shall determine whether a proposed withdrawal is a zone A, zone B, zone C, or zone D withdrawal and shall provide to the property owner written notification of its determination. However, if upon a preliminary review of the analysis and supporting evidence and data the department determines that the proposed withdrawal will cause a rejection only under subdivision (d)(*iv*), the department may, within the first 20 working days after actual receipt of the analysis and supporting evidence and data related to the proposed withdrawal under subsection (1), provide written notification to the property owner that up to 5 additional working days are needed for confirmation. If the department does not provide written notification stating a need for up to 5 additional working days or if the department cites any other reason under subdivision (d) for rejection, it must make its determination and provide to the property owner written notification of its determination within 20 working days after actual receipt of the analysis and supporting evidence and data related to the proposed withdrawal under subsection (1). The department's determination is subject to the following:

(a) If the department fails to provide written notification to the property owner within the time period required under this subsection, the property owner may register the withdrawal and proceed with the withdrawal.

(b) If the department determines that the proposed withdrawal is a zone A or a zone B withdrawal, the property owner may register the withdrawal and may proceed with the withdrawal.

(c) If the department determines that the proposed withdrawal is a zone C withdrawal, the property owner may register the withdrawal and proceed to make the withdrawal if the property owner self-certifies that he or she is implementing applicable environmentally sound and economically feasible water conservation measures prepared under section 32708a that the property owner considers to be reasonable or has self-certified that he or she is implementing applicable environmentally sound and economically feasible water conservation measures developed for the water use associated with that specific withdrawal that the property owner considers to be reasonable. A property owner proceeding under this subdivision shall provide 5 sets of water level recovery measurements, as described in an aquifer performance test, taken after pumping between June and October within 2 years after the production well is put in service. The department shall not require submission of additional information or data from a property owner proceeding under this subdivision.

(d) If the department determines that the proposed withdrawal is a zone D withdrawal, the property owner shall not register the withdrawal and shall not make the withdrawal unless the property owner applies for a water withdrawal permit under section 32723 and the withdrawal is authorized under that section, or unless it is authorized under subsection (4). In addition to the written notification of its determination under this subsection, if the department determines that the proposed withdrawal is a zone D withdrawal, the department shall include documentation demonstrating that the proposed water withdrawal is likely to cause an adverse resource impact. The documentation shall include 1 or more of the following:

(*i*) Identification of specific errors in data collection performed by the professional hydrologist or

hydrogeologist that render the analysis of the proposed withdrawal invalid.

(*ii*) A statement that the professional hydrologist or hydrogeologist used an inapplicable model to analyze the proposed withdrawal, with an explanation including both why the model selected for analysis was inapplicable for the proposed withdrawal and an analysis using an applicable model that shows the proposed withdrawal is likely to cause an adverse resource impact.

(*iii*) Identification of specific errors in the model analysis performed by the professional hydrologist or hydrogeologist that render the analysis of the proposed withdrawal invalid.

(*iv*) The cumulative streamflow depletion estimated for all the registered water withdrawals in an impacted watershed management area is likely to cause an adverse resource impact. The cumulative streamflow depletion calculation shall account for reevaluation of previously registered water withdrawals in the affected water management units using the Hunt, 2003; Ward and Lough, 2011; or a similar peer-reviewed model that assesses potential stream depletion.

(3) After a property owner registers a withdrawal pursuant to subsection (2), if, in developing the capacity to make the withdrawal, the conditions of the withdrawal deviate from the specific data that were evaluated, the property owner shall notify the department of the corrected data and the department shall confirm its determination under subsection (2). If the corrected data do not change the determination, the property owner may proceed with the withdrawal. If the corrected data change the determination, the property owner shall proceed under the provisions of this part related to the corrected determination.

(4) If a proposed withdrawal is a zone B withdrawal in a cold-transitional river system, or a zone C or zone D withdrawal, and a property owner does not submit any of the information described in subsection (1) or the department determines under subsection (2) that the proposed withdrawal is a zone D withdrawal, the property owner may request a site-specific review. A request for a site-specific review shall be submitted to the department in a form required by the department and shall include all of the following:

(a) The information described in section 32706a(3).

(b) The intended maximum monthly and annual volumes and rates of the proposed withdrawal, if different from the capacity of the equipment used for making the proposed withdrawal.

(c) If the amount and rate of the proposed withdrawal will have seasonal fluctuations, the relevant information related to the seasonal use of the proposed withdrawal.

(d) A description of how the water will be used and the location, amount, and rate of any return flow.

(e) Any other information the property owner would like the department to consider in making its determination under this section.

(5) Upon receipt of a request for a site-specific review under subsection (4), the department shall consider the information submitted and shall consider the actual stream or river flow data of any affected stream reach. The department shall also apply the drainage area integration standards provided in section 32706a(2)(a), (b), and (c), if applicable, and account for cumulative withdrawals as provided for in section 32706e. The department shall not rely on the assessment tool's determination in making its determination under a site-specific review. The department may calculate streamflow depletion using Hunt, 2003; Ward and Lough, 2011; or a similar peer-reviewed model that assesses potential stream depletion. The calculation of streamflow depletion may also be conducted on existing withdrawals in the same water management unit or units as the proposed withdrawal if applicable data are available. This data may be used to provide additional evidence as needed to demonstrate whether a proposed withdrawal is likely to cause an adverse resource impact.

(6) The department shall complete a site-specific review within 10 working days of submittal of a request for a site-specific review. If the department determines, based upon a site-specific review, that the proposed withdrawal is a zone A or a zone B withdrawal, the department shall provide written notification to the property owner and the property owner may register the withdrawal and may proceed with the withdrawal.

(7) Subject to subsection (8), if the department determines in conducting a site-specific review that the proposed withdrawal is a zone C withdrawal, the property owner may register the withdrawal and proceed to make the withdrawal if the property owner self-certifies that he or she is implementing applicable environmentally sound and economically feasible water conservation measures prepared under section 32708a that the property owner considers to be reasonable or has self-certified that he or she is implementing applicable environmentally sound and economically feasible water conservation measures developed for the water use associated with that specific withdrawal that the property owner considers to be reasonable.

(8) Except for withdrawals exempt from obtaining a water withdrawal permit under section 32723, if a site-specific review determines that a proposed withdrawal is a zone C withdrawal with capacity in excess of 1,000,000 gallons of water per day from the waters of the state to supply a common distribution system, the person proposing the withdrawal shall not register the withdrawal and shall not proceed with making the withdrawal unless the person obtains a water withdrawal permit under section 32723.

(9) If the department determines, based upon a site-specific review, that the proposed withdrawal is a zone D withdrawal, the property owner shall not register the withdrawal and shall not make the withdrawal unless he or she applies for a water withdrawal permit under section 32723 and the withdrawal is authorized under that section.

(10) After a property owner registers a withdrawal following a site-specific review, if, in developing the capacity to make the withdrawal, the conditions of the withdrawal deviate from the specific data that were evaluated in the site-specific review, the property owner shall notify the department of the corrected data and the department shall confirm its determination under the site-specific review. If the corrected data do not change the determination under the site-specific review, the property owner may proceed with the withdrawal. If the corrected data change the determination under the site-specific review, the property owner shall proceed under the provisions of this part related to the corrected determination.

(11) Nothing in this section alters any requirement to disclose information or any exemption from disclosure under the freedom of information act, 1976 PA 442, MCL 15.231 to 15.246, as otherwise provided under sections 32707(6) and 32708(4).

(12) As used in this part:

(a) "Aquifer performance test" means a controlled field test in which all of the following are done:

(*i*) At least 1 monitoring well is installed. The monitoring well must be installed in the same aquifer and screened at or near the same depth as the production well, and be located at a distance of 1 to 5 times the thickness of the aquifer from the proposed production well. A nearby existing well may be used as a monitoring well for the test instead if it meets all the monitoring well requirements.

(*ii*) Static water level elevation measurements are taken at 1-minute intervals for 24 hours before the pumping portion of the test to an accuracy of 0.05 feet.

(*iii*) Pumping is conducted at a rate at or above the desired production rate for the duration of the test and metered or periodically measured to ensure consistency of rate.

(*iv*) The pumping portion of the test is conducted for a period of 24 hours in confined aquifers or 72 hours in unconfined aquifers, during which drawdown measurements are taken at 1-minute intervals to an accuracy of 0.05 feet.

(*v*) After completion of the pumping period, measurements of water level recovery are taken at 1-minute intervals for 24 hours to an accuracy of 0.05 feet.

(*vi*) An analysis is conducted to determine, at a minimum, the aquifer hydraulic characteristics of transmissivity and storage coefficient employing the methods of Cooper and Jacob, 1946; Theis, 1935; Hantush and Jacob, 1955; Hantush and Jacob, 1960; Hantush and Jacob, 1961; Neuman, 1972; Neuman, 1974; or Hunt and Scott, 2007.

(b) "Cooper and Jacob, 1946" means Cooper and Jacob, 1946: "A Generalized Graphical Method for Evaluating Formation Constants and Summarizing Well-Field History".

(c) "Hantush and Jacob, 1955" means Hantush and Jacob, 1955: "Non-Steady Radial Flow in an Infinite Leaky Aquifer".

(d) "Hantush and Jacob, 1960" means Hantush and Jacob, 1960: "Modification of the Theory of Leaky Aquifers".

(e) "Hantush and Jacob, 1961" means Hantush and Jacob, 1961: "Aquifer Tests on Partially Penetrating Wells".

(f) "Hunt, 1999" means Hunt, 1999: "Unsteady Stream Depletion from Ground Water Pumping".

(g) "Hunt, 2003" means Hunt, 2003: "Unsteady Stream Depletion When Pumping from Semiconfined Aquifer".

(h) "Hunt and Scott, 2007" means Hunt and Scott, 2007: "Flow to a Well in a Two-Aquifer System".

(i) "Neuman, 1972" means Neuman, 1972: "Theory of Flow in Unconfined Aquifers Considering Delayed Gravity Response of the Water Table".

(j) "Neuman, 1974" means Neuman, 1974: "Effect of Partial Penetration on Flow in Unconfined Aquifers Considering Delayed Gravity Response".

(k) "Professional hydrologist or hydrogeologist" means an individual holding a license or registration from any state as a professional hydrologist, hydrogeologist, or geologist, or a current certification as a professional geologist by the American Institute of Professional Geology.

(*l*) "Streamflow depletion calculation" means an evaluation of the potential streamflow depletion in which all of the following are done:

(*i*) The streambed conductance of the potentially impacted streams shall be measured in-situ using slug testing, seepage meter testing, or both.

(*ii*) An aquifer performance test representing the proposed withdrawal location has been completed.

(*iii*) An analysis shall be conducted to calculate streamflow depletion using the applicable method of Hunt,

1999; Hunt, 2003; Ward and Lough, 2011; or a similar peer-reviewed model that assesses potential stream depletion. The analysis may also be conducted on existing withdrawals in the same water management unit or units as the proposed withdrawal if applicable data are available. This may be used to provide additional evidence as needed to demonstrate a proposed withdrawal is unlikely to cause an adverse resource impact.

(m) "Theis, 1935" means Theis, 1935: "The Relation Between the Lowering of the Piezometric Surface and the Rate and Duration of Discharge of a Well Using Groundwater Storage".

(n) "Ward and Lough, 2011" means Ward and Lough, 2011: "Stream Depletion from Pumping a Semiconfined Aquifer in a Two-Layer Leaky Aquifer System".

324.32706d Collection of stream or river flow measurements by persons other than department; development and use of protocol; training program.

Sec. 32706d. (1) The department shall develop a protocol for the collection of stream or river flow measurements by persons other than the department for use by the department in the administration of this part. The protocol may specify a minimum number of measurements, stream or river flow and weather conditions when the measurements are to be made, and any other conditions necessary to ensure the adequacy and quality of the measurements. The protocol shall ensure that stream or river flow measurements collected for this purpose meet the same data quality standards as stream or river flow measurements collected by the United States geological survey. The department shall consult with the United States geological survey and other recognized scientific experts in developing this protocol.

(2) The department may use stream or river flow data collected using the protocol under subsection (1) in conducting site-specific reviews, in making water withdrawal permit decisions under section 32723, in issuing permits under the safe drinking water act, 1976 PA 399, MCL 325.1001 to 325.1023, in updating the water withdrawal assessment tool as appropriate, or in other actions requiring an evaluation of stream or river flow.

(3) The department may establish a program to train and certify individuals in the collection of stream or river flow measurements. The department shall charge a fee sufficient to reimburse the department for the cost of a program developed under this subsection. The department may enter into a cooperative agreement with the United States geological survey to provide training and certification under this section.

324.32706e Cumulative withdrawals; determination of adverse impact.

Sec. 32706e. The department shall determine whether an adverse resource impact has occurred under this part and whether a withdrawal is a zone A, a zone B, a zone C, or a zone D withdrawal under this part based upon cumulative withdrawals affecting the same stream reach. In accounting for these cumulative withdrawals, the department shall apply both of the following:

(a) Beginning on October 1, 2008, the department shall begin water withdrawal accounting for cumulative withdrawals affecting the same stream reach.

(b) Beginning on February 1, 2009, the department shall adjust the water withdrawal accounting under subdivision (a) such that if cumulative withdrawals beginning on October 1, 2008 have removed a sufficient flow of water from a stream reach to change the zone classification of that stream reach, the department shall reset the water withdrawal accounting benchmark for that stream reach as follows:

(*i*) If the cumulative impact of withdrawals on February 1, 2009 results in a classification as a zone B withdrawal, the accounting benchmark shall be reset at the beginning point for zone B withdrawals.

(*ii*) If the cumulative impact of withdrawals on February 1, 2009 results in a classification as a zone C withdrawal, the accounting benchmark shall be reset at the beginning point for zone C withdrawals.

(*iii*) If the cumulative impact of withdrawals on February 1, 2009 results in a classification as a zone D withdrawal, the accounting benchmark shall be reset at the beginning point for zone C withdrawals. If there is not a zone C for the classification of the stream reach, the water withdrawal accounting benchmark shall be reset at the beginning point for zone B withdrawals.

324.32707 Reporting requirements; forms; water use reporting fees.

Sec. 32707. (1) Except as provided in subsections (2) and (3), a person who is required to register under section 32705 or holds a permit under section 32723 shall file a report annually with the department on a form provided by the department. Reports shall be submitted by April 1 of each year. Except as provided in subsection (8), reports shall include the following information:

(a) The amount and rate of water withdrawn on an annual and monthly basis.

(b) The source or sources of the water supply.

(c) The use or uses of the water withdrawn.

(d) The amount of consumptive use of water withdrawn.

(e) If the source of the water withdrawn is groundwater, the location of the well or wells in latitude and longitude, with the accuracy of the reported location data to within 25 feet.

(f) If the source of water withdrawn is groundwater, the static water level of the aquifer or aquifers, if practicable.

(g) Other information specified by rule of the department.

(h) At the discretion of the registrant or permit holder, the baseline capacity of the withdrawal and, if applicable, a description of the system capacity.

(i) At the discretion of the registrant or permit holder, the amount of water returned to the source watershed.

(j) Beginning in 2010, an acknowledgment that the registrant has reviewed applicable environmentally sound and economically feasible water conservation measures prepared under section 32708a.

(2) If a person reports the information required by this section to the department in conjunction with a permit or for any other purpose, that reporting, upon approval of the department, satisfies the reporting requirements of this section.

(3) The owner of a farm who reports water use under section 32708 is not required to report under subsection (1).

(4) The department may, upon request from a person required to report under this section, accept a formula or model that provides to the department's satisfaction the information required in subsection (1).

(5) The department shall develop forms for reporting under this section that minimize paperwork and allow for a notification to the department instead of a report if the annual amount of water withdrawn by a person required to report under this section is within 4% of the amount last reported and the other information required in subsection (1) has not changed since the last year in which a report was filed.

(6) Information described in section 32701(d)(*i*)(B) that is provided to the department under subsection (1)(h) is exempt from disclosure under the freedom of information act, 1976 PA 442, MCL 15.231 to 15.246, and shall not be disclosed unless the department determines that the withdrawal is causing an adverse resource impact.

(7) Except as otherwise provided in this subsection, a person who files an annual report or notification under this section shall annually remit a water use reporting fee of $200.00 to the department. Water use reporting fees shall be remitted to the department in conjunction with the annual report or notification submitted under this section. The department shall transmit water use reporting fees collected under this section to the state treasurer to be credited to the water use protection fund created in section 32714. A water use reporting fee is not required for a report or notification related to a farm that reports withdrawals under section 32708 or for a report under subsection (8).

(8) A person who withdraws less than 1,500,000 gallons of water in any year shall indicate this fact on the reporting form and is not required to provide information under subsection (1)(a) or (d). A person who withdraws less than 1,500,000 gallons of water in any year is not required to pay the water use reporting fee under subsection (7).

324.32708 Water use conservation plan; formula or model to estimate consumptive use of withdrawals for agricultural purposes; inclusion of information in statewide groundwater inventory and map; disclosure.

Sec. 32708. (1) The owner of a farm that is registered under this part who makes a withdrawal for an agricultural purpose, including irrigation for an agricultural purpose, may report the water use on the farm by annually submitting to the department of agriculture a water use conservation plan. Conservation plans shall

be submitted by April 1 of each year. The water use conservation plan shall include, but need not be limited to, all of the following information:

(a) The amount and rate of water withdrawn on an annual and monthly basis in either gallons or acre inches.

(b) The type of crop irrigated, if applicable.

(c) The acreage of each irrigated crop, if applicable.

(d) The source or sources of the water supply.

(e) If the source of the water withdrawn is groundwater, the location of the well or wells in latitude and longitude, with the accuracy of the reported location data to within 25 feet.

(f) If the water withdrawn is not used entirely for irrigation, the use or uses of the water withdrawn.

(g) If the source of water withdrawn is groundwater, the static water level of the aquifer or aquifers, if practicable.

(h) Applicable water conservation practices and an implementation plan for those practices. Beginning in 2010, the water use conservation plan shall include an acknowledgment that the owner of the farm has reviewed applicable environmentally sound and economically feasible water conservation measures prepared under section 32708a.

(i) At the discretion of the registrant, the baseline capacity of the withdrawal based upon system capacity and a description of the system capacity.

(2) The department and the department of agriculture in consultation with Michigan state university shall validate and use a formula or model to estimate the consumptive use of withdrawals made for agricultural purposes consistent with the objectives of section 32707.

(3) Subject to subsection (4), information provided to the department of agriculture under subsection (1)(a), (d), and (e) shall be forwarded to the department for inclusion in the statewide groundwater inventory and map prepared under section 32802.

(4) Information provided under subsection (1)(a), (e), and (i) is exempt from disclosure under the freedom of information act, 1976 PA 442, MCL 15.231 to 15.246, and shall not be disclosed by the department, the department of agriculture, or the department of natural resources unless the department determines that the withdrawal is causing an adverse resource impact.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 1996, Act 434, Imd. Eff. Dec. 2, 1996;—Am. 2003, Act 148, Imd. Eff. Aug. 8, 2003;—Am. 2006, Act 35, Imd. Eff. Feb. 28, 2006;—Am. 2008, Act 182, Imd. Eff. July 9, 2008.

Popular name: Act 451

Popular name: NREPA

324.32708a Generic water conservation measures; preparation; posting on website; submission of water conservation measures by water user's sector; acceptance by department; water conservation measures for agricultural purposes; report; notification of zone C withdrawal; definitions.

Sec. 32708a.

(1) Not later than March 31, 2009, the department shall prepare, based upon recommendations from representative trade associations, a set of generic water conservation measures that are applicable to all persons making large quantity withdrawals. The department shall post these generic water conservation measures on its website.

(2) Subject to subsection (3), each water user's sector may prepare and submit to the department water conservation measures that are applicable for water users within its sector. Upon receipt of water conservation measures from a water user's sector, the department shall review the water conservation measures, and, if the department determines that those water conservation measures are appropriate for that sector, the department shall accept those water conservation measures. Upon acceptance, the department shall post the water conservation measures on its website and those water conservation measures shall supersede the generic water conservation measures prepared under subsection (1) for water users within that sector. If the department determines that the water conservation measures are not appropriate for the water user's sector, the department shall provide comments to the water user's sector and suggestions that would result in the department's acceptance of the water conservation measures. A water user's sector may resubmit water conservation measures in response to the department's comments and suggestions.

(3) Water conservation measures for agricultural purposes shall be developed and approved by the commission of agriculture and shall be updated annually as part of the process for review and update of generally accepted agricultural and management practices under the Michigan right to farm act, 1981 PA 93, MCL 286.471 to 286.474. Water conservation measures approved under this subsection shall be posted on the

department of agriculture's website and shall be forwarded to the department for posting on its website.

(4) By April 1, 2010, the department shall report to the standing committees of the legislature with jurisdiction primarily related to natural resources and the environment on the status of the preparation and acceptance of water user sector conservation measures.

(5) If the department receives a registration for a zone C withdrawal, the department shall notify all other registrants and permit holders whose withdrawals are from the same water source as the zone C withdrawal of the status of the water source. Upon receipt of notification under this subsection, each of these registrants and permit holders shall review and consider implementing the applicable water conservation measures prepared under this section.

(6) Compliance with water conservation measures does not authorize a water withdrawal that is otherwise prohibited by law.

(7) As used in this section:

(a) "Permit holders" means persons holding a permit under section 32723 and persons holding a permit under the safe drinking water act, 1976 PA 399, MCL 325.1001 to 325.1023.

(b) "Water conservation measures" means environmentally sound and economically feasible water conservation measures.

History: Add. 2006, Act 35, Imd. Eff. Feb. 28, 2006;—Am. 2008, Act 182, Imd. Eff. July 9, 2008.

324.32709 Informational materials.

Sec. 32709. The department may contract for the preparation and distribution of informational materials to members of the public related to any of the following:

(a) The purposes, benefits, and requirements of this part.

(b) Information on complying with the registration requirement of this part and on any general or applicable methods for calculating or estimating water withdrawals or consumptive uses.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 2008, Act 182, Imd. Eff. July 9, 2008.

Popular name: Act 451

Popular name: NREPA

324.32710 Duties of department; electronic mail notification of withdrawals; formation of water resources assessment and education committee.

Sec. 32710. (1) The department shall do all of the following:

(a) Cooperate with the states and provinces in the Great Lakes region to develop and maintain a common base of information on the use and management of the water of the Great Lakes basin and to establish systematic arrangements for the exchange of this information.

(b) Collect and maintain information regarding the locations, types, and quantities of water use, including water withdrawals and consumptive uses, in a form that the department determines is comparable to the form used by other states and provinces in the Great Lakes region.

(c) Collect, maintain, and exchange information on current and projected future water needs with the other states and provinces in the Great Lakes region.

(d) Cooperate with other states and provinces in the Great Lakes region in developing a long-range plan for developing, conserving, and managing the water of the Great Lakes basin.

(e) Participate in the development of a regional consultation procedure for use in exchanging information on the effects of proposed water withdrawals and consumptive uses from the Great Lakes basin.

(f) Develop procedures for notifying water users and potential water users of the requirements of this part.

(g) If the department receives a registration for a zone B or a zone C withdrawal or issues a permit under section 32723 or the safe drinking water act, 1976 PA 399, MCL 325.1001 to 325.1023, for a zone B or zone C withdrawal, place a notice on the department's website and notify by electronic mail all of the following that have requested under subsection (2) an electronic mail notification:

(*i*) Conservation districts.

(*ii*) Regional planning agencies.

(*iii*) Watershed management planning committees.

(*iv*) Storm water committees established under part 31.

(*v*) The chief elected officials of the local units of government.

(*vi*) Community supplies owned by political subdivisions.

(*vii*) A water users committee established under section 32725.

(2) An organization listed in subsection (1)(g) that wishes to receive an electronic mail notification of withdrawals described in subsection (1)(g) that are located in its vicinity shall provide to the department an electronic mail address.

(3) Upon receipt of notification from the department under subsection (1)(g), the notified entities may form a water resources assessment and education committee in order to assess trends in water use in the vicinity of the withdrawal and educate water users. The department shall assist in the formation of these water resources assessment and education committees and may provide them with technical information regarding water use and capacity within their vicinity, aggregated at the stream reach level. Meetings of water resources assessment and education committees shall be open to the general public. A water resources assessment and education committee formed under this subsection may provide educational materials and recommendations regarding any of the following:

(a) Long-term water resources planning.

(b) Use of conservation measures.

(c) Drought management activities.

(d) Other topics related to water use as identified by the committee.

324.32713 Civil action; commencement; civil fine; recovery of surveillance and enforcement costs.

Sec. 32713. (1) The department may request the attorney general to commence a civil action for appropriate relief, including a permanent or temporary injunction, for a violation of this part or a rule promulgated under this part, including falsifying a record submitted under this part. An action under this section shall be brought in the circuit court for the county of Ingham or for the county in which the defendant is located, resides, or is doing business. The court has jurisdiction to restrain the violation and to require compliance.

(2) In addition to any other relief granted under subsection (1), the court may impose a civil fine as follows:

(a) For a person who knowingly violates section 32721 or 32723 or the terms of a permit issued under section 32723, a civil fine of not more than $10,000.00 per day of violation.

(b) For all other violations of this part, a civil fine of not more than $1,000.00.

(3) In addition to a fine imposed under subsection (2), the attorney general may file a suit in a court of competent jurisdiction to recover the full value of the costs of surveillance and enforcement by the state resulting from the violation.

324.32714 Water use protection fund; creation; disposition of assets; investments; money remaining in fund; expenditures.

Sec. 32714. (1) The water use protection fund is created within the state treasury.

(2) The state treasurer may receive money or other assets from any source for deposit into the fund. The state treasurer shall direct the investment of the fund, and shall credit to the fund interest and earnings from fund investments.

(3) Money in the fund at the close of the fiscal year shall remain in the fund and shall not lapse into the general fund.

(4) The department may expend money from the fund, upon appropriation, only for 1 or more of the following:

(a) The implementation and administration of this part.

(b) The preparation of the statewide groundwater inventory and map under section 32802.

(c) The expenses of the groundwater conservation advisory council under part 328.

(d) The implementation and administration of part 317.

324.32721 Large quantity withdrawal; prohibition; exception; certain large quantity withdrawals subject to definition of adverse resource impact existing on February 28, 2006.

Sec. 32721. (1) A person shall not make a new or increased large quantity withdrawal from the waters of the state that causes an adverse resource impact.

(2) This section does not apply to the baseline capacity of a large quantity withdrawal or a well capable of making a large quantity withdrawal that existed on February 28, 2006.

(3) This section does not apply to a withdrawal that is utilized solely for fire suppression.

(4) A person who developed the capacity to make a new or increased large quantity withdrawal on or after February 28, 2006 and prior to February 1, 2009 or who received a determination under former section 32724 during that period is subject to the definition of adverse resource impact that existed on February 28, 2006.

History: Add. 2006, Act 33, Imd. Eff. Feb. 28, 2006;—Am. 2008, Act 183, Imd. Eff. July 9, 2008.

324.32722 Presumption.

Sec. 32722. (1) For new or increased large quantity withdrawals developed on or after February 28, 2006 and prior to the implementation date of the assessment tool under section 32706a, there is a rebuttable presumption that the withdrawal will not cause an adverse resource impact in violation of section 32721 under either of the following circumstances:

(a) The location of the withdrawal is more than 1,320 feet from the banks of an affected stream reach.

(b) The withdrawal depth of the well is at least 150 feet.

(2) If the assessment tool determines that a withdrawal is a zone A or a zone B withdrawal and is not likely to cause an adverse resource impact, there is a rebuttable presumption that the withdrawal under the conditions that were the basis for the assessment tool's determination will not cause an adverse resource impact in violation of section 32721.

(3) If the department determines, based upon a site-specific review, or in connection with a permit or approval issued under section 32723 or the safe drinking water act, 1976 PA 399, MCL 325.1001 to 325.1023, that a withdrawal is not likely to cause an adverse resource impact, there is a rebuttable presumption that the withdrawal under the conditions that were the basis of the department's determination will not cause an adverse resource impact in violation of section 32721.

(4) A presumption under this section is not valid if the capacity to make the withdrawal is not developed within 18 months after the withdrawal is registered. A presumption under this section may be rebutted by a preponderance of evidence that a new or increased large quantity withdrawal from the waters of the state has caused or is likely to cause an adverse resource impact.

History: Add. 2006, Act 33, Imd. Eff. Feb. 28, 2006;—Am. 2008, Act 183, Imd. Eff. July 9, 2008.

Popular name: Act 451

Popular name: NREPA

324.32723 Water withdrawal permit; persons required to obtain; application; fee; issuance; conditions; revocation; petition for contested case hearing; exemptions from permit requirements.

Sec. 32723. (1) Except as provided in subsection (13), the following persons shall obtain a water withdrawal permit prior to making the withdrawal:

(a) A person who proposes to develop withdrawal capacity to make a new withdrawal of more than 2,000,000 gallons of water per day from the waters of the state to supply a common distribution system.

(b) A person who proposes to develop increased withdrawal capacity beyond baseline capacity of more than 2,000,000 gallons of water per day from the waters of the state to supply a common distribution system.

(c) A person who proposes to develop withdrawal capacity to make a new or increased large quantity withdrawal of more than 1,000,000 gallons of water per day from the waters of the state to supply a common

distribution system that a site-specific review has determined is a zone C withdrawal.

(d) A person who proposes to develop a new or increased withdrawal capacity that will result in an intrabasin transfer of more than 100,000 gallons per day average over any 90-day period.

(2) A person shall apply for a water withdrawal permit under this section by submitting an application to the department containing the information described in section 32706c(1)(a) to (e) and an evaluation of existing hydrological and hydrogeological conditions. If the applicant proposes to undertake a preventative measure along with the withdrawal, the property owner shall provide the department with a detailed description of the preventative measure and relevant information as to how the preventative measure will be implemented. In addition, the applicant shall submit an application fee in the amount of $2,000.00. The department shall transmit application fees collected under this section to the state treasurer to be credited to the water use protection fund created in section 32714.

(3) An application submitted under subsection (2) is considered to be administratively complete effective 30 days after it is received by the department unless the department notifies the applicant, in writing, during this 30-day period that the application is not administratively complete or that the fee required to be accompanied with the application has not been paid. If the department determines that the application is not administratively complete, the notification shall specify the information necessary to make the application administratively complete. If the department notifies the applicant as provided in this subsection, the 30-day period is tolled until the applicant submits to the department the specified information or fee.

(4) The department shall provide public notification of its receipt of applications under this section and shall provide a public comment period of not less than 45 days before applications are acted upon under subsection (5).

(5) The department shall make a decision whether to grant or deny a water withdrawal permit under this section within 120 days of receipt of an administratively complete application.

(6) The department shall issue a water withdrawal permit under subsection (1)(a), (b), or (c) if all of the following conditions are met:

(a) All water withdrawn, less any consumptive use, is returned, either naturally or after use, to the source watershed.

(b) The withdrawal will be implemented so as to ensure that the proposal will result in no individual or cumulative adverse resource impacts. Cumulative adverse resource impacts under this subdivision shall be evaluated by the department based upon available information gathered by the department.

(c) Subject to section 32726, the withdrawal will be implemented so as to ensure that it is in compliance with all applicable local, state, and federal laws as well as all legally binding regional interstate and international agreements, including the boundary waters treaty of 1909.

(d) The proposed use is reasonable under common law principles of water law in Michigan.

(e) For permit applications received on or after January 1, 2009, the applicant has self-certified that he or she is in compliance with environmentally sound and economically feasible water conservation measures developed by the applicable water user's sector under section 32708a or has self-certified that he or she is in compliance with environmentally sound and economically feasible water conservation measures developed for the water use associated with that specific withdrawal.

(f) The department determines that the proposed withdrawal will not violate public or private rights and limitations imposed by Michigan water law or other Michigan common law duties.

(7) The department shall issue a water withdrawal permit under subsection (1)(d) if the transfer complies with section 4.9 of the compact.

(8) In reviewing a proposed preventative measure, the department shall consider the effect of the preventative measure on preventing an adverse resource impact by diminishing the effect of the withdrawal on stream or river flow or the temperature regime of the stream or river. If the department approves a preventative measure in conjunction with a water withdrawal permit under this section, the department shall enter into a legally enforceable implementation schedule for completion of the preventative measure.

(9) A proposed use for which a water withdrawal permit is issued under this section shall be considered to satisfy the requirements of section 4.11 of the compact.

(10) A permit issued under part 31 pursuant to 33 USC 1326(b) shall be considered sufficient to demonstrate that there will not be an adverse resource impact under section 32721 and satisfies the conditions for a water withdrawal permit under this section. Upon receipt of an application under this section and evidence that the applicant holds a part 31 permit described in this subsection, the department shall grant the applicant a water withdrawal permit under this subsection.

(11) The department may revoke a water withdrawal permit issued under this section if the department determines following a hearing, based upon clear and convincing scientific evidence, that the withdrawal is causing an adverse resource impact.

(12) A person who is aggrieved by a determination of the department under this section related to a water withdrawal permit may file a sworn petition with the department setting forth the grounds and reasons for the complaint and asking for a contested case hearing on the matter pursuant to the administrative procedures act of 1969, 1969 PA 306, MCL 24.201 to 24.328. A petition filed more than 60 days after action on the water withdrawal permit may be rejected by the department as being untimely. The department shall issue a final decision on a petition for a contested case hearing within 6 months after receiving the petition. A determination, action, or inaction by the department following a contested case hearing is subject to judicial review as provided in the administrative procedures act of 1969, 1969 PA 306, MCL 24.201 to 24.328.

(13) The following withdrawals are not required to obtain a water withdrawal permit under this section:

(a) A withdrawal by a community supply that holds a permit under the safe drinking water act, 1976 PA 399, MCL 325.1001 to 325.1023.

(b) Seasonal withdrawals of not more than 2,000,000 gallons of water per day average in any consecutive 90-day period to supply a common distribution system unless the withdrawals result in a diversion.

(c) A withdrawal for the production of bottled drinking water approved by the department under a water source review conducted under section 17 of the safe drinking water act, 1976 PA 399, MCL 325.1017.

History: Add. 2006, Act 33, Imd. Eff. Feb. 28, 2006;—Am. 2008, Act 180, Imd. Eff. July 9, 2008.

Popular name: NREPA

324.32724 324.32724 Repealed. 2008, Act 181, Imd. Eff. July 9, 2008.

Compiler's note: The repealed section pertained to persons exempt from permit requirements.

Popular name: Act 451

Popular name: NREPA

324.32725 Water users committee; establishment; purpose; composition; notice of withdrawal; occurrence of adverse resource impacts; recommended solution proposed by department; order by director; petition; "unverified petition" and "permit holders" defined.

Sec. 32725. (1) All persons making large quantity withdrawals within a watershed are encouraged to establish a water users committee to evaluate the status of current water resources, water use, and trends in water use within the watershed and to assist in long-term water resources planning. A water users committee may be composed of all registrants, permit holders, and local government officials within the watershed. Upon establishment of a water users committee, a participating local government official may create an ad hoc subcommittee of residents of that local unit of government to provide that local government official with information and advice on water resources, water use, and trends in water use within the local unit of government.

(2) If the department authorizes a zone B withdrawal in a cold-transitional river system or a zone C withdrawal, the department shall notify all registrants, permit holders, and local government officials within the watershed of the withdrawal and of the authority under this section to establish a water users committee and may provide them technical information regarding water use and capacity within their vicinity aggregated at the stream reach level.

(3) If the department determines by reasonable scientifically-based evidence that adverse resource impacts are occurring or are likely to occur from 1 or more large quantity withdrawals, the department shall notify the water users committee in the watershed or shall convene a meeting of all registrants and permit holders within the watershed and shall attempt to facilitate an agreement on voluntary measures that would prevent adverse resource impacts.

(4) If, within 30 days after the department has notified the water users committee or convened the meeting under subsection (3), the registrants and permit holders are not able to voluntarily agree to measures that would prevent adverse resource impacts, the department may propose a solution that the department believes would equitably resolve the situation and prevent adverse resource impacts. The recommended solution is not binding on any of the parties.

(5) The director may, without a prior hearing, order permit holders to immediately restrict a withdrawal if the director determines by clear and convincing scientific evidence that there is a substantial and imminent threat that the withdrawal is causing or is likely to cause an adverse resource impact. The order shall specify the date on which the withdrawal must be restricted and the date on which it may be resumed. An order issued under this section shall remain in force and effect for not more than 30 days and may be renewed for an additional 30 days if the director determines by clear and convincing scientific evidence that conditions continue to pose a substantial and imminent threat that the withdrawal is causing or is likely to cause an

adverse resource impact. The order shall notify the person that the person may request a contested case hearing under the administrative procedures act of 1969, 1969 PA 306, MCL 24.201 to 24.328. The hearing shall be held within 10 business days following the request, unless the permittee requests a later date. As an alternative to requesting a contested case hearing, a person subject to an order under this section may seek judicial review of the order as provided in the revised judicature act of 1961, 1961 PA 236, MCL 600.101 to 600.9947.

(6) A registrant or permit holder may submit a petition to the director alleging that adverse resource impacts are occurring or are likely to occur from 1 or more water withdrawals. The director shall either investigate the petition or forward the petition to the director of the department of agriculture if the water withdrawals are from an agricultural well. The petition shall be in writing and shall include all the information requested by the director or the director of the department of agriculture, as appropriate.

(7) A person who submits more than 2 unverified petitions under this section within 1 year may be ordered by the director to pay for the full costs of investigating any third or subsequent unverified petition. As used in this subsection, "unverified petition" means a petition in response to which the director determines that there is not reasonable evidence to suspect adverse resource impacts.

(8) As used in this section, "permit holders" means persons holding a permit under section 32723 and persons holding a permit under the safe drinking water act, 1976 PA 399, MCL 325.1001 to 325.1023.

History: Add. 2006, Act 36, Imd. Eff. Feb. 28, 2006;—Am. 2008, Act 184, Imd. Eff. July 9, 2008.

324.32726 Local ordinance.

Sec. 32726. Except as authorized by the public health code, 1978 PA 368, MCL 333.1101 to 333.25211, a local unit of government shall not enact or enforce an ordinance that regulates a large quantity withdrawal. This section is not intended to diminish or create any existing authority of municipalities to require persons to connect to municipal water supply systems as authorized by law.

324.32727 Exemptions; compilation and sharing of certain data.

Sec. 32727. (1) The following withdrawals are exempt from the requirements of this part unless they result in a diversion:

(a) A withdrawal undertaken as part of an activity authorized by the department under part 111, 115, 201, 213, or 615.

(b) A withdrawal undertaken as part of an activity authorized by the United States environmental protection agency under either of the following:

(*i*) The comprehensive environmental response, compensation, and liability act of 1980, Public Law 96-510.

(*ii*) The resource conservation and recovery act of 1976, Public Law 94-580.

(c) A withdrawal that is undertaken for hydroelectric generation at sites certified, licensed, or permitted by the federal energy regulatory commission.

(d) A hydroelectric facility authorized under section 12 of chapter 264 of the act of March 3, 1909, commonly known as the river and harbor act of 1909, 35 Stat. 821.

(e) A hydroelectric facility authorized under section 1075(c) of the intermodal surface transportation efficiency act of 1991, Public Law 102-240.

(f) A hydroelectric facility authorized under Public Law 85, chapter 1368, 34 Stat. 102.

(g) Removal of water from an artificially created surface water body that has as its primary source of water either of the following:

(*i*) A withdrawal that is not a new or increased large quantity withdrawal.

(*ii*) A registered new or increased large quantity withdrawal that has been determined by the assessment tool, a site-specific review, or a permit issued under section 32723 to be a withdrawal that is not likely to cause an adverse resource impact.

(h) A withdrawal from a noncommercial well located on the following residential property:

(*i*) Single-family residential property unless that well is a lake augmentation well.

(*ii*) Multifamily residential property not exceeding 4 residential units and not more than 3 acres in size unless that well is a lake augmentation well.

(2) The director of the department shall ensure that data in the possession of the state related to withdrawals that are not regulated under this part are compiled and shared with departmental personnel responsible for implementing this part.

History: Add. 2006, Act 33, Imd. Eff. Feb. 28, 2006;—Am. 2008, Act 183, Imd. Eff. July 9, 2008.

Popular name: Act 451

Popular name: NREPA

324.32728 Construction and scope of act; rules.

Sec. 32728. (1) This part shall not be construed as affecting, intending to affect, or in any way altering or interfering with common law water rights or property rights or the applicability of other laws providing for the protection of natural resources or the environment or limit, waive, cede, or grant any rights or interest that the state possesses as sovereign for the people of the state in the waters or natural resources of the state.

(2) This part does not limit the right of a person whose interests have been or will be adversely affected to institute proceedings in circuit court against any person to protect such interests.

(3) Except as specifically authorized under this part, this part does not authorize the promulgation of rules.

History: Add. 2006, Act 33, Imd. Eff. Feb. 28, 2006;—Am. 2008, Act 185, Imd. Eff. July 9, 2008.

324.32730 Compact; implementation.

Sec. 32730. The compact shall be implemented as follows:

(a) Except as specifically provided in this part, water withdrawals originating within this state shall be regulated exclusively under this part.

(b) A proposed use for which a water withdrawal permit is issued under section 32723 shall be considered to satisfy the requirements of section 4.11 of the compact.

(c) The 2008 amendments to this part, the 2008 amendments to part 328, and the 2008 amendments to sections 4 and 17 of the safe drinking water act, 1976 PA 399, MCL 325.1004 and 325.1017, are intended to fully implement the compact in this state. For purposes of section 9.1 of the compact, all acts and parts of acts that were inconsistent with the compact on the effective date of the amendatory act that added this section have been modified, as necessary, to be consistent with the compact, and therefore section 9.1 does not repeal any acts or parts of acts.

(d) If the council proposes a revision to the standard of review and decision under section 3.1 and 3.3 of the compact, the governor shall notify the standing committees of the legislature with jurisdiction primarily related to natural resources and the environment. A regulation adopted pursuant to section 3.1 and 3.3 of the compact that amends the standard of review and decision shall not be deemed duly adopted in accordance with the statutory authorities and applicable procedures of this state unless the regulation is approved by the legislature and enacted into law.

PART 328
AQUIFER PROTECTION

324.32801 Definitions.

Sec. 32801. As used in this part:

(a) "Annex 2001" means the Great Lakes charter annex signed by the governors and premiers of the Great Lakes region on June 18, 2001.

(b) "Aquifer" means any water bearing bed or stratum of earth or rock capable of yielding groundwater to a water well in sufficient quantities that can be withdrawn.

(c) "Assessment tool" means the water withdrawal assessment tool provided for in part 327.

(d) "Base flow" means groundwater discharge to rivers and streams.

(e) "Conflict areas" means an aquifer or a portion of an aquifer in which the department has determined that there is reasonable, scientifically based evidence of a pattern of groundwater withdrawal conflicts or a single extended groundwater withdrawal conflict.

(f) "Council" means the water use advisory council created under section 32803.

(g) "Department" means the department of environmental quality.

(h) "Director" means the director of the department.

(i) "Groundwater" means water below the land surface in a zone of saturation.

(j) "Groundwater withdrawal conflict" means the failure of an existing water well that was constructed in compliance with part 127 of the public health code, 1978 PA 368, MCL 333.12701 to 333.12771, to furnish its normal supply of groundwater because of a progressive decline of the static water level within the aquifer due to the withdrawal of groundwater from the aquifer by a high-capacity well or sump, as determined based on reasonable, scientifically based evidence.

(k) "Static water level" means the distance between the ground surface and the water level within a well that is not being pumped.

History: Add. 2003, Act 148, Imd. Eff. Aug. 8, 2003;—Am. 2008, Act 189, Imd. Eff. July 9, 2008;—Am. 2018, Act 509, Imd. Eff. Dec. 28, 2018.

Popular name: Act 451

Popular name: NREPA

324.32802 Groundwater data; collection and compilation into statewide groundwater inventory and map; update; availability to public.

Sec. 32802. (1) Not later than 2 years after the effective date of the amendatory act that added this section, the department shall collect and compile groundwater data into a statewide groundwater inventory and map. The department shall use existing sources of groundwater data where those data are available, including information reported under part 327, information reported under the safe drinking water act, 1976 PA 399, MCL 325.1001 to 325.1023, and information collected under the groundwater dispute resolution program created in part 317, but may supplement those data through additional studies if those data are incomplete. Following completion of the initial statewide groundwater inventory and map, the department shall update the statewide groundwater inventory and map as new information becomes available. The department shall include data on all of the following in the statewide groundwater inventory and map:

(a) Location and water yielding capabilities of aquifers in the state.

(b) Aquifer recharge rates in the state, if available to the department.

(c) Static water levels of groundwater in the state.

(d) Base flow of rivers and streams in the state.

(e) Conflict areas in the state.

(f) Surface waters, including designated trout lakes and streams, and groundwater dependent natural resources, that are identified on the natural features inventory.

(g) The location and pumping capacity of all of the following:

(*i*) Industrial or processing facilities registered under section 32705 that withdraw groundwater.

(*ii*) Irrigation facilities registered under section 32705 that withdraw groundwater.

(*iii*) Public water supply systems that have the capacity to withdraw over 100,000 gallons of groundwater per day average in any consecutive 30-day period.

(h) Aggregate agricultural water use and consumptive use, by township.

(2) The department shall make the statewide groundwater inventory and map available to the general public.

History: Add. 2003, Act 148, Imd. Eff. Aug. 8, 2003.

Popular name: Act 451

Popular name: NREPA

324.32803 Water use advisory council; creation; qualifications and appointment of members; appointment of technical advisors; duties of council; report.

Sec. 32803. (1) The water use advisory council is created within the department. The council shall consist of all of the following members:

(a) Four individuals appointed by the senate majority leader as follows:

(*i*) One individual representing business and manufacturing interests.

(*ii*) One individual representing public utilities.

(*iii*) One individual representing a statewide angler association.

(*iv*) One individual representing a statewide agricultural organization.

(b) Four individuals appointed by the speaker of the house of representatives as follows:

(*i*) One individual representing registered well drilling contractors with hydrology and drilling field experience.

(*ii*) One individual representing local units of government.

(*iii*) One individual representing agricultural irrigators.

(*iv*) One individual representing wetlands conservation organizations.

(c) Five individuals appointed by the governor as follows:

(*i*) One individual representing municipal water suppliers.

(*ii*) One individual representing a statewide conservation organization.

(*iii*) One individual representing a statewide riparian landowners association.

(*iv*) One individual representing professional hydrologists and hydrogeologists, as defined in section 32706c, with hydrogeology field experience.

(*v*) One individual representing Indian tribes.

(d) Four individuals appointed by the director as follows:

(*i*) One individual representing nonagriculture irrigators.

(*ii*) One individual representing the aggregate industry.

(*iii*) One individual representing environmental organizations.

(*iv*) One individual representing local watershed councils.

(e) Six individuals serving as ex officio, nonvoting members, representing the department, the department of agriculture and rural development, the department of natural resources, the office of the Great Lakes, the Michigan geological survey, and the attorney general.

(2) The appointments to the council under subsection (1) shall be made not later than 60 days after the effective date of the 2018 amendatory act that amended this section. The individual making the appointment under subsection (1) shall give consideration and deference to individuals currently serving on the department's water use advisory council.

(3) An individual appointed to the council shall serve for a term of 4 years, and may be reappointed. Individuals appointed to the council serve without compensation. A vacancy on the council shall be filled in the same manner as the original appointment.

(4) The council may elect co-chairs, form committees, set meeting schedules and work plans to address the council's responsibilities as provided by law, address charges from the department, and establish priorities. Members of the council may participate in any committees created by the council. Members of the council shall strive to make recommendations by consensus vote, and may submit opposition statements that must be included in the council's report under subsection (7).

(5) The council may appoint technical advisors with specific scientific, technical, legal, and similar expertise relevant to the council's responsibilities. Technical advisors may participate in any council meetings, committees, or subgroups created by the council but shall not vote on recommendations made by the council to the department or legislature under subsection (7).

(6) A meeting of the council must be held in compliance with the open meetings act, 1976 PA 267, MCL 15.261 to 15.275.

(7) The council shall do all of the following:

(a) Make recommendations to the department, the department of agriculture and rural development, the department of natural resources, and the legislature on the implementation of part 327, including all of the following:

(*i*) Strategies for collection, verification, and use of data, including geology, aquifer characteristics, and groundwater and surface water hydrology.

(*ii*) Improvement, verification, regionalization, and integration of models used in the water withdrawal assessment tool and site-specific review, including models developed by private and public entities, organizations, or individuals.

(*iii*) Identification of research, public-private partnerships, training, and changes to the water withdrawal assessment tool needed to improve the department's ability to implement part 327 and to improve the water withdrawal assessment process under part 327.

(b) Study and make recommendations, as needed or as requested by the relevant standing committees of the legislature or the department, regarding the development and refinement of the water withdrawal assessment process under part 327.

(c) Make recommendations on reconciling conflicts in state laws related to the use of the waters of the state.

(d) At least every 2 years after the effective date of the 2018 amendatory act that amended this section,

provide a report to the senate majority leader, the speaker of the house of representatives, and the standing committees of the legislature with jurisdiction primarily related to natural resources and the environment that makes recommendations regarding how the water withdrawal assessment process under part 327 could be improved. The report shall contain specific recommendations on the use of the assessment tool, the site-specific review process, the permitting process, the staffing, budgetary, software, and other resources required by the departments to successfully implement part 327, and any other measure that the council determines would improve the water withdrawal assessment process under part 327.

History: Add. 2003, Act 148, Imd. Eff. Aug. 8, 2003;—Am. 2006, Act 34, Imd. Eff. Feb. 28, 2006;—Am. 2008, Act 189, Imd. Eff. July 9, 2008;—Am. 2018, Act 509, Imd. Eff. Dec. 28, 2018.

Compiler's note: For abolishment of the groundwater conservation advisory council and transfer of its powers and duties to the department of environmental quality, see E.R.O. No. 2007-5, compiled at MCL 324.99907.

For transfer of powers and duties of water resources conservation advisory council from department of natural resources to natural resources commission, and abolishment of the advisory council, see E.R.O. No. 2009-31, compiled at MCL 324.99919.

Popular name: Act 451

Popular name: NREPA

PART 329
GREAT LAKES PROTECTION

324.32901 Definitions.

Sec. 32901. As used in this part:

(a) "Board" means the Michigan Great Lakes protection fund technical advisory board created in section 32908.

(b) "Fund" means the Michigan Great Lakes protection fund created in section 32905.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Compiler's note: For the type III transfer of the office of the great lakes within the department of natural resources to the new office of the great lakes within the department of environment, great lakes, and energy, see E.R.O. 2019-1, compiled at MCL 324.99923.

Popular name: Act 451

Popular name: NREPA

324.32902 Legislative findings.

Sec. 32902. The legislature finds that:

(a) The Great Lakes are a valuable resource providing an important source of food, fresh water, recreation, beauty, and enjoyment.

(b) The ecosystems of the Great Lakes, which provide sustenance and recreation to the people of this state and other states and nations, have been severely affected and are continually threatened by the introduction of foreign species into the lakes and by pollution of the Great Lakes waters.

(c) Careful management of the Great Lakes will permit the rehabilitation and protection of the lakes, their waters, and their ecosystems, while continuing and expanding their use for industry, food production, transportation, and recreation.

(d) This state, because it is surrounded by the Great Lakes and because the Great Lakes contribute in innumerable ways to the state's economy, recreation, and way of life, must act as a steward for the protection, enhancement, and wise utilization of the Great Lakes.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.32903 Office of the Great Lakes; establishment; purpose; duties.

Sec. 32903. The office of the Great Lakes is established within the department of natural resources and is designated as the lead agency within state government for the development of policies, programs, and procedures to protect, enhance, and manage the Great Lakes. The office of the Great Lakes shall do all of the following:

(a) Advise the governor, the director, and the directors of other appropriate state departments on appropriate steps needed to coordinate state policy and state actions on the Great Lakes and to implement an ecosystem approach to this state's Great Lakes policies.

(b) Provide representation at the national level for this state's Great Lakes interests.

(c) Represent this state before Great Lakes policy development bodies such as the international joint commission.

(d) Ensure adequate research and staff work to maintain this state's regional leadership in resolving Great Lakes problems.

(e) Promote the wise use of the ports of this state and Great Lakes water transportation.

(f) Promote the Great Lakes tourism industry.

(g) Advocate the interests of this state in actions, policies, and legislation affecting the Great Lakes proposed in other Great Lakes states, Canadian provinces, Great Lakes policy development bodies, and the federal government.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Compiler's note: For transfer of the Office of the Great Lakes, including but not limited to the authority, powers, duties, functions, and responsibilities, to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

For transfer of the office of the Great Lakes from department of environmental quality to department of natural resources and environment, see E.R.O. No. 2009-31, compiled at MCL 324.99919.

For transfer of office of Great Lakes from department of natural resources and environment to department of environmental quality, see E.R.O. No. 2011-1, compiled at MCL 324.99921.

For transfer of office of the Great Lakes from department of environmental quality to department of natural resources, see E.R.O. No. 2017-5, compiled at MCL 324.99922.

For the type III transfer of the office of the Great Lakes within the department of natural resources to the new office of the Great Lakes within the department of environment, Great Lakes, and energy, see E.R.O. 2019-1, compiled at MCL 324.99923.

324.32904 Reports, analysis, and inventory to be submitted by governor to legislature.

Sec. 32904. The governor, with the assistance of the office of the Great Lakes, shall prepare and submit to the legislature the following:

(a) An annual report, submitted by December 31 of each year, on the state of the Great Lakes.

(b) A comprehensive analysis, in the governor's annual budget message, of all the funds from state and federal sources that the governor recommends be expended for the protection, enhancement, and management of the Great Lakes.

(c) A comprehensive inventory, submitted by August 2, 1986, of all state, federal, interstate, and international agencies, programs, and projects associated with the protection, enhancement, and management of the Great Lakes.

(d) A report, submitted by February 2, 1987, on the status of the agreement between the United States and Canada known as the Great Lakes water quality agreement of 1978, and recommending steps to be taken to execute the state's obligations in that agreement and to promote the state's role and objectives in the renegotiation of that agreement.

(e) A report, submitted by August 2, 1987, listing the priority research needs with respect to the Great Lakes.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Compiler's note: For transfer of the Office of the Great Lakes, including but not limited to the authority, powers, duties, functions, and responsibilities, to the Director of the Michigan Department of Environmental Quality, see E.R.O. 324.32905 Michigan Great Lakes protection fund; creation; sources of money; investment of fund; crediting interest and earnings to fund; money not to revert to general fund; annual report.

Sec. 32905. (1) The Michigan Great Lakes protection fund is created in the state treasury.

(2) The fund shall receive money from the following sources:

(a) Money received by the state from the Great Lakes protection fund authorized in part 331.

(b) Gifts and contributions to the fund.

(c) Other sources provided by law.

(3) The state treasurer shall direct the investment of the fund. Interest and earnings of the fund shall be credited to the fund. Money in the fund at the end of the fiscal year shall remain in the fund and shall not revert to the general fund.

(4) The state treasurer shall annually report to the board and the department on the amount of money in the fund.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.32906 State treasurer to credit money to fund.

Sec. 32906. The state treasurer shall credit all money the state receives from the Great Lakes protection fund as authorized in part 331 to the fund.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.32907 Use of money in fund.

Sec. 32907. Money in the fund shall be used only for programs or grants to supplement existing Great Lakes research and protection programs consistent with the purposes of part 331 including, but not limited to, the following:

(a) Research on the economic, environmental, and human health effects of contamination in the Great Lakes.

(b) The collection and analysis of data on the Great Lakes.

(c) The development of new or improved environmental cleanup technologies.

(d) Research to assess the effectiveness of pollution control policies.

(e) The assessment of the health of Great Lakes fish, waterfowl, and other organisms.

(f) Other programs consistent with the purposes of part 331.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

324.32908 Michigan Great Lakes protection fund technical advisory board; creation; appointment, qualifications, and terms of members; removal of member; election of chairperson; meetings; public notice; member not to receive grant.

Sec. 32908. (1) The Michigan Great Lakes protection fund technical advisory board is created within the department. The board shall consist of the following members:

(a) An individual appointed by the department who has knowledge or expertise in Great Lakes water issues.

(b) An individual appointed by the department who has knowledge or expertise in the effects of air pollution on the Great Lakes.

(c) Six individuals appointed by the department as follows:

(*i*) One individual from an environmental organization.

(*ii*) One individual from a business or industry related to the Great Lakes.

(*iii*) One individual who has performed research related to the water quality of the Great Lakes.

(*iv*) One individual who has performed research related to public health concerns associated with the Great Lakes.

(*v*) One individual who has knowledge or expertise in the demographics of the Great Lakes region or the climatology of the Great Lakes region.

(*vi*) One individual who represents the hazardous substance research center.

(2) A member of the board shall serve for a term of 3 years. However, of the first appointments to the board by the department under subsection (1)(c), 3 shall be appointed to serve 2-year terms and 3 shall be appointed to serve 1-year terms.

(3) A member of the board may be removed for inefficiency, neglect of duty, or malfeasance in office by the body that appointed him or her.

(4) The board shall elect a chairperson from among its members. The board shall meet at the call of the chairperson at least annually. A meeting of the board shall be held in compliance with the open meetings act, Act No. 267 of the Public Acts of 1976, being sections 15.261 to 15.275 of the Michigan Compiled Laws. Public notice of the time, date, and place of the meeting shall be given in the manner required by that act.

(5) A member of the board shall not receive a grant under this part.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.32909 Duties of board generally.

Sec. 32909. The board shall do both of the following:

(a) Advise this state's representatives on the board of directors of the Great Lakes protection fund authorized in part 331.

(b) Consult with the technical advisory committee of the Great Lakes protection fund.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.32910 Programs and grants to be funded; advice to department; compilation and submission of list; statement of guidelines; appropriation.

Sec. 32910. (1) The board shall annually advise the department on the programs or grants that should be funded under this part and shall submit a list of these programs or grants to the department for its approval. This list shall be compiled in order of priority. Upon approval of the list, the department shall submit the list to the legislature in January of each year.

(2) The department and the board shall include with each list submitted under subsection (1) a statement of the guidelines used in listing and assigning the priority of the proposed programs or grants.

(3) The legislature shall annually appropriate money from the Michigan Great Lakes protection fund and from the Great Lakes spill prevention research fund for programs or grants pursuant to this part.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.32911 Great Lakes spill prevention research fund; creation; appropriations, gifts, and contributions; investments; disposition of interest and earnings; reversions; use of money; definitions.

Sec. 32911. (1) The Great Lakes spill prevention research fund is created in the state treasury.

(2) The research fund may receive money as appropriated by the legislature, from gifts and contributions to the fund, and as otherwise provided by law. The state treasurer shall direct the investment of the research fund. Interest and earnings of the research fund shall be credited to the research fund. Money in the research fund at the close of the fiscal year shall remain in the research fund and shall not revert to the general fund.

(3) Money in the research fund shall be used only for the following purposes:

(a) Research into the prevention of spills during the transportation of hazardous materials on the Great Lakes and major tributaries of the Great Lakes.

(b) Research on selected pollution incidents to determine causal factors in spills of hazardous materials on the Great Lakes and major tributaries of the Great Lakes.

(c) Research into a total systems approach to address Great Lakes pollution problems that include human factors and socio-technical considerations.

(d) Research into the role of human factors in spills of hazardous materials on the Great Lakes and major tributaries of the Great Lakes, including human factors in pollution alarms, pollution monitoring systems, and instrumentation.

(e) Research into the deployment of existing and new technology related to transportation of hazardous materials on the Great Lakes and major tributaries of the Great Lakes and the appropriate allocation of functions between individuals and machines.

(f) Research to determine the relative contribution of spills of hazardous materials into the Great Lakes and major tributaries of the Great Lakes to the total pollution of the Great Lakes basin.

(g) Research on and modeling of spills to determine their effect on water intakes.

(4) As used in this section:

(a) "Great Lakes" means the Great Lakes and their connecting waterways over which the state has jurisdiction.

(b) "Hazardous material" means a chemical or other material which is or may become injurious to the public health, safety, or welfare, or to the environment.

(c) "Major tributary of the Great Lakes" means a river that flows into the Great Lakes that has a drainage area in excess of 700 square miles or has a drainage area that contains a population of 1,000,000 or more individuals.

(d) "Research fund" means the Great Lakes spill prevention research fund created in subsection (1).

(e) "Spill" means any leaking, pumping, pouring, emptying, emitting, discharging, escaping, leaching, or

disposing of a hazardous material in a quantity which is or may become injurious to the public health, safety, or welfare or to the environment.

PART 331
REGIONAL GREAT LAKES PROTECTION FUND

324.33101 Definitions.

Sec. 33101. As used in this part:

(a) "Agreement" means the document entitled "Great Lakes protection fund agreement" signed by the governor on February 26, 1989.

(b) "Great Lakes protection fund" or "fund" means the Great Lakes protection fund approved in the agreement.

(c) "Great Lakes toxic substance control agreement" means the document entitled "Great Lakes toxic substance control agreement" signed by the governor on May 21, 1986.

(d) "Great Lakes water quality agreement of 1978" means the "Great Lakes water quality agreement of 1978" between the United States and Canada signed November 22, 1978, including the phosphorous load reduction supplement signed October 7, 1983, and as amended by protocol signed November 18, 1987.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Compiler's note: For transfer of the Office of the Great Lakes, including but not limited to the authority, powers, duties, functions, and responsibilities, to the Director of the Michigan Department of Environmental Quality, see E.R.O. Popular name: Act 451

Popular name: NREPA

324.33102 Legislative findings and declaration.

Sec. 33102. The legislature finds and declares that:

(a) The Great Lakes protection fund has been created to advance the principal goals and objectives of the Great Lakes toxic substances control agreement and the Great Lakes water quality agreement of 1978.

(b) The Great Lakes protection fund has been created to finance and support state and regional projects for the protection, research, and cleanup of the Great Lakes.

(c) There is a need for a stable and predictable funding commitment for the preservation of Great Lakes water quality.

(d) The protection of the Great Lakes is of paramount public concern in the interest of the health, safety, and general welfare of the citizens of the state and the participation of the state in the Great Lakes protection fund will assist in achieving this protection.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Compiler's note: For transfer of the Office of the Great Lakes, including but not limited to the authority, powers, duties, functions, and responsibilities, to the Director of the Michigan Department of Environmental Quality, see E.R.O. 324.33103 Great Lakes protection fund; formation and operation; agreement; appointment of members to board of directors.

Sec. 33103. (1) The governor, on behalf of this state, may take all steps necessary to join with other states in the formation and operation of the Great Lakes protection fund provided that the fund does all of the following:

(a) Provides for the fund to receive money from each of the participating states and to expend only the interest and earnings of the fund for the purposes of subdivision (b).

(b) Provides for the funding of activities related to Great Lakes research and protection including but not limited to:

(*i*) Research on the economic, environmental, and human health effects of contamination in the Great

Lakes.

(*ii*) The collection and analysis of data on the Great Lakes.

(*iii*) The development of new or improved environmental cleanup technologies.

(*iv*) Research to assess the effectiveness of pollution control policies.

(*v*) The assessment of the health of Great Lakes fish, waterfowl, and other organisms.

(2) The governor shall do all things necessary to implement the agreement.

(3) The governor shall appoint members to the board of directors of the Great Lakes protection fund in accordance with the agreement.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: NREPA

324.33707 Contracts; borrowing funds from federal government.

Sec. 33707. Contracts entered into under this part involving the financial ability of the incorporated city, incorporated village, township, or county to meet all obligations and liabilities imposed by the contracts as to cost of lands, easements, rights-of-way, construction, or the maintenance and operation costs of the project or projects are subject to the revised municipal finance act, 2001 PA 34, MCL 141.2101 to 141.2821. Any incorporated city, incorporated village, or township, or the board of county road commissioners of any county when directed by the county board of commissioners, authorized to contract with the federal government or any agency of the federal government under this part, may borrow funds from the federal government or any agency of the federal government to implement this part, which borrowings shall be subject to existing statutes and charter limitations that are applicable to the borrowing. The revised municipal finance act, 2001 PA 34, MCL 141.2101 to 141.2821, applies to those borrowings.

324.33708 Interest in lands; easement for flood plain; acquisition; declared public purposes.

Sec. 33708. For the accomplishment of the purposes of this part, any city, incorporated village, township, or board of county road commissioners may acquire any interest in land necessary to any flood control, drainage, or beach erosion control project, or to preserve flood plains, by purchase, gift, exchange, condemnation, or otherwise. If an easement to preserve a flood plain is acquired, the acquiring agency, in any instrument conveying such right or in any eminent domain proceedings instituted therefor, may acquire the further right to use the land subject to the easement, or any part of the easement, for any other public purpose, but only to the extent that the other uses are specifically enumerated in the conveyance or eminent domain proceedings. The legislative body of any city, incorporated village, or township, or the board of county road commissioners of any county when directed by the county board of commissioners of the county, may institute and prosecute proceedings under the power of eminent domain in accordance with the laws of the state or any local charter relative to condemnation. Two or more adjoining cities, villages, or townships are authorized to maintain proceedings in accordance with the procedure prescribed by Act No. 81 of the Public Acts of 1925, being sections 123.71 to 123.73 of the Michigan Compiled Laws. The purposes contemplated by this part are declared to be public purposes within the meaning of the constitution, state laws, and charters relative to the power of eminent domain.

PART 339
CONTROL OF CERTAIN STATE LANDS

324.33901 Unpatented overflowed lands, made lands, and Lake St. Clair bottomlands; authority of department.

Sec. 33901. All of the unpatented overflowed lands, made lands, and Lake St. Clair bottomlands belonging to this state or held in trust by this state as provided in this part shall be held, leased, disposed of by deed, and controlled by the department in the manner provided in this part.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 2006, Act 496, Imd. Eff. Dec. 29, 2006.

Popular name: Act 451

Popular name: NREPA

324.33902 Powers of department to convey lands; dedication of unleased lands for recreational uses.

Sec. 33902. The department shall not deed or convey the lands described in section 33901 except as provided in sections 33903 to 33911. The department may dedicate unleased lands of the character described in section 33901 for public hunting, fishing, and other recreational uses.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 2006, Act 496, Imd. Eff. Dec. 29, 2006.

Popular name: Act 451

Popular name: NREPA

324.33903 Conveyance of certain leased lands by department; rights reserved.

Sec. 33903. The department, upon application of any person who, on the effective date of the 2006 amendatory act that amended this section, holds a lease of any portion or portions of land from this state pursuant to former 1913 PA 326, or this part, or upon application by that person's heirs or assigns, shall execute and deliver to the applicant or his or her heirs or assigns a deed conveying to him or her all of the right, title, and interest of this state in and to the lands described in this section, subject to the paramount rights of navigation, hunting, and fishing that remain in the general public and in the government as now existing and recognized by law. The deeds shall contain the provisions as to residency and club use and occupancy as now set forth in all leases previously granted under former 1913 PA 326. An application under this section must be filed at least 1 year before the date on which the lease expires.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 2006, Act 496, Imd. Eff. Dec. 29, 2006.

Popular name: Act 451

Popular name: NREPA

324.33904 Deeds; prerequisites to granting.

Sec. 33904. Before the department grants a deed, there shall be presented evidence that the applicant requesting the deed is the lessee of the land, that the land is part of the lands described in section 33903, and that all taxes on the land are paid. All property deeded under this part is thereafter subject to the general property tax act, 1893 PA 206, MCL 211.1 to 211.157, and the recording laws of this state.

324.33906 St. Clair Flats lands; conflicting claims; determination; appeal.

Sec. 33906. In all cases where there is a contest or conflict between applicants for a deed to the same piece or parcel of land growing out of errors of description, overlapping descriptions, prior leases, or otherwise, the conflicting claims shall be determined by the department at a meeting scheduled by the department after notice to each of the claimants of the time and place of hearing, and in such cases depositions may be taken by any claimant in the manner provided for in taking depositions in the circuit courts of this state. Any party considering himself or herself aggrieved by any decision of the department refusing to grant him or her a deed under this part, whether in case of conflict, contest, or otherwise, shall have a right of appeal to the circuit court for the county in which the land is situated, and the proceedings to take the appeal and the trial of the appeal in any of the courts shall be in accordance with the statutes providing for appeals from district courts of this state, or to take such other action at law or in equity as provided by the statutes and laws of the state of Michigan.

324.33910 Water highway lands; lease; conveyance to contiguous lessees.

Sec. 33910. The department, in its discretion, upon application of a person holding a lease or deed under this part to any lands lying contiguous to a water highway as surveyed under former 1899 PA 175, if it is determined that the water highway is no longer needed for navigation, ingress, and egress to surveyed lots, or for any public use, whether dredged or not, may execute and deliver to the applicant a deed subject to all the applicable conditions and provisions of sections 33902 to 33908, to all of the right, title, and interest of the state in and to 1/2 of the surveyed width of that portion of the water highway as lies contiguous to land held under lease or deed by the applicant.

Popular name: Act 451

Popular name: NREPA

324.33911 Granting deeds to certain property; requirements.

Sec. 33911. (1) Upon application of a person that holds a lease from this state of any portion or portions of the real property described in this part, the department may execute and deliver to the applicant a deed conveying all of the right, title, and interest of this state in and to that real property, subject to the paramount rights of hunting, fishing, and navigation, which remain in the general public and in the government as recognized by law. The deeds shall contain the same provisions as to use and occupancy now set forth in all the leases previously granted under former 1913 PA 326 or under this part. The department shall not grant a deed under this part unless the lessee of the subject property agrees to cancel the lease and relinquishes all rights under the lease.

(2) The department shall not grant a deed under this part for a lot that contains a structure unless the structure and the lot subject to the deed, including seawalls where present, comply with the applicable township building code and county and state sanitation codes and part 325, and the structure is located on a parcel of land that is adequately protected from erosion.

(3) A deed granted under this part shall not include a portion of the original lease that is submerged or lies below the elevation of 575.3 International Great Lakes Datum (IGLD 1985). The department of environmental quality shall perform a site inspection and set stakes, if necessary, to identify the boundaries of the area of the leased lot to be deeded. The applicant shall provide a boundary survey, completed by a professional surveyor, that delineates the area of the real property to be deeded. The state shall retain proprietary ownership in trust over the portion of the leased lot below the ordinary high-water mark of Lake St. Clair at the time of the conveyance.

(4) A deed shall not be granted under this part at less than the estimated land value of the real property as determined by the township in which the real property is located. Appraisal procedures and practices may include utilizing independent fee appraisal contractors. The appraisal shall not include improvements such as buildings, seawalls, and docks. Credit shall not be granted to the lessee for the years remaining on an unexpired lease when determining the sale value to the state. The applicant shall remit the full consideration within 1 year after being notified in writing of the selling price by the department. If the applicant does not remit the full consideration for the deed within 1 year, the department shall close the file and a new application must be submitted.

(5) If the applicant is not satisfied with the fair market value determined by the department under subsection (4), the applicant, within 30 days after receiving the determination, may submit a petition in writing to the circuit court in the thirty-first judicial circuit, and the court shall appoint an appraiser or appraisers from the department's approved listing to conduct an appraisal of the parcel. The decision of the court is final. The applicant shall pay all costs associated with this additional appraisal.

(6) A request for a deed shall be on a form provided by the department of environmental quality and shall be accompanied by an application fee of $500.00.

324.33912 Rental valuation periods; determination; improvements; maximum increase; gross sum.

Sec. 33912. Whenever any person is entitled under this part to lease for the period of 99 years, the department shall divide the term of 99 years into 2 periods of 50 and 49 years each, to be known as rental valuation periods, and the consideration or rental to be paid by the lessee for the first period of 50 years is to be determined by the department at the time such lessee is adjudged entitled to the lease. At the expiration of the first period of 50 years, the department shall redetermine the rental value or consideration to be paid by the lessee for the next succeeding rental period of 49 years until the expiration of the full term of the lease. However, the department, in determining the rental value to be paid by the lessee, shall consider the value of the land only and shall not increase the rental value or consideration for any of the rental periods because of the improvements that may have been made on any of the premises by a lessee. In determining the rental value or consideration to be paid by the lessee for the second valuation period of 49 years, the department shall not increase the rental value or consideration to any sum in excess of double the rental value or consideration determined for the first valuation period of 50 years. The consideration so fixed shall, as applied to the claimants coming within the provisions of this section, be a gross sum and not an annual rental.

324.33924 Definitions.

Sec. 33924. As used in this part:

(a) "Department" means the department of natural resources unless expressly indicated otherwise.

(b) "Possession", "occupancy", and "improvement" include dredging or ditching, the throwing up of embankments, sheetpiling, filling in, the erection of fences, a boathouse, land made by dredging and filling, or building structures.

(c) "Person" means an individual, partnership, corporation, association, or other nongovernmental legal entity.

(d) "Well maintained" means that any structure on the land complies with township building codes and current county and state sanitation codes and part 325 and that the land is adequately protected from erosion.

324.33927 Ascertainment of rights by department; hearing; powers of department.

Sec. 33927. The department shall ascertain and decide upon the rights of persons claiming the benefit of this part, and it may hear and decide in a summary manner all matters respecting such applications or claims, except as otherwise provided in this part, and to that end may compel the attendance of witnesses and receive testimony by deposition or otherwise as may be produced, and determine thereon, according to equity and justice, the validity and just extent of the claim and respective rights of conflicting claimants making application for a lease. It shall cause minutes of the filing of such claims and all its proceedings to be entered in a book kept for that purpose and keep a record of the evidence from which its decisions are made, and it is authorized when it considers it necessary, or upon request of any of the claimants, to employ a stenographer to assist the department. The department may administer oaths, issue subpoenas, and compel the attendance of witnesses and the production of papers upon any hearing before the department under this part. In case of disobedience on the part of any person or persons, or willful failure to appear pursuant to any subpoena issued by the department, or upon refusal of any witnesses to testify regarding any matter pending before the department or to produce books and papers which he or she is required by the department to produce, the circuit court of any county in this state, upon the application of the department, shall compel obedience by attachment proceedings for contempt as in the case of disobedience of the requirements of a subpoena issued from such court or a refusal to testify therein, and in addition the department shall have the powers vested in the circuit court to compel witnesses to testify to any matter pending before the department, and each witness who appears before the department by its order or subpoena shall receive for his or her attendance the fees and mileage provided witnesses in civil cases in circuit courts, said fees to be paid by the party calling such witnesses.

324.33928 Conflicting claims; determination by department; hearing; notice; depositions; appeal.

Sec. 33928. In all cases where there is a contest or conflict between applicants for a lease to the same piece or parcel of land growing out of a prior occupation or improvements, such conflicting claims shall be determined by the department at a meeting scheduled by the department after notice to each of the claimants of the time and place of hearing, and in such cases depositions may be taken by any claimant in the manner

provided for taking depositions in the circuit courts of this state. Any party considering himself or herself aggrieved by any decision of the department refusing to grant him or her a lease under the provisions of this part, whether in case of conflict, contest, or otherwise, has the right of appeal to the circuit court for the county in which the land is situated, and the proceedings to take the appeal and the trial of the appeal in any of those courts shall be in accordance with the statutes providing for appeals from district courts of this state, or the aggrieved party may take such other action at law or in equity as provided by the statutes and laws of this state.

324.33929 State leased lands; sale or transfer of lease; statement of purpose; approval by department; record of assignment.

Sec. 33929. (1) Each sale or transfer of a lease shall contain a specific statement of the purpose for which the property leased is to be used by the purchaser or assignee. A sale or transfer of a lease for other than club or residence purposes is not valid unless and until the sale or transfer is approved by the department of environmental quality.

(2) Before selling or transferring a property that is subject to a lease under this part, the parties involved shall apply to the department of environmental quality for approval of the transfer of the lease to the purchaser. The application shall be made on a form provided by the department of environmental quality and shall be accompanied by a fee of $250.00. Upon approval by the department of environmental quality, an assignment of lease form shall be recorded with the county register of deeds.

Popular name: Act 451

Popular name: NREPA

324.33934 State leased lands; tax default; procedure for payment; forfeiture of lease; co-owners; partial payment of taxes; certificate of cancellation.

Sec. 33934. (1) If default is made in the payment of taxes to the treasurer of the township, city, or village in which the lands leased are located, the same shall be returned to the county treasurer according to and subject to the provisions of law for the return and collection of unpaid taxes assessed upon real estate. The treasurer of the township, city, or village, at the same time that he or she makes returns to the county treasurer, shall make and transmit to the department a list of the lands so delinquent for taxes and the amount of taxes delinquent upon each description in the list. The county treasurer shall, at the same time he or she makes his or her return of delinquent lands to the department of treasury, make a similar return to the department of all such leasehold interests, the taxes upon which have not been collected, with a statement of the amount thereof. The county treasurer shall not receive payment of the amount of any taxes assessed upon such leasehold interests; but such taxes when returned delinquent by the township treasurer shall be payable only to the department. The department shall provide suitable books and enter in those books the description of every leasehold interest so returned and the taxes thereon. The person holding such interest in any parcel of this land may pay to the department at any time within 1 year after the same becomes a lien on the premises,

the taxes assessed thereon, with interest at the rate of 1/2 of 1% per month or fraction thereof, with 4% as a collection fee, from the first day of March last preceding. However, if the taxes are not paid within this time period, the leasehold interest is forfeited because of the nonpayment of the taxes, and within its discretion the department may release the premises to any person for any term of years not exceeding 99 years, upon that person paying to the department all unpaid taxes on the land, together with such rental as may be determined upon under this part by the department.

(2) If the leasehold interest is owned by 2 or more persons, and any 1 or more of the persons neglect or refuse to pay his or her or their proportionate share of the taxes assessed against the leasehold at the date when the taxes become due and payable, then any 1 or more of the owners may pay his or her or their proportionate share of the taxes, and the county treasurer, in his or her return of delinquent lands to the department, shall indicate partial payments of taxes credited to the owner or owners making them. Any owner not having made payment of his or her proportionate share of the taxes may, at any time within 1 year after the taxes have become a lien on the premises, pay to the department his or her proportionate share of the taxes with interest at the rate of 1% per month or fraction thereof, from the first day of March last preceding. If the proportionate share of taxes of any such owner is not paid within this time period, the interest of the owner in the leasehold is forfeited because of the nonpayment of the taxes, and thereafter within 30 days, such of the owners as have paid their proportionate share of the taxes, upon payment to the department of the amount of the taxes remaining due with interest accrued to the date of forfeiture, shall be entitled to conveyances by the department of the interests in the leasehold that have been forfeited. The interest thus conveyed shall be allotted equally among those owners who shall pay the delinquent taxes with interest as provided in this section.

(3) If default is made by any lessee in the payment of taxes, he or she shall be notified in writing by the department at least 3 months before the date of final forfeiture of the amount due and the penalty for nonpayment and the date upon which forfeiture is to occur.

(4) Upon payment to the department of taxes and interest as provided in this section, the payment amount shall be credited to the county in which such leasehold interests were assessed, in the same manner as taxes and interest are now credited to counties on part-paid state lands.

(5) Immediately upon formal determination by the department that a lease has been forfeited under this part, a certificate of cancellation of the lease shall be executed under the seal of the department and shall be forwarded to the register of deeds of the county where the land is situated. Upon receipt of this certificate, the register of deeds shall at once cause it to be recorded in a suitable book to be provided by the register of deeds. If the lease is of record in the register of deeds, the register of deeds shall note on the lease the fact that a certificate of cancellation has been issued and shall also note the citation to the record of such certificate.

324.33935 State leased lands; nonpayment of taxes; report.

Sec. 33935. Each county treasurer shall report to the department all descriptions of parcels of property subject to this part that have been returned for nonpayment of taxes, if those taxes have not been paid within 6 months after being returned for nonpayment of taxes. The report shall be made by the treasurer within 30 days after the 6-month period has expired. Land leased or deeded under this part that is returned to state ownership through purchase, gift, devise, lease expiration, or tax reversion shall not be re-leased or sold by the state if that land is not well maintained.

PART 341
IRRIGATION DISTRICTS

324.34101 Irrigation districts; conditions and limitations for withdrawal of waters from Great

Lakes; enforcement of section.

Sec. 34101. (1) This part is applicable in counties with a population of 400,000 or less to the use of water from the Great Lakes only, which for the purposes of this part include those portions of those lakes and streams tributary to the Great Lakes where the natural water levels are controlled by and at essentially the same water level as the Great Lake involved.

(2) Water shall not be withdrawn from the Great Lakes if it is being used within the confines of an irrigation district under this part which cannot reasonably be expected to benefit agricultural crops or other agricultural operations for improvement of the food supply and water shall not be withdrawn from the Great Lakes under this part at any place or at any time or in any amount or amounts for a single irrigation district or for the sum of all irrigation districts and water from the Great Lakes shall not be stored or transmitted by or for any irrigation district, authorized to be created by this part, in any manner or by any means or with the aid of any dam or other device that does 1 or more of the following:

(a) Will materially injure other users of the waters of the Great Lakes and connecting channels.

(b) Will significantly affect the levels of the Great Lakes and prejudice the state in its relations with other states bordering on the Great Lakes.

(c) Will adversely affect the state in its development and maintenance of fish and wildlife resources.

(d) Will be detrimental to the health and welfare of the people of the state.

(3) The department shall enforce and implement the conditions and limitations of this section in performing all duties placed upon it by the terms of this part, and for this purpose the department may call upon any officer, board, department, school, university, or other state institution and the officers or employees of any officer, board, department, school, university, or other state institution for assistance considered necessary to implement this part.

324.34103 Previously organized districts; validity, rights, privileges, and obligations; applicability of part.

Sec. 34103. This part does not affect the validity of any district organized under the laws of this state prior to July 10, 1967, or its rights in or to property, or any of its rights or privileges of any kind or nature; but the districts are subject to this part so far as practicable. In addition, this part shall not do any of the following:

(a) Affect, impair, or discharge any contract, obligations, lien, or charge for, or upon which, a district was or might become liable or chargeable if former Act No. 205 of the Public Acts of 1967 had not been passed.

(b) Affect the validity of any bonds which had been issued prior to July 10, 1967.

(c) Affect any action pending on July 10, 1967.

324.34104 Irrigation district as body corporate; powers; seal; condemnation.

Sec. 34104. An established irrigation district is a body corporate with power to contract, to sue and be sued, and to hold, manage, and dispose of real and personal property, in addition to any other powers conferred upon it by law, and shall continue in existence until such time as the district is dissolved by operation of law. In addition, each established irrigation district may adopt and use a corporate seal, acquire the right to use of water for irrigation purposes, under plans approved by the department, acquire sites for reservoirs and rights-of-way for drains, canals, and laterals, and exercise the right of condemnation pursuant

to the provisions of Act No. 149 of the Public Acts of 1911, being sections 213.21 to 213.25 of the Michigan Compiled Laws, or under the applicable provisions of sections 75 to 84 of the drain code of 1956, Act No. 40 of the Public Acts of 1956, being sections 280.75 to 280.84 of the Michigan Compiled Laws, and shall be considered to be a state agency as that term is used in that act.

324.34105 District contracts with federal government, state, and others; approval by department; state's public trust.

Sec. 34105. As used in this section, "federal government" means the United States and includes any and all agencies of the United States. The irrigation district may contract with the federal government, whereby the federal government will pay the whole or part of the cost of the project or will perform the whole or any part of the work connected with the project, which contract may include any specific terms required by act of congress or federal regulation as a condition for the participation of the federal government. The irrigation district may also contract with the state or any agency of the state or with any person in respect to any matter connected with the construction, operation, or maintenance of any irrigation works or for providing new means of water supply or the improvement of the existing water supply for the lands within the irrigation district. All contracts and agreements executed under this section shall be subject to the approval of the department. Such a contract or agreement or anything in consequence of such a contract or agreement shall not in any manner infringe upon or invade the state's public trust in its waters.

324.34108 Grants of federal, state, and private aid for irrigation projects.

Sec. 34108. An irrigation district may apply for and accept grants or any aid which the United States government or any agency of the United States government, the state or any of its political subdivisions, or any person may authorize to be made or given in aid of an irrigation project.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.34109 Irrigation districts; petitions for formulation or improvement; contents;

circulation; signatures.

Sec. 34109. (1) Whenever a majority of freeholders owning lands in a proposed irrigation district who represent 1/3 or more of the area of lands within the district, or whenever freeholders owning lands who represent more than 1/2 the area of lands within the district, desire to provide for the irrigation of the lands; to improve the existing water supply for the lands or provide a new water supply system for the lands; to purchase, extend, operate, or maintain constructed irrigation works; or to cooperate with the United States for the assumption as principal or guarantor of indebtedness to the United States on account of district lands, they may file in the office of the county drain commissioner of the county that embraces the largest acreage of the district a petition, hereinafter referred to as the "petition", which shall include all of the following:

(a) The name of the proposed irrigation district.

(b) The necessity of the proposed work, describing the necessity.

(c) The object and purpose of the system proposed to be constructed, together with a general description of the system.

(d) A general description of the lands proposed to be included in the district, accompanying the petition shall be a preliminary engineering report on the feasibility of the project, including a report on the sufficiency of its water supply; the approximate area of irrigable land within the district, including an estimate of the cost of construction.

(e) The names of all freeholders owning lands in the proposed district, when known.

(f) Whether or not the petitioners desire and propose to cooperate with the United States.

(g) A general plea for the organization of the district.

(2) The petitions for the organization of the same district may be circulated and may be filed in more than 1 counterpart and, when filed, shall together be regarded as a single petition having as many signers as there are separate signers on the several petitions filed. All petitions for the organization of the district filed prior to the hearing on the petition shall be considered by the irrigation board the same as if filed with the first petition placed on file, and the signatures contained on those petitions shall be counted in determining whether sufficient persons have signed the petition.

Popular name: Act 451

Popular name: NREPA

324.34110 Irrigation districts; affidavit of signers of petitions; evidence.

Sec. 34110. The affidavit of 1 or more of the signers of the petition stating that they have examined it and are acquainted with the locality of the district and that the petition is signed by a sufficient number of persons owning lands in the district may be taken by the irrigation board as sufficient evidence of the facts stated in the petition.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.34111 Irrigation districts; lands included.

Sec. 34111. The lands proposed to be included in any irrigation district need not be contiguous if the benefit of the proposed work in each part will exceed the costs of the proposed work in each part; and lands within any city, village, or township may be included within the limits of any irrigation district if the creation of the irrigation district will benefit the lands within the city, village, or township in any amount equal to or in excess of the amount of assessment for construction against the lands therein.

Popular name: Act 451

Popular name: NREPA

324.34112 Irrigation board; creation; membership; chairperson; availability of writings to public; minutes; records and files; member as commissioner of irrigation and public officer; presumption; contested report or action; burden of proof; exception.

Sec. 34112. (1) There is created for each irrigation district petitioned for under this part an irrigation board to consist of the drain commissioner of each county involved in the project in which the lands of the proposed irrigation district are located, the director of the department of agriculture, and the chairperson of the directors of each soil conservation district involved in the project in which the lands of the proposed irrigation district are located. The director of the department of agriculture may designate a representative from the department

of agriculture and the chairperson of the directors of each soil conservation district may designate a representative from the directors of the soil conservation district to serve in their place as members of the irrigation board. The county drain commissioner of the county in which the largest amount of irrigation district land is contained shall serve as chairperson of the irrigation board.

(2) A writing prepared, owned, used, in the possession of, or retained by the irrigation board in the performance of an official function shall be made available to the public in compliance with the freedom of information act, Act No. 442 of the Public Acts of 1976, being sections 15.231 to 15.246 of the Michigan Compiled Laws. The chairperson of the irrigation board shall keep minutes of the proceedings of the irrigation board, and records and files of the board shall be kept in his or her office.

(3) A member of the irrigation board shall be known as a commissioner of irrigation. A commissioner of an irrigation district is a public officer. The presumption shall be in favor of the regularity and validity of the official act of a commissioner of irrigation. When a report of the commissioners of an irrigation district or action is contested, the burden of proof shall rest upon the contestant. This subsection shall not apply to an action brought with respect to a failure to comply with Act No. 442 of the Public Acts of 1976, as prescribed in subsection (2), or a failure to comply with the open meetings act, Act No. 267 of the Public Acts of 1976, being sections 15.261 to 15.275 of the Michigan Compiled Laws.

324.34114 Control over withdrawals and operations; rules; orders; expenses.

Sec. 34114. (1) The department shall maintain superintending control over withdrawals and operations of each irrigation district formed under this part and may promulgate rules to implement this authority.

(2) The department may enforce the limitations and conditions of section 34101 by order prohibiting the further withdrawal of water or by taking other action as is authorized by this part or any other act or law. Each irrigation district shall reimburse the department for any reasonable and necessary expense incurred by the department in maintaining superintending control over that district.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.34115 Irrigation board; conducting business at public meeting; notice; calling and notice of meetings; affidavit as proof of mailing; waiver of additional notice; quorum; adjournment; action by board; signing of orders.

Sec. 34115. (1) The business that the irrigation board may perform shall be conducted at a public meeting of the irrigation board held in compliance with the open meetings act, Act No. 267 of the Public Acts of 1976, being sections 15.261 to 15.275 of the Michigan Compiled Laws. Public notice of the time, date, and place of the meeting shall be given in the manner required by Act No. 267 of the Public Acts of 1976.

(2) A meeting of the irrigation board may be called by the chairperson or by 2 members of the irrigation board. In addition to the notice prescribed in subsection (1), notice setting forth the time and place of the meeting shall be sent by certified mail to each member. That notice shall be mailed not less than 5 days before the meeting. The affidavit of the chairperson as to this mailing shall be conclusive proof of the mailing.

(3) The notice of a meeting prescribed in subsection (2) is not required if all members are present. A member of the board may waive the additional mailed notice of a meeting, either before or after the meeting.

(4) A majority of the members of the board constitutes a quorum for the transaction of business, but a lesser number may adjourn the meeting. Unless otherwise provided in this part, an action shall not be taken by the board except by a majority vote of the board's members. The adjournment of the hearing need not be advertised. Each order issued by the irrigation board shall be signed by the chairperson.

Popular name: Act 451

Popular name: NREPA

324.34116 Proceedings upon petition for establishment of irrigation districts; meetings; filing and examination of petition; report; expenses and compensation.

Sec. 34116. (1) Upon receipt of a petition for the establishment of an irrigation district, the county drain commissioner shall call the first meeting of the irrigation board. A copy of the petition and duplicates of all maps and other papers filed with the petition shall be filed with the department at least 4 weeks before the date set for the public hearing on the petition. The department shall examine the petition, maps, and other papers and, if it considers it necessary, examine the proposed district, the irrigation works proposed to be constructed, or the location of the irrigation works to be constructed, and prepare a report covering those features of the proposed irrigation project that relate to section 34101 and other matters as the department considers advisable. The department shall submit the report to the irrigation board at the meeting set for the hearing of the petition. All reasonable and necessary expenses incurred by the department in making the report shall be paid for by the persons signing the petition.

(2) Any additional compensation for services rendered on behalf of an irrigation district by members of the irrigation board in addition to official duties of the members shall be provided by the respective governmental agencies from which the original compensation for other various duties and services rendered are received.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.34117 Irrigation board; first meeting; considerations; naming project and irrigation district; determination of sufficiency of petition and practicability of proposed project; objections; hearing; notice; report of department; final order of determination; order of department; eliminating or adding land in irrigation district; rehearing; legal establishment of irrigation district.

Sec. 34117. (1) The irrigation board at its first meeting shall consider the petition for the project, make a tentative determination as to the sufficiency of the petition and the practicability of the proposed irrigation project, and make a tentative determination of the area to be assessed. The irrigation board shall give a name to the project and to the irrigation district.

(2) After the irrigation board has made the determination regarding sufficiency of the petition and practicability of the proposed project, it shall set a time and place to hear objections to the proposed irrigation project and the petition for the project, and to consider the matter of assessing the cost of the irrigation project in the affected lands.

(3) In addition to the public notice prescribed in section 34115(1), additional notice of the hearing shall be published twice in the county in not less than 1 newspaper published in the county and designated by the irrigation board, with the first publication not less than 20 days before the hearing. Notice of the hearing shall also be given to property owners in the assessment district pursuant to Act No. 162 of the Public Acts of 1962, being sections 211.741 to 211.746 of the Michigan Compiled Laws. The irrigation board may provide a form to be substantially followed in giving this notice.

(4) At the hearing, the department shall submit its report on the petition, and any person is entitled to be heard. After the hearing, the irrigation board shall make a determination as to the sufficiency of the petition, the practicability of the irrigation project, and whether the irrigation project should be constructed. If the department determines that the project should be constructed, it shall issue an appropriate final order of determination.

(5) A final order of determination establishing an irrigation district shall not be issued by the irrigation board until the board has been served with an order by the department stating that the department has determined that the proposed irrigation by the proposed irrigation district, as set forth in the petition, supporting papers, and examinations specified in section 34116, is feasible and within the purpose of this part and that the project can be constructed and operated in a manner that would not violate the conditions and limitations of section 34101. If the department by its order determines that the proposed irrigation district cannot be established without violating a condition or limitation of section 34101, its order shall be final and further action for the formation of the proposed irrigation district shall not be taken by the irrigation board. Land in the irrigation district shall not be eliminated from or added to that land tentatively determined to be assessed without a rehearing after notice, as provided in this section. The irrigation district is legally established after entry of the final order of determination.

324.34122 Costs of irrigation district; computation; approval.

Sec. 34122. Within 10 days after the letting of contracts, or, in case of an appeal, then immediately after the appeal has been decided, the chairperson of the irrigation board shall make a computation of cost of a project under this part, which shall include all preliminary costs, the cost of construction of the improvement, establishment of the special assessment district, the preparation of the tax roll, notices, advertising, printing, financing, legal, professional, engineering, inspection, condemnation expenses, interest on the bonds for the first year if bonds are to be issued and an amount not to exceed 10% of the gross sum to cover contingent expenses, and all other administrative costs incidental to making of the improvement or establishment of the irrigation special assessment district. The chairperson shall submit the computation of cost to the irrigation board for its approval, and, when the computation of cost is approved by the board or amended and approved by the board, it shall become the final computation of cost for the irrigation district.

324.34123 Assessment roll; description of lands benefited; apportionment of costs; objections.

Sec. 34123. The chairperson of the irrigation board, under the direction of the board, shall make out an assessment roll, entering and describing on the assessment roll all the lots, premises, and parcels of land to be assessed, including on the assessment roll all lands benefited by the construction of the irrigation improvement. The assessments shall be based upon benefits to be derived from the proposed irrigation improvement. The irrigation board shall tentatively establish the percentage of the cost of the irrigation improvement which is to be borne by each of the parcels of land assessed on the special assessment roll. After the tentative apportionments and assessment roll is made, the irrigation board shall set a time and place when and where they will meet and hear any objections to the roll.

324.34126 Special assessment rolls; final orders and confirmation; endorsement; memorandum of installments; conclusiveness.

Sec. 34126. After the hearing, the irrigation board shall enter its final order of apportionment and order of confirmation of the roll and shall make an endorsement upon the roll showing the date of confirmation and when the amount to be raised is to be payable. If the amount is to be payable in more than 1 installment, the irrigation board shall enter on the roll a memorandum of the installments and of the years when the installments shall be spread and shall add a certificate in writing of the determination whether the taxes assessed for benefits shall be paid in 1 or more years. The special assessment rolls shall be dated and signed by the irrigation board and filed on or before the last Wednesday in September of each year in the office of the county clerk of the counties involved. When any improvement special assessment roll is confirmed by the irrigation board, it shall be final and conclusive.

324.34128 Tax assessment rolls; contents; permanent installment payments.

Sec. 34128. The chairperson of the irrigation board, at the direction of the irrigation board, shall prepare a tax assessment roll in each year for the collection of taxes for the current year and shall certify it to the county clerk on or before the first day of the annual meeting of the county board of commissioners. In each roll, he or

she shall add to the amount to be collected interest on all unpaid installments to the date of tax collection. To the roll for the last year, he or she shall add a further amount, if any, as may be necessary, together with outstanding uncollected taxes, to pay all outstanding bonds and interest on the bonds to maturity. If the roll is made payable in more than 1 installment, a permanent assessment roll may be maintained in the office of the county treasurer, subject to the direction of the board of county auditors, in counties having such a board, and of the county board of commissioners in other counties, showing the total cost, the number of installments, and the amount of each annual assessment, together with interest charges on the assessment, which shall be carried in a separate column. If the roll is made payable in more than 1 installment, and the total amount of any assessment is $10.00 or less, exclusive of interest, then the assessment shall be payable in 1 installment; but if the assessment exceeds $10.00 and is made payable in more than 1 installment, then no installment, exclusive of interest, shall be less than $10.00, excepting the final installment, which shall be payable in the amount of the actual balance.

324.34129 Spread of special assessments on local tax rolls; orders by county board of commissioners.

Sec. 34129. The county board of commissioners of the counties involved shall order the spread of all irrigation special assessments on the local tax rolls by the local tax assessing officials pursuant to sections 36 to 38 of the general property tax act, Act No. 206 of the Public Acts of 1893, being sections 211.36 to 211.38 of the Michigan Compiled Laws.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.34130 Spread of special assessments on local tax rolls; duties of local assessing officers.

Sec. 34130. The supervisor or the village or city assessor shall spread on his or her roll the total amount of all irrigation special assessment taxes determined by the irrigation board and approved by the county board of commissioners to be assessed upon the county, township, city, or village tax roll for the year in which the same was assessed and extending the tax in the same column with the general county, township, city, or village tax. In villages or cities where the municipal taxes are assessed and collected prior to the October meeting of the county board of commissioners, all taxes ordered to be spread against the municipalities shall be spread during the calendar year following the action by the county board of commissioners. The supervisor, assessor, or tax levying official shall spread upon the roll, separately and immediately following the other descriptions, all tracts or parcels of land specified by the irrigation board to be assessed for benefits, and shall place opposite each description, in a column marked "(giving the name or number)..... irrigation special assessment taxes", the amount of taxes apportioned on that tract or parcel of land, as certified to him or her by the county clerk.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.34131 Special assessment taxes; interest, charges, collections, disbursement; defense of collector; limitation on actions; payments under protest; liens.

Sec. 34131. All irrigation special assessment taxes assessed under this part shall be subject to the same interest and charges, and shall be collected in the same manner, as state and other general taxes are collected, and collecting officers are vested with the same power and authority in the collection of the taxes as are or may be conferred by law for collecting general taxes. Irrigation special assessment taxes, when collected, shall be returned to the county treasurer to be disbursed by him or her. If a suit is brought against the collector arising out of the collection of an irrigation special assessment tax, the county shall defend the collector in the same manner that he or she has the right to be defended in the collection of general taxes. A suit shall not be instituted to recover any special assessment tax or money paid or property sold therefor, or for damages on account thereof, unless brought within 30 days from the time of payment of the money to, or sale of the property by, the collecting officer. If the tax is paid under protest, the reasons for the protest shall be specified, and the same procedure observed as is required by the general tax law. All taxes levied under this

part, with all lawful costs, interest, and charges, shall be and remain a perpetual lien upon the lands upon which they are assessed, and a personal claim against the owner of the lands until they are paid. If the taxes levied by the special assessment irrigation district are not collected by the treasurer of a participating municipality, they shall be returned by him or her, together with the lands upon which they were levied, to the county treasurer in the same return, at the same time, and in the same manner, in every respect, naming in each case the particular irrigation district, as lands are returned for state, county, and township taxes, and the taxes shall follow the lands, the same as all other taxes, and all the general provisions of law for enforcing the payment of township, county, and state taxes shall apply to irrigation special assessment taxes and to the lands returned delinquent for those taxes, in the same manner and with the same effect.

Popular name: Act 451

Popular name: NREPA

324.34133 Invalid assessments; validation procedure; payments applied to reassessments.

Sec. 34133. If, in the opinion of the irrigation board, a special assessment is invalid by reason of irregularities or informalities in the proceedings, or if any court of competent jurisdiction adjudges an assessment illegal, the irrigation board, whether the improvement has been made or not and whether any part of the assessment has been paid or not, may proceed from the last step at which the proceedings were legal and cause a new assessment to be made for the same purpose for which the former assessment was made. All proceedings on the reassessment and for the collection of the reassessment shall be conducted in the same manner as provided for the original assessment. Whenever an assessment or any part of an assessment levied upon any premises has been set aside in such a manner, if the assessment or part of an assessment has been paid and not refunded, the payment made shall be applied upon the reassessment.

324.34134 Irrigation orders to pay charges and to pay easements or rights-of-way; installments; drawing orders on first and succeeding years' assessments; limitations; certification by treasurer.

Sec. 34134. The irrigation board of each special assessment district may issue irrigation orders for the payment of all charges reflected by the computation of costs upon the irrigation fund of each particular district. Irrigation taxes shall not be assessed for benefits received that are to be paid by irrigation orders in excess of 10 annual installments. All irrigation orders for the payment for easements or rights-of-way shall be paid out of the first year's taxes, and the balance of the first year's taxes shall be applied toward payment of the irrigation construction contracts. For the balance due upon such contracts, the irrigation board shall draw irrigation orders payable out of each succeeding year's assessment. An irrigation board shall not draw orders payable in any 1 year for a larger amount than 90% of that year's assessment. Irrigation orders shall be ordered to be paid by the irrigation board only after a certification by the treasurer of the irrigation district that there are sufficient funds in the irrigation district fund to pay the order. The county treasurers of the counties involved in irrigation districts shall keep a record of all receipts and disbursements of all irrigation districts in their respective counties.

Popular name: NREPA

324.34136 Operating and maintaining property of irrigation district; fixing and collecting water charges; approval of charges; charges for water services as lien on affected lands; certification of delinquent charges; entering charges on tax roll; enforcement; exaction of other charges; future expenses; assessment; notice of hearing.

Sec. 34136. (1) The irrigation board shall operate and maintain the property of the irrigation district.

(2) The irrigation board may fix and collect water charges to cover the cost of the operation and maintenance of physical structures and administrative expenses of the district in connection with the transportation, impoundment, and utilization of water for irrigation purposes. The charges shall be approved by the majority vote of the irrigation board and shall be made to each user of water.

(3) Charges for water services furnished to a user or to a landowner shall be a lien on the affected lands from the date the charges are due. Charges delinquent for 6 months or more shall be certified annually to the proper tax assessing officer or agency, who shall enter the charges upon the next tax roll against the premises to which the services have been rendered, and the charges shall be collected and the lien shall be enforced in the same manner as provided for the collection of taxes assessed upon the tax roll and the enforcement of the lien. The time and manner of certification and other procedures regarding the collection of the charges and the enforcement of the lien shall be prescribed by the irrigation board in cooperation with the governing bodies of the public corporations in which the lands are located. Instead of or in addition to levying water charges for the operation and maintenance of the properties of the irrigation district, the irrigation board, under the same conditions and for the same purpose, may exact connection, readiness to serve, availability, or service charges to be paid by the users or owners of land utilizing irrigation water for irrigation purposes.

(4) Future necessary expenses incurred in the administration and operation of the district and its properties may be assessed not less than once every 3 years on the basis of benefits derived after notice of the hearing on the maintenance assessment roll is given in compliance with the open meetings act, Act No. 267 of the Public Acts of 1976, being sections 15.261 to 15.275 of the Michigan Compiled Laws, and Act No. 162 of the Public Acts of 1962, being sections 211.741 to 211.746 of the Michigan Compiled Laws.

324.34137 Attack on orders; proceedings by writ of superintending control; legality of irrigation special assessment district and project; assessments; actions.

Sec. 34137. (1) Except as prescribed in subsection (2), the final order of determination, the order of apportionment of benefits, or the order confirming the special assessment roll shall not be subject to attack in a court except by proceedings by writ of superintending control brought within 20 days after the filing of the order in the office of the chairperson of the irrigation board issuing the order. If a proceeding is not brought within the time prescribed, the irrigation special assessment district and project shall be considered to have been legally established, and the legality of the irrigation special assessment district and project and the assessments for the district and project shall not be questioned in an action at law or in equity.

(2) This section shall not prohibit the bringing of an action pursuant to the open meetings act, Act No. 267 of the Public Acts of 1976, being sections 15.261 to 15.275 of the Michigan Compiled Laws.

Popular name: NREPA

324.34138 Suspension of water delivery; delinquent irrigation taxes; right-of-way for laterals; condemnation; payment.

Sec. 34138. The irrigation board may, by the adoption of an appropriate order, provide for the suspension of water delivery to any land in the district upon which the irrigation taxes levied and assessed remain due and unpaid for 2 years. The irrigation board shall make all arrangements for right-of-way for laterals from the

main drain or canal to each tract of land subject to assessment, and when necessary the board shall condemn to procure right-of-way for laterals and make such rules in regard to the payment for the right-of-way as it considers just and equitable.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.34139 Irrigation boards; powers and duties.

Sec. 34139. The irrigation board shall manage and conduct the business affairs of the district, make and execute all necessary contracts, employ agents, officers, and employees as may be required and prescribe their duties, establish equitable orders and rules for the distribution and use of water among owners of such lands, and generally perform all acts as are necessary to fully implement this part. The orders and rules with respect to the irrigation district shall be printed in convenient form for distribution to the freeholders in the irrigation district.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.34140 Right of entry upon land to survey; location of drains; acquisition of property; reservoirs for storage or transfers of Great Lakes water.

Sec. 34140. The irrigation board and its agents and employees may enter upon any land within the district to make surveys, and may locate the line of any drain or canal and the necessary branches of that location. The irrigation board may acquire, either by purchase or condemnation, all lands and other property necessary for the construction, use, maintenance, repair, and improvement of any canal, drain or drains, and lands for reservoirs or dams, for the storage of water, and for all necessary appurtenances thereto. The board may acquire by purchase or condemnation any irrigation works, dams, drains, canals, pumping equipment, pumps, or reservoirs for the use of the district. The irrigation board may construct the necessary dams, reservoirs, and works for the storage or transfer of Great Lakes water for the district, and may perform any lawful act necessary to furnish water to each landowner in the district for irrigation purposes.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.34141 Advancement of money to pay costs; reimbursement by irrigation special assessment district; obligations.

Sec. 34141. Any person may advance money for the payment of any part of the cost of a project and shall be reimbursed by the irrigation special assessment district, with or without interest as may be agreed, when funds are available for that purpose. The obligation of the irrigation special assessment district to make the reimbursement may be evidenced by a contract or note, which contract or note may pledge the full faith and credit of the irrigation special assessment district and may be made payable out of the assessments made against properties in the irrigation special assessment district, out of the proceeds of bonds issued by the irrigation special assessment district pursuant to this part, or out of any other available funds, but the contract or note is subject to the revised municipal finance act, 2001 PA 34, MCL 141.2101 to 141.2821.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 2002, Act 220, Imd. Eff. Apr. 29, 2002.

Popular name: Act 451

Popular name: NREPA

324.34142 District accounts; duties of county treasurer; expenditure from district funds; bond interest; funds transfer.

Sec. 34142. The county treasurers of the counties in which the irrigation district is located shall carry all accounts and items pertaining thereto as a separate account upon the books of their office. A record shall be kept of the amount of money paid from the irrigation district funds for the use and benefit of any irrigation district and, upon payment to the county treasurer of taxes assessed by the irrigation district, the county treasurer shall pay for the outstanding interest on bonds issued out of the taxes received or shall transfer the excess of funds to the irrigation district fund for the use and benefit of the irrigation district.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.34143 Irrigation district funds; deposit; interest; use.

Sec. 34143. The irrigation district funds shall be deposited by the county treasurer in a bank of the county in accordance with the general laws of this state, and interest so received shall belong to the irrigation district fund. Money collected or appropriated for an individual irrigation special assessment district fund shall be used solely for the use and benefit of the irrigation district for which it was raised or received.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.34144 Irrigation district funds; county treasurers as custodians; deputies; bond; orders for payment.

Sec. 34144. The county treasurer shall be the custodian of the funds of the irrigation district. He or she may designate 1 or more of his or her deputies who may act for him or her in the performance of any of his or her duties under this section. The irrigation board may require the county treasurer and any deputy county treasurer, so designated, to furnish a bond payable to the irrigation district, in addition to any bond payable to the county, conditioned upon the faithful discharge of his or her duties in respect to money belonging to the irrigation district, the premium on the bond to be paid by the irrigation district. Money held by the treasurer shall be paid out only upon order of the irrigation board, except that an order shall not be required for the payment of principal and interest on bonds.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.34145 Revolving fund to pay for preliminary costs; assessment of preliminary costs; repayment of fund.

Sec. 34145. The county board of commissioners in which an irrigation district is proposed to be formed may provide for an appropriation to create a revolving fund to pay for the preliminary costs of irrigation improvement projects within the county. The preliminary costs shall be assessed to the property owners in the assessment district by the irrigation board after notice of the hearing is given as prescribed in section 34115 and Act No. 162 of the Public Acts of 1962, being sections 211.741 to 211.746 of the Michigan Compiled Laws. The preliminary costs shall be repaid to the fund if the project is not finally constructed. The preliminary costs shall be repaid to the fund when a project is constructed out of the first bond proceeds, taxes, or assessments received.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.34146 Borrowing money; issuing bonds; anticipating collection of special assessments; amount; applicability of law.

Sec. 34146. The irrigation board may borrow money and issue the bonds of the special assessment district for that money in anticipation of the collection of special assessments to defray the cost of any improvement made under this part after the special assessment roll has been confirmed. The bonds shall not exceed the amount of the special assessments in anticipation of the collection of which they are issued. The issuance of special assessment bonds shall be governed by the general laws of this state applicable to the issuance of special assessment bonds and in accordance with the revised municipal finance act, 2001 PA 34, MCL 141.2101 to 141.2821. Bonds may be issued in anticipation of the collection of special assessments levied in respect to 2 or more public improvements, but no special assessment district shall be compelled to pay the obligation of any other special assessment district.

PART 342

GREAT LAKES—ST. LAWRENCE RIVER BASIN WATER RESOURCES COMPACT

324.34201 Great Lakes-St. Lawrence River Basin Water Resources Compact.

Sec. 34201. The Great Lakes-St. Lawrence River Basin Water Resources Compact is hereby ratified, enacted into law, and entered into by this state as a party as follows:

AGREEMENT

Section 1. The states of Illinois, Indiana, Michigan, Minnesota, New York, Ohio and Wisconsin and the Commonwealth of Pennsylvania hereby solemnly covenant and agree with each other, upon enactment of concurrent legislation by the respective state legislatures and consent by the Congress of the United States as follows:

GREAT LAKES—ST. LAWRENCE RIVER BASIN WATER RESOURCES COMPACT

ARTICLE 1

SHORT TITLE, DEFINITIONS, PURPOSES AND DURATION

Section 1.1. Short Title. This act shall be known and may be cited as the "Great Lakes—St. Lawrence River Basin Water Resources Compact."

Section 1.2. Definitions. For the purposes of this Compact, and of any supplemental or concurring legislation enacted pursuant thereto, except as may be otherwise required by the context:

Adaptive Management means a Water resources management system that provides a systematic process for evaluation, monitoring and learning from the outcomes of operational programs and adjustment of policies, plans and programs based on experience and the evolution of scientific knowledge concerning Water resources and Water Dependent Natural Resources.

Agreement means the Great Lakes—St. Lawrence River Basin Sustainable Water Resources Agreement.

Applicant means a Person who is required to submit a Proposal that is subject to management and regulation under this Compact. Application has a corresponding meaning.

Basin or Great Lakes—St. Lawrence River Basin means the watershed of the Great Lakes and the St. Lawrence River upstream from Trois-Rivières, Québec within the jurisdiction of the Parties.

Basin Ecosystem or Great Lakes—St. Lawrence River Basin Ecosystem means the interacting components of air, land, Water and living organisms, including humankind, within the Basin.

Community within a Straddling County means any incorporated city, town or the equivalent thereof, that is located outside the Basin but wholly within a County that lies partly within the Basin and that is not a Straddling Community.

Compact means this Compact.

Consumptive Use means that portion of the Water Withdrawn or withheld from the Basin that is lost or otherwise not returned to the Basin due to evaporation, incorporation into Products, or other processes.

Council means the Great Lakes—St. Lawrence River Basin Water Resources Council, created by this Compact.

Council Review means the collective review by the Council members as described in Article 4 of this Compact.

County means the largest territorial division for local government in a State. The County boundaries shall be defined as those boundaries that exist as of December 13, 2005.

Cumulative Impacts mean the impact on the Basin Ecosystem that results from incremental effects of all aspects of a Withdrawal, Diversion or Consumptive Use in addition to other past, present, and reasonably foreseeable future Withdrawals, Diversions and Consumptive Uses regardless of who undertakes the other Withdrawals, Diversions and Consumptive Uses. Cumulative Impacts can result from individually minor but collectively significant Withdrawals, Diversions and Consumptive Uses taking place over a period of time.

Decision-Making Standard means the decision-making standard established by Section 4.11 for Proposals subject to management and regulation in Section 4.10.

Diversion means a transfer of Water from the Basin into another watershed, or from the watershed of one of the Great Lakes into that of another by any means of transfer, including but not limited to a pipeline, canal, tunnel, aqueduct, channel, modification of the direction of a water course, a tanker ship, tanker truck or rail tanker but does not apply to Water that is used in the Basin or a Great Lake watershed to manufacture or produce a Product that is then transferred out of the Basin or watershed. Divert has a corresponding meaning.

Environmentally Sound and Economically Feasible Water Conservation Measures mean those measures, methods, technologies or practices for efficient water use and for reduction of water loss and waste or for reducing a Withdrawal, Consumptive Use or Diversion that *i*) are environmentally sound, *ii*) reflect best practices applicable to the water use sector, *iii*) are technically feasible and available, *iv*) are economically feasible and cost effective based on an analysis that considers direct and avoided economic and environmental costs and *v*) consider the particular facilities and processes involved, taking into account the environmental impact, age of equipment and facilities involved, the processes employed, energy impacts and other appropriate factors.

Exception means a transfer of Water that is excepted under Section 4.9 from the prohibition against

Diversions in Section 4.8.

Exception Standard means the standard for Exceptions established in Section 4.9.4.

Intra-Basin Transfer means the transfer of Water from the watershed of one of the Great Lakes into the watershed of another Great Lake.

Measures means any legislation, law, regulation, directive, requirement, guideline, program, policy, administrative practice or other procedure.

New or Increased Diversion means a new Diversion, an increase in an existing Diversion, or the alteration of an existing Withdrawal so that it becomes a Diversion.

New or Increased Withdrawal or Consumptive Use means a new Withdrawal or Consumptive Use or an increase in an existing Withdrawal or Consumptive Use.

Originating Party means the Party within whose jurisdiction an Application or registration is made or required.

Party means a State party to this Compact.

Person means a human being or a legal person, including a government or a nongovernmental organization, including any scientific, professional, business, non-profit, or public interest organization or association that is neither affiliated with, nor under the direction of a government.

Product means something produced in the Basin by human or mechanical effort or through agricultural processes and used in manufacturing, commercial or other processes or intended for intermediate or end use consumers. (*i*) Water used as part of the packaging of a Product shall be considered to be part of the Product. (*ii*) Other than Water used as part of the packaging of a Product, Water that is used primarily to transport materials in or out of the Basin is not a Product or part of a Product. (*iii*) Except as provided in (*i*) above, Water which is transferred as part of a public or private supply is not a Product or part of a Product. (*iv*) Water in its natural state such as in lakes, rivers, reservoirs, aquifers, or water basins is not a Product.

Proposal means a Withdrawal, Diversion or Consumptive Use of Water that is subject to this Compact.

Province means Ontario or Québec.

Public Water Supply Purposes means water distributed to the public through a physically connected system of treatment, storage and distribution facilities serving a group of largely residential customers that may also serve industrial, commercial, and other institutional operators. Water Withdrawn directly from the Basin and not through such a system shall not be considered to be used for Public Water Supply Purposes.

Regional Body means the members of the Council and the Premiers of Ontario and Québec or their designee as established by the Agreement.

Regional Review means the collective review by the Regional Body as described in Article 4 of this Compact.

Source Watershed means the watershed from which a Withdrawal originates. If Water is Withdrawn directly from a Great Lake or from the St. Lawrence River, then the Source Watershed shall be considered to be the watershed of that Great Lake or the watershed of the St. Lawrence River, respectively. If Water is Withdrawn from the watershed of a stream that is a direct tributary to a Great Lake or a direct tributary to the St. Lawrence River, then the Source Watershed shall be considered to be the watershed of that Great Lake or the watershed of the St. Lawrence River, respectively, with a preference to the direct tributary stream watershed from which it was Withdrawn.

Standard of Review and Decision means the Exception Standard, Decision-Making Standard and reviews as outlined in Article 4 of this Compact.

State means one of the states of Illinois, Indiana, Michigan, Minnesota, New York, Ohio or Wisconsin or the Commonwealth of Pennsylvania.

Straddling Community means any incorporated city, town or the equivalent thereof, wholly within any County that lies partly or completely within the Basin, whose corporate boundary existing as of the effective date of this Compact, is partly within the Basin or partly within two Great Lakes watersheds.

Technical Review means a detailed review conducted to determine whether or not a Proposal that requires Regional Review under this Compact meets the Standard of Review and Decision following procedures and guidelines as set out in this Compact.

Water means ground or surface water contained within the Basin.

Water Dependent Natural Resources means the interacting components of land, Water and living organisms affected by the Waters of the Basin.

Waters of the Basin or Basin Water means the Great Lakes and all streams, rivers, lakes, connecting channels and other bodies of water, including tributary groundwater, within the Basin.

Withdrawal means the taking of water from surface water or groundwater. Withdraw has a corresponding meaning.

Section 1.3. Findings and Purposes.

The legislative bodies of the respective Parties hereby find and declare:

1. Findings:

a. The Waters of the Basin are precious public natural resources shared and held in trust by the States;

b. The Waters of the Basin are interconnected and part of a single hydrologic system;

c. The Waters of the Basin can concurrently serve multiple uses. Such multiple uses include municipal, public, industrial, commercial, agriculture, mining, navigation, energy development and production, recreation, the subsistence, economic and cultural activities of native peoples, Water quality maintenance, and the maintenance of fish and wildlife habitat and a balanced ecosystem. And, other purposes are encouraged, recognizing that such uses are interdependent and must be balanced;

d. Future Diversions and Consumptive Uses of Basin Water resources have the potential to significantly impact the environment, economy and welfare of the Great Lakes—St. Lawrence River region;

e. Continued sustainable, accessible and adequate Water supplies for the people and economy of the Basin are of vital importance; and,

f. The Parties have a shared duty to protect, conserve, restore, improve and manage the renewable but finite Waters of the Basin for the use, benefit and enjoyment of all their citizens, including generations yet to come. The most effective means of protecting, conserving, restoring, improving and managing the Basin Waters is through the joint pursuit of unified and cooperative principles, policies and programs mutually agreed upon, enacted and adhered to by all Parties.

2. Purposes:

a. To act together to protect, conserve, restore, improve and effectively manage the Waters and Water Dependent Natural Resources of the Basin under appropriate arrangements for intergovernmental cooperation and consultation because current lack of full scientific certainty should not be used as a reason for postponing measures to protect the Basin Ecosystem;

b. To remove causes of present and future controversies;

c. To provide for cooperative planning and action by the Parties with respect to such Water resources;

d. To facilitate consistent approaches to Water management across the Basin while retaining State management authority over Water management decisions within the Basin;

e. To facilitate the exchange of data, strengthen the scientific information base upon which decisions are made and engage in consultation on the potential effects of proposed Withdrawals and losses on the Waters and Water Dependent Natural Resources of the Basin;

f. To prevent significant adverse impacts of Withdrawals and losses on the Basin's ecosystems and watersheds;

g. To promote interstate and State-Provincial comity; and,

h. To promote an Adaptive Management approach to the conservation and management of Basin Water resources, which recognizes, considers and provides adjustments for the uncertainties in, and evolution of, scientific knowledge concerning the Basin's Waters and Water Dependent Natural Resources.

Section 1.4. Science.

1. The Parties commit to provide leadership for the development of a collaborative strategy with other regional partners to strengthen the scientific basis for sound Water management decision making under this Compact.

2. The strategy shall guide the collection and application of scientific information to support:

a. An improved understanding of the individual and Cumulative Impacts of Withdrawals from various locations and Water sources on the Basin Ecosystem and to develop a mechanism by which impacts of Withdrawals may be assessed;

b. The periodic assessment of Cumulative Impacts of Withdrawals, Diversions and Consumptive Uses on a Great Lake and St. Lawrence River watershed basis;

c. Improved scientific understanding of the Waters of the Basin;

d. Improved understanding of the role of groundwater in Basin Water resources management; and,

e. The development, transfer and application of science and research related to Water conservation and Water use efficiency.

ARTICLE 2
ORGANIZATION

Section 2.1. Council Created.

The Great Lakes—St. Lawrence River Basin Water Resources Council is hereby created as a body politic and corporate, with succession for the duration of this Compact, as an agency and instrumentality of the governments of the respective Parties.

Section 2.2. Council Membership.

The Council shall consist of the Governors of the Parties, ex officio.

Section 2.3. Alternates.

Each member of the Council shall appoint at least one alternate who may act in his or her place and stead, with authority to attend all meetings of the Council and with power to vote in the absence of the member. Unless otherwise provided by law of the Party for which he or she is appointed, each alternate shall serve during the term of the member appointing him or her, subject to removal at the pleasure of the member. In the event of a vacancy in the office of alternate, it shall be filled in the same manner as an original appointment for the unexpired term only.

Section 2.4. Voting.

1. Each member is entitled to one vote on all matters that may come before the Council.

2. Unless otherwise stated, the rule of decision shall be by a simple majority.

3. The Council shall annually adopt a budget for each fiscal year and the amount required to balance the budget shall be apportioned equitably among the Parties by unanimous vote of the Council. The appropriation of such amounts shall be subject to such review and approval as may be required by the budgetary processes of the respective Parties.

4. The participation of Council members from a majority of the Parties shall constitute a quorum for the transaction of business at any meeting of the Council.

Section 2.5. Organization and Procedure.

The Council shall provide for its own organization and procedure, and may adopt rules and regulations governing its meetings and transactions, as well as the procedures and timeline for submission, review and consideration of Proposals that come before the Council for its review and action. The Council shall organize, annually, by the election of a Chair and Vice Chair from among its members. Each member may appoint an advisor, who may attend all meetings of the Council and its committees, but shall not have voting power. The Council may employ or appoint professional and administrative personnel, including an Executive Director, as it may deem advisable, to carry out the purposes of this Compact.

Section 2.6. Use of Existing Offices and Agencies.

It is the policy of the Parties to preserve and utilize the functions, powers and duties of existing offices and agencies of government to the extent consistent with this Compact. Further, the Council shall promote and aid the coordination of the activities and programs of the Parties concerned with Water resources management in the Basin. To this end, but without limitation, the Council may:

1. Advise, consult, contract, assist or otherwise cooperate with any and all such agencies;

2. Employ any other agency or instrumentality of any of the Parties for any purpose; and,

3. Develop and adopt plans consistent with the Water resources plans of the Parties.

Section 2.7. Jurisdiction.

The Council shall have, exercise and discharge its functions, powers and duties within the limits of the Basin. Outside the Basin, it may act in its discretion, but only to the extent such action may be necessary or convenient to effectuate or implement its powers or responsibilities within the Basin and subject to the consent of the jurisdiction wherein it proposes to act.

Section 2.8. Status, Immunities and Privileges.

1. The Council, its members and personnel in their official capacity and when engaged directly in the affairs of the Council, its property and its assets, wherever located and by whomsoever held, shall enjoy the same immunity from suit and every form of judicial process as is enjoyed by the Parties, except to the extent that the Council may expressly waive its immunity for the purposes of any proceedings or by the terms of any contract.

2. The property and assets of the Council, wherever located and by whomsoever held, shall be considered public property and shall be immune from search, requisition, confiscation, expropriation or any other form of taking or foreclosure by executive or legislative action.

3. The Council, its property and its assets, income and the operations it carries out pursuant to this Compact shall be immune from all taxation by or under the authority of any of the Parties or any political subdivision thereof; provided, however, that in lieu of property taxes the Council may make reasonable payments to local taxing districts in annual amounts which shall approximate the taxes lawfully assessed upon similar property.

Section 2.9. Advisory Committees.

The Council may constitute and empower advisory committees, which may be comprised of representatives of the public and of federal, State, tribal, county and local governments, water resources agencies, water-using industries and sectors, water-interest groups and academic experts in related fields.

ARTICLE 3

GENERAL POWERS AND DUTIES

Section 3.1. General.

The Waters and Water Dependent Natural Resources of the Basin are subject to the sovereign right and responsibilities of the Parties, and it is the purpose of this Compact to provide for joint exercise of such powers of sovereignty by the Council in the common interests of the people of the region, in the manner and to the extent provided in this Compact. The Council and the Parties shall use the Standard of Review and Decision and procedures contained in or adopted pursuant to this Compact as the means to exercise their authority under this Compact. The Council may revise the Standard of Review and Decision, after consultation with the Provinces and upon unanimous vote of all Council members, by regulation duly adopted in accordance with Section 3.3 of this Compact and in accordance with each Party's respective statutory authorities and applicable procedures. The Council shall identify priorities and develop plans and policies relating to Basin Water resources. It shall adopt and promote uniform and coordinated policies for Water resources conservation and management in the Basin.

Section 3.2. Council Powers.

The Council may: plan; conduct research and collect, compile, analyze, interpret, report and disseminate data on Water resources and uses; forecast Water levels; conduct investigations; institute court actions; design, acquire, construct, reconstruct, own, operate, maintain, control, sell and convey real and personal property and any interest therein as it may deem necessary, useful or convenient to carry out the purposes of this Compact; make contracts; receive and accept such payments, appropriations, grants, gifts, loans, advances and other funds, properties and services as may be transferred or made available to it by any Party or by any other public or private agency, corporation or individual; and, exercise such other and different powers as may be delegated to it by this Compact or otherwise pursuant to law, and have and exercise all powers necessary or convenient to carry out its express powers or which may be reasonably implied therefrom.

Section 3.3. Rules and Regulations.

1. The Council may promulgate and enforce such rules and regulations as may be necessary for the implementation and enforcement of this Compact. The Council may adopt by regulation, after public notice and public hearing, reasonable Application fees with respect to those Proposals for Exceptions that are subject to Council review under Section 4.9. Any rule or regulation of the Council, other than one which deals solely with the internal management of the Council or its property, shall be adopted only after public notice and hearing.

2. Each Party, in accordance with its respective statutory authorities and applicable procedures, may adopt and enforce rules and regulations to implement and enforce this Compact and the programs adopted by such Party to carry out the management programs contemplated by this Compact.

Section 3.4. Program Review and Findings.

1. Each Party shall submit a report to the Council and the Regional Body detailing its Water management and conservation and efficiency programs that implement this Compact. The report shall set out the manner in which Water Withdrawals are managed by sector, Water source, quantity or any other means, and how the provisions of the Standard of Review and Decision and conservation and efficiency programs are implemented. The first report shall be provided by each Party one year from the effective date of this Compact and thereafter every 5 years.

2. The Council, in cooperation with the Provinces, shall review its Water management and conservation and efficiency programs and those of the Parties that are established in this Compact and make findings on whether the Water management program provisions in this Compact are being met, and if not, recommend options to assist the Parties in meeting the provisions of this Compact. Such review shall take place:

a. 30 days after the first report is submitted by all Parties; and,

b. Every five years after the effective date of this Compact; and,

c. At any other time at the request of one of the Parties.

3. As one of its duties and responsibilities, the Council may recommend a range of approaches to the Parties with respect to the development, enhancement and application of Water management and conservation and efficiency programs to implement the Standard of Review and Decision reflecting improved scientific understanding of the Waters of the Basin, including groundwater, and the impacts of Withdrawals on the Basin Ecosystem.

ARTICLE 4
WATER MANAGEMENT AND REGULATION

Section 4.1. Water Resources Inventory, Registration and Reporting.

1. Within five years of the effective date of this Compact, each Party shall develop and maintain a Water resources inventory for the collection, interpretation, storage, retrieval exchange, and dissemination of information concerning the Water resources of the Party, including, but not limited to, information on the location, type, quantity, and use of those resources and the location, type, and quantity of Withdrawals,

Diversions and Consumptive Uses. To the extent feasible, the Water resources inventory shall be developed in cooperation with local, State, federal, tribal and other private agencies and entities, as well as the Council. Each Party's agencies shall cooperate with that Party in the development and maintenance of the inventory.

2. The Council shall assist each Party to develop a common base of data regarding the management of the Water Resources of the Basin and to establish systematic arrangements for the exchange of those data with other States and Provinces.

3. To develop and maintain a compatible base of Water use information, within five years of the effective date of this Compact any Person who Withdraws Water in an amount of 100,000 gallons per day or greater average in any 30-day period (including Consumptive Uses) from all sources, or Diverts Water of any amount, shall register the Withdrawal or Diversion by a date set by the Council unless the Person has previously registered in accordance with an existing State program. The Person shall register the Withdrawal or Diversion with the Originating Party using a form prescribed by the Originating Party that shall include, at a minimum and without limitation: the name and address of the registrant and date of registration; the locations and sources of the Withdrawal or Diversion; the capacity of the Withdrawal or Diversion per day and the amount Withdrawn or Diverted from each source; the uses made of the Water; places of use and places of discharge; and, such other information as the Originating Party may require. All registrations shall include an estimate of the volume of the Withdrawal or Diversion in terms of gallons per day average in any 30-day period.

4. All registrants shall annually report the monthly volumes of the Withdrawal, Consumptive Use and Diversion in gallons to the Originating Party and any other information requested by the Originating Party.

5. Each Party shall annually report the information gathered pursuant to this Section to a Great Lakes—St. Lawrence River Water use data base repository and aggregated information shall be made publicly available, consistent with the confidentiality requirements in Section 8.3.

6. Information gathered by the Parties pursuant to this Section shall be used to improve the sources and applications of scientific information regarding the Waters of the Basin and the impacts of the Withdrawals and Diversions from various locations and Water sources on the Basin Ecosystem, and to better understand the role of groundwater in the Basin. The Council and the Parties shall coordinate the collection and application of scientific information to further develop a mechanism by which individual and Cumulative Impacts of Withdrawals, Consumptive Uses and Diversions shall be assessed.

Section 4.2. Water Conservation and Efficiency Programs.

1. The Council commits to identify, in cooperation with the Provinces, Basin-wide Water conservation and efficiency objectives to assist the Parties in developing their Water conservation and efficiency program. These objectives are based on the goals of:

a. Ensuring improvement of the Waters and Water Dependent Natural Resources;

b. Protecting and restoring the hydrologic and ecosystem integrity of the Basin;

c. Retaining the quantity of surface water and groundwater in the Basin;

d. Ensuring sustainable use of Waters of the Basin; and,

e. Promoting the efficiency of use and reducing losses and waste of Water.

2. Within two years of the effective date of this Compact, each Party shall develop its own Water conservation and efficiency goals and objectives consistent with the Basin-wide goals and objectives, and shall develop and implement a Water conservation and efficiency program, either voluntary or mandatory, within its jurisdiction based on the Party's goals and objectives. Each Party shall annually assess its programs in meeting the Party's goals and objectives, report to the Council and the Regional Body and make this annual assessment available to the public.

3. Beginning five years after the effective date of this Compact, and every five years thereafter, the Council, in cooperation with the Provinces, shall review and modify as appropriate the Basin-wide objectives, and the Parties shall have regard for any such modifications in implementing their programs. This assessment will be based on examining new technologies, new patterns of Water use, new resource demands and threats, and Cumulative Impact assessment under Section 4.15.

4. Within two years of the effective date of this Compact, the Parties commit to promote Environmentally Sound and Economically Feasible Water Conservation Measures such as:

a. Measures that promote efficient use of Water;

b. Identification and sharing of best management practices and state of the art conservation and efficiency technologies;

c. Application of sound planning principles;

d. Demand-side and supply-side Measures or incentives; and,

e. Development, transfer and application of science and research.

5. Each Party shall implement in accordance with paragraph 2 above a voluntary or mandatory Water

conservation program for all, including existing, Basin Water users. Conservation programs need to adjust to new demands and the potential impacts of cumulative effects and climate.

Section 4.3. Party Powers and Duties.

1. Each Party, within its jurisdiction, shall manage and regulate New or Increased Withdrawals, Consumptive Uses and Diversions, including Exceptions, in accordance with this Compact.

2. Each Party shall require an Applicant to submit an Application in such manner and with such accompanying information as the Party shall prescribe.

3. No Party may approve a Proposal if the Party determines that the Proposal is inconsistent with this Compact or the Standard of Review and Decision or any implementing rules or regulations promulgated thereunder. The Party may approve, approve with modifications or disapprove any Proposal depending on the Proposal's consistency with this Compact and the Standard of Review and Decision.

4. Each Party shall monitor the implementation of any approved Proposal to ensure consistency with the approval and may take all necessary enforcement actions.

5. No Party shall approve a Proposal subject to Council or Regional Review, or both, pursuant to this Compact unless it shall have been first submitted to and reviewed by either the Council or Regional Body, or both, and approved by the Council, as applicable. Sufficient opportunity shall be provided for comment on the Proposal's consistency with this Compact and the Standard of Review and Decision. All such comments shall become part of the Party's formal record of decision, and the Party shall take into consideration any such comments received.

Section 4.4. Requirement for Originating Party Approval.

No Proposal subject to management and regulation under this Compact shall hereafter be undertaken by any Person unless it shall have been approved by the Originating Party.

Section 4.5. Regional Review.

1. General.

a. It is the intention of the Parties to participate in Regional Review of Proposals with the Provinces, as described in this Compact and the Agreement.

b. Unless the Applicant or the Originating Party otherwise requests, it shall be the goal of the Regional Body to conclude its review no later than 90 days after notice under Section 4.5.2 of such Proposal is received from the Originating Party.

c. Proposals for Exceptions subject to Regional Review shall be submitted by the Originating Party to the Regional Body for Regional Review, and where applicable, to the Council for concurrent review.

d. The Parties agree that the protection of the integrity of the Great Lakes—St. Lawrence River Basin Ecosystem shall be the overarching principle for reviewing Proposals subject to Regional Review, recognizing uncertainties with respect to demands that may be placed on Basin Water, including groundwater, levels and flows of the Great Lakes and the St. Lawrence River, future changes in environmental conditions, the reliability of existing data and the extent to which Diversions may harm the integrity of the Basin Ecosystem.

e. The Originating Party shall have lead responsibility for coordinating information for resolution of issues related to evaluation of a Proposal, and shall consult with the Applicant throughout the Regional Review Process.

f. A majority of the members of the Regional Body may request Regional Review of a regionally significant or potentially precedent setting Proposal. Such Regional Review must be conducted, to the extent possible, within the time frames set forth in this Section. Any such Regional Review shall be undertaken only after consulting the Applicant.

2. Notice from Originating Party to the Regional Body.

a. The Originating Party shall determine if a Proposal is subject to Regional Review. If so, the Originating Party shall provide timely notice to the Regional Body and the public.

b. Such notice shall not be given unless and until all information, documents and the Originating Party's Technical Review needed to evaluate whether the Proposal meets the Standard of Review and Decision have been provided.

c. An Originating Party may:

i. Provide notice to the Regional Body of an Application, even if notification is not required; or,

ii. Request Regional Review of an application, even if Regional Review is not required. Any such Regional Review shall be undertaken only after consulting the Applicant.

d. An Originating Party may provide preliminary notice of a potential Proposal.

3. Public Participation.

a. To ensure adequate public participation, the Regional Body shall adopt procedures for the review of Proposals that are subject to Regional Review in accordance with this Article.

b. The Regional Body shall provide notice to the public of a Proposal undergoing Regional Review. Such notice shall indicate that the public has an opportunity to comment in writing to the Regional Body on whether the Proposal meets the Standard of Review and Decision.

c. The Regional Body shall hold a public meeting in the State or Province of the Originating Party in order to receive public comment on the issue of whether the Proposal under consideration meets the Standard of Review and Decision.

d. The Regional Body shall consider the comments received before issuing a Declaration of Finding.

e. The Regional Body shall forward the comments it receives to the Originating Party.

4. Technical Review.

a. The Originating Party shall provide the Regional Body with its Technical Review of the Proposal under consideration.

b. The Originating Party's Technical Review shall thoroughly analyze the Proposal and provide an evaluation of the Proposal sufficient for a determination of whether the Proposal meets the Standard of Review and Decision.

c. Any member of the Regional Body may conduct their own Technical Review of any Proposal subject to Regional Review.

d. At the request of the majority of its members, the Regional Body shall make such arrangements as it considers appropriate for an independent Technical Review of a Proposal.

e. All Parties shall exercise their best efforts to ensure that a Technical Review undertaken under Sections 4.5.4.c and 4.5.4.d does not unnecessarily delay the decision by the Originating Party on the Application. Unless the Applicant or the Originating Party otherwise requests, all Technical Reviews shall be completed no later than 60 days after the date the notice of the Proposal was given to the Regional Body.

5. Declaration of Finding.

a. The Regional Body shall meet to consider a Proposal. The Applicant shall be provided with an opportunity to present the Proposal to the Regional Body at such time.

b. The Regional Body, having considered the notice, the Originating Party's Technical Review, any other independent Technical Review that is made, any comments or objections including the analysis of comments made by the public, First Nations and federally recognized Tribes, and any other information that is provided under this Compact shall issue a Declaration of Finding that the Proposal under consideration:

i. Meets the Standard of Review and Decision;

ii. Does not meet the Standard of Review and Decision; or,

iii. Would meet the Standard of Review and Decision if certain conditions were met.

c. An Originating Party may decline to participate in a Declaration of Finding made by the Regional Body.

d. The Parties recognize and affirm that it is preferable for all members of the Regional Body to agree whether the Proposal meets the Standard of Review and Decision.

e. If the members of the Regional Body who participate in the Declaration of Finding all agree, they shall issue a written Declaration of Finding with consensus.

f. In the event that the members cannot agree, the Regional Body shall make every reasonable effort to achieve consensus within 25 days.

g. Should consensus not be achieved, the Regional Body may issue a Declaration of Finding that presents different points of view and indicates each Party's conclusions.

h. The Regional Body shall release the Declarations of Finding to the public.

i. The Originating Party and the Council shall consider the Declaration of Finding before making a decision on the Proposal.

Section 4.6. Proposals Subject to Prior Notice.

1. Beginning no later than five years of the effective date of this Compact, the Originating Party shall provide all Parties and the Provinces with detailed and timely notice and an opportunity to comment within 90 days on any Proposal for a New or Increased Consumptive Use of 5 million gallons per day or greater average in any 90-day period. Comments shall address whether or not the Proposal is consistent with the Standard of Review and Decision. The Originating Party shall provide a response to any such comment received from another Party.

2. A Party may provide notice, an opportunity to comment and a response to comments even if this is not required under paragraph 1 of this Section. Any provision of such notice and opportunity to comment shall be undertaken only after consulting the Applicant.

Section 4.7. Council Actions.

1. Proposals for Exceptions subject to Council Review shall be submitted by the Originating Party to the Council for Council Review, and where applicable, to the Regional Body for concurrent review.

2. The Council shall review and take action on Proposals in accordance with this Compact and the

Standard of Review and Decision. The Council shall not take action on a Proposal subject to Regional Review pursuant to this Compact unless the Proposal shall have been first submitted to and reviewed by the Regional Body. The Council shall consider any findings resulting from such review.

Section 4.8. Prohibition of New or Increased Diversions.

All New or Increased Diversions are prohibited, except as provided for in this Article.

Section 4.9. Exceptions to the Prohibition of Diversions.

1. Straddling Communities. A Proposal to transfer Water to an area within a Straddling Community but outside the Basin or outside the source Great Lake Watershed shall be excepted from the prohibition against Diversions and be managed and regulated by the Originating Party provided that, regardless of the volume of Water transferred, all the Water so transferred shall be used solely for Public Water Supply Purposes within the Straddling Community, and:

a. All Water Withdrawn from the Basin shall be returned, either naturally or after use, to the Source Watershed less an allowance for Consumptive Use. No surface water or groundwater from outside the Basin may be used to satisfy any portion of this criterion except if it:

i. Is part of a water supply or wastewater treatment system that combines water from inside and outside of the Basin;

ii. Is treated to meet applicable water quality discharge standards and to prevent the introduction of invasive species into the Basin;

iii. Maximizes the portion of water returned to the Source Watershed as Basin Water and minimizes the surface water or groundwater from outside the Basin;

b. If the Proposal results from a New or Increased Withdrawal of 100,000 gallons per day or greater average over any 90-day period, the Proposal shall also meet the Exception Standard; and,

c. If the Proposal results in a New or Increased Consumptive Use of 5 million gallons per day or greater average over any 90-day period, the Proposal shall also undergo Regional Review.

2. Intra-Basin Transfer. A Proposal for an Intra-Basin Transfer that would be considered a Diversion under this Compact, and not already excepted pursuant to paragraph 1 of this Section, shall be excepted from the prohibition against Diversions, provided that:

a. If the Proposal results from a New or Increased Withdrawal less than 100,000 gallons per day average over any 90-day period, the Proposal shall be subject to management and regulation at the discretion of the Originating Party.

b. If the Proposal results from a New or Increased Withdrawal 100,000 gallons per day or greater average over any 90-day period and if the Consumptive Use resulting from the Withdrawal is less than 5 million gallons per day average over any 90-day period:

i. The Proposal shall meet the Exception Standard and be subject to management and regulation by the Originating Party, except that the Water may be returned to another Great Lake watershed rather than the Source Watershed;

ii. The Applicant shall demonstrate that there is no feasible, cost effective, and environmentally sound water supply alternative within the Great Lake watershed to which the Water will be transferred, including conservation of existing water supplies; and,

iii. The Originating Party shall provide notice to the other Parties prior to making any decision with respect to the Proposal.

c. If the Proposal results in a New or Increased Consumptive Use of 5 million gallons per day or greater average over any 90-day period:

i. The Proposal shall be subject to management and regulation by the Originating Party and shall meet the Exception Standard, ensuring that Water Withdrawn shall be returned to the Source Watershed;

ii. The Applicant shall demonstrate that there is no feasible, cost effective, and environmentally sound water supply alternative within the Great Lake watershed to which the Water will be transferred, including conservation of existing water supplies;

iii. The Proposal undergoes Regional Review; and,

iv. The Proposal is approved by the Council. Council approval shall be given unless one or more Council Members vote to disapprove.

3. Straddling Counties. A Proposal to transfer Water to a Community within a Straddling County that would be considered a Diversion under this Compact shall be excepted from the prohibition against Diversions, provided that it satisfies all of the following conditions:

a. The Water shall be used solely for the Public Water Supply Purposes of the Community within a Straddling County that is without adequate supplies of potable water;

b. The Proposal meets the Exception Standard, maximizing the portion of water returned to the Source Watershed as Basin Water and minimizing the surface water or groundwater from outside the Basin;

c. The Proposal shall be subject to management and regulation by the Originating Party, regardless of its size;

d. There is no reasonable water supply alternative within the basin in which the community is located, including conservation of existing water supplies;

e. Caution shall be used in determining whether or not the Proposal meets the conditions for this Exception. This Exception should not be authorized unless it can be shown that it will not endanger the integrity of the Basin Ecosystem;

f. The Proposal undergoes Regional Review; and,

g. The Proposal is approved by the Council. Council approval shall be given unless one or more Council Members vote to disapprove.

A Proposal must satisfy all of the conditions listed above. Further, substantive consideration will also be given to whether or not the Proposal can provide sufficient scientifically based evidence that the existing water supply is derived from groundwater that is hydrologically interconnected to Waters of the Basin.

4. Exception Standard. Proposals subject to management and regulation in this Section shall be declared to meet this Exception Standard and may be approved as appropriate only when the following criteria are met:

a. The need for all or part of the proposed Exception cannot be reasonably avoided through the efficient use and conservation of existing water supplies;

b. The Exception will be limited to quantities that are considered reasonable for the purposes for which it is proposed;

c. All Water Withdrawn shall be returned, either naturally or after use, to the Source Watershed less an allowance for Consumptive Use. No surface water or groundwater from the outside the Basin may be used to satisfy any portion of this criterion except if it:

i. Is part of a water supply or wastewater treatment system that combines water from inside and outside of the Basin;

ii. Is treated to meet applicable water quality discharge standards and to prevent the introduction of invasive species into the Basin;

d. The Exception will be implemented so as to ensure that it will result in no significant individual or cumulative adverse impacts to the quantity or quality of the Waters and Water Dependent Natural Resources of the Basin with consideration given to the potential Cumulative Impacts of any precedent-setting consequences associated with the Proposal;

e. The Exception will be implemented so as to incorporate Environmentally Sound and Economically Feasible Water Conservation Measures to minimize Water Withdrawals or Consumptive Use;

f. The Exception will be implemented so as to ensure that it is in compliance with all applicable municipal, State and federal laws as well as regional interstate and international agreements, including the Boundary Waters Treaty of 1909; and,

g. All other applicable criteria in Section 4.9 have also been met.

Section 4.10. Management and Regulation of New or Increased Withdrawals and Consumptive Uses.

1. Within five years of the effective date of this Compact, each Party shall create a program for the management and regulation of New or Increased Withdrawals and Consumptive Uses by adopting and implementing Measures consistent with the Decision-Making Standard. Each Party, through a considered process, shall set and may modify threshold levels for the regulation of New or Increased Withdrawals in order to assure an effective and efficient Water management program that will ensure that uses overall are reasonable, that Withdrawals overall will not result in significant impacts to the Waters and Water Dependent Natural Resources of the Basin, determined on the basis of significant impacts to the physical, chemical, and biological integrity of Source Watersheds, and that all other objectives of the Compact are achieved. Each Party may determine the scope and thresholds of its program, including which New or Increased Withdrawals and Consumptive Uses will be subject to the program.

2. Any Party that fails to set threshold levels that comply with Section 4.10.1 any time before 10 years after the effective date of this Compact shall apply a threshold level for management and regulation of all New or Increased Withdrawals of 100,000 gallons per day or greater average in any 90 day period.

3. The Parties intend programs for New or Increased Withdrawals and Consumptive Uses to evolve as may be necessary to protect Basin Waters. Pursuant to Section 3.4, the Council, in cooperation with the Provinces, shall periodically assess the Water management programs of the Parties. Such assessments may produce recommendations for the strengthening of the programs, including without limitation, establishing lower thresholds for management and regulation in accordance with the Decision-Making Standard.

Section 4.11. Decision-Making Standard.

Proposals subject to management and regulation in Section 4.10 shall be declared to meet this Decision-Making Standard and may be approved as appropriate only when the following criteria are met:

1. All Water Withdrawn shall be returned, either naturally or after use, to the Source Watershed less an allowance for Consumptive Use;

2. The Withdrawal or Consumptive Use will be implemented so as to ensure that the Proposal will result in no significant individual or cumulative adverse impacts to the quantity or quality of the Waters and Water Dependent Natural Resources and the applicable Source Watershed;

3. The Withdrawal or Consumptive Use will be implemented so as to incorporate Environmentally Sound and Economically Feasible Water Conservation Measures;

4. The Withdrawal or Consumptive Use will be implemented so as to ensure that it is in compliance with all applicable municipal, State and federal laws as well as regional interstate and international agreements, including the Boundary Waters Treaty of 1909;

5. The proposed use is reasonable, based upon a consideration of the following factors:

a. Whether the proposed Withdrawal or Consumptive Use is planned in a fashion that provides for efficient use of the water, and will avoid or minimize the waste of Water;

b. If the Proposal is for an increased Withdrawal or Consumptive use, whether efficient use is made of existing water supplies;

c. The balance between economic development, social development and environmental protection of the proposed Withdrawal and use and other existing or planned withdrawals and water uses sharing the water source;

d. The supply potential of the water source, considering quantity, quality, and reliability and safe yield of hydrologically interconnected water sources;

e. The probable degree and duration of any adverse impacts caused or expected to be caused by the proposed Withdrawal and use under foreseeable conditions, to other lawful consumptive or non-consumptive uses of water or to the quantity or quality of the Waters and Water Dependent Natural Resources of the Basin, and the proposed plans and arrangements for avoidance or mitigation of such impacts; and,

f. If a Proposal includes restoration of hydrologic conditions and functions of the Source Watershed, the Party may consider that.

Section 4.12. Applicability.

1. Minimum Standard. This Standard of Review and Decision shall be used as a minimum standard. Parties may impose a more restrictive decision-making standard for Withdrawals under their authority. It is also acknowledged that although a Proposal meets the Standard of Review and Decision it may not be approved under the laws of the Originating Party that has implemented more restrictive Measures.

2. Baseline.

a. To establish a baseline for determining a New or Increased Diversion, Consumptive Use or Withdrawal, each Party shall develop either or both of the following lists for their jurisdiction:

i. A list of existing Withdrawal approvals as of the effective date of the Compact;

ii. A list of the capacity of existing systems as of the effective date of this Compact. The capacity of the existing systems should be presented in terms of Withdrawal capacity, treatment capacity, distribution capacity, or other capacity limiting factors. The capacity of the existing systems must represent the state of the systems. Existing capacity determinations shall be based upon approval limits or the most restrictive capacity information.

b. For all purposes of this Compact, volumes of Diversions, Consumptive Uses, or Withdrawals of Water set forth in the list(s) prepared by each Party in accordance with this Section, shall constitute the baseline volume.

c. The list(s) shall be furnished to the Regional Body and the Council within one year of the effective date of this Compact.

3. Timing of Additional Applications. Applications for New or Increased Withdrawals, Consumptive Uses or Exceptions shall be considered cumulatively within ten years of any application.

4. Change of Ownership. Unless a new owner proposes a project that shall result in a Proposal for a New or Increased Diversion or Consumptive Use subject to Regional Review or Council approval, the change of ownership in and of itself shall not require Regional Review or Council approval.

5. Groundwater. The Basin surface water divide shall be used for the purpose of managing and regulating New or Increased Diversions, Consumptive Uses or Withdrawals of surface water and groundwater.

6. Withdrawal Systems. The total volume of surface water and groundwater resources that supply a common distribution system shall determine the volume of a Withdrawal, Consumptive Use or Diversion.

7. Connecting Channels. The watershed of each Great Lake shall include its upstream and downstream connecting channels.

8. Transmission in Water Lines. Transmission of Water within a line that extends outside the Basin as it conveys Water from one point to another within the Basin shall not be considered a Diversion if none of the

Water is used outside the Basin.

9. Hydrologic Units. The Lake Michigan and Lake Huron watersheds shall be considered to be a single hydrologic unit and watershed.

10. Bulk Water Transfer. A Proposal to Withdraw Water and to remove it from the Basin in any container greater than 5.7 gallons shall be treated under this Compact in the same manner as a Proposal for a Diversion. Each Party shall have the discretion, within its jurisdiction, to determine the treatment of Proposals to Withdraw Water and to remove it from the Basin in any container of 5.7 gallons or less.

Section 4.13. Exemptions.

Withdrawals from the Basin for the following purposes are exempt from the requirements of Article 4.

1. To supply vehicles, including vessels and aircraft, whether for the needs of the persons or animals being transported or for ballast or other needs related to the operation of the vehicles.

2. To use in a non-commercial project on a short-term basis for firefighting, humanitarian, or emergency response purposes.

Section 4.14. U.S. Supreme Court Decree: Wisconsin et al. v. Illinois et al.

1. Notwithstanding any terms of this Compact to the contrary, with the exception of Paragraph 5 of this Section, current, New or Increased Withdrawals, Consumptive Uses and Diversions of Basin Water by the State of Illinois shall be governed by the terms of the United States Supreme Court decree in Wisconsin et al. v. Illinois et al. and shall not be subject to the terms of this Compact nor any rules or regulations promulgated pursuant to this Compact. This means that, with the exception of Paragraph 5 of this Section, for purposes of this Compact, current, New or Increased Withdrawals, Consumptive Uses and Diversions of Basin Water within the State of Illinois shall be allowed unless prohibited by the terms of the United States Supreme Court decree in Wisconsin et al. v. Illinois et al.

2. The Parties acknowledge that the United States Supreme Court decree in Wisconsin et al. v. Illinois et al. shall continue in full force and effect, that this Compact shall not modify any terms thereof, and that this Compact shall grant the parties no additional rights, obligations, remedies or defenses thereto. The Parties specifically acknowledge that this Compact shall not prohibit or limit the State of Illinois in any manner from seeking additional Basin Water as allowed under the terms of the United States Supreme Court decree in Wisconsin et al. v. Illinois et al., any other party from objecting to any request by the State of Illinois for additional Basin Water under the terms of said decree, or any party from seeking any other type of modification to said decree. If an application is made by any party to the Supreme Court of the United States to modify said decree, the Parties to this Compact who are also parties to the decree shall seek formal input from the Canadian Provinces of Ontario and Québec, with respect to the proposed modification, use best efforts to facilitate the appropriate participation of said Provinces in the proceedings to modify the decree, and shall not unreasonably impede or restrict such participation.

3. With the exception of Paragraph 5 of this Section, because current, New or Increased Withdrawals, Consumptive Uses and Diversions of Basin Water by the State of Illinois are not subject to the terms of this Compact, the State of Illinois is prohibited from using any term of this Compact, including Section 4.9, to seek New or Increased Withdrawals, Consumptive Uses or Diversions of Basin Water.

4. With the exception of Paragraph 5 of this Section, because Sections 4.3, 4.4, 4.5, 4.6, 4.7, 4.8, 4.9, 4.10, 4.11, 4.12 (Paragraphs 1, 2, 3, 4, 6 and 10 only), and 4.13 of this Compact all relate to current, New or Increased Withdrawals, Consumptive Uses and Diversions of Basin Waters, said provisions do not apply to the State of Illinois. All other provisions of this Compact not listed in the preceding sentence shall apply to the State of Illinois, including the Water Conservation Programs provision of Section 4.2.

5. In the event of a Proposal for a Diversion of Basin Water for use outside the territorial boundaries of the Parties to this Compact, decisions by the State of Illinois regarding such a Proposal would be subject to all terms of this Compact, except Paragraphs 1, 3 and 4 of this Section.

6. For purposes of the State of Illinois' participation in this Compact, the entirety of this Section 4.14 is necessary for the continued implementation of this Compact and, if severed, this Compact shall no longer be binding on or enforceable by or against the State of Illinois.

Section 4.15. Assessment of Cumulative Impacts.

1. The Parties in cooperation with the Provinces shall collectively conduct within the Basin, on a Lake watershed and St. Lawrence River Basin basis, a periodic assessment of the Cumulative Impacts of Withdrawals, Diversions and Consumptive Uses from the Waters of the Basin, every 5 years or each time the incremental Basin Water losses reach 50 million gallons per day average in any 90-day period in excess of the quantity at the time of the most recent assessment, whichever comes first, or at the request of one or more of the Parties. The assessment shall form the basis for a review of the Standard of Review and Decision, Council and Party regulations and their application. This assessment shall:

a. Utilize the most current and appropriate guidelines for such a review, which may include but not be

limited to Council on Environmental Quality and Environment Canada guidelines;

b. Give substantive consideration to climate change or other significant threats to Basin Waters and take into account the current state of scientific knowledge, or uncertainty, and appropriate Measures to exercise caution in cases of uncertainty if serious damage may result;

c. Consider adaptive management principles and approaches, recognizing, considering and providing adjustments for the uncertainties in, and evolution of science concerning the Basin's water resources, watersheds and ecosystems, including potential changes to Basin-wide processes, such as lake level cycles and climate.

2. The Parties have the responsibility of conducting this Cumulative Impact assessment. Applicants are not required to participate in this assessment.

3. Unless required by other statutes, Applicants are not required to conduct a separate cumulative impact assessment in connection with an Application but shall submit information about the potential impacts of a Proposal to the quantity or quality of the Waters and Water Dependent Natural Resources of the applicable Source Watershed. An Applicant may, however, provide an analysis of how their Proposal meets the no significant adverse Cumulative Impact provision of the Standard of Review and Decision.

ARTICLE 5
TRIBAL CONSULTATION

Section 5.1. Consultation with Tribes

1. In addition to all other opportunities to comment pursuant to Section 6.2, appropriate consultations shall occur with federally recognized Tribes in the Originating Party for all Proposals subject to Council or Regional Review pursuant to this Compact. Such consultations shall be organized in the manner suitable to the individual Proposal and the laws and policies of the Originating Party.

2. All federally recognized Tribes within the Basin shall receive reasonable notice indicating that they have an opportunity to comment in writing to the Council or the Regional Body, or both, and other relevant organizations on whether the Proposal meets the requirements of the Standard of Review and Decision when a Proposal is subject to Regional Review or Council approval. Any notice from the Council shall inform the Tribes of any meeting or hearing that is to be held under Section 6.2 and invite them to attend. The Parties and the Council shall consider the comments received under this Section before approving, approving with modifications or disapproving any Proposal subject to Council or Regional Review.

3. In addition to the specific consultation mechanisms described above, the Council shall seek to establish mutually agreed upon mechanisms or processes to facilitate dialogue with, and input from federally recognized Tribes on matters to be dealt with by the Council; and, the Council shall seek to establish mechanisms and processes with federally recognized Tribes designed to facilitate on-going scientific and technical interaction and data exchange regarding matters falling within the scope of this Compact. This may include participation of tribal representatives on advisory committees established under this Compact or such other processes that are mutually-agreed upon with federally recognized Tribes individually or through duly-authorized intertribal agencies or bodies.

ARTICLE 6
PUBLIC PARTICIPATION

Section 6.1. Meetings, Public Hearings and Records.

1. The Parties recognize the importance and necessity of public participation in promoting management of the Water Resources of the Basin. Consequently, all meetings of the Council shall be open to the public, except with respect to issues of personnel.

2. The minutes of the Council shall be a public record open to inspection at its offices during regular business hours.

Section 6.2. Public Participation.

It is the intent of the Council to conduct public participation processes concurrently and jointly with processes undertaken by the Parties and through Regional Review. To ensure adequate public participation, each Party or the Council shall ensure procedures for the review of Proposals subject to the Standard of Review and Decision consistent with the following requirements:

1. Provide public notification of receipt of all Applications and a reasonable opportunity for the public to submit comments before Applications are acted upon.

2. Assure public accessibility to all documents relevant to an Application, including public comment received.

3. Provide guidance on standards for determining whether to conduct a public meeting or hearing for an Application, time and place of such a meeting(s) or hearing(s), and procedures for conducting of the same.

4. Provide the record of decision for public inspection including comments, objections, responses and approvals, approvals with conditions and disapprovals.

ARTICLE 7
DISPUTE RESOLUTION AND ENFORCEMENT

Section 7.1. Good Faith Implementation.

Each of the Parties pledges to support implementation of all provisions of this Compact, and covenants that its officers and agencies shall not hinder, impair, or prevent any other Party carrying out any provision of this Compact.

Section 7.2. Alternative Dispute Resolution.

1. Desiring that this Compact be carried out in full, the Parties agree that disputes between the Parties regarding interpretation, application and implementation of this Compact shall be settled by alternative dispute resolution.

2. The Council, in consultation with the Provinces, shall provide by rule procedures for the resolution of disputes pursuant to this section.

Section 7.3. Enforcement.

1. Any Person aggrieved by any action taken by the Council pursuant to the authorities contained in this Compact shall be entitled to a hearing before the Council. Any Person aggrieved by a Party action shall be entitled to a hearing pursuant to the relevant Party's administrative procedures and laws. After exhaustion of such administrative remedies, (*i*) any aggrieved Person shall have the right to judicial review of a Council action in the United States District Courts for the District of Columbia or the District Court in which the Council maintains offices, provided such action is commenced within 90 days; and, (*ii*) any aggrieved Person shall have the right to judicial review of a Party's action in the relevant Party's court of competent jurisdiction, provided that an action or proceeding for such review is commenced within the time frames provided for by the Party's law. For the purposes of this paragraph, a State or Province is deemed to be an aggrieved Person with respect to any Party action pursuant to this Compact.

2. a. Any Party or the Council may initiate actions to compel compliance with the provisions of this Compact, and the rules and regulations promulgated hereunder by the Council. Jurisdiction over such actions is granted to the court of the relevant Party, as well as the United States District Courts for the District of Columbia and the District Court in which the Council maintains offices. The remedies available to any such court shall include, but not be limited to, equitable relief and civil penalties.

b. Each Party may issue orders within its respective jurisdiction and may initiate actions to compel compliance with the provisions of its respective statutes and regulations adopted to implement the authorities contemplated by this Compact in accordance with the provisions of the laws adopted in each Party's jurisdiction.

3. Any aggrieved Person, Party or the Council may commence a civil action in the relevant Party's courts and administrative systems to compel any Person to comply with this Compact should any such Person, without approval having been given, undertake a New or Increased Withdrawal, Consumptive Use or Diversion that is prohibited or subject to approval pursuant to this Compact.

a. No action under this subsection may be commenced if:

i. The Originating Party or Council approval for the New or Increased Withdrawal, Consumptive Use or Diversion has been granted; or,

ii. The Originating Party or Council has found that the New or Increased Withdrawal, Consumptive Use or Diversion is not subject to approval pursuant to this Compact.

b. No action under this subsection may be commenced unless:

i. A Person commencing such action has first given 60 days prior notice to the Originating Party, the Council and Person alleged to be in noncompliance; and,

ii. Neither the Originating Party nor the Council has commenced and is diligently prosecuting appropriate enforcement actions to compel compliance with this Compact.

The available remedies shall include equitable relief, and the prevailing or substantially prevailing party may recover the costs of litigation, including reasonable attorney and expert witness fees, whenever the court determines that such an award is appropriate.

4. Each of the Parties may adopt provisions providing additional enforcement mechanisms and remedies including equitable relief and civil penalties applicable within its jurisdiction to assist in the implementation of this Compact.

ARTICLE 8
ADDITIONAL PROVISIONS

Section 8.1. Effect on Existing Rights.

1. Nothing in this Compact shall be construed to affect, limit, diminish or impair any rights validly established and existing as of the effective date of this Compact under State or federal law governing the Withdrawal of Waters of the Basin.

2. Nothing contained in this Compact shall be construed as affecting or intending to affect or in any way to interfere with the law of the respective Parties relating to common law Water rights.

3. Nothing in this Compact is intended to abrogate or derogate from treaty rights or rights held by any Tribe recognized by the federal government of the United States based upon its status as a Tribe recognized by the federal government of the United States.

4. An approval by a Party or the Council under this Compact does not give any property rights, nor any exclusive privileges, nor shall it be construed to grant or confer any right, title, easement, or interest in, to or over any land belonging to or held in trust by a Party; neither does it authorize any injury to private property or invasion of private rights, nor infringement of federal, State or local laws or regulations; nor does it obviate the necessity of obtaining federal assent when necessary.

Section 8.2. Relationship to Agreements Concluded by the United States of America.

1. Nothing in this Compact is intended to provide nor shall be construed to provide, directly or indirectly, to any Person any right, claim or remedy under any treaty or international agreement nor is it intended to derogate any right, claim, or remedy that already exists under any treaty or international agreement.

2. Nothing in this Compact is intended to infringe nor shall be construed to infringe upon the treaty power of the United States of America, nor shall any term hereof be construed to alter or amend any treaty or term thereof that has been or may hereafter be executed by the United States of America.

3. Nothing in this Compact is intended to affect nor shall be construed to affect the application of the Boundary Waters Treaty of 1909 whose requirements continue to apply in addition to the requirements of this Compact.

Section 8.3. Confidentiality.

1. Nothing in this Compact requires a Party to breach confidentiality obligations or requirements prohibiting disclosure, or to compromise security of commercially sensitive or proprietary information.

2. A Party may take measures, including but not limited to deletion and redaction, deemed necessary to protect any confidential, proprietary or commercially sensitive information when distributing information to other Parties. The Party shall summarize or paraphrase any such information in a manner sufficient for the Council to exercise its authorities contained in this Compact.

Section 8.4. Additional Laws.

Nothing in this Compact shall be construed to repeal, modify or qualify the authority of any Party to enact any legislation or enforce any additional conditions and restrictions regarding the management and regulation of Waters within its jurisdiction.

Section 8.5. Amendments and Supplements.

The provisions of this Compact shall remain in full force and effect until amended by action of the governing bodies of the Parties and consented to and approved by any other necessary authority in the same manner as this Compact is required to be ratified to become effective.

Section 8.6. Severability.

Should a court of competent jurisdiction hold any part of this Compact to be void or unenforceable, it shall be considered severable from those portions of the Compact capable of continued implementation in the absence of the voided provisions. All other provisions capable of continued implementation shall continue in full force and effect.

Section 8.7. Duration of Compact and Termination.

Once effective, the Compact shall continue in force and remain binding upon each and every Party unless terminated.

This Compact may be terminated at any time by a majority vote of the Parties. In the event of such termination, all rights established under it shall continue unimpaired.

ARTICLE 9

EFFECTUATION

Section 9.1. Repealer.

All acts and parts of acts inconsistent with this act are to the extent of such inconsistency hereby repealed.

Section 9.2. Effectuation by Chief Executive.

The Governor is authorized to take such action as may be necessary and proper in his or her discretion to effectuate the Compact and the initial organization and operation thereunder.

Section 9.3. Entire Agreement.

The Parties consider this Compact to be complete and an integral whole. Each provision of this Compact is considered material to the entire Compact, and failure to implement or adhere to any provision may be considered a material breach. Unless otherwise noted in this Compact, any change or amendment made to the Compact by any Party in its implementing legislation or by the U.S. Congress when giving its consent to this Compact is not considered effective unless concurred in by all Parties.

Section 9.4. Effective Date and Execution.

This Compact shall become binding and effective when ratified through concurring legislation by the states of Illinois, Indiana, Michigan, Minnesota, New York, Ohio and Wisconsin and the Commonwealth of Pennsylvania and consented to by the Congress of the United States. This Compact shall be signed and sealed in nine identical original copies by the respective chief executives of the signatory Parties. One such copy shall be filed with the Secretary of State of each of the signatory Parties or in accordance with the laws of the state in which the filing is made, and one copy shall be filed and retained in the archives of the Council upon its organization. The signatures shall be affixed and attested under the following form:

In Witness Whereof, and in evidence of the adoption and enactment into law of this Compact by the legislatures of the signatory parties and consent by the Congress of the United States, the respective Governors do hereby, in accordance with the authority conferred by law, sign this Compact in nine duplicate original copies, attested by the respective Secretaries of State, and have caused the seals of the respective states to be hereunto affixed this ____ day of (month), (year).

LAND HABITATS

PART 351
WILDERNESS AND NATURAL AREAS

324.35101 Definitions.

Sec. 35101. As used in this part:

(a) "Natural area" means a tract of state land or water under control of the department and dedicated and regulated by the department pursuant to this part which:

(*i*) Has retained or reestablished its natural character, or has unusual flora and fauna or biotic, geologic, scenic, or other similar features of educational or scientific value, but it need not be undisturbed.

(*ii*) Has been identified and verified through research and study by qualified observers.

(*iii*) May be coextensive with or part of a wilderness area or wild area.

(b) "Wild area" means a tract of undeveloped state land or water under control of the department and dedicated and regulated by the department pursuant to this part which:

(*i*) Is less than 3,000 acres of state land.

(*ii*) Has outstanding opportunities for personal exploration, challenge, or contact with natural features of the landscape and its biological community.

(*iii*) Possesses 1 or more of the characteristics of a wilderness area.

(c) "Wilderness area" means a tract of undeveloped state land or water under control of the department and dedicated and regulated by the department pursuant to this part which:

(*i*) Has 3,000 or more acres of state land or is an island of any size.

(*ii*) Generally appears to have been affected primarily by forces of nature with the imprint of the work of humans substantially unnoticeable.

(*iii*) Has outstanding opportunities for solitude or a primitive and unconfined type of recreation.

(*iv*) Contains ecological, geological, or other features of scientific, scenic, or natural history value.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 1996, Act 290, Imd. Eff. June 19, 1996.

Popular name: Act 451

Popular name: NREPA

324.35102 Wilderness, wild, and natural areas; duty of department to identify, dedicate, and administer.

Sec. 35102. The department shall identify for dedication, dedicate, and administer wilderness areas, wild areas, and natural areas in accordance with this part. The department shall enlist the voluntary cooperation and support of interested citizens and conservation groups.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.35103 Review of state land; identification of certain tracts; determination of dedication; proposed alteration or withdrawal of previously dedicated areas; filing proposals;

procedure for making dedication or denying proposal; exchange of dedicated land; notice requirements.

Sec. 35103. (1) The department shall annually review all state land under its control and identify those tracts that in its judgment best exhibit the characteristics of a wilderness area, wild area, or natural area. The department shall determine which land in its judgment is most suitable for dedication as wilderness areas, wild areas, or natural areas. The department shall administer the proposed land so as to protect its natural values.

(2) A citizen may propose to the department land that in his or her judgment exhibits the characteristics of a wilderness area, wild area, or natural area and is suitable for dedication by the department as such or may propose the alteration or withdrawal of previously dedicated areas. Land under control of the department that has been dedicated or designated before August 3, 1972 as a natural area, nature study area, preserve, natural reservation, wilderness, or wilderness study area shall be considered by the department and, if eligible, proposed for dedication. The proposals of the department shall be filed with both houses of the legislature.

(3) Within 90 days after land is proposed in accordance with subsections (1) or (2), the department shall make the dedication or issue a written statement of its principal reasons for denying the proposal. The department shall dedicate a wilderness area, wild area, or natural area, or alter or withdraw the dedication, by promulgating a rule. The department shall hold a public hearing relative to the dedication in the county where the land to be dedicated is located before a rule making the dedication may be promulgated. Not more than 10% of state land under the control of the department shall be dedicated pursuant to this subsection. All persons who have notified the department in writing during a calendar year of their interest in dedication of areas under this part shall be furnished by the department with a notice of all areas pending dedication or alteration or withdrawal from dedication during that calendar year.

(4) The department may exchange dedicated land for the purpose of acquiring other land that, in its judgment, is more suitable for the purposes of this part.

(5) Except as provided in subsection (4), prior to recommending the transfer of any land that is dedicated as a wilderness area, a wild area, or a natural area under this part, the department shall notify the citizens committee for Michigan state parks created in section 74102a and shall place a public notice in a newspaper of general circulation in the area in which the dedicated land is located describing the proposed transfer. Except as provided in subsection (4), dedicated land shall not be transferred except as specifically authorized by law.

324.35104 Proximity of wild and natural areas to certain urban centers; designation of private land or land controlled by other governmental units.

Sec. 35104. (1) The department shall attempt to provide, to the extent possible, wild areas and natural areas in relative proximity to urban centers of more than 100,000 population.

(2) Private land or land under the control of other governmental units may be designated by the department in the same way as a wilderness area, wild area, or natural area and administered by the department under a cooperative agreement between the owner and the department.

Popular name: Act 451

Popular name: NREPA

324.35105 Prohibited activities; easement.

Sec. 35105. (1) The following are prohibited on state land in a wilderness area, wild area, or natural area, or on state land proposed by the department for dedication in 1 of these categories during the 90 days a dedication is pending pursuant to section 35103:

(a) Removing, cutting, picking, or otherwise altering vegetation, except as necessary for appropriate public access, the preservation or restoration of a plant or wildlife species, or the documentation of scientific values and with written consent of the department.

(b) Except as provided in subsection (2), granting an easement for any purpose.

(c) Exploration for or extraction of minerals.

(d) A commercial enterprise, utility or permanent road.

(e) A temporary road, landing of aircraft, use of motor vehicles, motorboats, or other form of mechanical

transport, or any structure or installation, except as necessary to meet minimum emergency requirements for administration as a wilderness area, wild area, or natural area by the department.

(f) Motorized equipment, except if the department approves its use for management purposes or conservation practices.

(2) If a right-of-way or an easement for ingress and egress was granted on land prior to the land's designation as a wilderness area, wild area, or natural area, upon request, the department may grant an easement along the route of the existing right-of-way or easement for the installation and maintenance of utilities for gas, electric, telephone, and cable services. In granting an easement under this section, the department shall require conditions necessary to protect the wilderness area, wild area, or natural area.

Popular name: NREPA

324.35107 Maintenance or restoration of wilderness, wild, or natural area.

Sec. 35107. (1) State land in a wilderness area, wild area, or natural area shall be maintained or restored so as to preserve its natural values in a manner compatible with this part.

(2) Grasslands, forested lands, swamps, marshes, bogs, rock outcrops, beaches, and wholly enclosed waters of this state that are an integral part of a wilderness area, wild area, or natural area shall be included within and administered as a part of the area.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.35108 Posting signs; contents.

Sec. 35108. The department shall post signs in appropriate locations along the borders of a wilderness area, wild area, or natural area. The signs shall give notice of the area's dedication and may state those activities that are prohibited under section 35105 and those activities that are punishable as a misdemeanor pursuant to section 35106.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 1996, Act 290, Imd. Eff. June 19, 1996.

Popular name: Act 451

Popular name: NREPA

324.35110 Taxation; audit of assessments; appropriation.

Sec. 35110. The local taxing authority is entitled to collect from the state a tax on a wilderness, wild, or natural area within its jurisdiction at its ad valorem tax rate or $2.00 per acre, whichever is less. The department shall audit the assessments of wilderness, wild, or natural areas regularly to ensure that the properties are assessed in the same ratio as similar properties in private ownership. The legislature shall appropriate from the general fund for payments under this section.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.35111 Saving clause.

Sec. 35111. (1) Nothing in this part affects or diminishes any right acquired or vested before August 3, 1972.

(2) Nothing in this part alters the status of land dedicated by the commission before August 3, 1972 until dedicated pursuant to section 35103, except that tax reverted lands are subject to section 35110. Purchased land dedicated by the commission before August 3, 1972 is subject to ad valorem taxes if dedicated pursuant to section 35103.

PART 353
SAND DUNES PROTECTION AND MANAGEMENT

324.35301 Definitions.

Sec. 35301. As used in this part:

(a) "Contour change" includes any grading, filling, digging, or excavating that significantly alters the physical characteristic of a critical dune area, except that which is involved in sand dune mining as defined in part 637.

(b) "Crest" means the line at which the first lakeward facing slope of a critical dune ridge breaks to a slope of less than 1-foot vertical rise in a 5-1/2-foot horizontal plane for a distance of at least 20 feet, if the areal extent where this break occurs is greater than 1/10 acre in size.

(c) "Critical dune area" means a geographic area designated in the "atlas of critical dune areas" dated February 1989 that was prepared by the department of natural resources.

(d) "Department" means the department of environmental quality.

(e) "Foredune" means 1 or more low linear dune ridges that are parallel and adjacent to the shoreline of a Great Lake and are rarely greater than 20 feet in height. The lakeward face of a foredune is often gently sloping and may be vegetated with dune grasses and low shrub vegetation or may have an exposed sand face.

(f) "Model zoning plan" means the model zoning plan provided for in sections 35304 to 35309 and 35311a to 35324.

(g) "Permit" means a permit for a use within a critical dune area under this part.

(h) "Planning commission" means the body or entity within a local government that is responsible for zoning and land use planning for the local unit of government.

(i) "Restabilization" means restoration of the natural contours of a critical dune to the extent practicable, the restoration of the protective vegetative cover of a critical dune through the establishment of indigenous vegetation, and the placement of snow fencing or other temporary sand trapping measures for the purpose of preventing erosion, drifting, and slumping of sand.

(j) "Special use project" means any of the following:

(*i*) A proposed use in a critical dune area for an industrial or commercial purpose regardless of the size of the site.

(*ii*) A multifamily use of more than 3 acres.

(*iii*) A multifamily use of 3 acres or less if the density of use is greater than 4 individual residences per acre.

(*iv*) A proposed use in a critical dune area, regardless of size of the use, that the planning commission, or the department if a local unit of government does not have an approved zoning ordinance, determines would damage or destroy features of archaeological or historical significance.

(k) "Use" means a developmental, silvicultural, or recreational activity done or caused to be done by a person that significantly alters the physical characteristic of a critical dune area or a contour change done or caused to be done by a person. Use does not include sand dune mining as defined in part 637.

(*l*) "Zoning ordinance" means an ordinance of a local unit of government that regulates the development of critical dune areas within the local unit of government pursuant to the requirements of this part.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 1995, Act 262, Imd. Eff. Jan. 8, 1996;—Am. 2012, Act 297, Imd. Eff. Aug. 7, 2012.

Compiler's note: For transfer of authority, powers, duties, functions, and responsibilities of the Land and Water Management Division, with the exception of the farmland and open space preservation program, natural rivers program, and Michigan information resource inventory system, to the Director of the Michigan Department of Environmental Quality, see E.R.O. No. 1995-16, compiled at MCL 324.99901 of the Michigan Compiled Laws.

Popular name: Act 451

Popular name: NREPA

324.35302 Legislative findings.

Sec. 35302. The legislature finds that:

(a) The critical dune areas of this state are a unique, irreplaceable, and fragile resource that provide significant recreational, economic, scientific, geological, scenic, botanical, educational, agricultural, and ecological benefits to the people of this state and to people from other states and countries who visit this resource.

(b) The purpose of this part is to balance for present and future generations the benefits of protecting, preserving, restoring, and enhancing the diversity, quality, functions, and values of the state's critical dunes with the benefits of economic development and multiple human uses of the critical dunes and the benefits of public access to and enjoyment of the critical dunes. To accomplish this purpose, this part is intended to do all of the following:

(*i*) Ensure and enhance the diversity, quality, functions, and values of the critical dunes in a manner that is compatible with private property rights.

(*ii*) Ensure sound management of all critical dunes by allowing for compatible economic development and multiple human uses of the critical dunes.

(*iii*) Coordinate and streamline governmental decision-making affecting critical dunes through the use of the most comprehensive, accurate, and reliable information and scientific data available.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 2012, Act 297, Imd. Eff. Aug. 7, 2012.

324.35303 Notice to local units of government and property owners; copy of “atlas of critical dune areas”; contents of notice; supplying addresses of property owners.

Sec. 35303. (1) As soon as practicable following July 5, 1989, the department shall notify by mail each local unit of government that has within its jurisdiction critical dune areas, and include a copy of the "atlas of critical dune areas" dated February 1989 and a copy of former Act No. 222 of the Public Acts of 1976 with the notice. By October 1, 1989, the department shall mail a copy of the same notice to each property owner of record who owns property within a critical dune area. The notices shall include the following information:

(a) That designated property within the local unit of government is a critical dune area that is subject to regulation under former Act No. 222 of the Public Acts of 1976.

(b) That a local unit of government may adopt a zoning ordinance that is approved by the department, or, if the local unit of government does not have an approved ordinance, the use of the critical dune area will be regulated by the department under the model zoning plan.

(2) Upon the request of the department, a local unit of government shall supply to the department the address of each property owner of record who owns property within a critical dune area within its jurisdiction in a timely manner that enables the department to provide notice to the property owners as required under subsection (1).

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.35304 Permit for use in critical dune area; requirements; decision of local unit of government; limitations; ordinance; model zoning plan; special exceptions; assisting local units of government.

Sec. 35304. (1) A person shall not initiate a use within a critical dune area unless the person obtains a permit from the local unit of government in which the critical dune area is located or the department if the department issues permits as provided under subsection (7). A permit for a use within a critical dune area is subject to all of the following:

(a) A person proposing a use within a critical dune area shall file an application with the local unit of government, or with the department if the department is issuing permits under the model zoning plan. The application form shall include information necessary to conform with the requirements of this part. If a project

proposes the use of more than 1 critical dune area location within a local unit of government, 1 application may be filed for the uses.

(b) The local unit of government shall provide notice of an application filed under this section to each person who makes a written request to the local unit of government for notification of pending applications. The local unit of government may charge an annual fee for providing this notice. The local unit of government shall prepare a monthly list of the applications made during the previous month and shall promptly provide copies of the list for the remainder of the calendar year to the persons who have requested notice. In addition, if the department issues permits under this part within a local unit of government, notice of an application shall also be given to the local conservation district office, the county clerk, the county health department, and the local unit of government in which the property is located. The monthly list shall state the name and address of each applicant, the location of the applicant's project, and a summary statement of the purpose of the use. The local unit of government may hold a public hearing on pending applications.

(c) The notice shall state that unless a written request is filed with the local unit of government within 20 days after the notice is sent, the local unit of government may grant the application without a public hearing. Upon the written request of 2 or more persons who own real property within 2 miles of the project, the local unit of government shall hold a public hearing pertaining to a permit application.

(d) At least 10 days' notice of a hearing to be held pursuant to this section shall be given by publication in 1 or more newspapers of general circulation in the county in which the proposed use is to be located, and by providing notice to the persons who have requested notice pursuant to subdivision (b) and to the person requesting the hearing.

(e) After the filing of an application, the local unit of government shall grant or deny the permit within 60 days, or within 90 days if a public hearing is held. If a permit is denied, the local unit of government shall provide to the applicant a concise written statement of its reasons for denial of the permit, and if it appears that a minor modification of the application would result in the granting of the permit, the nature of the modification shall be stated. In an emergency, the local unit of government may issue a conditional permit before the expiration of the 20-day period referred to in subdivision (c).

(f) The local unit of government shall base a decision to grant or deny a permit under this section on the model zoning plan or on any existing ordinance that is in effect in the local unit of government that provides a substantially equivalent level of protection for critical dune areas and that is approved by the department.

(g) Subject to section 35316, a permit shall be approved unless the local unit of government or the department determines that the use will significantly damage the public interest on the privately owned land, or, if the land is publicly owned, the public interest in the publicly owned land, by significant and unreasonable depletion or degradation of any of the following:

(*i*) The diversity of the critical dune areas within the local unit of government.

(*ii*) The quality of the critical dune areas within the local unit of government.

(*iii*) The functions of the critical dune areas within the local unit of government.

(2) The decision of the local unit of government or the department with respect to a permit shall be in writing and shall be based upon evidence that would meet the standards in section 75 of the administrative procedures act of 1969, 1969 PA 306, MCL 24.275. A decision denying a permit shall document, and any review upholding the decision shall determine, all of the following:

(a) That the local unit of government or the department has met the burden of proof under subsection (1).

(b) That the decision is based upon sufficient facts or data.

(c) That the decision is the product of reliable scientific principles and methods.

(d) That the decision has applied the principles and methods reliably to the facts.

(e) That the facts or data upon which the decision is based are recorded in the file.

(3) A permit shall not be granted that authorizes construction of a dwelling or other permanent building on the first lakeward facing slope of a critical dune area or foredune except on a lot of record that was recorded prior to July 5, 1989 that does not have sufficient buildable area landward of the crest to construct the dwelling or other permanent building as proposed by the applicant. The proposed construction, to the greatest extent possible, shall be placed landward of the crest. The portion of the development that is lakeward of the crest shall be placed in the location that has the least impact on the critical dune area.

(4) Except as provided in subsection (3), a permit shall provide that a use that is a structure shall be constructed behind the crest of the first landward ridge of a critical dune area that is not a foredune. However, if construction occurs within 100 feet measured landward from the crest of the first landward ridge that is not a foredune, the use shall meet all of the following requirements:

(a) The structure and access to the structure shall be in accordance with a site plan prepared for the site by a registered professional architect or a licensed professional engineer and the site plan shall provide for the disposal of storm waters without serious soil erosion and without sedimentation of any stream or other body

of water.

(b) Access to the structure shall be from the landward side of the dune.

(c) The dune shall be restabilized with indigenous vegetation.

(d) The crest of the dune shall not be reduced in elevation.

(5) As soon as possible following adoption of a zoning ordinance enacted pursuant to this part, the local unit of government shall submit to the department a copy of the ordinance that it determines meets the requirements of this part. If the local unit of government has an existing ordinance that it contends is substantially equivalent to the model zoning plan, that ordinance may be submitted to the department at any time. The department shall review zoning ordinances submitted under this section to assure compliance with this part. If the department finds that an ordinance is not in compliance with this part, the department shall work with the local unit of government to bring the ordinance into compliance and inform the local unit of the failure to comply and in what ways the submitted ordinance is deficient. Unless a local unit of government receives notice, within 180 days after submittal of the ordinance to the department under this subsection, that the ordinance is not in compliance with this part, the ordinance shall be considered to be approved by the department.

(6) A local unit of government may adopt, submit to the department, and obtain approval of a zoning ordinance based on the model zoning plan or an equivalent ordinance as provided in this section by June 30, 1990. If a local unit does not have an approved ordinance by June 30, 1990, the department shall implement the model zoning plan for that local unit of government in the same manner and under the same circumstances as provided in subsection (1). Notwithstanding any other provision of this part, a local unit of government may adopt a zoning ordinance at any time, and upon the approval of the department, that ordinance shall take the place of the model zoning plan implemented by the department.

(7) If a local unit of government in which a proposed use is to be located does not elect to issue permits or does not receive department approval of a zoning ordinance that regulates critical dune areas, the department shall implement the model zoning plan in the place of the local unit of government and issue special exceptions in the same circumstances as provided in this part for the issuance of variances by local units of government, and issue permits pursuant to subsection (1) and part 13.

(8) The department shall assist local units of government in developing ordinances that meet the requirements of this part.

Popular name: NREPA

324.35305 Hearing; judicial review.

Sec. 35305. (1) If an applicant for a permit or a special exception or the owner of the property immediately adjacent to the proposed use is aggrieved by a decision of the department in regard to the issuance or denial of a permit or special exception under this part, the applicant or owner may request a formal hearing on the matter involved. The hearing shall be conducted by the department as a contested case hearing in the manner provided for in the administrative procedures act of 1969, 1969 PA 306, MCL 24.201 to 24.328.

(2) Following the hearing provided for under subsection (1), a decision of the department in regard to the issuance or denial of a permit or special exception under this part is subject to judicial review as provided for in the administrative procedures act of 1969, 1969 PA 306, MCL 24.201 to 24.328.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 2012, Act 297, Imd. Eff. Aug. 7, 2012.

Popular name: Act 451

Popular name: NREPA

324.35306 Lawful use of land or structure; exemptions.

Sec. 35306. (1) The lawful use of land or a structure, as existing and lawful within a critical dune area at the time the department implements the model zoning plan for a local unit of government, may be continued although the use of that land or structure does not conform to the model zoning plan. The continuance, completion, restoration, reconstruction, extension, or substitution of existing nonconforming uses of land or a structure may continue upon reasonable terms that are consistent, to the extent possible, with the applicable zoning provisions of the local unit of government in which the use is located.

(2) The lawful use of land or a structure, as existing and lawful within a local unit of government that has a zoning ordinance approved by the department, may, but is not required by this part to, be continued subject to the law pertaining to existing uses within the act that enables that local unit of government to zone and the applicable zoning provisions of the local unit of government.

(3) A use needed to obtain or maintain a permit or license that is required by law to continue operating an electric utility generating facility that is in existence on July 5, 1989 shall not be precluded under this part.

(4) A use needed to maintain, repair, or replace existing utility lines, pipelines, or other utility facilities within a critical dune area that were in existence on July 5, 1989, or were constructed in accordance with a permit under this part, is exempt for purposes for which the permit was issued from the operation of this part or a local ordinance approved under this part if the maintenance, repair, or replacement is completed in compliance with all of the following:

(a) Vehicles shall not be driven on slopes greater than 1-foot vertical rise in a 3-foot horizontal plane.

(b) All disturbed areas shall be immediately stabilized and revegetated with native vegetation following completion of work to prevent erosion.

(c) Any removal of woody vegetation shall be done in a manner to assure that any adverse effect on the dune will be minimized and will not significantly alter the physical characteristics or stability of the dune.

(d) To accomplish replacement of a utility pole, the new pole shall be placed adjacent to the existing pole, and the existing pole shall be removed by cutting at ground level.

(e) In the case of repair of underground utility wires, the repair shall be limited to the minimal excavation necessary to replace the wires by plowing, small trench excavation, or directional boring. Replacement of wires on slopes steeper than 1-foot vertical rise in a 4-foot horizontal plane shall be limited to installation by plowing or directional boring only.

(f) In the case of repair or replacement of underground pipelines, directional boring shall be utilized, and if excavation is necessary to access and bore the pipeline, the excavation area shall be located on slopes 1-foot vertical rise in a 4-foot horizontal plane or less.

(5) Uses that have received all necessary permits from the state or the local unit of government in which the proposed use is located by July 5, 1989, are exempt for purposes for which a permit is issued from the operation of this part or local ordinances approved under this part. Such uses shall be regulated pursuant to local ordinances in effect by that date.

324.35307 Maps.

Sec. 35307. Upon adoption of an approved zoning ordinance, certified copies of the maps showing critical dune areas, and existing development and uses, shall be sent by the local unit of government to the state tax commission and the assessing office, planning commission, and governing board of the local unit of government, if requested by an entity listed in this section.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

324.35308 Prohibited uses; exception.

Sec. 35308. (1) Except as provided in subsection (2), the following uses shall be prohibited in a critical dune area:

(a) A surface drilling operation that is utilized for the purpose of exploring for or producing hydrocarbons or natural brine or for the disposal of the waste or by-products of the operation.

(b) Production facilities regulated under parts 615 and 625.

(2) Uses described in subsection (1) that are lawfully in existence at a site on July 5, 1989 may be continued. The continuance, completion, restoration, reconstruction, extension, or substitution of those existing uses shall be permitted upon reasonable terms prescribed by the department.

324.35309 Use permit and inspection fee; disposition of fees; authorization of separate fee; bond.

Sec. 35309. (1) A local unit of government, or the department if the local unit of government does not have an approved zoning ordinance, may establish a use permit and inspection fee.

(2) The department shall forward all fees it collects under this section to the state treasurer for deposit in the land and water management permit fee fund created in part 301.

(3) Fees collected by a local unit of government shall be credited to the treasury of the local unit of government to be used to defray the cost of administering uses under a zoning ordinance.

(4) In addition to fees provided for in this section, a soil conservation district may charge a separate fee to cover the actual expense of providing services under this part and for providing technical assistance and advice to individuals who seek assistance in matters pertaining to compliance under this part.

(5) A local unit of government, or the department if the local unit of government does not have an approved zoning ordinance, may require the holder of a permit issued by a local unit of government or the department to file with the local unit of government or the department a bond executed by an approved surety in this state in an amount necessary to assure faithful conformance with the permit.

324.35310 Suspension or revocation of permit; restraining order, injunction, or other appropriate remedy; instituting action; cumulative rights; performance review; determination of noncompliance; response; implementation of model zoning plan; appeal; civil fine; order to pay cost of restabilization; violation as misdemeanor.

Sec. 35310. (1) If the department finds that a person is not in compliance with the model zoning plan if the department is implementing the plan, or if the department is involved in the modification or reversal of a decision regarding a special use project as provided in section 35322, the department may suspend or revoke the permit.

(2) At the request of the department, the attorney general may institute an action for a restraining order or injunction or other appropriate remedy to prevent or preclude a violation of the model zoning plan if the department is implementing the provisions of the plan or if the department is involved in the modification or reversal of a decision regarding a special use project as provided in section 35322. At the request of the governing body of a local unit of government, the county prosecutor may institute an action for a restraining order or injunction or other proper remedy to prevent a violation of a zoning ordinance approved under this part. This shall be in addition to the rights provided in part 17, and as otherwise provided by law. An action under this subsection instituted by the attorney general may be instituted in the circuit court for the county of Ingham or in the county in which the defendant is located, resides, or is doing business.

(3) The department shall periodically review the performance of all local units of government that have ordinances approved under this part. If the department determines that the local unit of government is not administering the ordinance in conformance with this part, the department shall notify the local unit of government in writing of its determination, including specific reasons why the local unit of government is not in compliance. The local unit of government has 60 days to respond to the department. If the department determines that the local unit of government has not made sufficient changes to its ordinance administration or otherwise explained its actions, the department may withdraw the approval of the local ordinance and implement the model zoning plan within that local unit of government. If a local unit disagrees with an action of the department to withdraw approval of the local ordinance, it may appeal that action pursuant to the administrative procedures act of 1969, 1969 PA 306, MCL 24.201 to 24.328, in the manner provided in that act for contested cases.

(4) In addition to any other relief provided by this section, the court may impose on a person who violates this part, or a permit, a civil fine of not more than $5,000.00 for each day of violation, or may order a violator to pay the full cost of restabilization of a critical dune area or other natural resource that is damaged or destroyed as a result of a violation, or both.

(5) A person who violates this part, or a person who violates a permit issued under this part, is guilty of a misdemeanor, punishable by a fine of not more than $5,000.00 per day for each day of violation.

324.35311 Review of “atlas of critical dune areas”; appointment and duties of review team.

Sec. 35311. Beginning with the effective date of the 2012 act that amended this section and once every 10 years thereafter, the department may appoint a team of qualified ecologists, who may be employed by the department or may be persons with whom the department enters into contracts, to review "the atlas of critical dune areas" dated February 1989. The review team shall evaluate the accuracy of the designations of critical dune areas within the atlas and shall recommend to the legislature any changes to the atlas or underlying

criteria revisions to the atlas that would provide more precise protection to the targeted resource.

324.35311a Construction, improvement, and maintenance of driveways.

Sec. 35311a. (1) Notwithstanding section 35316 or any other provision of this part, the construction, improvement, and maintenance of a driveway shall be permitted for any dwelling or other permanent building allowed in a critical dune area, including a dwelling or other permanent building approved under this part or a lawful nonconforming use, subject only to applicable permit requirements under sections 35312 through 35325 and the following:

(a) A driveway shall be permitted either to the principal building or, in the sole discretion of the applicant, to an accessory building, under the provisions of this section. Additional driveways, if any, shall meet the applicable requirements for any other use under this part. The development of a plan for a driveway should include consideration of the use of retaining walls, bridges, or similar measures, if feasible, to minimize the impact of the driveway, parking, and turnaround areas, and the consideration of alternative locations on the same lot of record.

(b) Driveways on slopes steeper than a 1-foot vertical rise in a 4-foot horizontal plane, but not steeper than a 1-foot rise in a 3-foot horizontal plane, shall be in accordance with a site plan submitted with the permit application and prepared for the site by a registered professional architect or licensed professional engineer. The site plan shall include (*i*) storm water drainage that provides for disposal of storm water without serious erosion, (*ii*) methods for controlling erosion from wind and water, and (*iii*) restabilization, by design elements including vegetation, cut-and-fill, bridges, traverses, and such other elements as are required in the judgment of the architect or engineer to meet these requirements.

(c) Driveways on slopes steeper than a 1-foot vertical rise in a 3-foot horizontal plane shall be in accordance with a site plan submitted with the permit application and prepared for the site by a licensed professional engineer. The site plan shall include (*i*) storm water drainage that provides for disposal of storm water without serious erosion, (*ii*) methods for controlling erosion from wind and water, and (*iii*) restabilization, by design elements including vegetation, cut-and-fill, bridges, traverses, and such other elements as are required in the judgment of the engineer to meet these requirements. The engineer shall certify under seal that the driveway is not likely to increase erosion or decrease stability.

(2) Temporary construction access for all construction, including new construction, renovation, repairs, rebuilding, or replacement, and repair, improvement, or replacement of septic tanks and systems, shall be allowed for any use allowed in a critical dune area for which a driveway is not already installed by the owner, subject only to the requirements that the temporary access shall not involve a contour change or vegetation removal that increases erosion or decreases stability except as can be restabilized upon completion of the construction. The temporary access shall be maintained in stable condition, and restabilization shall be commenced promptly upon completion of the construction.

(3) As used in this section, "driveway" means a privately owned, constructed, and maintained vehicular access from a road or easement serving the property to the principal building or accessory buildings, that is paved, graveled, or otherwise improved for vehicular access, 16 feet wide or narrower in the sole discretion of the applicant or owner, and may include, in the sole discretion of the applicant or owner, a shared driveway.

324.35311b Construction, improvement, and maintenance of accessibility measures.

Sec. 35311b. (1) Notwithstanding section 35316 or any other provision of this part, at the request of the applicant, the construction, improvement, and maintenance of accessibility measures shall be permitted for any dwelling or other permanent building allowed in a critical dune area, including a dwelling or other permanent building approved under this part or a lawful nonconforming use, subject only to applicable permit requirements under sections 35312 through 35325 and the following:

(a) Accessibility measures on slopes steeper than a 1-foot vertical rise in a 4-foot horizontal plane, but not steeper than a 1-foot vertical rise in a 3-foot horizontal plane, shall be in accordance with a site plan submitted with the permit application and prepared for the site by a registered professional architect or licensed professional engineer. The site plan shall include (*i*) storm water drainage that provides for disposal of storm water without serious erosion, (*ii*) methods for controlling erosion from wind and water, and (*iii*)

restabilization, by design elements including vegetation, cut-and-fill, bridges, traverses, and such other elements as are required in the judgment of the architect or engineer to meet these requirements.

(b) Accessibility measures on slopes steeper than a 1-foot vertical rise in a 3-foot horizontal plane shall be in accordance with a site plan submitted with the permit application and prepared for the site by a licensed professional engineer. The site plan shall include (*i*) storm water drainage that provides for disposal of storm water without serious erosion, (*ii*) methods for controlling erosion from wind and water, and (*iii*) restabilization, by design elements including vegetation, cut-and-fill, bridges, traverses, and such other elements as are required in the judgment of the engineer to meet these requirements. The engineer shall certify under seal that the accessibility measures are not likely to increase erosion or decrease stability.

(2) As used in this section, "accessibility measures" means a circulation path and at least 1 entrance on a circulation path complying with American national standards institute chapter 4 standards for accessible routes, from a road or easement serving the property, and, at the option of the applicant, from a sidewalk, a driveway, or a garage. As used in this section, accessibility measures do not include driveways.

(3) For the purposes of this section, the choice of components for an accessible route under American national standards institute standard 402.2 shall be at the option of the applicant.

324.35312 Zoning ordinance; provisions; regulation of additional lands.

Sec. 35312. (1) A local unit of government that has 1 or more critical dune areas within its jurisdiction may formulate a zoning ordinance pursuant to the Michigan zoning enabling act, 2006 PA 110, MCL 125.3101 to 125.3702.

(2) A zoning ordinance shall consist of all of the provisions of the model zoning plan or comparable provisions that provide substantially equivalent protection of critical dune areas as the model zoning plan but shall not be more restrictive than the model zoning plan or the standard of review for permits or variances prescribed in the model zoning plan.

(3) A local unit of government may by an affirmative vote of its governing body following a public hearing regulate additional lands as critical dune areas under this part as considered appropriate by the planning commission if the lands are determined by the local unit of government to be essential to the hydrology, ecology, topography, or integrity of a critical dune area. A local unit of government shall provide within its zoning ordinance for the protection of lands that are within 250 feet of a critical dune area, if those lands are determined by the local unit of government to be essential to the hydrology, ecology, topography, or integrity of a critical dune area.

(4) If a local unit of government does not have an approved zoning ordinance, the department may regulate additional lands described in subsection (3). However, the lands added by the department shall not extend more than 250 feet from the landward boundary of a critical dune area, unless, following a public hearing, an affirmative vote of the governing body of the local unit of government authorizes a further extension. If the director determines that the mapping of a critical dune area designated in the "atlas of critical dune areas" dated February 1989 was inaccurate, the department may regulate additional lands. However, the lands added by the department shall not extend more than 250 feet from the landward boundary of a critical dune area.

324.35313 Zoning ordinance; requirements for applications for permits for use of critical dune area.

Sec. 35313. (1) A zoning ordinance shall require that all applications for permits for the use of a critical dune area include in writing all of the following:

(a) That the county enforcing agency designated pursuant to part 91 finds that the project is in compliance with part 91 and any applicable soil erosion and sedimentation control ordinance that is in effect in the local unit of government.

(b) That a proposed sewage treatment or disposal system on the site has been approved by the county health department or the department.

(c) Assurances that the cutting and removing of trees and other vegetation will be performed according to the "forestry management guidelines for Michigan" prepared by the society of American foresters in 1987 as revised in 2010 and may include a program to provide mitigation for the removal of trees or vegetation by

providing assurances that the applicant will plant on the site more trees and other vegetation than were removed by the proposed use.

(d) A site plan that contains data required by the planning commission concerning the physical development of the site and extent of disruption of the site by the proposed development.

(2) A local unit of government or the department shall not require an environmental site assessment or environmental impact statement as part of a permit application except for a special use project.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 2012, Act 297, Imd. Eff. Aug. 7, 2012.

324.35314 Zoning ordinance; provisions; review of subdivision development.

Sec. 35314. (1) A zoning ordinance shall provide for all of the following:

(a) Lot size, width, density, and front and side setbacks.

(b) Storm water drainage that provides for disposal of drainage water without serious erosion.

(c) Methods for controlling erosion from wind and water.

(d) Restabilization.

(2) Each zoning ordinance shall provide that a use that proposes a subdivision development shall be reviewed by the local unit of government to assure compliance with all of the model zoning plan.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.35315 Zoning ordinance; prohibited uses in critical dune area.

Sec. 35315. A zoning ordinance shall not permit either of the following uses in a critical dune area:

(a) The disposal of sewage on-site unless the standards of applicable sanitary codes are met or exceeded.

(b) A use that does not comply with the minimum setback requirements required by rules that are promulgated under part 323.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.35316 Zoning ordinances; additional prohibited uses in critical dune area; variance; contour maps; guidelines; restoration.

Sec. 35316. (1) Unless a variance is granted pursuant to section 35317, a zoning ordinance shall not permit the following uses in a critical dune area:

(a) A structure and access to the structure on a slope within a critical dune area that has a slope that measures from a 1-foot vertical rise in a 4-foot horizontal plane to less than a 1-foot vertical rise in a 3-foot horizontal plane, unless the structure and access to the structure are in accordance with a site plan prepared for the site by a registered professional architect or a licensed professional engineer and the site plan provides for the disposal of storm waters without serious soil erosion and without sedimentation of any stream or other body of water.

(b) A use on a slope within a critical dune area that has a slope steeper than a 1-foot vertical rise in a 3-foot horizontal plane.

(c) A use involving a contour change if the local unit of government or the department determines that it is more likely than not to increase erosion or decrease stability.

(d) Silvicultural practices, as described in the "forest management guidelines for Michigan", prepared by the society of American foresters as revised in 2010, if the local unit of government or the department determines that they are more likely than not to increase erosion or decrease stability.

(e) A use that involves a vegetation removal if the local unit of government or the department determines that it is more likely than not to increase erosion or decrease stability.

(2) If the local unit of government is not certain of the degree of slope on a property for which a use permit is sought, the local unit may require that the applicant supply contour maps of the site with 5-foot intervals at or near any proposed structure or roadway.

(3) The department shall develop guidelines to describe the method by which the department and local units of government measure slopes to implement the requirements of the zoning ordinance or the model zoning plan.

(4) If a person is ordered by the department, or by a local unit of government that is enforcing a zoning

ordinance authorized under this part, to restore a critical dune area that has been degraded by that person, the department or local unit of government shall establish a procedure by which the restoration of the critical dune area is monitored to assure that the restoration is completed in a satisfactory manner.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 1995, Act 262, Imd. Eff. Jan. 8, 1996;—Am. 2012, Act 297, Imd. Eff. Aug. 7, 2012.

Popular name: Act 451

Popular name: NREPA

324.35317 Variances; special exceptions; limitations; decision; environmental site assessment or environmental impact statement; annual report; forwarding application to local government; review and comment; waiver of opportunity to review; notice of opposition; determination of practical difficulty.

Sec. 35317. (1) A local unit of government may issue variances under a zoning ordinance, or the department may issue special exceptions under the model zoning plan if a local unit of government does not have an approved zoning ordinance, if a practical difficulty will occur to the owner of the property if the variance or special exception is not granted. In determining whether a practical difficulty will occur if a variance or special exception is not granted, primary consideration shall be given to assuring that human health and safety are protected by the determination and that the determination complies with applicable local zoning, other state laws, and federal law. If a practical difficulty will occur to the owner of the property if the variance or special exception is not granted, a variance or special exception shall be granted under this section unless the local unit of government or the department determines that the use will significantly damage the public interest on the privately owned land, or, if the land is publicly owned, the public interest in the publicly owned land, by significant and unreasonable depletion or degradation of any of the following:

(a) The diversity of the critical dune areas within the local unit of government.

(b) The quality of the critical dune areas within the local unit of government.

(c) The functions of the critical dune areas within the local unit of government.

(2) The decision of the local unit of government or the department shall be in writing and shall be based upon evidence that would meet the standards in section 75 of the administrative procedures act of 1969, 1969 PA 306, MCL 24.275. A decision denying a variance or special exception shall document, and any review upholding the decision shall determine, all of the following:

(a) That the local unit of government or the department has met the burden of proof under subsection (1).

(b) That the decision is based upon sufficient facts or data.

(c) That the decision is the product of reliable scientific principles and methods.

(d) That the decision has applied the principles and methods reliably to the facts.

(e) That the facts or data upon which the decision is based are recorded in the file.

(3) A local unit of government or the department shall not require an environmental site assessment or environmental impact statement for a variance except for a special use project.

(4) A variance shall not be granted from a setback requirement provided for under the model zoning plan or an equivalent zoning ordinance approved under section 35034 enacted pursuant to this part unless the property for which the variance is requested is 1 of the following:

(a) A nonconforming lot of record that is recorded prior to July 5, 1989, and that becomes nonconforming due to the operation of this part or a zoning ordinance.

(b) A lot legally created after July 5, 1989 that later becomes nonconforming due to natural shoreline erosion.

(c) Property on which the base of the first landward critical dune of at least 20 feet in height that is not a foredune is located at least 500 feet inland from the first foredune crest or line of vegetation on the property. However, the setback shall be a minimum of 200 feet measured from the foredune crest or line of vegetation.

(5) Each local unit of government that has issued a variance for a use other than a special use project during the previous 12 months shall file an annual report with the department indicating variances that have been granted by the local unit of government during that period.

(6) Upon receipt of an application for a special exception under the model zoning plan, the department shall forward a copy of the application and all supporting documentation to the local unit of government having jurisdiction over the proposed location. The local unit of government shall have 60 days to review and comment on the proposed special exception. The department shall not make a decision on a special exception under the model zoning plan until either the local unit of government has commented on the proposed special exception or has waived its opportunity to review the special exception. The local unit of government may waive its opportunity to review the application at any time within 60 days after receipt of the application and

supporting documentation by notifying the department in writing. The local unit of government also waives its opportunity to review the application if it fails to act as authorized in this subsection within 60 days. If the local unit of government waives its opportunity to review the application, the local unit of government also waives its opportunity to oppose the decision by the department to issue a special exception. If the local unit of government opposes the issuance of the special exception, the local unit of government shall notify the department, in writing, of its opposition within the 60-day notice period. If the local unit of government opposes the issuance of the special exception, the department shall not issue a special exception. The local unit of government may also consider whether a practical difficulty will occur to the owner of the property if the special exception is not granted by the department and may make a recommendation to the department within the 60-day notice period. The department shall base its determination of whether a practical difficulty exists on information provided by the local unit of government and other pertinent information.

324.35319 Environmental assessment; contents.

Sec. 35319. The zoning ordinance shall provide that if an environmental assessment is required under section 35313, that assessment shall include the following information concerning the site of the proposed use:

(a) The name and address of the applicant.

(b) A description of the applicant's proprietary interest in the site.

(c) The name, address, and professional qualifications of the person preparing the environmental assessment and his or her opinion as to whether the proposed development of the site is consistent with protecting features of environmental sensitivity and archaeological or historical significance that may be located on the site.

(d) The description and purpose of the proposed use.

(e) The location of existing utilities and drainageways.

(f) The general location and approximate dimensions of proposed structures.

(g) Major proposed change of land forms such as new lakes, terracing, or excavating.

(h) Sketches showing the scale, character, and relationship of structures, streets or driveways, and open space.

(i) Approximate location and type of proposed drainage, water, and sewage facilities.

(j) Legal description of property.

(k) A physical description of the site, including its dominant characteristics, its vegetative character, its present use, and other relevant information.

(*l*) A natural hazards review consisting of a list of natural hazards such as periodic flooding, poor soil bearing conditions, and any other hazards peculiar to the site.

(m) An erosion review showing how erosion control will be achieved and illustrating plans or programs that may be required by any existing soil erosion and sedimentation ordinance.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 2012, Act 297, Imd. Eff. Aug. 7, 2012.

Popular name: Act 451

Popular name: NREPA

324.35320 Environmental impact statement; contents.

Sec. 35320. If an environmental impact statement is required under section 35313 prior to permitting a proposed use, a zoning ordinance may require that the statement include all of the following:

(a) The name and address of the applicant.

(b) A description of the applicant's proprietary interest in the site of the proposed use.

(c) The name, address, and professional qualifications of the proposed professional design team members,

including the designation of the person responsible for the preparation of the environmental impact statement.

(d) The description and purpose of the proposed use.

(e) Six copies and 1 reproducible transparency of a schematic use plan of the proposed use showing the general location of the proposed use and major existing physical and natural features on the site, including, but not limited to, watercourses, rock outcropping, wetlands, and wooded areas.

(f) The location of the existing utilities and drainageways.

(g) The location and notation of public streets, parks, and railroad and utility rights-of-way within or adjacent to the proposed use.

(h) The general location and dimensions of proposed streets, driveways, sidewalks, pedestrian ways, trails, off-street parking, and loading areas.

(i) The general location and approximate dimensions of proposed structures.

(j) Major proposed change of land forms such as new lakes, terracing, or excavating.

(k) Approximate existing and proposed contours and drainage patterns, showing at least 5-foot contour intervals.

(*l*) Sketches showing the scale, character, and relationship of structures, streets or driveways, and open space.

(m) Approximate location and type of proposed drainage, water and sewage treatment and disposal facilities.

(n) A legal description of the property.

(o) An aerial photo and contour map showing the development site in relation to the surrounding area.

(p) A description of the physical site, including its dominant characteristics, its vegetative character, its present use, and other relevant information.

(q) A soil review giving a short descriptive summary of the soil types found on the site and whether the soil permits the use of septic tanks or requires central sewer. The review may be based on the "unified soil classification system" as adopted by the United States government corps of engineers and bureau of reclamation, dated January 1952, or the national cooperative soil survey classification system, and the standards for the development prospects that have been offered for each portion of the site.

(r) A natural hazards review consisting of a list of natural hazards such as periodic flooding, poor soil bearing conditions, and any other hazards peculiar to the site.

(s) A substrata review including a descriptive summary of the various geologic bedrock formations underlying the site, including the identification of known aquifers, the approximate depths of the aquifers, and, if being tapped for use, the principal uses to be made of these waters, including irrigation, domestic water supply, and industrial usage.

(t) An erosion review showing how erosion control will be achieved and illustrating plans or programs that may be required by any existing soil erosion and sedimentation ordinance.

(u) At a minimum, a site plan for compliance with all of the following standards for the construction and postconstruction periods:

(*i*) Surface drainage designs and structures are erosion-proof through control of the direction, volume, and velocities of drainage patterns. These patterns shall promote natural vegetation growth that are included in the design so that drainage waters may be impeded in their flow and percolation encouraged.

(*ii*) The design shall include trash collection devices when handling street and parking drainage to contain solid waste and trash.

(*iii*) Watercourse designs, control volumes, and velocities of water to prevent bottom and bank erosion. In particular, changes of direction shall guard against undercutting of banks.

(*iv*) If vegetation has been removed or has not been able to establish on surface areas such as infill zones, it is the duty of the developer to stabilize and control the impacted surface areas to prevent wind erosion and the blowing of surface material through the planting of grasses, windbreaks, and other similar barriers.

324.35321 Review of site plan; duties of planning commission.

Sec. 35321. A zoning ordinance shall provide that, in reviewing a site plan required under section 35313(1)(d), the planning commission shall do both of the following:

(a) Determine whether the requirements of the zoning ordinance have been met and whether the plan is consistent with existing laws.

(b) Recommend alterations of a proposed development to minimize adverse effects anticipated if the

development is approved and to assure compliance with all applicable state and local requirements.

324.35323 Destruction of structure or use; exemption; replacement.

Sec. 35323. A structure or use located in a critical dune area that is destroyed by fire, other than arson for which the owner is found to be responsible, or an act of nature, except for erosion, is exempt from the operation of this part or a zoning ordinance under this part for the purpose of rebuilding or replacing the structure or use, if the structure or use was lawful at the time it was constructed or commenced. A replacement structure and its use may differ from that which was destroyed if it does not exceed in size or scope that which was destroyed.

PART 355
BIOLOGICAL DIVERSITY CONSERVATION

324.35501 Definitions.

Sec. 35501. As used in this part:

(a) "Biological diversity" means the full range of variety and variability within and among living organisms and the natural associations in which they occur. Biological diversity includes ecosystem diversity, species diversity, and genetic diversity.

(b) "Committee" means the joint legislative working committee on biological diversity created pursuant to

section 35504.

(c) "Conserve", "conserving", and "conservation" mean measures for maintaining natural biological diversity and measures for restoring natural biological diversity through management efforts, in order to protect, restore, and enhance as much of the variety of native species and communities as possible in quantities and distributions that provide for the continued existence and normal functioning of native species and communities, including the viability of populations throughout the natural geographic distributions of native species and communities.

(d) "Ecosystem" means an assemblage of species, together with the species' physical environment, considered as a unit.

(e) "Ecosystem diversity" means the distinctive assemblages of species and ecological processes that occur in different physical settings of the biosphere.

(f) "Genetic diversity" means the differences in genetic composition within and among populations of a given species.

(g) "Habitat" means the area or type of environment in which an organism or biological population normally lives or occurs.

(h) "Reporting department" means a state department or agency that is required by the committee under this part to file 1 or more reports.

(i) "Species diversity" means the richness and variety of native species.

(j) "State strategy" means the recommended state strategy prepared by the committee.

(k) "Sustained yield" means the achievement and maintenance in perpetuity of regular periodic output of the various renewable resources without impairment of the productivity of the land.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.35502 Legislative findings.

Sec. 35502. The legislature finds that:

(a) The earth's biological diversity is an important natural resource. Decreasing biological diversity is a concern.

(b) Most losses of biological diversity are unintended consequences of human activity.

(c) Humans depend on biological resources, including plants, animals, and microorganisms, for food, medicine, shelter, and other important products.

(d) Biological diversity is valuable as a source of intellectual and scientific knowledge, recreation, and aesthetic pleasure.

(e) Conserving biological diversity has economic implications.

(f) Reduced biological diversity may have potentially serious consequences for human welfare as resources for research and agricultural, medicinal, and industrial development are diminished.

(g) Reduced biological diversity may also potentially impact ecosystems and critical ecosystem processes that moderate climate, govern nutrient cycles and soil conservation and production, control pests and diseases, and degrade wastes and pollutants.

(h) Reduced biological diversity may diminish the raw materials available for scientific and technical advancement, including the development of improved varieties of cultivated plants and domesticated animals.

(i) Maintaining biological diversity through habitat protection and management is often less costly and more effective than efforts to save species once they become endangered.

(j) Because biological resources will be most important for future needs, study by the legislature regarding maintaining the diversity of living organisms in their natural habitats and the costs and benefits of doing so is prudent.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.35503 State goal.

Sec. 35503. (1) It is the goal of this state to encourage the lasting conservation of biological diversity.

(2) This part does not require a state department or agency to alter its regulatory functions.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.35504 Joint legislative working committee on biological diversity; creation; appointment of members; establishment, organization, and membership of scientific advisory boards; consultation with other qualified individuals; function; reports; meetings; compliance with open meetings act; writings available to public; public hearings; dissolution.

Sec. 35504. (1) The joint legislative working committee on biological diversity is created in the legislature. The committee shall consist of 4 members of the senate appointed by the senate majority leader, 2 members of the house of representatives appointed by the republican leader of the house of representatives, and 2 members of the house of representatives appointed by the democratic leader of the house of representatives. Members of the committee shall be appointed by the senate majority leader and the republican and democratic leaders of the house of representatives within 30 days of March 23, 1994. At least 1 of the committee members appointed from the senate shall be a member of the minority party of the senate, and at least 1 of the committee members appointed from each house shall be a member of a standing committee that primarily addresses legislation pertaining to environmental protection and natural resources, or wildlife and fisheries management, and agriculture. The committee may establish and organize 1 or more scientific advisory boards to provide the committee with specific expertise as the committee considers necessary or helpful. If 1 or more scientific advisory boards are established, each board shall include individuals with expertise pertaining to the area of resource management at issue. The representatives shall include at least 1 individual employed by a state department or agency; 1 or more individuals employed by a university or college who work in applied research; and 1 or more individuals who work in basic research. The committee may consult with other individuals who are qualified representatives of industry and environmental groups. In fulfilling its duties under this part, the committee may consult with individuals and groups who are knowledgeable about, or interested in, biological diversity and conservation or are knowledgeable about scientific and technological issues related to biological diversity and its impact on human habitat.

(2) The function of the committee shall be to prepare a recommended state strategy for conservation of biological diversity and to report on the costs, benefits, and other implications of the strategy. Upon the request of the committee, state departments and state agencies shall submit reports containing the information required under section 35505 to the committee to enable the committee to prepare the state strategy and fulfill its functions under this part. The state strategy shall in part be based on information provided to the committee in these reports required under this section.

(3) The committee shall meet as soon as possible upon formation and then shall meet at least quarterly. The committee shall at its initial meeting develop a timeline establishing when specific reports are due from each of the reporting departments from which the committee requests reports. However, all reports required under section 35505(1) shall be submitted to the committee by a reporting department by December 30, 1994. The committee shall provide assistance to the reporting department as the committee considers necessary or helpful in developing the state strategy.

(4) The committee shall hold regularly scheduled meetings, and the business of the committee shall be conducted at public meetings held in compliance with the open meetings act, Act No. 267 of the Public Acts of 1976, being sections 15.261 to 15.275 of the Michigan Compiled Laws. Public notice of the time, date, and place of meeting shall be given in the manner required by Act No. 267 of the Public Acts of 1976.

(5) A writing prepared, owned, used, in the possession of, or retained by the committee shall be made available to the public in compliance with the freedom of information act, Act No. 442 of the Public Acts of 1976, being sections 15.231 to 15.246 of the Michigan Compiled Laws.

(6) The committee shall hold public hearings to solicit input from individuals and entities regarding biological diversity.

(7) The committee shall be dissolved on December 30, 1995.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.35505 Reports; contents; additional information.

Sec. 35505. (1) The committee may require clear and concise reports containing the information listed under subsection (2) and, if applicable, subsection (3) from state departments and state agencies, including, but not limited to, the following:

(a) Department of natural resources.

(b) State transportation department.

(c) Department of commerce.

(d) Department of agriculture.

(e) Department of public health.

(f) Department of military affairs.

(2) Each reporting department shall prepare for the committee a report that contains an overview of all of the following:

(a) A report pertaining to those activities of the reporting departments that alter biological diversity, noting which ecosystems and species are impacted and the existence of and effectiveness of mitigation measures.

(b) Any other information determined by the committee to be necessary or helpful in preparing the state strategy.

(c) The costs and benefits of preserving biological diversity and mitigation measures.

(3) In addition to the information required under subsection (2), the department of natural resources and the department of agriculture shall include in their report, to the extent practical, examples of techniques that are used to improve the protection and maintenance of this state's biological diversity, and the long-term viability of ecosystems and ecosystem processes, including all of the following:

(a) Enhancement of scientific knowledge through improved and more complete biological surveys, and research designed to identify factors limiting population viability or persistence.

(b) Identification of habitats and species of special concern and methods to protect them.

(c) Improvement of management techniques based on scientific knowledge of the conservation of biological diversity.

(d) Effective restoration methods for ecosystems or species of concern.

(e) Broad-based education efforts regarding the importance of biological diversity and the need for conservation.

(f) Use of areas demonstrating management techniques that conserve or restore native biological diversity.

(g) Use of cooperative programs among government agencies, public and private ventures, and the public sector.

(h) Promotion of sustained yield of natural resources for human benefit.

(i) Any other technique to improve the protection and maintenance of this state's biological diversity, and the long-term viability of ecosystems and ecosystem processes whether or not the technique is in current use if supported by scientific knowledge.

(j) The costs and benefits associated with activities described in subdivisions (a) to (i).

Popular name: Act 451

Popular name: NREPA

324.35506 Development of state strategy; factors; progress report to legislature; circulation of draft report; public hearing; report to legislature.

Sec. 35506. (1) Based on information received from the reporting departments and other sources identified in section 35504(1), the committee shall develop a state strategy that includes, but is not limited to, consideration of all of the following:

(a) Reduction of cumulative adverse impacts of all state departments and agencies on biological diversity.

(b) Responsibility of each reporting department to conserve biological diversity and determine the costs of such actions.

(c) Methods of cooperation among reporting departments, other states, and provinces concerning ecosystems management.

(d) Establishment of cooperative programs among governmental agencies, public and private ventures, universities and colleges, and the private sector.

(e) Identification of habitats and species of special concern and methods to protect them.

(f) Prevention of extinction of species.

(g) Provisions for the long-term viability of ecosystems and ecosystem processes.

(h) Development of areas demonstrating management techniques that conserve or restore native biological diversity.

(i) Development of broad-based educational efforts regarding the importance of biological diversity and the need for conservation.

(j) Development of criteria for evaluating the progress of this state in implementing the strategy.

(k) The effects on human beings or the environment, taking into account the economic, social, and environmental costs and benefits of the conservation of biological diversity.

(*l*) The effects of conserving biological diversity on agriculture and forestry.

(2) By December 30, 1994, the committee shall submit to the legislature a report detailing progress made toward development of the strategy.

(3) By June 30, 1995, the committee shall circulate a draft of the report described in subsection (4) and conduct a public hearing regarding the content of the draft report.

(4) By December 30, 1995, the committee shall approve and submit to the legislature a report containing all of the following:

(a) The recommended state strategy.

(b) Summaries of all written comments and reporting department reports received by the committee pertaining to the work of the committee.

(c) An evaluation of reports submitted by reporting departments.

(d) An evaluation of the cumulative impacts of the reporting departments on the biological diversity of this state.

(e) Recommendations pertaining to legislative options.

(f) Recommendations regarding whether the definitions in this part should be revised.

(g) Recommendations regarding whether there is a need to establish a biological diversity education center to set research priorities and provide leadership and coordination pertaining to fulfilling the policy of this state to maintain biological diversity.

(h) Recommendations concerning research priorities and personnel training to facilitate the implementation of the state strategy.

PART 357
NATURAL BEAUTY ROADS

324.35701 Definitions.

Sec. 35701. As used in this part:

(a) "Board" means board of county road commissioners.

(b) "City street" means city major street or city local street as described in section 9 of Act No. 51 of the Public Acts of 1951, being section 247.659 of the Michigan Compiled Laws.

(c) "County local road" means county local road as described in section 4 of Act No. 51 of the Public Acts of 1951, being section 247.654 of the Michigan Compiled Laws.

(d) "Native vegetation" means original or indigenous plants of this state including trees, shrubs, vines, wild flowers, aquatic plants, or ground cover.

(e) "Natural" means in a state provided by nature, without human-made changes, wild, or uncultivated.

(f) "Street" means city street or village street.

(g) "Village street" means village major street or village local street as described in section 9 of Act No. 51 of the Public Acts of 1951.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: Natural Beauty Roads

Popular name: NREPA

324.35702 Petition for designation; hearing; notice; resolution.

Sec. 35702. (1) Twenty-five or more freeholders of a township may apply by petition to the board for the county in which that township is located for designation of a county local road or portion of a county local road as a natural beauty road. Twenty-five or more freeholders of a city may petition the legislative body of the city for designation of a city street or a portion of a city street as a natural beauty street. Twenty-five or more freeholders of a village may petition the legislative body of the village for designation of a village street or a portion of a village street as a natural beauty street.

(2) Within 6 months after a petition is received, the board or the legislative body of the city or village shall hold a public hearing to consider designating the road or street described in the petition as a natural beauty road or natural beauty street, respectively. The hearing shall be held at a suitable place within the township in which the proposed natural beauty road is located or the city or village in which the proposed natural beauty street is located. At the hearing, a party or interested person may support or object to the proposed designation. The board, the legislative body of the city, or the legislative body of the village shall give notice of the hearing by publication at least once each week for 2 successive weeks in a newspaper of general circulation in the county, city, or village, respectively, and by posting 5 notices within the limits of the portion of the road or street to be designated, in public and conspicuous places. The posting shall be done and at least

1 publication in the newspaper shall be made not less than 10 days before the hearing.

(3) Within 30 days after the hearing, if the board, the legislative body of the city, or the legislative body of the village considers the designation desirable, it shall file with the county clerk, city clerk, or village clerk, respectively, a true copy of its resolution designating the portion of the county local road as a natural beauty road, the portion of the city street as a natural beauty street, or the portion of the village street as a natural beauty street, respectively.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Natural Beauty Roads

Popular name: NREPA

324.35703 Designation; petition requesting withdrawal; revocation of designation; determination; publication of notice; reversion to former status.

Sec. 35703. (1) Not more than 45 days after a board designates a road as a natural beauty road or the legislative body of a city or village designates a street as a natural beauty street, the property owners of record of 51% or more of the lineal footage along the natural beauty road or natural beauty street may submit a petition to the board or the legislative body of the city or village, respectively, requesting that the designation be withdrawn. If the petition is valid, the designation as a natural beauty road or natural beauty street shall be withdrawn.

(2) A board or the legislative body of a city or village may revoke a designation of a natural beauty road or natural beauty street after holding a public hearing in accordance with the procedure described in section 35702(2). Not more than 30 days after a hearing, if the board, the legislative body of the city, or the legislative body of the village by majority vote determines that the revocation is necessary, it shall file with the county clerk, city clerk, or village clerk, respectively, a notice of its determination and publish the notice in a newspaper of general circulation in the county, city, or village, respectively, once each week for 2 successive weeks. After publication of the notice, the road or street previously designated shall revert to its former status.

324.35704 Guidelines and procedures for native vegetation preservation; rights of public utilities or governmental agencies or municipalities.

Sec. 35704. (1) The department shall develop uniform guidelines and procedures that may be adopted by a board to preserve native vegetation in a natural beauty road right-of-way from destruction or substantial damage by cutting, spraying, dusting, mowing, or other means. The department shall develop uniform guidelines that may be adopted by the legislative body of a city or village to preserve native vegetation in a natural beauty street right-of-way from destruction or substantial damage by cutting, spraying, dusting, mowing, or other means. Guidelines and procedures developed pursuant to this subsection shall not prohibit the application of accepted principles of sound forest management in a natural beauty road or natural beauty street right-of-way or prevent a local road authority from regulating speed and from taking actions to modify specific road features to correct traffic hazards that pose a direct and ongoing threat to motorists.

(2) The department may advise and consult with a board or a city or village legislative body on the application of the guidelines and procedures.

(3) A board or a city or village legislative body shall provide for a public hearing before an act that would result in substantial damage to native vegetation in the right-of-way of a natural beauty road or natural beauty street, respectively, is permitted.

(4) Subject to subsections (5), (6), and (7), prior to approval of any construction project or tree cutting that would significantly impact native vegetation within the right-of-way of a natural beauty road, the board shall notify the clerk of the city, village, or township within which the road lies of the proposed activity. If the city, village, or township desires to hold a public hearing on the proposed activity, the clerk of the city, village, or township shall notify the board within 7 days of the transmittal of notice by the board. The notice to the board shall include the date, time, and place of the township, city, or village hearing. The hearing shall take place within 14 days of the transmittal of notice to the board. A member of the board or a representative of the board shall attend the hearing. The city, village, or township clerk shall provide the board with a written report of testimony taken at the hearing within 10 days of the hearing. The board shall not approve the

construction project or tree cutting until 12 days after notice of the proposed activity has been sent to the city, village, or township clerk, or if notification of a hearing is timely received by the board, until 12 days after the public hearing is held. The board shall consider, in approval or denial of the proposed activity, any report of testimony taken at the public hearing received from the city, village, or township.

(5) The notification and hearing provided for in subsection (4) are not required if the construction or tree cutting is necessitated by emergency conditions.

(6) This part does not affect the right of a public utility to control vegetation in connection with the maintenance, repair, or replacement of public utility facilities constructed in a road or street before its designation as a natural beauty road or natural beauty street, or in connection with the construction, maintenance, repair, or replacement of public utility facilities crossing a natural beauty road or natural beauty street.

(7) This part does not affect or restrict the maintenance activities of a governmental agency or municipality having jurisdiction over a beauty road.

324.35705 Citizen's advisory committee; establishment; purpose.

Sec. 35705. The department may establish a citizen's advisory committee to assist in the formulation of proposals for guidelines and procedures.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Compiler's note: For transfer of citizens advisory committee for natural beauty roads to department of natural resources by type III transfer, see. E.R.O. No. 2009-12, compiled at MCL 324.99916.

Popular name: Act 451

Popular name: Natural Beauty Roads

Popular name: NREPA

324.35706 Violation of guideline or procedure; complaint; civil action; default in payment of civil fine or costs.

Sec. 35706. (1) If there is a violation of a guideline or procedure adopted by a board, the legislative body of a city, or the legislative body of a village pursuant to section 35704, a complaint, signed by 5 or more freeholders of the township, city, or village, respectively, or by freeholders representing 10% or more of the lineal frontage along a natural beauty road or natural beauty street, may be filed with the county prosecutor, city attorney, or village attorney, respectively, or with the attorney general. The county prosecutor, the city attorney, the village attorney, or the attorney general, on behalf of the board, the legislative body of the city, the legislative body of the village, or the department, may commence a civil action seeking either of the following:

(a) A temporary or permanent injunction to enjoin the violation of the guideline or procedure.

(b) A civil fine of not more than $400.00 for the violation of the guideline or procedure.

(2) A default in the payment of a civil fine or costs ordered under this part or an installment of the fine or costs may be remedied by any means authorized under the revised judicature act of 1961, Act No. 236 of the Public Acts of 1961, being sections 600.101 to 600.9947 of the Michigan Compiled Laws.

PART 358
ADOPT-A-SHORELINE PROGRAM

324.35801 Adopt-a-shoreline program; "department" defined; administration; purpose; rules; agreements with volunteer groups to implement program.

Sec. 35801. (1) As used in this part, "department" means the department of natural resources.

(2) The department shall administer an adopt-a-shoreline program to remove litter from shorelines within state parks and state recreation areas. The program shall include public informational activities, but shall be directed primarily toward encouraging and facilitating the involvement of volunteer groups in litter cleanup

work and assisting volunteer groups in selecting specific shoreline or shoreline segments for cleanup activities.

(3) The department may promulgate rules as necessary to implement the adopt-a-shoreline program.

(4) The department may enter into agreements with volunteer groups to implement the adopt-a-shoreline program. Agreements with volunteer groups shall include, but are not limited to, all of the following:

(a) Identification of the designated shoreline or shoreline segment. The volunteer group may request a specific segment of the shoreline it wishes to adopt, subject to the approval of the state park or recreation area manager or supervisor. The department shall assist volunteer groups to select sections of a shoreline and to identify any necessary permits and other authorizations, in cooperation with affected federal, state, and local management agencies, nonprofit organizations, and private landowners.

(b) Specification of the duties of the volunteer group, which shall include both of the following:

(*i*) Removal of litter along the designated shoreline or shoreline segment at least once each year.

(*ii*) Compliance with any rules related to the program that are adopted by the department.

History: Add. 1996, Act 89, Imd. Eff. Feb. 27, 1996;—Am. 2018, Act 79, Eff. June 17, 2018.

Compiler's note: In separate opinions, the Michigan Supreme Court held that Section 45(8), (9), (10), and (12) and the second sentence of Section 46(1) ("An agency shall not file a rule ... until at least 10 days after the date of the certificate of approval by the committee or after the legislature adopts a concurrent resolution approving the rule.") of the Administrative Procedures Act of 1969, in providing for the Legislature's reservation of authority to approve or disapprove rules proposed by executive branch agencies, did not comply with the enactment and presentment requirements of Const 1963, Art 4, and violated the separation of powers provision of Const 1963, Art 3, and, therefore, were unconstitutional. These specified portions were declared to be severable with the remaining portions remaining effective. Blank v Department of Corrections, 462 Mich 103 (2000).

Popular name: Act 451

Popular name: NREPA

324.35802 Adopt-a-shoreline program; duties of department.

Sec. 35802. In implementing this part and the adopt-a-shoreline program, the department shall do all of the following:

(a) Create a recognition program that acknowledges the efforts of volunteer groups and the members of the groups that participate in the adopt-a-shoreline program.

(b) Provide safety information and assistance to the participating volunteer groups.

(c) Provide volunteer groups with natural resource information and educational materials.

History: Add. 1996, Act 89, Imd. Eff. Feb. 27, 1996.

Popular name: Act 451

Popular name: NREPA

324.35803 Cleanup effort conducted on state land; part or agreement construed.

Sec. 35803. This part or an agreement under this part shall not be construed to prohibit a cleanup effort from being conducted on any state land.

History: Add. 1996, Act 89, Imd. Eff. Feb. 27, 1996;—Am. 2018, Act 79, Eff. June 17, 2018.

Popular name: Act 451

PART 359
ADOPT-A-RIVER PROGRAM

324.35901 Adopt-a-river program; "department" defined; administration; purpose; rules; agreements with volunteer groups to implement program.

Sec. 35901. (1) As used in this part, "department" means the department of natural resources.

(2) The department shall administer an adopt-a-river program to remove litter from rivers and riverbanks within state parks and state recreation areas. The program shall include public informational activities, but shall be directed primarily toward encouraging and facilitating the involvement of volunteer groups in litter cleanup work and assisting volunteer groups in selecting specific river or stream segments for cleanup activities.

(3) The department may promulgate rules as necessary to implement the adopt-a-river program.

(4) The department may enter into agreements with volunteer groups to implement the adopt-a-river program. Agreements with volunteer groups shall include, but are not limited to, all of the following:

(a) Identification of the designated river or stream segment. The volunteer group may request a specific segment of the river or stream it wishes to adopt, subject to the approval of the state park or recreation area manager or supervisor. The department shall assist volunteer groups to select sections of a river or stream and to identify any necessary permits or other authorizations, in cooperation with affected federal, state, and local management agencies, nonprofit organizations, and private landowners.

(b) Specification of the duties of the volunteer group, which shall include both of the following:

(*i*) Removal of litter along the designated river or stream segment at least once each year.

(*ii*) Compliance with any rules related to the program that are adopted by the department.

History: Add. 1996, Act 88, Imd. Eff. Feb. 27, 1996;—Am. 2018, Act 78, Eff. June 17, 2018.

Compiler's note: In separate opinions, the Michigan Supreme Court held that Section 45(8), (9), (10), and (12) and the second sentence of Section 46(1) ("An agency shall not file a rule ... until at least 10 days after the date of the certificate of approval by the committee or after the legislature adopts a concurrent resolution approving the rule.") of the Administrative Procedures Act of 1969, in providing for the Legislature's reservation of authority to approve or disapprove rules proposed by executive branch agencies, did not comply with the enactment and presentment requirements of Const 1963, Art 4, and violated the separation of powers provision of Const 1963, Art 3, and, therefore, were unconstitutional. These specified portions were declared to be severable with the remaining portions remaining effective. Blank v Department of Corrections, 462 Mich 103 (2000).

PART 361
FARMLAND AND OPEN SPACE PRESERVATION

324.36101 Definitions.

Sec. 36101. As used in this part:

(a) "Agricultural conservation easement" means a conveyance, by a written instrument, in which, subject to permitted uses, the owner relinquishes to the public in perpetuity his or her development rights and makes a covenant running with the land not to undertake development.

(b) "Agricultural use" means the production of plants and animals useful to humans, including forages and sod crops; grains, feed crops, and field crops; dairy and dairy products; poultry and poultry products; livestock, including breeding and grazing of cattle, swine, captive cervidae, and similar animals; berries; herbs; flowers; seeds; grasses; nursery stock; fruits; vegetables; maple syrup production; Christmas trees; and other similar uses and activities. Agricultural use includes use in a federal acreage set-aside program or a federal conservation reserve program. Agricultural use does not include the management and harvesting of a woodlot.

(c) "Conservation district board" means that term as defined in section 9301.

(d) "Development" means an activity that materially alters or affects the existing conditions or use of any land.

(e) "Development rights" means an interest in land that includes the right to construct a building or structure, to improve land for development, to divide a parcel for development, or to extract minerals incidental to a permitted use or as set forth in an instrument recorded under this part.

(f) "Development rights agreement" or "agreement" means a restrictive covenant, evidenced by an instrument in which the owner and this state, for a term of years, agree to jointly hold the right to undertake development of the land, and that contains a covenant running with the land, for a term of years, not to undertake development, subject to permitted uses.

(g) "Development rights easement" or "easement" means a grant, by an instrument, in which the owner relinquishes to the public in perpetuity or for a term of years the right to undertake development of the land, and that contains a covenant running with the land, not to undertake development, subject to permitted uses.

(h) "Farmland" means 1 or more of the following:

(*i*) A farm of 40 or more acres in 1 ownership, with 51% or more of the land area devoted to an agricultural use.

(*ii*) A farm of 5 acres or more but less than 40 acres, in 1 ownership, with 51% or more of the land area devoted to an agricultural use, and that has produced a gross annual income from agriculture of $200.00 per year or more per acre of cleared and tillable land. A farm described in this subparagraph enrolled in a federal acreage set-aside program or a federal conservation reserve program is considered to have produced a gross annual income from agriculture of $200.00 per year or more per acre of cleared and tillable land.

(*iii*) A farm designated by the department of agriculture and rural development as a specialty farm in 1 ownership that has produced a gross annual income from an agricultural use of $2,000.00 or more. Specialty farm includes, but is not limited to, the following:

(A) A greenhouse.

(B) A farm used for equine breeding and grazing; the breeding and grazing of cervidae, pheasants, and other game animals; bees and bee products; mushrooms; aquaculture; or other similar uses and activities.

(*iv*) Parcels of land in 1 ownership that are not contiguous but that constitute an integral part of a farming operation being conducted on land otherwise qualifying as farmland.

(i) "Fund" means the agricultural preservation fund created in section 36202.

(j) "Local governing body" means 1 of the following:

(*i*) With respect to farmland or open space land that is located in a city or village, the legislative body of the city or village.

(*ii*) With respect to farmland or open space land that is not located in a city or village but that is located in a township having a zoning ordinance in effect as provided by law, the township board of the township.

(*iii*) With respect to farmland or open space land that is not described in subparagraph (*i*) or (*ii*), the county board of commissioners.

(k) "Open space land" means 1 of the following:

(*i*) Land that is 1 or more of the following:

(A) An undeveloped site included in a national registry of historic places or designated as a historic site pursuant to state or federal law.

(B) Riverfront property subject to designation under part 305, to the extent that full legal descriptions may be declared open space under the meaning of this part, if the undeveloped parcel or government lot parcel or portions of the undeveloped parcel or government lot parcel as assessed and owned are affected by part 305 and lie within 1/4 mile of the river.

(C) Undeveloped land designated as an environmental area under part 323, including unregulated portions of that land.

(*ii*) Any other area that is approved by the local governing body and is 1 of the following:

(A) An area the preservation of which in its present condition would conserve natural or scenic resources, such as soils, wetlands, and beaches; enhance recreation opportunities; or preserve a historic site.

(B) Idle potential farmland of not less than 40 acres that is substantially undeveloped and because of its soil, terrain, and location is capable of being devoted to agricultural uses as identified by the department of agriculture and rural development.

(*l*) "Owner" means a person having a freehold estate in land coupled with possession and enjoyment. If land is subject to a land contract, owner means the vendee in agreement with the vendor. This subdivision does not apply to section 36104e.

(m) "Permitted use" means any use expressly authorized within a development rights agreement, development rights easement, or agriculture conservation easement that is consistent with the farming

operation or that does not alter the open space character of the land, as applicable. The state land use agency shall determine whether a use, other than a use under section 36104c or 36104e, is a permitted use pursuant to section 36104a.

(n) "Person" includes an individual, corporation, limited liability company, business trust, estate, trust, partnership, or association, or 2 or more persons having a joint or common interest in land.

(o) "Planning commission" means a planning commission created under the Michigan planning enabling act, 2008 PA 33, MCL 125.3801 to 125.3885.

(p) "Prohibited use" means a use that is not consistent with an agricultural use for farmland subject to a development rights agreement or is not consistent with the open space character of the land for lands subject to a development rights easement.

(q) "Property taxes" means general ad valorem taxes levied after January 1, 1974, on lands and structures in this state, including collection fees, but not including special assessments, penalties, or interest.

(r) "Regional planning commission" means a regional planning commission created pursuant to 1945 PA 281, MCL 125.11 to 125.25.

(s) "Regional planning district" means a planning and development region as established by Executive Directive No. 1968-1, as amended, whose organizational structure is approved by the regional council.

(t) "State income tax act" means the income tax act of 1967, 1967 PA 281, MCL 206.1 to 206.847, and in effect during the particular year of the reference to the act.

(u) "State land use agency" means the department of agriculture and rural development.

(v) "Substantially undeveloped" means any parcel or area of land essentially unimproved except for a dwelling, building, structure, road, or other improvement that is incidental to agricultural and open space uses.

(w) "Unique or critical land area" means agricultural or open space land identified by the land use agency as an area that should be preserved.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 1996, Act 233, Imd. Eff. June 5, 1996;—Am. 2000, Act 262, Imd. Eff. June 29, 2000;—Am. 2008, Act 336, Imd. Eff. Dec. 23, 2008;—Am. 2016, Act 265, Eff. Sept. 26, 2016;—Am. 2023, Act 230, Eff. Feb. 13, 2024.

Popular name: NREPA

324.36102 Development rights agreement or easement; execution authorized; provisions.

Sec. 36102. (1) The state land use agency may execute a development rights agreement or easement on behalf of the state.

(2) The provisions of a development rights agreement or easement shall be consistent with the purposes of this part and shall not permit an action which will materially impair the character of the land involved.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: Farmland and Open Space

Popular name: NREPA

324.36103 Development rights agreement or easement; effect of execution and acceptance; term; limitation; disposition; prior lien, lease, or interest not superseded; lien of state or local governing body; subordination.

Sec. 36103. (1) The execution and acceptance of a development rights agreement or easement by the state or local governing body and the owner dedicates to the public the development rights in the land for the term specified in the instrument. A development rights agreement or easement shall be for an initial term of not less than 10 years. A development rights agreement or easement entered into after June 5, 1996 shall not be for a term of more than 90 years.

(2) The state or local governing body shall not sell, transfer, convey, relinquish, vacate, or otherwise dispose of a development rights agreement or easement except with the agreement of the owner as provided in sections 36111, 36111a, 36112, and 36113.

(3) An agreement or easement does not supersede any prior lien, lease, or interest that is properly recorded with the county register of deeds.

(4) A lien created under this part in favor of the state or a local governing body is subordinate to a lien of a mortgage that is recorded in the office of the register of deeds before the recording of the lien of the state or local governing body.

(5) The state shall subordinate its interest in a recorded agreement under section 36104 or an easement

under section 36105 or 36106 to a subsequently recorded mortgage lien, lease, or interest if both of the following conditions are met:

(a) The parcel meets the requirements set forth under section 36111(2)(a) for parcels containing existing structures.

(b) The landowner requesting the subordination is an individual essential to the operation of the farm as defined in section 36110(5).

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 1996, Act 233, Imd. Eff. June 5, 1996;—Am. 2003, Act 36, Imd. Eff. July 3, 2003.

Popular name: Act 451

Popular name: Farmland and Open Space

Popular name: NREPA

324.36104 Application for farmland development rights agreement; form; contents; notice; review, comment, and recommendations; approval or rejection; appeal; preparation, contents, execution, and recordation of agreement; annual listing of current agreements; application effective for current tax year; reapplication; tax exemption.

Sec. 36104. (1) An owner of land desiring a farmland development rights agreement may apply by filing an application with the local governing body having jurisdiction under this part. The owner shall apply on a form prescribed by the state land use agency. The application shall contain information reasonably necessary to properly classify the land as farmland. This information shall include a land survey or a legal description of the land and a map showing the significant natural features and all structures and physical improvements located on the land.

(2) Upon receipt of the application, the local governing body shall notify the county planning commission or the regional planning commission and the soil conservation district agency. If the county has jurisdiction, it shall also notify the township board of the township in which the land is situated.

(3) An agency or local governing body receiving notice has 30 days to review, comment, and make recommendations to the local governing body with which the application is filed. These reviewing agencies do not have an approval or rejection power over the application.

(4) After considering the comments and recommendations of the reviewing agencies and local governing bodies, the local governing body holding the application shall approve or reject the application within 45 days after the application is received, unless that period is extended by agreement of the parties involved. The local governing body's approval or rejection of the application shall be based upon, and consistent with, rules promulgated under section 36116.

(5) If an application for a farmland development rights agreement is approved by the local governing body having jurisdiction, the local governing body shall forward a copy, along with the comments and recommendations of the reviewing bodies, to the state land use agency. The application shall contain a statement from the assessing officer where the property is located specifying the current fair market value of the land and structures in compliance with the agricultural section of the Michigan state tax commission assessor manual. If action is not taken by the local governing body within the time prescribed or agreed upon, the applicant may proceed as provided in subsection (6) as if the application was rejected.

(6) If the application for a farmland development rights agreement is rejected by the local governing body, the local governing body shall return the application to the applicant with a written statement regarding the reasons for rejection. Within 30 days after receipt of the rejected application, the applicant may appeal the rejection by submitting the application to the state land use agency.

(7) The state land use agency, within 60 days after a farmland development rights agreement application is received under subsection (5) or (6), shall approve or reject the application. The state land use agency may reject an application for a farmland development rights agreement that has been approved by a local governing body only if the proposed agreement would be inconsistent with section 36101(f). If the application is approved by the state land use agency, the state land use agency shall prepare a farmland development rights agreement that includes all of the following provisions:

(a) A structure shall not be built on the land except for use consistent with farm operations, which includes a residence for an individual essential to the operation of the farm under section 36111(2)(b), or lines for utility transmission or distribution purposes or with the approval of the local governing body and the state land use agency.

(b) Land improvements shall not be made except for use consistent with farm operations or with the approval of the local governing body and the state land use agency.

(c) Any interest in the land shall not be sold except a scenic, access, or utility easement that does not

substantially hinder farm operations.

(d) Public access is not permitted on the land unless agreed to by the owner.

(e) Any other condition and restriction on the land as agreed to by the parties that is considered necessary to preserve the land or appropriate portions of it as farmland.

(8) Upon approval of an application by the state, the state land use agency shall execute the farmland development rights agreement on behalf of the state and shall forward the agreement to the applicant for execution. After the applicant executes the farmland development rights agreement, the applicant shall have the executed farmland development rights agreement recorded by the register of deeds in the county in which the property is located. The applicant shall provide a copy of the recorded farmland development rights agreement to the state land use agency.

(9) The state land use agency shall annually provide a listing of current farmland development rights agreements to county equalization offices where the land is located and to the approving local governing body.

(10) An application that is approved by the local governing body by November 1 shall take effect for the current tax year.

(11) If an application for a farmland development rights agreement is rejected by the state land use agency, the state land use agency shall notify the affected local governing body, all reviewing agencies concerned, and the applicant with a written statement containing the reasons for rejection. An applicant receiving a rejection from the state land use agency may appeal the rejection pursuant to the administrative procedures act of 1969, 1969 PA 306, MCL 24.201 to 24.328.

(12) An applicant may reapply for a farmland development rights agreement following a 1-year waiting period.

(13) The value of the jointly owned development rights as expressed in a farmland development rights agreement is not exempt from ad valorem taxation and shall be assessed to the owner of the land as part of the value of that land.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 1996, Act 233, Imd. Eff. June 5, 1996;—Am. 2016, Act 265, Eff. Sept. 26, 2016.

324.36104a Permitted use; criteria; exception.

Sec. 36104a. (1) In determining whether a use is a permitted use, the state land use agency shall consider the following criteria:

(a) Whether the use adversely affects the productivity of farmland or adversely affects the character of open space land.

(b) Whether the use materially alters or negatively affects the existing conditions or use of the land.

(c) Whether the use substantially alters the agricultural use of farmland subject to a development rights agreement or substantially alters the natural character of open space land subject to an open space easement.

(d) Whether the use results in a material alteration of an existing structure to a nonagricultural use.

(e) Whether the use conforms with all applicable federal, state, and local laws and ordinances.

(2) Subsection (1) does not apply to a use authorized under section 36104c or 36104e.

History: Add. 1996, Act 233, Imd. Eff. June 5, 1996;—Am. 2023, Act 230, Eff. Feb. 13, 2024.

324.36104e Solar facility; permitted use; development rights agreement; tax credit;

definitions.

Sec. 36104e. (1) As used in this section:

(a) "Amended development rights agreement" means a development rights agreement that includes the conditions required to allow a solar facility to be installed and operated on all or a portion of the land subject to the agreement.

(b) "Deferment period" means the period of time beginning when construction of the solar facility commences and ending when the solar facility is completely removed.

(c) "Electric provider" means either of the following:

(*i*) An electric provider as defined in section 5 of the clean and renewable energy and energy waste reduction act, 2008 PA 295, MCL 460.1005.

(*ii*) A merchant plant as defined in section 10g of 1939 PA 3, MCL 460.10g.

(d) "Landowner" means a person that meets both of the following requirements:

(*i*) Has a freehold estate in land coupled with possession and enjoyment or, if land is subject to a land contract, is the vendee.

(*ii*) Has signed a development rights agreement with the state land use agency, and, if the land is subject to a land contract, the vendor.

(e) "NRCS" means the United States Department of Agricultural Natural Resource Conservation Service.

(f) "Solar agreement" means an agreement entered into by the landowner and the solar facility owner or operator to authorize the installation and operation of a solar facility on all or a portion of the land and that contains all conditions specifically identified in this section as the responsibility of the solar facility owner or operator.

(g) "Solar facility" means a facility, owned by an electric provider, for the generation of electricity using solar photovoltaic cells.

(h) "Solar facility site" means the land subject to a solar agreement.

(2) A solar facility is a permitted use under a development rights agreement if all of the following conditions are met:

(a) Before the solar facility became a permitted use, the land was subject to a development rights agreement.

(b) The land subject to the development rights agreement was divided under section 36110(4), if only a portion of the land was to be subject to a solar agreement.

(c) After any split required by subdivision (b), the landowner and state land use agency amend the resulting development rights agreement applicable to the solar facility site.

(d) The amended development rights agreement applicable to the proposed solar facility site extends the existing development rights agreement beyond the original termination date for an amount of time equal to the length of the deferment period. However, the deferment period shall not exceed 90 years minus the remaining term of the development rights agreement. A landowner may enter into a subsequent amended development rights agreement to provide for an additional deferment period.

(e) At least 60 days have elapsed since the development rights agreement was recorded.

(f) The solar facility site is designed, planted, and maintained with groundcover that achieves a score of at least 76 on the Michigan Pollinator Habitat Planning Scorecard for Solar Sites developed by the Michigan State University Department of Entomology or is designed, planted, and maintained in compliance with NRCS Cover Standard 327.

(g) A bond or irrevocable letter of credit payable to this state is maintained during the deferment period as financial assurance for the decommissioning of the solar facility and the return of the land to agricultural use. The amount of the financial surety shall be calculated by a licensed professional engineer. Every 3 years, or as the department considers necessary, the amount of the bond or irrevocable letter of credit shall be adjusted as necessary to ensure that the financial assurance is sufficient for the purposes of this subdivision.

(h) The solar facility site is designed, established, and maintained in a manner that ensures the land can be returned to agricultural use at the end of the deferment period.

(i) The land is returned to normal agricultural operations and use by the first growing season following the end of the deferment period.

(3) Under the solar agreement, the electric provider may assume responsibility for compliance with subsection (2)(f), (g), or (h). Under the solar agreement, the electric provider shall assume responsibility for maintenance of any agricultural drain, as defined in section 30103 or 30305, that is privately owned and necessary for exemption from regulation under part 301 or 303, respectively.

(4) When the deferment period ends, the solar facility is no longer a permitted use.

(5) The landowner shall not claim a tax credit under section 36109 during the deferment period. If a

landowner relinquishes the development rights agreement under sections 36111 and 36111a at any time during the deferment period, the past 7 years of tax credits are payable. The past 7 years of tax credits are calculated from the time the amended development rights agreement is recorded and shall be held until the land is returned to agricultural production at the end of the deferment period.

Popular name: Act 451

Popular name: Farmland and Open Space

Popular name: NREPA

324.36105 Open space land; application for open space development rights easement; approval or rejection; provisions; tax exemption.

Sec. 36105. (1) If an owner of open space land desires an open space development rights easement, and the land is subject to section 36101(j)(*i*), the procedures for filing an application provided by the state land use agency shall follow as provided in section 36104, except section 36104(7) and (12) do not apply to an open space development rights easement.

(2) The state land use agency, within 60 days after the open space development rights easement application is received, shall approve or reject the application. If the application is approved by the state land use agency, the state land use agency shall prepare an open space development rights easement that includes the following provisions:

(a) A structure shall not be built on the land without the approval of the state land use agency.

(b) Improvement to the land shall not be made without the approval of the state land use agency.

(c) An interest in the land shall not be sold, except for a scenic, access, or utility easement that does not substantially hinder the character of the open space land.

(d) Access to the open space land may be provided if access is agreed to by the owner and if access will not jeopardize the conditions of the land.

(e) Any other condition or restriction on the land as agreed to by the parties that is considered necessary to preserve the land or appropriate portions of it as open space land.

(3) Upon receipt of the application, the state land use agency shall notify the state tax commission. Upon notification, the state tax commission shall within 60 days make an on-site appraisal of the land in compliance with the Michigan state tax commission assessors manual. The application shall contain a statement specifying the current fair market value of the land and the current fair market value of the development rights. The state land use agency shall submit to the legislature each application for an open space development rights easement and an analysis of its cost to the state. The application shall be approved in both houses by a resolution concurred in by a majority of the members elected and serving in each house. The amount of the cost shall be returned to the local governing body if lost revenues are indicated. A copy of the approved application and the open space development rights easement shall be forwarded by the state land use agency to the applicant for execution and to the local assessing office where the land is situated.

(4) If an application for an open space development rights easement is rejected under subsection (2), the applicant may reapply for an open space development rights easement beginning 1 year after the rejection.

(5) The development rights held by the state as expressed in an open space development rights easement under this section are exempt from ad valorem taxation.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 1996, Act 233, Imd. Eff. June 5, 1996;—Am. 2002, Act 75, Imd. Eff. Mar. 15, 2002.

Compiler's note: In subsection (1), the reference to "section 36101(j)(i)" evidently should be to "section 36101(k)(i)" as the result of Act 265 of 2016.

Popular name: Act 451

Popular name: Farmland and Open Space

Popular name: NREPA

324.36106 Open space land; application for open space development rights easement; form; contents; notice; review, comments, and recommendations; approval or rejection; preparation and contents of easement; appraisal; statement of fair market value; execution and recordation of easement; forwarding copies of easement; appeal; legislative approval; costs; reapplication; tax exemption.

Sec. 36106. (1) An owner of open space land desiring an open space development rights easement whose land is subject to section 36101(j)(*ii*) may apply by filing an application with the local governing body. The application shall be made on a form prescribed by the state land use agency. The application shall contain

information reasonably necessary to properly identify the land as open space. This information shall include a land survey or a legal description of the land and a map showing the significant natural features and all structures and physical improvements located on the land.

(2) Upon receipt of an application, the local governing body shall notify the county planning commission, the regional planning commission, and the soil conservation district agency. If the local governing body is the county board of commissioners, the county board shall also notify the township board of the township in which the land is situated. If the land is within 3 miles of the boundary of a city or within 1 mile of the boundary of a village, the local governing body shall notify the governing body of the city or village.

(3) An entity receiving notice under subsection (2) has 30 days to review, comment, and make recommendations to the local governing body with which the application was filed.

(4) The local governing body shall approve or reject the application after considering the comments and recommendations of the reviewing entities and within 45 days after the application was received by the local governing body, unless that period is extended by agreement of the parties involved. The local governing body's approval or rejection of the application shall be based upon, and consistent with, rules promulgated by the state land use agency under section 36116. If the local governing body does not act within the time prescribed or agreed upon, the applicant may proceed as provided in subsection (9) as if the application was rejected.

(5) If the application is approved by the local governing body, the local governing body shall prepare the easement. If the application is approved by the state land use agency on appeal, the state land use agency shall prepare the easement. An easement prepared under this section shall contain all of the following provisions:

(a) A structure shall not be built on the land without the approval of the local governing body.

(b) An improvement to the land shall not be made without the approval of the local governing body.

(c) An interest in the land shall not be sold, except for a scenic, access, or utility easement that does not substantially hinder the character of the open space land.

(d) Public access to the open space land may be provided if agreed upon by the owner and if access will not jeopardize the conditions of the land.

(e) Any other condition or restriction on the land as agreed to by both parties that is considered necessary to preserve the land or appropriate portions of it as open space land.

(6) Upon receipt of the application, the local governing body shall direct either the local assessing officer or an independent certified assessor to make an on-site appraisal of the land within 30 days in compliance with the Michigan state tax commission assessors manual. The approved application shall contain a statement specifying the current fair market value of the land and the current fair market value of the development rights, if any. A copy of the approved application and the development rights easement shall be forwarded to the applicant for his or her execution.

(7) If the owner of the land executes the approved easement, it shall be returned to the local governing body for its execution. The local governing body shall record the development rights easement with the register of deeds of the county. A copy of the approved easement shall be forwarded to the local assessing office and to the state land use agency for their information.

(8) The decision of the local governing body may be appealed to the state land use agency, pursuant to subsection (9).

(9) If an application for an open space development rights easement is rejected by the local governing body, the local governing body shall notify the applicant and all reviewing entities with a written statement of the reasons for rejection. Within 30 days after receipt of the rejected application, the applicant may appeal the rejection to the state land use agency. The state land use agency shall have 60 days to approve or reject the application. The state land use agency shall submit to the legislature each approved application for an open space development rights easement and an analysis of its cost. The application shall be approved in both houses by a resolution concurred in by a majority of the members elected and serving in each house. The amount of the cost shall be returned to the local governing body where lost revenues are indicated. A copy of the approved application and an appropriate easement shall be forwarded by the state land use agency to the applicant for execution and to the local governing body where the land is situated.

(10) If an application for an open space development rights easement is rejected under subsection (4), the applicant may reapply for an open space development rights easement beginning 1 year after the final rejection.

(11) The development rights held by the local governing body as expressed in an open space development rights easement are exempt from ad valorem taxation.

324.36107 Notice of owners' intentions regarding extension or expiration of agreement or easement; notice of lien.

Sec. 36107. (1) All participants owning land contained under a development rights agreement or easement shall notify, on a form provided by the state land use agency for informational purposes only, the state or the local governing body holding the development rights, 6 months before the natural termination date of the development rights agreement or easement, of the owners' intentions regarding whether the agreement or easement should be extended or allowed to expire.

(2) The state land use agency shall notify the landowner via first-class mail at least 7 years before the expiration of a development rights agreement or easement that a lien may be placed at the time of expiration on the enrolled land in accordance with section 36111(8) if the landowner does not extend the agreement or easement and shall indicate to the landowner the option of not claiming credits during all or a portion of the next 7 years.

324.36108 Special assessments.

Sec. 36108. (1) A city, village, township, county, or other governmental agency shall not impose special assessments for sanitary sewers, water, lights, or nonfarm drainage on land for which a development rights agreement or easement has been recorded, except for years before 1995 as to a dwelling or a nonfarm structure located on the land, unless the assessments were imposed before the recording of the development rights agreement or easement.

(2) Land covered by this exemption shall be denied use of an improvement created by the special assessment until it has paid that portion of the special assessment directly attributable to the actual use of the improvement created by the special assessment.

(3) Upon termination of a development rights agreement or easement that has been exempt from a special assessment under this section, a city, village, township, county, or other governmental agency may impose the previously exempted special assessment. However, the amount of that special assessment shall not exceed the amount the special assessment would have been at the initial time of exemption, and shall not be subject to interest or penalty.

(4) If a dwelling or a nonfarm structure located on land covered by a development rights agreement or easement is required under the public health code, Act No. 368 of the Public Acts of 1978, being sections 333.1101 to 333.25211 of the Michigan Compiled Laws, to connect to an improvement created by a special assessment, the owner of that dwelling or nonfarm structure shall pay only that portion of the special assessment directly attributable to the actual use of the improvement created by the special assessment.

324.36109 Credit against state income tax or former state single business tax act or Michigan business tax act.

Sec. 36109. (1) An owner of farmland and related buildings subject to 1 or more development rights agreements under section 36104 or agricultural conservation easements or purchases of development rights under section 36111b or 36206 who is required or eligible to file a return as an individual or a claimant under the state income tax act may claim a credit against state income tax liability for the amount by which the property taxes on the land and structures used in the farming operation, including the homestead, restricted by the development rights agreements, agricultural conservation easements, or purchases of development rights exceed 3.5% of the household income as defined in section 508 of the income tax act of 1967, 1967 PA 281, MCL 206.508, excluding a deduction if taken under section 613 of the internal revenue code of 1986, 26 USC

613. For the purposes of this section, all of the following apply:

(a) A partner in a partnership is considered an owner of farmland and related buildings owned by the partnership and covered by a development rights agreement, agricultural conservation easement, or purchase of development rights. A partner is considered to pay a proportion of the property taxes on that property equal to the partner's share of ownership of capital or distributive share of ordinary income as reported by the partnership to the Internal Revenue Service or, if the partnership is not required to report that information to the Internal Revenue Service, as provided in the partnership agreement or, if there is no written partnership agreement, a statement signed by all the partners. A partner claiming a credit under this section based upon the partnership agreement or a statement shall file a copy of the agreement or statement with his or her income tax return. If the agreement or statement is not filed, the department of treasury shall deny the credit. All partners in a partnership claiming the credit allowed under this section shall compute the credit using the same basis for the apportionment of the property taxes.

(b) A shareholder of a corporation that has filed a proper election under subchapter S of chapter 1 of subtitle A of the internal revenue code of 1986, 26 USC 1361 to 1379, is considered an owner of farmland and related buildings covered by a development rights agreement that are owned by the corporation. A shareholder is considered to pay a proportion of the property taxes on that property equal to the shareholder's percentage of stock ownership for the tax year as reported by the corporation to the Internal Revenue Service. Except as provided in subsection (8), this subdivision applies to tax years beginning after 1987.

(c) Except as otherwise provided in this subdivision, an individual in possession of property for life under a life estate with remainder to another person or holding property under a life lease is considered the owner of that property if it is farmland and related buildings covered by a development rights agreement. Beginning January 1, 1986, if an individual in possession of property for life under a life estate with remainder to another person or holding property under a life lease enters into a written agreement with the person holding the remainder interest in that land and the written agreement apportions the property taxes in the same manner as revenue and expenses, the life lease or life estate holder and the person holding the remainder interest may claim the credit under this act as it is apportioned to them under the written agreement upon filing a copy of the written agreement with the return.

(d) If a trust holds farmland and related buildings covered by a development rights agreement and an individual is treated under subpart E of subchapter J of subchapter A of chapter 1 of the internal revenue code of 1986, 26 USC 671 to 679, as the owner of that portion of the trust that includes the farmland and related buildings, that individual is considered the owner of that property.

(e) An individual who is the sole beneficiary of a trust that is the result of the death of that individual's spouse is considered the owner of farmland and related buildings covered by a development rights agreement and held by the trust if the trust conforms to all of the following:

(*i*) One hundred percent of the trust income is distributed to the beneficiary in the tax year in which the trust receives the income.

(*ii*) The trust terms do not provide that any portion of the trust is to be paid, set aside, or otherwise used in a manner that would qualify for the deduction allowed by section 642(c) of the internal revenue code of 1986, 26 USC 642.

(f) A member in a limited liability company is considered an owner of farmland and related buildings covered by a development rights agreement that are owned by the limited liability company. A member is considered to pay a proportion of the property taxes on that property equal to the member's share of ownership or distributive share of ordinary income as reported by the limited liability company to the Internal Revenue Service.

(2) An owner of farmland and related buildings subject to 1 or more development rights agreements under section 36104 or agricultural conservation easements or purchases of development rights under section 36111b or 36206 to whom subsection (1) does not apply may claim a credit under the former single business tax act, 1975 PA 228, or the Michigan business tax act, 2007 PA 36, MCL 208.1101 to 208.1601, for the amount by which the property taxes on the land and structures used in farming operations restricted by the development rights agreements, agricultural conservation easements, or purchases of development rights exceed 3.5% of the adjusted business income of the owner as defined in section 36 of the former single business tax act, 1975 PA 228, or the business income tax base of the owner as defined in section 201 of the Michigan business tax act, 2007 PA 36, MCL 208.1201, plus compensation to shareholders not included in adjusted business income or the business income tax base, excluding any deductions if taken under section 613 of the internal revenue code of 1986, 26 USC 613. When calculating adjusted business income for tax years beginning before 1987, federal taxable income shall not be less than zero for the purposes of this subsection only. A participant is not eligible to claim a credit and refund against the former single business tax act, 1975 PA 228, or the Michigan business tax act, 2007 PA 36, MCL 208.1101 to 208.1601, unless the

participant demonstrates that the participant's agricultural gross receipts of the farming operation exceed 5 times the property taxes on the land for each of 3 out of the 5 tax years immediately preceding the year in which the credit is claimed. This eligibility requirement does not apply to those participants who executed farmland development rights agreements under this part before January 1, 1978. A participant may compare, during the contract period, the average of the most recent 3 years of agricultural gross receipts to property taxes in the first year that the participant entered the program under the present contract in calculating the gross receipts qualification. Once an election is made by the participant to compute the benefit in this manner, all future calculations shall be made in the same manner.

(3) If the farmland and related buildings covered by a development rights agreement under section 36104 or an agricultural conservation easement or purchase of development rights under section 36111b or 36206 are owned by more than 1 owner, each owner is allowed to claim a credit under this section based upon that owner's share of the property tax payable on the farmland and related buildings. The department of treasury shall consider the property tax equally apportioned among the owners unless a written agreement signed by all the owners is filed with the return, which agreement apportions the property taxes in the same manner as all other items of revenue and expense. If the property taxes are considered equally apportioned, a husband and wife shall be considered 1 owner, and a person with respect to whom a deduction under section 151 of the internal revenue code of 1986, 26 USC 151, is allowable to another owner of the property shall not be considered an owner.

(4) A beneficiary of an estate or trust to which subsection (1) does not apply is entitled to the same percentage of the credit provided in this section as that person's percentage of all other distributions by the estate or trust.

(5) If the allowable amount of the credit claimed exceeds the state income tax or the state business tax otherwise due for the tax year or if there is no state income tax or the state business tax due for the tax year, the amount of the claim not used as an offset against the state income tax or the state business tax, after examination and review, shall be approved for payment to the claimant pursuant to 1941 PA 122, MCL 205.1 to 205.31. The total credit allowable under this part and chapter 9 of the income tax act of 1967, 1967 PA 281, MCL 206.501 to 206.532, or the former single business tax act, 1975 PA 228, or the Michigan business tax act, 2007 PA 36, MCL 208.1101 to 208.1601, shall not exceed the total property tax due and payable by the claimant in that year. The amount the credit exceeds the property tax due and payable shall be deducted from the credit claimed under this part.

(6) For purposes of audit, review, determination, appeals, hearings, notices, assessments, and administration relating to the credit program provided by this section, the state income tax act, the former single business tax act, 1975 PA 228, or the Michigan business tax act, 2007 PA 36, MCL 208.1101 to 208.1601, applies according to which tax the credit is claimed against. If an individual is allowed to claim a credit under subsection (1) based upon property owned or held by a partnership, S corporation, or trust, the department of treasury may require that the individual furnish it with a copy of a tax return, or portion of a tax return, and supporting schedules that the partnership, S corporation, or trust files under the internal revenue code.

(7) The department of treasury shall account separately for payments under this part and not combine them with other credit programs. A payment made to a claimant for a credit claimed under this part shall be issued by 1 or more warrants made out to the county treasurer in each county in which the claimant's property is located and the claimant, unless the claimant specifies on the return that a copy of the receipt showing payment of the property taxes that became a lien in the year for which the credit is claimed, or that became a lien in the year before the year for which the credit is claimed, is attached to the income tax or business tax return filed by the claimant. If the claimant specifies that a copy of the receipt is attached to the return, the payment shall be made directly to the claimant. A warrant made out to a claimant and a county treasurer shall be used first to pay delinquent property taxes, interest, penalties, and fees on property restricted by the development rights agreement. If the warrant exceeds the amount of delinquent taxes, interest, penalties, and fees, the county treasurer shall remit the excess to the claimant. If a claimant falsely specifies that the receipt showing payment of the property taxes is attached to the return and if the property taxes on the land subject to that development rights agreement were not paid before the return was filed, all future payments to that claimant of credits claimed under this act attributable to that development rights agreement may be made payable to the county treasurer of the county in which the property subject to the development rights agreement is located and to that claimant.

(8) For property taxes levied after 1987, a person that was an S corporation and had entered into a development rights agreement before January 1, 1989, and paid property taxes on that property, may claim the credit allowed by this section as an owner eligible under subsection (2). A subchapter S corporation claiming a credit as permitted by this subsection for taxes levied in 1988 through 1990 shall claim the credit by filing

an amended return under the former single business tax act, 1975 PA 228. If a subchapter S corporation files an amended return as permitted by this subsection and if a shareholder of the subchapter S corporation claimed a credit under subsection (1)(b) for the same property taxes, the shareholder shall file an amended return under the state income tax act. A subchapter S corporation is not entitled to a credit under this subsection until all of its shareholders file the amended returns required by this subsection. The department of treasury shall first apply a credit due to a subchapter S corporation under this subsection to repay credits claimed under this section by the subchapter S corporation's shareholders for property taxes levied in 1988 through 1990 and shall refund any remaining credit to the S corporation. Interest or penalty is not due or payable on an income tax liability resulting from an amended return required by this subsection. A subchapter S corporation electing to claim a credit as an owner eligible under subsection (2) shall not claim a credit under subsection (1) for property taxes levied after 1987.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 1996, Act 233, Imd. Eff. June 5, 1996;—Am. 2000, Act 421, Eff. Mar. 28, 2001;—Am. 2002, Act 75, Imd. Eff. Mar. 15, 2002;—Am. 2007, Act 174, Imd. Eff. Dec. 21, 2007;—Am. 2016, Act 265, Eff. Sept. 26, 2016.

Popular name: Act 451

Popular name: Farmland and Open Space

Popular name: NREPA

324.36110 Sale of land; notice; death or disability of owner; division into smaller parcels of land; "individual essential to the operation of a farm" defined; fee prohibited.

Sec. 36110. (1) Land subject to a development rights agreement or easement may be sold without penalty under sections 36111, 36112, and 36113, if the use of the land by the successor in title complies with the provisions contained in the development rights agreement or easement. The seller shall notify the governmental authority having jurisdiction over the development rights of the change in ownership.

(2) If the owner of land subject to a development rights agreement or easement dies or becomes totally and permanently disabled or when an individual essential to the operation of the farm dies or becomes totally and permanently disabled, the land may be relinquished from the program under this part and is subject to a lien pursuant to sections 36111(11), 36112(7), and 36113(7). A request for relinquishment under this section shall be made within 3 years from the date of death or disability. A request for relinquishment under this subsection shall be made only by the owner in case of a disability or, in case of death, the person who becomes the owner through survivorship or inheritance.

(3) If an owner of land subject to a development rights agreement becomes totally and permanently disabled or dies, land containing structures that were present before the recording of the development rights agreement may be relinquished from the agreement, upon request of the disabled agreement holder or upon request of the person who becomes an owner through survivorship or inheritance, and upon approval of the local governing body and the state land use agency. Not more than 2 acres may be relinquished under this subsection unless additional land area is needed to encompass all of the buildings located on the parcel, in which case not more than 5 acres may be relinquished. If the parcel proposed to be relinquished is less in area than the minimum parcel size required by local zoning, the parcel may not be relinquished unless a variance is obtained from the local zoning board of appeals to allow for the smaller parcel size. The portion of the farmland relinquished from the development rights agreement under this subsection is subject to a lien pursuant to section 36111(11).

(4) The land described in a development rights agreement may be divided into smaller parcels of land and continued under the same terms and conditions as the original development rights agreement. The smaller parcels created by the division must meet the minimum requirements for being enrolled under this act or be 40 acres or more in size. Farmland may be divided once under this subsection without fee by the state land use agency. The state land use agency may charge a reasonable fee not greater than the state land use agency's actual cost of dividing the agreement for all subsequent divisions of that farmland. When a division of a development rights agreement is made under this subsection and is executed and recorded, the state land use agency shall notify the applicant, the local governing body and its assessing office, all reviewing agencies, and the department of treasury.

(5) As used in this section, "individual essential to the operation of the farm" means a co-owner, partner, shareholder, farm manager, or family member, who, to a material extent, cultivates, operates, or manages farmland under this part. An individual is considered involved to a material extent if that individual does 1 or more of the following:

(a) Has a financial interest equal to or greater than 1/2 the cost of producing the crops, livestock, or products and inspects and advises and consults with the owner on production activities.

(b) Works 1,040 hours or more annually in activities connected with production of the farming operation.

(6) The state land use agency shall not charge a fee to process a change of ownership under subsection (1) or a division under subsection (4).

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995;—Am. 1996, Act 233, Imd. Eff. June 5, 1996;—Am. 2016, Act 265, Eff. Sept. 26, 2016.

324.36111 Expiration, renewal, relinquishment, or termination of development rights agreement.

Sec. 36111. (1) A development rights agreement expires at the expiration of the term of the agreement unless renewed with the consent of the owner of the land. If the owner of the land has complied with the requirements of this part regarding development rights agreements, the owner is entitled to automatic renewal of the agreement upon written request of the owner. A development rights agreement may be renewed for a term of not less than 7 years. If a development rights agreement is renewed, the state land use agency shall send a copy of the renewal contract to the local governing body.

(2) A development rights agreement or a portion of the farmland covered by a development rights agreement may be relinquished as provided in this section and section 36111a. Farmland may be relinquished by this state before a termination date contained in the instrument under either of the following circumstances:

(a) If approved by the local governing body and the state land use agency, land containing structures that were present before the recording of the development rights agreement may be relinquished from the agreement. Not more than 2 acres may be relinquished under this subdivision unless additional land area is needed to encompass all of the buildings located on the parcel, in which case not more than 5 acres may be relinquished. If the size of the parcel proposed to be relinquished is less than that required by local zoning, the parcel shall not be relinquished unless a variance is obtained from the local zoning board of appeals to allow for the smaller parcel size.

(b) If approved by the local governing body and the state land use agency, land may be relinquished from the agreement for the construction of a residence by an individual essential to the operation of the farm as defined in section 36110(5). Not more than 2 acres may be relinquished under this subdivision. If the size of the parcel proposed to be relinquished is less than that required by local zoning, the parcel shall not be relinquished unless a variance is obtained from the local zoning board of appeals to allow for the smaller parcel size.

(3) Until April 1, 1997, if an owner who entered into or renewed a development rights agreement before April 15, 1994 makes a request, in writing, to the state land use agency, to terminate that development rights agreement with respect to all or a portion of the farmland covered by the agreement, the state land use agency shall approve the request and relinquish that farmland from the development rights agreement. If farmland is relinquished under this subsection, the state land use agency shall notify the local governing body of the local unit of government in which the land is located of the relinquishment.

(4) If the request for relinquishment of the development rights agreement is approved, the state land use agency shall prepare an instrument, subject to subsections (5) to (8), and shall forward the original relinquishment instrument to the applicant. The applicant shall have the relinquishment instrument recorded by the register of deeds in the county in which the property is located. The applicant shall provide a copy of the recorded relinquishment instrument to the department.

(5) If a development rights agreement or a portion of a development rights agreement is to be relinquished pursuant to subsection (2) or section 36111a, the state land use agency shall record a lien against the property formerly subject to the development rights agreement for the total amount of the allocated tax credit of the last 7 years, including the year of termination, received by an owner under section 36109 and attributable to the property formerly subject to the development rights agreement, plus interest at the rate of 6% per annum simple interest from the time the credit was received until the lien is placed on the property.

(6) If the property being relinquished from the development rights agreement is less than all of the property subject to that development rights agreement, the allocated tax credit for the development rights agreement shall be multiplied by the property's share of the taxable value of the agreement. As used in this subsection:

(a) "The allocated tax credit" means the amount obtained by multiplying the owner's total farmland preservation credit claimed in that year on all agreements by the quotient of the ad valorem property tax levied in that year on property subject to the development rights agreement that included the property being relinquished from the agreement divided by the total property taxes levied on property subject to any development rights agreement and used in determining the farmland preservation credit in that year.

(b) "The property's share of the taxable value of the agreement" means the quotient of the taxable value of

the property being relinquished from the agreement divided by the total taxable value of property subject to the development rights agreement that included the property being relinquished from the agreement. For years before 1995, taxable value means assessed value.

(7) Thirty days before the recording of a lien under this section, the state land use agency shall notify the owner of the farmland subject to the development rights agreement of the amount of the lien, including interest, if any. If the lien amount is paid before 30 days after the owner is notified, the lien shall not be recorded. The lien may be paid and discharged at any time and is payable to the state by the owner of record when the land or any portion of it is sold by the owner of record, or if the land is converted to a use prohibited by the former development rights agreement. The lien shall be discharged upon renewal or reentry in a development rights agreement, except that a subsequent lien shall not be less than the lien discharged. Notwithstanding any other provision of this section, from July 1, 2011 through September 30, 2011, a lien under this section recorded before January 1, 2011 may be paid at 85% of the face value of the lien. From October 1, 2011 through March 31, 2012, a lien under this section recorded before January 1, 2011 may be paid at 90% of the face value of the lien.

(8) Upon the termination of all or a portion of the development rights agreement under subsection (3) or, subject to subsection (14), the termination of a development rights agreement under subsection (1), the state land use agency shall prepare and record a lien, if any, against the property formerly subject to the development rights agreement for the total amount of the allocated tax credit of the last 7 years, including the year of termination, received by the owner under section 36109, attributable to the property formerly subject to the development rights agreement. The lien shall be without interest or penalty and is payable as provided in subsection (7). However, if the development rights agreement was approved or rejected by the local governing body under section 36104 on or after July 1, 2012 and is terminated under subsection (1), the amount of the lien shall include interest at the current monthly interest rate of 1 percentage point above the adjusted prime rate per annum from the time the lien is recorded until it is paid. The adjusted prime rate shall be determined as provided in section 23 of 1941 PA 122, MCL 205.23.

(9) The state land use agency shall notify the department of treasury of the termination of a development rights agreement.

(10) The unappropriated proceeds from lien payments made under this part shall be forwarded to the state treasurer for deposit in the agricultural preservation fund created in section 36202.

(11) Upon the relinquishment of all of the farmland under section 36110(2) or a portion of the farmland under section 36110(3), the state land use agency shall prepare and record a lien against the property formerly subject to a development rights agreement in an amount calculated as follows:

(a) Establishing a term of years by multiplying 7 by a fraction, the numerator of which is the number of years the farmland was under the development rights agreement, including any extensions, and the denominator of which is the number representing the term of years of that agreement, including any extensions.

(b) The lien amount equals the total amount of the allocated tax credit claimed attributable to that development rights agreement in the immediately preceding term of years as determined in subdivision (a).

(12) When a lien is paid under this section, the state land use agency shall prepare and record a discharge of lien with the register of deeds in the county in which the land is located. The discharge of lien shall specifically state that the lien has been paid in full, that the lien is discharged, that the development rights agreement and accompanying contract are terminated, and that the state has no further interest in the land under that agreement.

(13) A farmland development rights agreement is automatically relinquished when the farmland becomes subject to an agricultural conservation easement or purchase of development rights under section 36111b or 36206.

(14) If, upon expiration of the term of a farmland development rights agreement, the farmland becomes subject to an agricultural conservation easement or purchase of development rights under section 36111b or 36206 or if a farmland development rights agreement is automatically relinquished under subsection (13), the farmland is not subject to a lien under this section.

324.36111a Relinquishment of development rights agreement; conditions; "economic

viability" defined.

Sec. 36111a. (1) Upon request from a landowner and a local governing body, the state land use agency shall relinquish farmland from the development rights agreement if 1 or both of the following occur:

(a) The local governing body determines 1 or more of the following:

(*i*) That, because of the quality of the farmland, agricultural production cannot be made economically viable with generally accepted agricultural and management practices.

(*ii*) That surrounding conditions impose physical obstacles to the agricultural operation or prohibit essential agricultural practices.

(*iii*) That significant natural physical changes in the farmland have occurred that are generally irreversible and permanently limit the productivity of the farmland.

(*iv*) That a court order restricts the use of the farmland so that agricultural production cannot be made economically viable.

(b) The local governing body determines that the relinquishment is in the public interest and that the farmland to be relinquished meets 1 or more of the following conditions:

(*i*) The farmland is to be owned, operated, and maintained by a public body for a public use.

(*ii*) The farmland had been zoned for the immediately preceding 3 years for a commercial or industrial use.

(*iii*) The farmland is zoned for commercial or industrial use and the relinquishment of the farmland will be mitigated by 1 of the following means:

(A) For every 1 acre of farmland to be relinquished, an agricultural conservation easement will be acquired over 2 acres of farmland of comparable or better quality located within the same local unit of government where the farmland to be relinquished is located. The agricultural conservation easement shall be held by the local unit of government where the farmland to be relinquished is located or, if the local governing body declines to hold the agricultural conservation easement, by the state land use agency.

(B) If an agricultural conservation easement cannot be acquired as provided under sub-subparagraph (A), there will be deposited into the state agricultural preservation fund created in section 36202 an amount equal to twice the value of the development rights to the farmland being relinquished, as determined by a certified appraisal.

(*iv*) The farmland is to be owned, operated, and maintained by an organization exempt from taxation under section 501(c)(3) of the internal revenue code of 1986, 26 U.S.C. 501, and the relinquishment will be beneficial to the local community.

(2) In determining public interest under subsection (1)(b), the governing body shall consider all of the following:

(a) The long-term effect of the relinquishment upon the preservation and enhancement of agriculture in the surrounding area, including any nonfarm encroachment upon other agricultural operations in the surrounding area.

(b) Any other reasonable and prudent site alternatives to the farmland to be relinquished.

(c) Any infrastructure changes and costs to the local governmental unit that will result from the development of the farmland to be relinquished.

(3) If a landowner's relinquishment application under this section is denied by the local governing body, the landowner may appeal that denial to the state land use agency. In determining whether to grant the appeal and approve the relinquishment, the state land use agency shall follow the criteria established in subsection (1)(a) or follow the criteria in subsection (1)(b) and consider the factors described in subsection (2).

(4) The state land use agency shall review an application approved by the local governing body to verify that the criteria provided in subsection (1)(a) were met or the criteria in subsection (1)(b) were met and the factors in subsection (2) were considered. If the local governing body did not render a determination in accordance with this subsection, the state land use agency shall not relinquish the farmland from the development rights agreement.

(5) A local governing body may elect to waive its right to make a relinquishment determination under subsection (1)(a) or (b) by providing written notice of that election to the state land use agency. The written notice shall grant the state land use agency sole authority to grant or deny the application as provided in this section.

(6) A decision by the state land use agency to grant or deny an application for relinquishment under this section that adversely affects a land owner or a local governing body is subject to a contested case hearing as provided under this act and the administrative procedures act of 1969, 1969 PA 306, MCL 24.201 to 24.328.

(7) As used in this section, "economic viability" means that the cash flow returning to the farming operation is positive. The local governing body or state land use agency shall evaluate an application for relinquishment, and determine the economic viability of the affected farming operation, by doing all of the

following:

(a) Estimating crop, livestock, or product value of the farmland using locally accepted production methods and local United States department of agriculture yield capabilities for the specific soil types and average price for crop, livestock, or product over the past 5 years.

(b) Adding average yearly property tax credits afforded by the development rights agreement over the immediately preceding 5-year period.

(c) Subtracting estimated expenses directly attributed to the production of the crop, livestock, or product, including, but not limited to, seed, fertilizer, insecticide, building and machinery repair, drying, trucking, and property taxes.

(d) Subtracting the estimated cost of the operator's labor and management time at rates established by the United States department of agriculture for "all labor", Great Lakes area, as published in the United States department of agriculture labor reports.

(e) Subtracting typical capital replacement cost per acre of nonland assets using a useful life depreciation rate for comparable farming operations.

324.36111b Development rights or acquisition of agricultural conservation easements; application; selection criteria and scoring system; notification; points; determination of development rights value; approval by director; installment purchase plan; provisions for protection of farmland; termination of easements; value development rights in event of condemnation.

Sec. 36111b. (1) An application submitted under section 36111(10) for purchase of development rights or acquisition of agricultural conservation easements shall be evaluated and ranked according to selection criteria and a scoring system approved by the commission of agriculture. In developing a point system for selecting the parcels for purchase of development rights or the acquisition of agricultural conservation easements, the department of agriculture shall seek the assistance of the department of natural resources, Michigan state university, the United States department of agriculture-natural resources conservation service, and other appropriate professional and industry organizations. The selection criteria shall give consideration to the quality and physical characteristics of the parcel as well as surrounding land uses and threat of development.

(2) The department of agriculture shall prepare a notification to those individuals whose farmland development rights agreements are expiring in the year of application or expiring 1 year after the year of application. The notice shall be completed not less than 90 days before an application deadline set by the department of agriculture and shall include written information and details regarding the program. Applications for the purchase of development rights or the acquisition of agricultural conservation easements shall be submitted to the department of agriculture by the owner of that land and must include written support by the local governing body.

(3) In developing a scoring system, points shall be given to farmland that meets 1 or more of the following criteria, with subdivision (a) given priority over subdivisions (b) to (e):

(a) Productive capacity of farmland suited for the production of feed, food, and fiber, including, but not limited to, prime or unique farmland or farmland of local importance, as defined by the United States department of agriculture-natural resources conservation service.

(b) Lands that are enrolled under this act.

(c) Prime agricultural lands that are faced with development pressure that will permanently alter the ability for that land to be used for productive agricultural activity.

(d) Parcels that would complement and are part of a documented, long-range effort or plan for land preservation by the local governing body.

(e) Parcels with available matching funds from the local governing body, private organizations, or other sources.

(4) For purposes of subsections (7) and (8), the value of development rights in the purchase of development rights or the acquisition of agricultural conservation easements shall be determined by subtracting the current fair market value of the property without the development rights from the current fair market value of the property with all development rights.

(5) The director of the department of agriculture shall approve individual parcels for the purchase of

development rights or the acquisition of agricultural conservation easements based upon the adopted selection criteria and scoring process. The commission of agriculture shall approve a method to establish the price to be paid for the purchase of development rights or the acquisition of agricultural conservation easements, such as via appraisal, bidding, or a formula-based process and shall establish the maximum price to be paid on a per purchase basis from the lien fund. The director of the department of agriculture, after negotiations with the landowner, shall approve the price to be paid for purchase of development rights or the acquisition of the agricultural conservation easements. Proper releases from mortgage holders and lienholders must be obtained and executed to ensure that all development rights are purchased free and clear of all encumbrances.

(6) The department may purchase the agricultural conservation easement through an installment purchase agreement under terms negotiated by the department.

(7) An agricultural conservation easement shall include appropriate provisions for the protection of the farmland and other unique and critical benefits. An agricultural conservation easement may be terminated if the land, as determined by the commission of agriculture, meets 1 or more of the criteria described in section 36111a(1)(a) to (d). An agricultural conservation easement or portion of an agricultural conservation easement shall not be terminated unless approved by the local governing body and the commission of natural resources and the commission of agriculture. If an agricultural conservation easement is terminated, the current fair market value of the development rights, at the time of termination, shall be paid to the state land use agency. Any payment received by the state land use agency under this part shall be used to acquire agricultural conservation easements on additional farmland under section 36111(10).

(8) Whenever a public entity, authority, or political subdivision exercises the power of eminent domain and condemns land enrolled under this act, the value of the land shall include the value of development rights covered by development rights agreements or agricultural conservation easements. If the development rights have been purchased or agricultural conservation easements have been acquired under section 36111(10), the value of the development rights at the time of condemnation shall be paid to the state land use agency and any payment received by the state land use agency shall be used to acquire agricultural conservation easements on additional land under section 36111(10).

324.36112 Relinquishment of open space development rights easement pursuant to MCL 324.36105.

Sec. 36112. (1) An open space development rights easement pursuant to section 36105 shall be relinquished by the state at the expiration of the term of the easement unless renewed with the consent of the owner of the land. If the owner of the land has complied with the requirements of this part regarding open space development rights easements, the owner is entitled to automatic renewal of the agreement upon written request of the landowner.

(2) An open space development rights easement may be relinquished by the state prior to a termination date contained in the instrument as follows:

(a) At any time the state determines that the development of the land is in the public interest and in agreement with the owner of the land.

(b) The owner of the land may submit an application to the local governing body where the original application for an open space development rights easement was submitted requesting that the development rights easement be relinquished. The application shall be made on a form prescribed by the state land use agency. The request for relinquishment shall be processed and shall be subject to the provisions as provided in sections 36104 and 36105 for review and approval.

(3) If the request for relinquishment of the development rights easement is approved, the state land use agency shall prepare an instrument providing for the relinquishment of the open space development rights easement, subject to subsections (4), (5), (6), and (7), and shall record it with the register of deeds of the county in which the land is situated.

(4) At the time a development rights easement is to be relinquished pursuant to subsection (2)(b), the state land use agency shall cause to be prepared and recorded a lien against the property formerly subject to the development rights easement for the total amount of the ad valorem taxes not paid on the development rights during the period it was held by the state, if any. The lien shall provide that interest at the rate of 6% per annum compounded shall be added to the ad valorem taxes not paid from the time the exemption was received until it is paid.

(5) The lien shall become payable to the state by the owner of record at the time the land or any portion of it is sold by the owner of record, or if the land is converted to a use prohibited by the former open space development rights easement.

(6) Upon the termination of the open space development rights easement pursuant to subsection (2)(a), the development rights revert back to the owner without penalty or interest.

(7) Upon the natural termination of the open space development rights easement pursuant to subsection (1), the state land use agency shall cause to be prepared and recorded a lien against the property formerly subject to the open space development rights easement. The amount of the lien shall be the total amount of the last 7 years ad valorem taxes not paid on the development rights during the period it was held by the state, if any. The lien shall be without penalty or interest and shall be payable subject to subsection (5).

(8) A copy of the renewal or relinquishment of an open space development rights easement shall be sent to the local governing body's assessing office.

324.36113 Relinquishment of open space development rights easement pursuant to MCL 324.36106.

Sec. 36113. (1) An open space development rights easement pursuant to section 36106 shall be relinquished by the local governing body at the expiration of the term of the easement unless renewed with the consent of the owner of the land if the owner of the land has complied with the requirements of this part regarding open space development rights easements, the owner shall be entitled to automatic renewal of the agreement upon written request of the landowner.

(2) An open space development rights easement may be relinquished by the local governing body prior to a termination date contained in the instrument as follows:

(a) At any time the local governing body determines that the development of the land is in the public interest and in agreement with the owner of the land.

(b) The owner of the land may submit an application to the local governing body having jurisdiction requesting that the development rights easement be relinquished. The application shall be made on a form prescribed by the state land use agency. The request for relinquishment shall be processed and shall be subject to the provisions as provided in section 36106 for review and approval.

(3) If the request for relinquishment of the open space development rights easement is approved, the local governing body shall prepare an instrument providing for the relinquishment of the open space development rights easement, subject to subsections (4), (5), (6), and (7), and shall record it with the register of deeds of the county in which the land is situated.

(4) At the time an open space development rights easement is to be relinquished pursuant to subsection (2)(b), the local governing body shall cause to have prepared and recorded a lien against the property formerly subject to the open space development rights easement. The amount of the lien shall be the total amount of the ad valorem taxes not paid on the development rights during the period it was held by the local governing body, if any. The lien shall provide that interest at the rate of 6% per annum compounded shall be added to the ad valorem taxes exemption from the time granted until the lien is paid.

(5) The lien shall become payable to the local governing body by the owner of record at the time the land or any portion of it is sold by the owner of record, or if the land is converted to a use prohibited by the former open space development rights easement.

(6) Upon the termination of the open space development rights easement pursuant to subsection (2)(a), the development rights revert back to the owner without penalty or interest and the development rights easement upon the land expire.

(7) Upon the natural termination of the open space development rights easement pursuant to subsection (1), the local governing body shall cause to be prepared and recorded a lien against the property formerly subject to the open space development rights easement. The amount of the lien shall be the total amount of the last 7 years ad valorem taxes not paid on the development rights during the period it was held by the local governing body, if any. The lien shall be without penalty or interest and will be payable subject to subsection (5).

(8) A copy of the renewal or relinquishment of an open space development rights easement shall be sent to the local assessing office.

PART 362
AGRICULTURAL PRESERVATION FUND

324.36201 Definitions.

Sec. 36201. As used in this part:

(a) "Agricultural conservation easement" means a conveyance, by a written instrument, in which, subject to permitted uses, the owner relinquishes to the public in perpetuity his or her development rights and makes a covenant running with the land not to undertake development.

(b) "Agricultural use" means substantially undeveloped land devoted to the production of plants and animals useful to humans, including forages and sod crops; grains, feed crops, and field crops; dairy and dairy products; poultry and poultry products; livestock, including breeding and grazing of cattle, swine, captive cervidae, and similar animals; berries; herbs; flowers; seeds; grasses; nursery stock; fruits; vegetables; Christmas trees; and other similar uses and activities. Agricultural use includes use in a federal acreage set-aside program, a federal conservation reserve program, or a wetland reserve program. Agricultural use does not include the management and harvesting of a woodlot.

(c) "Board" means the agricultural preservation fund board created in section 36204.

(d) "Commission" means the commission of agriculture and rural development.

(e) "Department" means the department of agriculture and rural development.

(f) "Development" means an activity that materially alters or affects the existing conditions or use of any land in a manner that is inconsistent with an agricultural use.

(g) "Development rights" means an interest in land that includes the right to construct a building or structure, to improve land for development, or to divide a parcel for development purposes.

(h) "Farmland" means 1 or more of the following:

(*i*) A farm of 40 or more acres in 1 ownership, with 51% or more of the land area devoted to an agricultural use.

(*ii*) A farm of 5 acres or more in 1 ownership, but less than 40 acres, with 51% or more of the land area devoted to an agricultural use, that has produced a gross annual income from agriculture of $200.00 per year or more per acre of cleared and tillable land. A farm described in this subparagraph enrolled in a federal acreage set-aside program or a federal conservation reserve program is considered to have produced a gross annual income from agriculture of $200.00 per year or more per acre of cleared and tillable land.

(*iii*) A farm designated by the department as a specialty farm in 1 ownership that has produced a gross annual income of $2,000.00 or more from an agricultural use. Specialty farms include, but are not limited to, greenhouses; equine breeding and grazing; the breeding and grazing of cervidae, pheasants, and other game animals; bees and bee products; mushrooms; aquaculture; and other similar uses and activities.

(*iv*) Parcels of land in 1 ownership that are not contiguous but which constitute an integral part of a farming operation being conducted on land otherwise qualifying as farmland may be included in an application under this part.

(i) "Fund" means the agricultural preservation fund created in section 36202.

(j) "Grant" means a grant for the purchase of an agriculture conservation easement under this part.

(k) "Owner" means a person having a freehold estate in land coupled with possession and enjoyment. If land is subject to a land contract, owner means the vendee in agreement with the vendor.

(*l*) "Permitted use" means any use expressly authorized within an agriculture conservation easement consistent with the farming operation or that does not adversely affect the productivity of the farmland. Storage, retail or wholesale marketing, or processing of agricultural products is a permitted use in a farming operation if more than 50% of the stored, processed, or merchandised products are produced by the farm operator for at least 3 of the immediately preceding 5 years. Permitted use includes oil and gas exploration and extraction, but does not include other mineral development that is inconsistent with an agricultural use.

History: Add. 2000, Act 262, Imd. Eff. June. 29, 2000;—Am. 2013, Act 86, Imd. Eff. June 28, 2013.

Popular name: Act 451

Popular name: NREPA

324.36202 Agricultural preservation fund; creation; disposition; money remaining in fund; administration; expenditures.

Sec. 36202. (1) The agricultural preservation fund is created within the state treasury.

(2) The state treasurer may receive money or other assets from any source for deposit into the fund, including federal funds, other state revenues, gifts, bequests, and other donations. The state treasurer shall direct the investment of the fund and shall credit to the fund interest and earnings from fund investments.

(3) Money in the fund at the close of the fiscal year shall remain in the fund and shall not lapse to the general fund.

(4) The department shall be the administrator of the fund for auditing purposes.

(5) Money in the fund may be expended, upon appropriation, as follows:

(a) Not more than $1,400,000.00 annually for the administrative costs of the department and the board in implementing this part and part 361.

(b) After expenditures for the administrative costs under subdivision (a), money in the fund may be used, upon approval of the board, to provide grants to local units of government pursuant to section 36203.

(c) After expenditures under subdivisions (a) and (b) have been made, if the amount of money remaining in the fund exceeds $5,000,000.00, money in the fund may be used, upon approval of the board, pursuant to part 361 for the purchase of development rights to farmland or the acquisition of agricultural conservation easements.

(6) Expenditures of money in the fund as provided in this part are consistent with the state's interest in preserving farmland and are for an important public purpose.

History: Add. 2000, Act 262, Imd. Eff. June. 29, 2000;—Am. 2004, Act 75, Imd. Eff. Apr. 21, 2004;—Am. 2013, Act 86, Imd. Eff.

Popular name: NREPA

324.36203 Purchase of agricultural conservation easements; establishment of grant program; application; eligibility; form; contents; forwarding to board.

Sec. 36203. (1) The department shall establish a grant program to provide grants to eligible local units of government for the purchase of agricultural conservation easements.

(2) A grant application shall be submitted by the local unit of government applying for the grant. A local unit of government is eligible to submit a grant application under this section if both of the following requirements have been met:

(a) The local unit of government has adopted a development rights ordinance providing for a purchase of development rights program pursuant to the county zoning act, 1943 PA 183, MCL 125.201 to 125.240, the township zoning act, 1943 PA 184, MCL 125.271 to 125.310, or the city and village zoning act, 1921 PA 207, MCL 125.581 to 125.600, that contains all of the following:

(*i*) An application procedure.

(*ii*) The criteria for a scoring system for parcel selections within the local unit of government.

(*iii*) A method to establish the price to be paid for development rights, which may include an appraisal, bidding, or formula-based process.

(b) The local unit of government has adopted, within the last 10 years, a comprehensive land use plan that includes a plan for agricultural preservation or the local unit of government is included within a regional plan that was prepared within the last 10 years that includes a plan for agricultural preservation.

(3) An application for a grant shall be submitted on a form prescribed by the department. The grant application shall include at a minimum a list of the parcels proposed for acquisition of agricultural conservation easements, the size and location of each parcel, the amount of local matching funds, and the estimated acquisition value of the agricultural conservation easements.

(4) Upon receipt of grant applications pursuant to subsection (3), the department shall forward those grant applications to the board for consideration under section 36205.

324.36204 Agricultural preservation fund board; creation; membership; appointment; terms; quorum; compensation; expenses; election of chairperson and vice-chairperson; removal of member; vacancy.

Sec. 36204. (1) The agricultural preservation fund board is created within the department.

(2) The board shall consist of the following members:

(a) The director of the department or his or her designee.

(b) The director of the department of natural resources or his or her designee.

(c) Five individuals appointed by the governor as follows:

(*i*) Two individuals representing agricultural interests.

(*ii*) One individual representing conservation interests.

(*iii*) One individual representing development interests.

(*iv*) One individual representing the general public.

(d) In addition to the members described in subdivisions (a) to (c), the director of the department may appoint 2 individuals with knowledge and expertise in agriculture or land use, or local government, as nonvoting members.

(3) The members first appointed to the board shall be appointed within 60 days after the effective date of this section.

(4) Members of the board appointed under subsection (2)(c) and (d) shall serve for terms of 4 years or until a successor is appointed, whichever is later. However, of the members first appointed under subsection (2)(c), 1 shall be appointed for a term of 2 years, 2 shall be appointed for terms of 3 years, and 2 shall be appointed for terms of 4 years.

(5) A majority of the members of the board constitute a quorum for the transaction of business at a meeting of the board. A majority of the members present and serving are required for official action of the board.

(6) Members of the board shall serve without compensation. However, members of the board may be reimbursed for their actual and necessary expenses incurred in the performance of their official duties as members of the board.

(7) The board shall annually elect a chairperson and a vice-chairperson from among its members.

(8) The board may remove a member of the board for incompetency, dereliction of duty, malfeasance, misfeasance, or nonfeasance in office, or any other good cause.

(9) A vacancy on the board shall be filled for the unexpired term in the same manner as the original appointment.

324.36205 Application; evaluation criteria; priority; determination of grant awards; amount; notification; report to commission; maximum expenditure; portion of acquisition cost to be provided by applicant or another person.

Sec. 36205. (1) An application submitted to the board under section 36203 shall be evaluated according to selection criteria established by the board. The criteria shall place a priority on the acquisition of agricultural conservation easements on farmland that meets 1 or more of the following:

(a) Farmland that has a productive capacity suited for the production of feed, food, and fiber.

(b) Farmland that would complement and is part of a documented, long-range effort or plan for land preservation by the local unit of government in which the farmland is located.

(c) Farmland that is located within an area that complements other land protection efforts by creating a block of farmland that is subject to an agricultural conservation easement under this part or part 361, or a development rights agreement under part 361, or in which development rights have been acquired under part 361.

(d) Farmland in which a greater portion of matching funds or a larger percentage of the agricultural conservation easement value is provided by a local unit of government or sources other than the fund.

(e) Other factors considered important by the board.

(2) After reviewing grant applications for the acquisition of agricultural conservation easements and evaluating them according to the criteria established in subsection (1), the board shall determine which grants should be awarded and the amount of the grants. Upon making its determination, the board shall notify the department and shall submit a report containing this information to the commission.

(3) The board may establish a maximum amount per acre that may be expended with money from the fund for the purchase of agricultural conservation easements.

(4) A grant shall require that a portion of the cost of acquiring an agricultural conservation easement shall be provided by the applicant or another person.

Popular name: Act 451

Popular name: NREPA

324.36206 Distribution of grants to local units of government; condition; reviewing permitted uses; contribution of development rights; purchase by local unit of government through installment purchase agreement; joint holding by state and local unit of government; delegation of enforcement authority; transfer to property owner; tax credits under MCL 324.36109.

Sec. 36206. (1) After the board determines which grants should be awarded, and the amount of the grants, the department shall distribute the grants to the local units of government awarded the grants. The department shall condition the receipt of a grant upon the department's approval of the agricultural conservation easements being acquired.

(2) In reviewing permitted uses contained within an agricultural conservation easement under subsection (1), the department shall consider all of the following:

(a) Whether the permitted uses adversely affect the productivity of farmland.

(b) Whether the permitted uses materially alter or negatively affect the existing conditions or use of the land.

(c) Whether the permitted uses result in a material alteration of an existing structure to a nonagricultural use.

(d) Whether the permitted uses conform with all applicable federal, state, and local laws and ordinances.

(3) The department may accept contributions of all or a portion of the development rights to 1 or more parcels of land, including a conservation easement or a historic preservation easement as defined in section 2140, as part of a transaction for the purchase of an agricultural conservation easement.

(4) A local unit of government that purchases an agricultural conservation easement with money from a grant may purchase the agricultural conservation easement through an installment purchase agreement under terms negotiated by the local unit of government.

(5) An agricultural conservation easement acquired under this part shall be held jointly by the state and the local unit of government in which the land subject to the agricultural conservation easement is located. However, the state may delegate enforcement authority of 1 or more agricultural conservation easements to the local units of government in which the agricultural conservation easements are located.

(6) An agricultural conservation easement acquired under this part may be transferred to the owner of the property subject to the agricultural conservation easement if the state and the local unit of government holding the agricultural conservation easement agree to the transfer and the terms of the transfer.

(7) Section 36109 provides for tax credits for an owner of farmland subject to an agricultural conservation easement under this section.

ENDANGERED SPECIES

PART 365

ENDANGERED SPECIES PROTECTION

324.36501 Definitions.

Sec. 36501. As used in this part:

(a) "Endangered species" means any species of fish, plant life, or wildlife that is in danger of extinction throughout all or a significant part of its range, other than a species of insecta determined by the department or the secretary of the United States department of the interior to constitute a pest whose protection under this part would present an overwhelming and overriding risk to humans.

(b) "Fish or wildlife" means any member of the animal kingdom, including any mammal, fish, amphibian, mollusk, crustacean, arthropod, or other invertebrate, and includes any part, product, egg, or offspring, or the dead body or parts thereof. Fish or wildlife includes migratory birds, nonmigratory birds, or endangered birds for which protection is afforded by treaty or other international agreement.

(c) "Import" means to bring into, introduce into, or attempt to bring into or introduce into any place subject to the jurisdiction of this state.

(d) "Plant or plant life" means any member of the plant kingdom, including seeds, roots, and other parts of a member of the plant kingdom.

(e) "Species" includes any subspecies of fish, plant life, or wildlife and any other group of fish, plants, or wildlife of the same species or smaller taxa in common spatial arrangement that interbreed or cross-pollinate when mature.

(f) "Take" means, in reference to fish and wildlife, to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, collect, or attempt to engage in any such conduct.

(g) "Take" means, in reference to plants, to collect, pick, cut, dig up, or destroy in any manner.

(h) "Threatened species" means any species which is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range.

Popular name: Act 451

Popular name: NREPA

324.36502 Duties of department.

Sec. 36502. The department shall perform those acts necessary for the conservation, protection, restoration, and propagation of endangered and threatened species of fish, wildlife, and plants in cooperation with the federal government, pursuant to the endangered species act of 1973, Public Law 93-205, 87 Stat. 884, and with rules promulgated by the secretary of the interior under that act.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.36503 Investigations; determinations; rule; review.

Sec. 36503. (1) The department shall conduct investigations on fish, plants, and wildlife in order to develop information relating to population, distribution, habitat needs, limiting factors, and other biological and ecological data to determine management measures necessary for their continued ability to sustain themselves successfully. On the basis of these determinations and other available scientific and commercial data, which may include consultation with scientists and others who may have specialized knowledge, learning, or experience, the department shall promulgate a rule listing those species of fish, plants, and wildlife that are determined to be endangered or threatened within the state, pursuant to the administrative procedures act of 1969, Act No. 306 of the Public Acts of 1969, being sections 24.201 to 24.328 of the Michigan Compiled Laws.

(2) The department shall conduct a review of the state list of endangered and threatened species within not more than 2 years after its effective date and every 2 years thereafter, and may amend the list by appropriate additions or deletions pursuant to Act No. 306 of the Public Acts of 1969.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

Administrative rules: R 299.1021 et seq. of the Michigan Administrative Code.

324.36504 Programs; cooperative agreements.

Sec. 36504. (1) The department may establish programs, including acquisition of land or aquatic habitat, as are considered necessary for the management of endangered or threatened species.

(2) In implementing the programs authorized by this section, the department may enter into cooperative agreements with federal and state agencies, political subdivisions of the state, or with private persons for the administration and management of any area or program established under this section or for investigation as outlined in section 36503.

History: Add. 1995, Act 59, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.36505 Prohibitions; exceptions.

Sec. 36505. (1) Except as otherwise provided in this part, a person shall not take, possess, transport, import, export, process, sell, offer for sale, buy, or offer to buy, and a common or contract carrier shall not transport or receive for shipment, any species of fish, plants, or wildlife appearing on the following lists:

(a) The list of fish, plants, and wildlife indigenous to the state determined to be endangered or threatened within the state pursuant to section 36503 or subsection (3).

(b) The United States list of endangered or threatened native fish and wildlife.

(c) The United States list of endangered or threatened plants.

(d) The United States list of endangered or threatened foreign fish and wildlife.

(2) A species of fish, plant, or wildlife appearing on any of the lists delineated in subsection (1) which enters the state from another state or from a point outside the territorial limits of the United States may enter, be transported, possessed, and sold in accordance with the terms of a federal permit issued pursuant to section 10 of the endangered species act of 1973, 16 USC 1539, or an applicable permit issued under the laws of another state.

(3) The department may, by rule, treat any species as an endangered species or threatened species even though it is not listed pursuant to section 36503, if it finds any of the following:

(a) The species so closely resembles in appearance, at the point in question, a species which is listed pursuant to section 36503 that enforcement personnel would have substantial difficulty in attempting to differentiate between the listed and unlisted species.

(b) The effect of the substantial difficulty in differentiating between a listed and an unlisted species is an additional threat to an endangered or threatened species.

(c) The treatment of an unlisted species will substantially facilitate the enforcement and further the intent of this part.

(4) The department may permit the taking, possession, purchase, sale, transportation, exportation, or shipment of species of fish, plants, or wildlife which appear on the state list of endangered or threatened

species compiled pursuant to section 36503 and subsection (3) for scientific, zoological, or educational purposes, for propagation in captivity of such fish, plants, or wildlife to ensure their survival.

(5) Upon good cause shown and where necessary to alleviate damage to property or to protect human health, endangered or threatened species found on the state list compiled pursuant to section 36503 and subsection (3) may be removed, captured, or destroyed, but only as authorized by a permit issued by the department pursuant to part 13. Carnivorous animals found on the state list may be removed, captured, or destroyed by any person in emergency situations involving an immediate threat to human life, but the removal, capture, or destruction shall be reported to the department within 24 hours of the act.

(6) This section does not prohibit any of the following:

(a) The importation of a trophy under a permit issued pursuant to section 10 of the endangered species act of 1973, 16 USC 1539, which is not for resale and which was lawfully taken in a manner permitted by the laws of the state, territory, or country where the trophy was caught, taken, or killed.

(b) The taking of a threatened species when the department has determined that the abundance of the species in the state justifies a controlled harvest not in violation of federal law.

(c) Subject to any permits that may be required by the department, the possession, transfer, transportation, importation, or exportation or the transport or receipt for shipment by a common or contract carrier of a raptor or the captive-bred progeny of a raptor, a raptor egg, or raptor semen acquired in accordance with applicable state and federal laws and regulations which allow raptors, raptor eggs, or raptor semen to be used in falconry or in the captive propagation of raptors for use in falconry.

(d) Subject to any permits that may be required by the department, the selling, offering for sale, buying, or offering to buy a raptor that was captive-bred or semen from a raptor that was captive-bred in accordance with applicable state and federal laws and regulations which allow raptors or raptor semen to be used in falconry or in captive propagation of raptors for use in falconry.

CHAPTER 2
MANAGEMENT OF RENEWABLE RESOURCES

SUBCHAPTER 1
WILDLIFE

WILDLIFE CONSERVATION

PART 401
WILDLIFE CONSERVATION

324.40101 Meanings of words and phrases.

Sec. 40101. For purposes of this part, the words and phrases defined in sections 40102 to 40104 have the meanings ascribed to them in those sections.

History: Add. 1995, Act 57, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.40102 Definitions; A to F.

Sec. 40102. (1) "Animals" means wild birds and wild mammals.

(2) "Bag limit" means the number of animals that may be taken and possessed as determined by the department.

(3) "Bow" means a device for propelling an arrow from a string drawn, held, and released by hand where the force used to hold the string in the drawn position is provided by the archer's muscles.

(4) "Buy" or "sell" means an exchange or attempt or offer to exchange for money, barter, or anything of value.

(5) "Chase" means to follow animals with dogs or other wild or domestic animals trained for that purpose.

(6) "Cormorant damage" means adverse impacts of double-crested cormorants on fish, fish hatchery stock, wildlife, plants, and their habitats and on man-made structures.

(7) "Cormorant depredation order" means the depredation order for double-crested cormorants to protect public resources, 50 CFR 21.48, issued by the United States Department of the Interior, Fish and Wildlife Service.

(8) "Crossbow" means a weapon consisting of a bow mounted transversely on a stock or frame and designed to fire an arrow, bolt, or quarrel by the release of a bow string that is controlled by a mechanical or electric trigger and has a working safety and a draw weight of 100 pounds or greater.

(9) "Deer or elk feeding" means the depositing, distributing, or tending of feed in an area frequented by wild, free-ranging white-tailed deer or elk. Deer or elk feeding does not include any of the following:

(a) Feeding wild birds or other wildlife if done in such a manner as to exclude wild, free-ranging white-tailed deer and elk from gaining access to the feed.

(b) The scattering of feed solely as the result of normal logging practices or normal agricultural practices.

(c) The storage or use of feed for agricultural purposes if 1 or more of the following apply:

(*i*) The area is occupied by livestock actively consuming the feed on a daily basis.

(*ii*) The feed is covered to deter wild, free-ranging white-tailed deer or elk from gaining access to the feed.

(*iii*) The feed is in a storage facility that is consistent with normal agricultural practices.

(d) Baiting to take game as provided by an order of the commission under section 40113a.

(10) "Disability" means a determinable physical characteristic of an individual that may result from disease, injury, congenital condition of birth, or functional disorder.

(11) "Feed" means a substance composed of grain, mineral, salt, fruit, vegetable, hay, or any other food material or combination of these materials, whether natural or manufactured, that may attract white-tailed deer or elk. Feed does not include any of the following:

(a) Plantings for wildlife.

(b) Standing farm crops under normal agricultural practices.

(c) Agricultural commodities scattered solely as the result of normal agricultural practices.

(12) "Firearm" means any weapon which will, is designed to, or may readily be converted to expel a projectile by action of an explosive. A pneumatic gun, as defined in section 1 of 1990 PA 319, MCL 123.1101, other than a paintball gun that expels by pneumatic pressure plastic balls filled with paint for the purpose of marking the point of impact, is also considered a firearm for the purpose of this act.

History: Add. 1995, Act 57, Imd. Eff. May 24, 1995;—Am. 1998, Act 86, Imd. Eff. May 13, 1998;—Am. 1999, Act 66, Imd. Eff. June 25, 1999;—Am. 2000, Act 347, Imd. Eff. Dec. 28, 2000;—Am. 2007, Act 48, Imd. Eff. Aug. 3, 2007;—Am. 2015, Act 24, Eff. July 1, 2015.

Popular name: Act 451

Popular name: NREPA

324.40103 Definitions; G to R; "conservation" defined.

Sec. 40103. (1) "Game" means any species of wildlife designated by the legislature or the commission as game under section 40110 and any of the following animals but does not include privately owned cervidae species located on a cervidae livestock facility registered under the privately owned cervidae producers marketing act, 2000 PA 190, MCL 287.951 to 287.969:

(a) Badger.

(b) Bear.

(c) Beaver.

(d) Bobcat.

(e) Brant.

(f) Coot.
(g) Coyote.
(h) Crow.
(i) Deer.
(j) Duck.
(k) Elk.
(*l*) Fisher.
(m) Florida gallinule.
(n) Fox.
(o) Geese.
(p) Hare.
(q) Hungarian partridge.
(r) Marten.
(s) Mink.
(t) Moose.
(u) Muskrat.
(v) Opossum.
(w) Otter.
(x) Pheasant.
(y) Quail.
(z) Rabbit.
(aa) Raccoon.
(bb) Ruffed grouse.
(cc) Sharptailed grouse.
(dd) Skunk.
(ee) Snipe.
(ff) Sora rail.
(gg) Squirrel.
(hh) Virginia rail.
(ii) Weasel.
(jj) Wild turkey.
(kk) Wolf.
(*ll*) Woodchuck.
(mm) Woodcock.

(2) "Interim order of the department" means an order of the department issued under section 40108.

(3) "Kind" means an animal's sex, age, or physical characteristics.

(4) "Normal agricultural practices" means generally accepted agricultural and management practices as defined by the commission of agriculture and rural development.

(5) "Open season" means the dates during which game may be legally taken.

(6) "Parts" means any or all portions of an animal, including the skin, plumage, hide, fur, entire body, or egg of an animal.

(7) "Protected" or "protected animal" means an animal or kind of animal that is designated by the department as an animal that shall not be taken.

(8) "Residence" means a permanent building serving as a temporary or permanent home. Residence may include a cottage, cabin, or mobile home, but does not include a structure designed primarily for taking game, a tree blind, a tent, a recreational or other vehicle, or a camper.

(9) "Conservation" means the wise use of natural resources.

History: Add. 1995, Act 57, Imd. Eff. May 24, 1995;—Am. 1998, Act 86, Imd. Eff. May 13, 1998;—Am. 1999, Act 66, Imd. Eff. June 25, 1999;—Am. 2000, Act 191, Eff. June 1, 2001;—Am. 2012, Act 520, Imd. Eff. Dec. 28, 2012;—Am. 2013, Act 21, Imd. Eff. May 8, 2013;—Am. 2014, Act 281, Eff. Mar. 31, 2015;—Am. 2016, Act 382, Imd. Eff. Dec. 22, 2016.

Compiler's note: Act 160 of 2004, which was approved by the governor and filed with the secretary of state on June 18, 2004, provided for the amendment of Act 451 of 1994 by amending Sec. 40103 and adding Sec. 40110a. The amended and added sections were effective June 18, 2004. On March 28, 2005, a petition seeking a referendum on Act 160 of 2004 was filed with the Secretary of State. Const 1963, art 2, sec 9, provides that no law as to which the power of referendum properly has been invoked shall be effective thereafter unless approved by a majority of the electors voting thereon at the next general election. A referendum on Act 160 of 2004 was presented to the electors at the November 2006 general election as Proposal 06-3, which read as follows:

"PROPOSAL 06-3

"A REFERENDUM ON PUBLIC ACT 160 OF 2004 — AN ACT TO ALLOW THE ESTABLISHMENT OF A HUNTING SEASON FOR MOURNING DOVES

"Public Act 160 of 2004 would:

"Authorize the Natural Resources Commission to establish a hunting season for mourning doves.

"Require a mourning dove hunter to have a small game license and a $2.00 mourning dove stamp.

"Stipulate that revenue from the stamp must be split evenly between the Game and Fish Protection Fund and the Fish and Wildlife Trust Fund.

"Require the Department of Natural Resources to address responsible mourning dove hunting; management practices for the propagation of mourning doves; and participation in mourning dove hunting by youth, the elderly and the disabled in the Department's annual hunting guide.

"Should this law be approved?

"Yes [ ]

"No [ ]"

Act 160 of 2004 was rejected by a majority of the electors voting thereon at the November 2006 general election.

Enacting section 1 of Act 281 of 2014 provides:

"Enacting section 1. This act reenacts all or portions of 2012 PA 520, 2013 PA 21, 2013 PA 22 and 2013 PA 108. If any portions of 2012 PA 520 or 2013 PA 21 or 2013 PA 22 or 2013 PA 108 not amended by this act are invalidated pursuant to referendum or any other reason, then any such invalidated portions of 2012 PA 520, 2013 PA 21, 2013 PA 22 and 2013 PA 108 which are otherwise included in this act, shall be deemed to be reenacted pursuant to this act."

Enacting section 2 of Act 281 of 2014 provides:

"Enacting section 2. If any part or parts of this act are found to be in conflict with the state constitution of 1963, the United States constitution, or federal law, this act shall be implemented to the maximum extent that the state constitution of 1963, the United States constitution, and federal law permit. Any provision held invalid or inoperative shall be severable from the remaining portions of this act."

Public Act 281 of 2014 was proposed by initiative petition pursuant to Const 1963, art II, § 9. The initiative petition was approved by an affirmative vote of the majority of the Senate on August 13, 2014 and by the House of Representatives on August 27, 2014. The initiative petition was filed with the Secretary of State on August 27, 2014.

In Keep Michigan Wolves Protected v State of Michigan, an unpublished opinion issued November 22, 2016, (Docket No. 328604), the Michigan Court of Appeals held that 2014 PA 281, which amended sections of the natural resources and environmental protection act, 1994 PA 451, MCL 324.101 to 324.90106, is unconstitutional as it violates the title-object clause of section 24 of article IV of the state constitution of 1963.

Popular name: Act 451

Popular name: NREPA

324.40104 Definitions; T, V.

Sec. 40104. (1) "Take" means to hunt with any weapon, dog, raptor, or other wild or domestic animal trained for that purpose; kill; chase; follow; harass; harm; pursue; shoot; rob; trap; capture; or collect animals, or to attempt to engage in such an activity.

(2) "Transport" means to carry or ship animals within this state or to points outside this state.

(3) "Trap" means taking or attempting to take animals by means of a trap or other device designed to kill or capture animals.

(4) "Vehicle" means every device in, upon, or by which any person or property is or may be transported, except devices exclusively moved by human power.

History: Add. 1995, Act 57, Imd. Eff. May 24, 1995.

324.40105 Animals as property of state; taking of animals to be regulated.

Sec. 40105. All animals found in this state, whether resident or migratory and whether native or introduced, are the property of the people of the state, and the taking of all animals shall be regulated by the department as provided by law.

History: Add. 1995, Act 57, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.40106 Game or protected animal; taking, releasing, transporting, selling, buying, or possessing; construction of section.

Sec. 40106. A person shall not take, release, transport, sell, buy, or have in his or her possession game or any protected animal, whether living or dead, or parts of any game or protected animal, from this state or from outside of this state, except as provided for in this part or by an order of the department or an interim order of the department. This section does not enhance the department's powers to establish an open season for an animal that is not game or give the department the power to designate a species as game.

History: Add. 1995, Act 57, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.40107 Management of animals; orders of department; procedures for exercising power; revision of order; filing orders to take place of former 1929 PA 286; filing and effective date of orders.

Sec. 40107. (1) The department shall manage animals in this state. In managing animals, the department may issue orders to do all of the following:

(a) Make recommendations to the legislature regarding animals that should be added or deleted from the category of game.

(b) Determine the kinds of animals that may be taken.

(c) Determine the animals or kinds of animals that are protected.

(d) Except as otherwise provided in section 40110, establish open seasons for taking or possessing game.

(e) Establish lawful methods of taking game.

(f) Establish lawful methods of taking game for persons who have certain disabilities.

(g) Establish bag limits.

(h) Establish geographic areas within the state where certain regulations may apply to the taking of animals.

(i) Determine conditions under which permits may be issued by the department.

(j) Establish fees for the issuing of permits by the department.

(k) Regulate the hours during which animals may be taken.

(*l*) Require that a person involved in a chase of an animal have in his or her possession a valid license that would authorize the taking of the animal being chased.

(m) Establish conditions under which animals taken or possessed outside of this state may be imported into this state.

(n) Regulate the buying and selling of animals and parts of animals.

(o) Establish methods of taking animals that are primarily taken because of the value of their pelts, which methods supplement the lawful methods of taking such animals that exist on October 1, 1988.

(2) In exercising a power under this section, the department shall comply with the following procedures in a manner that assures adequate public notice, opportunity for public comment, and due regard for traditional methods and practices that were lawful prior to October 1, 1988:

(a) An order shall be prepared by the department after comments from department field personnel and interested persons have been solicited and considered.

(b) The order shall be on the department agenda for at least 1 month prior to its consideration.

(c) The department shall provide an opportunity for public comment on the order.

(d) Except as otherwise provided in this subdivision, the department prior to issuance of an order shall provide a copy of each order to each member of the senate and the house of representatives standing committees that consider legislation pertaining to conservation, environment, recreation, tourism, and natural resources. The members of the standing committees have 30 days to review and submit comments to the department regarding an order. This subdivision shall not apply to an order that does not alter the substance of a lawful provision that exists in the form of a statute, rule, regulation, or order at the time the order is prepared.

(e) The department shall approve, reject, or modify the order.

(3) The department may revise an order issued pursuant to this section, and any revision of such an order shall comply with the procedure set forth in subsection (2).

(4) Not later than January 1, 1990, the commission shall issue orders pursuant to subsection (1) and file orders with the secretary of state that the commission considers sufficient to take the place of former 1929 PA 286. The orders filed with the secretary of state pursuant to this subsection shall indicate that the orders become effective upon filing with the secretary of state. Following the effective date of this part, the department shall undertake all of the powers given to the commission in former 1988 PA 256.

324.40107c Control and management of double-crested cormorants; administration of program; organization of states; funds.

Sec. 40107c. (1) To reduce cormorant damage, the department shall administer a program to control and manage double-crested cormorants. The department shall administer the program in cooperation with federal agencies and in a manner that complies with the cormorant depredation order.

(2) In consultation with the department of environmental quality, the department shall participate in a federally recognized organization of states, such as the Mississippi flyway council, to coordinate a regional effort to reduce cormorant damage that includes urging the federal government to do both of the following:

(a) Expand state options for double-crested cormorant control by revising the cormorant depredation order.

(b) Seek to amend the migratory bird convention with Mexico to designate the double-crested cormorant as a game species.

(3) The department shall seek funding from the Great Lakes protection fund authorized under part 331 for deposit in the cormorant control fund created in section 40107d.

324.40108 Interim orders.

Sec. 40108. The department may modify an order issued under section 40107 by issuing an interim order consistent with federal regulations or when the department determines that animals are at risk of being depleted or extirpated, or the animal is threatening public safety or inflicting damage to horticulture, agriculture, or other property. The department shall publicize an interim order in a manner that ensures that interested persons are provided notice of the proposed interim order, the reasons for the requested modifications, and the proposed effective date of the order. In addition, the department shall provide a copy of an interim order to each member of the senate and the house of representatives standing committees that consider legislation pertaining to conservation, environment, recreation, tourism, and natural resources. An interim order under this section shall be in effect for not longer than 6 months.

324.40110 Designation of species as game; establishment of first open season; removal from list; orders; definitions.

Sec. 40110. (1) Only the legislature or the commission may designate a wildlife species as game. Only the legislature or commission may establish the first open season for a game species designated under this section. The legislature retains the sole authority to remove a wildlife species from the list of game species. The commission shall exercise its authority under this subsection by issuing orders consistent with its duty to use principles of sound scientific wildlife management, as expressed in section 40113a. The commission may decline to issue orders authorizing an open season for a game species if doing so would conflict with principles of sound scientific wildlife management. The commission shall not designate any of the following as game under this subsection:

(a) A domestic animal.

(b) Livestock.

(c) Any species added to the game list by a public act that is rejected by a referendum before May 14, 2013.

(2) After the legislature or commission authorizes the establishment of the first open season for game under this section, the department may issue orders pertaining to that animal for each of the purposes listed in section 40107.

(3) As used in this section:

(a) "Domestic animal" means those species of animals that live under the husbandry of humans.

(b) "Livestock" includes, but is not limited to, cattle, sheep, new world camelids, goats, bison, privately owned cervids, ratites, swine, equine, poultry, and rabbits. Livestock does not include dogs and cats.

History: Add. 1995, Act 57, Imd. Eff. May 24, 1995;—Am. 2013, Act 21, Imd. Eff. May 8, 2013;—Am. 2014, Act 281, Eff. Mar. 31, 2015;—Am. 2016, Act 382, Imd. Eff. Dec. 22, 2016.

Compiler's note: Enacting section 1 of Act 281 of 2014 provides:

"Enacting section 1. This act reenacts all or portions of 2012 PA 520, 2013 PA 21, 2013 PA 22 and 2013 PA 108. If any portions of 2012 PA 520 or 2013 PA 21 or 2013 PA 22 or 2013 PA 108 not amended by this act are invalidated pursuant to referendum or any other reason, then any such invalidated portions of 2012 PA 520, 2013 PA 21, 2013 PA 22 and 2013 PA 108 which are otherwise included in this act, shall be deemed to be reenacted pursuant to this act."

Enacting section 2 of Act 281 of 2014 provides:

"Enacting section 2. If any part or parts of this act are found to be in conflict with the state constitution of 1963, the United States constitution, or federal law, this act shall be implemented to the maximum extent that the state constitution of 1963, the United States constitution, and federal law permit. Any provision held invalid or inoperative shall be severable from the remaining portions of this act."

Public Act 281 of 2014 was proposed by initiative petition pursuant to Const 1963, art II, § 9. The initiative petition was approved by an affirmative vote of the majority of the Senate on August 13, 2014 and by the House of Representatives on August 27, 2014. The initiative petition was filed with the Secretary of State on August 27, 2014.

In Keep Michigan Wolves Protected v State of Michigan, an unpublished opinion issued November 22, 2016, (Docket No. 328604), the Michigan Court of Appeals held that 2014 PA 281, which amended sections of the natural resources and environmental protection act, 1994 PA 451, MCL 324.101 to 324.90106, is unconstitutional as it violates the title-object clause of section 24 of article IV of the state constitution of 1963.

324.40110a Open season for moose.

Sec. 40110a. The legislature hereby authorizes the establishment of the first open season for moose. The commission may issue orders pertaining to moose for each of the purposes listed in section 40113a, including, but not limited to, orders establishing the first open season for moose.

History: Add. 2010, Act 366, Imd. Eff. Dec. 22, 2010.

Compiler's note: Act 160 of 2004, which was approved by the governor and filed with the secretary of state on June 18, 2004, provided for the amendment of Act 451 of 1994 by amending Sec. 40103 and adding Sec. 40110a. The amended and added sections were effective June 18, 2004. On March 28, 2005, a petition seeking a referendum on Act 160 of 2004 was filed with the Secretary of State. Const 1963, art 2, sec 9, provides that no law as to which the power of referendum properly has been invoked shall be effective thereafter unless approved by a majority of the electors voting thereon at the next general election. A referendum on Act 160 of 2004 was presented to the electors at the November 2006 general election as Proposal 06-3, which read as follows:

"PROPOSAL 06-3

"A REFERENDUM ON PUBLIC ACT 160 OF 2004 — AN ACT TO ALLOW THE ESTABLISHMENT OF A HUNTING SEASON FOR MOURNING DOVES

"Public Act 160 of 2004 would:

"Authorize the Natural Resources Commission to establish a hunting season for mourning doves.

"Require a mourning dove hunter to have a small game license and a $2.00 mourning dove stamp.

"Stipulate that revenue from the stamp must be split evenly between the Game and Fish Protection Fund and the Fish and Wildlife Trust Fund.

"Require the Department of Natural Resources to address responsible mourning dove hunting; management practices for the propagation of mourning doves; and participation in mourning dove hunting by youth, the elderly and the disabled in the Department's annual hunting guide.

"Should this law be approved?

"Yes [ ]

"No [ ]"

Act 160 of 2004 was rejected by a majority of the electors voting thereon at the November 2006 general election.

324.40111 Taking animal from in or upon vehicle; transporting or possessing firearm in or upon vehicle; person with disability; transporting or possessing unloaded firearm in or upon vehicle on sporting clays range; individual holding permit to hunt from standing vehicle; possessing and discharging firearm to take game from personal assistive mobility device; transporting or possessing bow or crossbow in or upon vehicle while on public land or highway, road, or street; written permission to hunt or discharge firearm within certain distance of property; definitions.

Sec. 40111. (1) Except as otherwise provided in subsection (3) or (5), this part, or in a department order authorized under section 40107, an individual shall not take an animal from in or upon a vehicle.

(2) Except as otherwise provided in subsection (3), (4), or (5), this part, or in a department order authorized under section 40107, an individual shall not transport or possess a firearm in or upon a vehicle, unless the firearm is unloaded and enclosed in a case, unloaded and carried in the trunk of a vehicle, or unloaded in a motorized boat.

(3) A person with a disability may transport or possess a firearm in or upon a vehicle, except for a car or truck, on a state licensed game bird hunting preserve if the firearm is unloaded and the vehicle is operated at a speed of not greater than 10 miles per hour. A person with a disability may possess a loaded firearm and may

discharge that firearm to take an animal from in or upon a vehicle, except for a car or truck, on a state licensed game bird hunting preserve if the vehicle is not moving. The department may demand proof of eligibility under this subsection. An individual shall possess proof of his or her eligibility under this subsection and furnish the proof upon the request of a peace officer.

(4) An individual may transport or possess an unloaded firearm in or upon a vehicle on a sporting clays range.

(5) An individual holding a valid permit to hunt from a standing vehicle under section 40114 may transport or possess an uncased firearm with a loaded magazine on a personal assistive mobility device if the action is open. An individual holding a valid permit to hunt from a standing vehicle under section 40114 may possess a loaded firearm and may discharge that firearm to take game from a personal assistive mobility device if each of the following applies:

(a) The personal assistive mobility device is not moving.

(b) The individual holds a valid base license under section 43523a, holds any other necessary license under part 435, and complies with all other laws and rules for the taking of game.

(6) An individual may transport or possess a bow or crossbow in or upon a vehicle while that vehicle is operated on public land or on a highway, road, or street in this state if the bow or crossbow is unloaded and uncocked, enclosed in a case, or carried in the trunk of a vehicle.

(7) An individual shall not hunt with a firearm within 150 yards of an occupied building, dwelling, house, residence, or cabin, or any barn or other building used in connection with a farm operation, without obtaining the written permission of the owner, renter, or occupant of the property.

(8) As used in this section:

(a) "Person with a disability" means a disabled person as that term is defined in section 19a of the Michigan vehicle code, 1949 PA 300, MCL 257.19a, and who is in possession of 1 of the following:

(*i*) A certificate of identification or windshield placard issued to a disabled person under section 675 of the Michigan vehicle code, 1949 PA 300, MCL 257.675.

(*ii*) A special registration plate issued to a disabled person under section 803d of the Michigan vehicle code, 1949 PA 300, MCL 257.803d.

(b) "Personal assistive mobility device" means any device, including, but not limited to, one that is battery-powered, that is designed solely for use by an individual with mobility impairment for locomotion and is considered an extension of the individual.

(c) "Uncocked" means the following:

(*i*) For a bow, that the bow is not in the drawn position.

(*ii*) For a crossbow, that the crossbow is not in the cocked position.

(d) "Unloaded" means the following:

(*i*) For a firearm, that the firearm does not have ammunition in the barrel, chamber, cylinder, clip, or magazine when the barrel, chamber, cylinder, clip, or magazine is part of or attached to the firearm.

(*ii*) For a bow, that an arrow is not nocked.

(*iii*) For a crossbow, that a bolt is not in the flight groove.

324.40111a Deer and elk feeding; order; definition.

Sec. 40111a. (1) The commission, after consultation with the commission of agriculture and rural development, shall issue in the manner provided in section 40113a an order concerning deer and elk feeding in this state.

(2) As used in this section, "deer and elk feeding" means the depositing, distributing, or tending of feed in an area frequented by wild, free-ranging white-tailed deer and elk to prevent them from starving or for recreational viewing. Deer and elk feeding does not include any of the following:

(a) Baiting to take game as provided by an order of the commission under section 40113a.

(b) The scattering of feed solely as the result of normal logging practices or normal agricultural practices.

(c) The storage or use of feed for agricultural purposes if 1 or more of the following apply:

(*i*) The area is occupied by livestock actively consuming the feed on a daily basis.

(*ii*) The feed is covered to deter wild, free-ranging white-tailed deer and elk from gaining access to the feed or is being used on a daily basis.

(*iii*) The feed is in a storage facility or is stored in a manner that is consistent with normal agricultural practices.

(d) Feeding wild birds or other wildlife if done in such a manner as to exclude wild, free-ranging white-tailed deer and elk from gaining access to the feed.

History: Add. 1999, Act 66, Imd. Eff. June 25, 1999;—Am. 2004, Act 537, Imd. Eff. Jan. 3, 2005;—Am. 2009, Act 199, Imd. Eff. Dec. 29, 2009;—Am. 2015, Act 265, Imd. Eff. Dec. 23, 2015.

324.40112 Obstructing or interfering in lawful taking of animals or fish; prohibited conduct; petition; injunction; violation as misdemeanor; penalties; section inapplicable to peace officer.

Sec. 40112. (1) An individual shall not obstruct or interfere in the lawful taking of animals or fish by another individual.

(2) An individual violates this section when the individual intentionally or knowingly does any of the following:

(a) Drives or disturbs animals or fish for the purpose of disrupting a lawful taking.

(b) Blocks, impedes, or harasses another individual who is engaged in the process of lawfully taking an animal or fish.

(c) Uses a natural or artificial visual, aural, olfactory, gustatory, or physical stimulus or an unmanned vehicle or unmanned device that uses aerodynamic forces to achieve flight or that operates on the surface of the water or underwater, to affect animal or fish behavior in order to hinder or prevent the lawful taking of an animal or a fish.

(d) Erects barriers to deny ingress or egress to areas where the lawful taking of animals or fish may occur. This subdivision does not apply to an individual who erects barriers to prevent trespassing on his or her property.

(e) Interjects himself or herself into the line of fire of an individual lawfully taking wildlife.

(f) Affects the condition or placement of personal or public property intended for use in the lawful taking of an animal or a fish in order to impair the usefulness of the property or prevent the use of the property.

(g) Enters or remains upon private lands without the permission of the owner or the owner's agent, for the purpose of violating this section.

(h) Engages in any other act or behavior for the purpose of violating this section.

(3) Upon petition of an aggrieved person or an individual who reasonably may be aggrieved by a violation of this section, a court of competent jurisdiction, upon a showing that an individual was engaged in and threatens to continue to engage in illegal conduct under this section, may enjoin that conduct.

(4) An individual who violates this section is guilty of a misdemeanor punishable by imprisonment for not more than 93 days or a fine of not less than $500.00 or more than $1,000.00, or both, and the costs of prosecution. An individual who violates this section a second or subsequent time is guilty of a misdemeanor punishable by imprisonment for not more than 1 year or a fine of not less than $1,000.00 or more than $2,500.00, or both, and the costs of prosecution. In addition to the penalties provided for in this subsection, any permit or license issued by the department authorizing the individual to take animals or fish shall be revoked. A prosecution under this section does not preclude prosecution or other action under any other criminal or civil statute.

(5) This section does not apply to a peace officer while the peace officer performs his or her lawful duties.

History: Add. 1995, Act 57, Imd. Eff. May 24, 1995;—Am. 1996, Act 316, Eff. July 1, 1996;—Am. 2015, Act 12, Eff. July 13, 2015

324.40113 Artificial light.

Sec. 40113. (1) Except as otherwise provided in a department order authorized under section 40107 for a specified animal, a person shall not use an artificial light in taking game or in an area frequented by animals; throw or cast the rays of a spotlight, headlight, or other artificial light in a field, woodland, or forest while having a bow or firearm or other weapon capable of shooting a projectile in the person's possession or under the person's control unless otherwise permitted by law. A licensed hunter may use an artificial light 1 hour before and 1 hour after shooting hours while in possession of any unloaded firearm or bow and traveling afoot to and from the licensed hunter's hunting location.

(2) Except as otherwise provided in a department order authorized under section 40107, a person shall not throw, cast, or cause to be thrown or cast, the rays of an artificial light from December 1 to October 31 between the hours of 11 p.m. and 6 a.m. for the purpose of locating animals. Except as otherwise permitted by law or an order of the department, from November 1 to November 30, a person shall not throw, cast, or cause to be thrown or cast, the rays of a spotlight, headlight, or other artificial light for the purpose of locating animals. This subsection does not apply to any of the following:

(a) A peace officer while in the performance of the officer's duties.

(b) A person operating an emergency vehicle in an emergency.

(c) An employee of a public or private utility while working in the scope of his or her employment.

(d) A person operating a vehicle with headlights in a lawful manner upon a street, highway, or roadway.

(e) A person using an artificial light to identify a house or mailbox number.

(f) The use of artificial lights used to conduct a census by the department.

(g) A person using an artificial light from November 1 to November 30 on property that is owned by that person or by a member of that person's immediate family.

(3) The operator of a vehicle from which the rays of an artificial light have been cast in a clear attempt to locate game shall immediately stop the vehicle upon the request of a uniformed peace officer or when signaled by a peace officer with a flashing signal light or siren from a marked patrol vehicle.

324.40113a Legislative findings and declarations; taking of game; issuance of orders; right to hunt, fish, and take game.

Sec. 40113a. (1) The legislature finds and declares that:

(a) The fish and wildlife populations of the state and their habitat are of paramount importance to the citizens of this state.

(b) The conservation of fish and wildlife populations of the state depend upon the wise use and sound scientific management of the state's natural resources.

(c) The sound scientific management of the fish and wildlife populations of the state, including hunting of bear, is declared to be in the public interest.

(d) The sound scientific management of bear populations in this state is necessary to minimize human and bear encounters and to prevent bears from threatening or harming humans, livestock, and pets.

(2) The commission has the exclusive authority to regulate the taking of game as that term is defined in section 40103 and to regulate sport fishing under part 487 in this state, including, but not limited to, regulating the use of commercial hunting guides or sport fishing guides in taking game and fish. The commission shall, to the greatest extent practicable, utilize principles of sound scientific management in making decisions regarding the taking of game. The commission may take testimony from department personnel, independent experts, and others, and review scientific literature and data, among other sources, in support of its duty to use principles of sound scientific management. The commission shall issue orders regarding the taking of game following a public meeting and an opportunity for public input. Not less than 30 days before issuing an order, the commission shall provide a copy of the order to each of the following:

(a) Each member of each standing committee of the senate or house of representatives that considers legislation pertaining to conservation, the environment, natural resources, recreation, tourism, or agriculture.

(b) The chairperson of the senate appropriations committee and the chairperson of the house of representatives appropriations committee.

(c) The members of the subcommittee of the senate appropriations committee and the subcommittee of the house of representatives appropriations committee that consider the budget of the department of natural resources.

(3) The legislature declares that hunting, fishing, and the taking of game are a valued part of the cultural

heritage of this state and should be forever preserved. The legislature further declares that these activities play an important part in the state's economy and in the conservation, preservation, and management of the state's natural resources. Therefore, the legislature declares that the citizens of this state have a right to hunt, fish, and take game, subject to the regulations and restrictions prescribed by subsection (2) and law.

History: Add. 1996, Act 377, Eff. Dec. 5, 1996;—Am. 1997, Act 19, Imd. Eff. June 12, 1997;—Am. 2013, Act 21, Imd. Eff. May 8, 2013;—Am. 2013, Act 22, Imd. Eff. May 8, 2013;—Am. 2014, Act 281, Eff. Mar. 31, 2015;—Am. 2016, Act 382, Imd. Eff. Dec. 22, 2016;—Am. 2023, Act 222, Eff. Feb. 20, 2024.

Compiler's note: This section, as added by Act 377 of 1996, was submitted to, and approved by, the electors of the state at the general election held on November 5, 1996.

Enacting section 1 of Act 281 of 2014 provides:

"Enacting section 1. This act reenacts all or portions of 2012 PA 520, 2013 PA 21, 2013 PA 22 and 2013 PA 108. If any portions of 2012 PA 520 or 2013 PA 21 or 2013 PA 22 or 2013 PA 108 not amended by this act are invalidated pursuant to referendum or any other reason, then any such invalidated portions of 2012 PA 520, 2013 PA 21, 2013 PA 22 and 2013 PA 108 which are otherwise included in this act, shall be deemed to be reenacted pursuant to this act."

Enacting section 2 of Act 281 of 2014 provides:

"Enacting section 2. If any part or parts of this act are found to be in conflict with the state constitution of 1963, the United States constitution, or federal law, this act shall be implemented to the maximum extent that the state constitution of 1963, the United States constitution, and federal law permit. Any provision held invalid or inoperative shall be severable from the remaining portions of this act."

Public Act 281 of 2014 was proposed by initiative petition pursuant to Const 1963, art II, § 9. The initiative petition was approved by an affirmative vote of the majority of the Senate on August 13, 2014 and by the House of Representatives on August 27, 2014. The initiative petition was filed with the Secretary of State on August 27, 2014.

In Keep Michigan Wolves Protected v State of Michigan, an unpublished opinion issued November 22, 2016, (Docket No. 328604), the Michigan Court of Appeals held that 2014 PA 281, which amended sections of the natural resources and environmental protection act, 1994 PA 451, MCL 324.101 to 324.90106, is unconstitutional as it violates the title-object clause of section 24 of article IV of the state constitution of 1963.

Popular name: NREPA

324.40114 Permits or licenses; issuance to individual who is paraplegic, amputee, or permanently disabled; taking of game with modified bow; permits for additional activities; activities not considered hunting; suspension, revocation, annulment, withdrawal, recall, cancellation, or amendment of permit; disposition of fees; report; sterilization of game; deer management zones; ordinance; "cub bear" defined.

Sec. 40114. (1) The department may issue a permit to an individual who is unable to walk because the individual is a paraplegic or an amputee or because of a disease or injury that has rendered the individual permanently disabled. A permit issued under this subsection authorizes the individual to take game during the open season for that game, including deer of either sex, from or upon a standing vehicle if that individual holds a license to take that game issued under part 435 and complies with all other laws and rules for the taking of game.

(2) The department may issue a permit to an individual who is permanently disabled, who has full use of only 1 arm, and who upon investigation is unable to hold, aim, and shoot a bow. A permit issued under this subsection authorizes the individual to take game during the open season for that game with a bow that has been modified so that the bow may be held, aimed, and shot with 1 arm, if that individual holds a license to take that game issued under part 435 and complies with all other laws and rules for the taking of game.

(3) The commission may issue an order under section 40113a regulating the taking of game with a modified bow that may be shot with 1 arm. Subsection (2) does not apply on or after the effective date of such an order.

(4) In addition, the department may issue permits authorizing 1 or more of the following:

(a) The taking or possession of animals for the purpose of rehabilitating animals.

(b) The taking of animals to prevent or control damage to crops or feed, disease, or nuisance caused by the animals. The taking of animals to prevent or control damage to crops or feed is subject to the following:

(*i*) Except during an open season for deer, deer may be taken under this subdivision if the department determines that deer have caused damage to emerging, standing, or harvested crops or to feed properly stored in accordance with normal agricultural practices. If the department receives a request for a permit to take deer under this subdivision, the department shall, within 5 business days after receiving the request, determine whether a permit should be issued. If the department determines that a permit should not be issued under this subdivision, the department shall deny the request in writing within 10 business days after receiving the request. In denying the request for a permit, the department shall advise the applicant on other techniques for controlling or preventing damage caused by deer.

(*ii*) A permittee under a deer damage shooting permit may designate not more than 15 authorized shooters to implement the provisions of the permit unless the department authorizes otherwise.

(*iii*) Except during an open season for bear, bear may be taken under this subdivision if the department determines that bear have caused damage to emerging, standing, or harvested crops or to feed properly stored in accordance with normal agricultural practices. If the department receives a request for a permit to take bear under this subdivision, the department shall, within 4 days after receiving the request, respond to the request and evaluate whether a permit should be issued. The department may, within 10 days after responding to the request for a permit, attempt or recommend that the applicant attempt other methods for controlling or preventing damage caused by bear, if the applicant is not required to pay for those methods. Within 10 days after responding to a request for a permit, the department shall grant or deny the request in writing. In denying the request for a permit, the department shall advise the applicant on other techniques for controlling or preventing damage caused by bear. A permittee under a bear damage shooting permit may allow only an individual with a bear hunting license issued under section 43528 for that bear management unit and calendar year to implement the provisions of this subdivision. If an individual takes a bear under this subdivision, that individual shall not take another bear under a bear hunting license issued under section 43528 during that calendar year. An individual implementing this section is subject to the rules and regulations for a bear hunting license issued under section 43528 except that individuals shall not use bait to take a bear under this subdivision. An individual shall not take a cub bear or a female bear accompanied by a cub bear under this subdivision. The department shall not allow more than 5% of the bear hunting licenses issued for a bear management unit to be used to implement the provisions of this subdivision. However, in a bear management unit that offers fewer than 20 licenses, the department may allow 1 of those bear hunting licenses to be used to implement this subdivision. If an individual takes a bear under this subdivision, that individual shall register that bear at a field office of the department within 72 hours after taking the bear.

(c) The collection, transportation, possession, or disposition of animals and parts of animals for scientific purposes.

(d) The public exhibition of animals.

(e) Taxidermy.

(f) The disposition of accidentally or unlawfully taken or injured animals or animals that are unlawfully possessed.

(g) The taking of game with a crossbow by an individual who is permanently or temporarily disabled.

(h) The taking or possession of raptors for the purposes of falconry.

(5) The taking of animals pursuant to a permit issued under subsection (4)(a), (b), (c), (d), (e), (f), or (h) is not considered hunting.

(6) A permit issued under this section may be suspended, revoked, annulled, withdrawn, recalled, canceled, or amended pursuant to the administrative procedures act of 1969, 1969 PA 306, MCL 24.201 to 24.328. If the holder of a permit is convicted of violating the permit or this section, his or her permit or license may be revoked and any animal and the parts of any animal in his or her possession shall be disposed of in a manner approved by the department.

(7) The department shall forward fees received for permits and licenses issued under this section to the state treasurer to be credited to the game and fish protection account of the Michigan conservation and recreation legacy fund provided for in section 2010.

(8) By March 30, 2018, the department shall issue a report in electronic form to each member of the legislature that includes all of the following:

(a) The number of bear damage shooting permits issued under subsection (4)(b)(*iii*).

(b) The number of bears taken under subsection (4)(b)(*iii*).

(c) Any recommendations for changes to the bear damage shooting permits under subsection (4)(b)(*iii*).

(9) Until April 1, 2022, the department shall not issue a permit authorizing the sterilization of game. The department shall submit, to the standing committees of the senate and house of representatives with primary responsibility for natural resources issues, 2 reports on the results of research under any permit authorizing the sterilization of game issued before the effective date of the amendatory act that added this subsection. A preliminary report shall be submitted by December 31, 2020 and a final report by March 31, 2022. The reports shall include any recommendations for legislation, including whether and how sterilization of deer should be authorized as a manner of taking game.

(10) The commission may establish, in or adjacent to urban areas with a high concentration of deer, special deer management zones for which a higher number of deer kill tags are issued.

(11) The legislative body of a municipality may by ordinance adopt a firearm hunting distance requirement shorter than the 150-yard requirement under section 40111 as part of a deer management plan. The 150-yard requirement under section 40111 does not apply in circumstances addressed by the ordinance.

(12) As used in this section, "cub bear" means a bear that is less than 1 year of age.

History: Add. 1995, Act 57, Imd. Eff. May 24, 1995;—Am. 2004, Act 587, Eff. Dec. 23, 2006;—Am. 2008, Act 169, Imd. Eff. July 2, 2008;—Am. 2009, Act 109, Imd. Eff. Oct. 1, 2009;—Am. 2010, Act 87, Imd. Eff. May 27, 2010;—Am. 2012, Act 65, Imd. Eff. Mar. 27, 2012;—Am. 2014, Act 407, Eff. Mar. 30, 2015;—Am. 2016, Act 356, Eff. Mar. 29, 2017;—Am. 2018, Act 390, Eff. Mar. 19, 2019.

Compiler's note: Enacting section 2 of Act 587 of 2004 provides:

"Enacting section 2. This amendatory act does not take effect unless House Joint Resolution Z of the 92nd Legislature becomes a part of the state constitution of 1963 as provided in section 1 of article XII of the state constitution of 1963."

Popular name: Act 451

Popular name: NREPA

324.40115 Possession of certain game killed in collision with motor vehicle.

Sec. 40115. (1) Subject to subsections (9) and (10), an individual may possess game, other than badger, bobcat, brant, coot, crow, cub bear, duck, elk, fisher, Florida gallinule, geese, marten, moose, otter, snipe, sora rail, spotted fawn deer, Virginia rail, wild turkey, wolf, and woodcock, that is either killed by, or injured and euthanized as allowed under law following, a collision with a motor vehicle. The driver of the motor vehicle has first priority to take possession of the game.

(2) An individual in possession of deer under subsection (1) shall do 1 of the following:

(a) Obtain a salvage tag under subsection (8).

(b) Promptly notify the department or a local law enforcement agency of his or her intent to maintain possession of the game under subsection (1) by telephone or on the department's website.

(c) If the individual is the driver of the motor vehicle involved in the collision and as a result of that collision is calling 9-1-1 to report the collision, the individual must state his or her intent to maintain possession of the game under subsection (1).

(3) An individual in possession of beaver, coyote, fox, mink, muskrat, opossum, raccoon, skunk, weasel, or small game under subsection (1) shall prepare a written record with all of the following information:

(a) The date and time the individual took possession of the game.

(b) The location where the possession of the game occurred.

(c) The type of game the individual seeks to possess.

(d) Whether the individual has requested a salvage tag under subsection (8).

(e) The individual's full name, including middle initial, date of birth, mailing address, telephone number, and driver license number.

(f) The intended purpose for obtaining possession of the game, including, but not limited to, human consumption, bait, or other uses.

(4) An individual in possession of bear under subsection (1) shall obtain a salvage tag for that bear under subsection (8).

(5) If an individual notifies 9-1-1, the department, or a local law enforcement agency under subsection (2) of his or her intent to legally maintain possession of the game under subsection (1), that individual shall provide 9-1-1, the department, or the local law enforcement agency with the following information:

(a) The date and time the individual took possession of the game.

(b) The location where the possession of the game occurred.

(c) The type of game the individual seeks to possess. If the game is a deer, identify whether the deer is an antlered deer or antlerless deer. If it is an antlered deer, identify the number of antler points.

(d) Whether the individual has requested a salvage tag under subsection (8).

(e) The individual's full name, including middle initial, date of birth, mailing address, telephone number, and driver license number.

(f) The intended purpose for obtaining possession of the game, including, but not limited to, human consumption, bait, or other uses.

(6) For beaver, coyote, fox, mink, muskrat, opossum, raccoon, skunk, weasel, and small game, an individual shall maintain the written record prepared under subsection (3) until the individual obtains a salvage tag under subsection (8) or until the game and its parts are consumed, are composted, or are no longer possessed by any person. The record shall be kept at the location where the game or its parts are kept. The individual shall exhibit the record upon request of a law enforcement officer.

(7) An individual in possession of game under subsection (1) who has obtained a salvage tag under subsection (2), (4), or (8) shall upon the request of a conservation officer or peace officer produce the salvage tag. Immediately following the issuance of a salvage tag, an individual possessing game shall securely attach the salvage tag to the game. The salvage tag shall remain attached until the game is processed, butchered for consumption, or delivered to a business for the purpose of taxidermy or tanning. If the game is used for bait, the salvage tag may be removed, but the individual possessing that game shall produce the salvage tag if requested by a conservation officer or peace officer.

(8) The department shall promptly issue a salvage tag if requested by an individual in possession of game under subsection (1).

(9) The director may immediately suspend all salvage mechanisms for disease-affected areas by issuing an order based on sound science to address disease control. The department shall provide public notice of that order and notify the legislative committees with primary oversight of natural resources before issuing that order. The director shall revoke the suspension after the department verifies the absence of the identified disease in the affected area. The department shall provide public notice of the suspension and of the revocation of the suspension by posting notice on the department's website and at department offices throughout the disease-affected areas.

(10) This section does not apply to an individual who intentionally uses a motor vehicle to kill or injure game.

(11) The department shall annually issue a report in electronic form to each member of the legislature that includes all of the following:

(a) The number of salvage tags issued under subsection (8).

(b) The number of animals reported to the department under subsection (2)(b).

(c) If available, the number of animals reported to local law enforcement agencies or 9-1-1 under subsection (2)(b) and (c).

History: Add. 2014, Act 255, Eff. Sept. 28, 2014.

Compiler's note: Former MCL 324.40115, which pertained to issuance of permit to person with a disability, was repealed by Act 347 of 2000, Eff. July 1, 2000.

Popular name: Act 451

Popular name: NREPA

324.40116 Hunter orange or other authorized color; exceptions; noncompliance not as evidence of contributory negligence; review and determination by commission; "hunter orange" and "hunter pink" defined.

Sec. 40116. (1) An individual shall not take game during the established daylight shooting hours from August 15 through April 30 unless the individual wears a cap, hat, vest, jacket, or rain gear of hunter orange or a color authorized by the commission under subsection (4). Hunter orange or a color authorized by the commission under subsection (4) includes camouflage that is not less than 50% hunter orange or a color authorized by the commission under subsection (4). The garments that are hunter orange or a color authorized by the commission under subsection (4) must be the hunter's outermost garment and be visible from all sides of the hunter.

(2) Subsection (1) does not apply to an individual engaged in the taking of deer with a bow or crossbow during archery deer season, an individual taking bear with a bow or crossbow, an individual engaged in the taking of turkey or migratory birds other than woodcock, an individual engaged in the sport of falconry, or an individual who is stationary and in the act of hunting bobcat, coyote, or fox.

(3) The failure of an individual to comply with this section is not evidence of contributory negligence in a civil action for injury to the individual or for the individual's wrongful death.

(4) The commission shall review and determine whether hunter pink or any additional colors are effective and safe for individuals to wear while hunting. By October 1, 2017, the commission shall issue an order under section 40113a authorizing what additional garment colors may be worn under subsection (1) based on the determination made by the commission under this subsection.

(5) As used in this section:

(a) "Hunter orange" means the highly visible color commonly referred to as hunter orange and includes blaze orange, flame orange, and fluorescent blaze orange.

(b) "Hunter pink" means the highly visible color commonly referred to as hunter pink and includes blaze pink, flame pink, and fluorescent blaze pink.

324.40118 Violation as misdemeanor; penalty; additional penalties.

Sec. 40118. (1) An individual who violates this part, an order or interim order issued under this part, or a condition of a permit issued under this part, except for a violation specified in subsections (2) to (19), is guilty of a misdemeanor punishable by imprisonment for not more than 90 days or a fine of not less than $50.00 or more than $500.00, or both, and the costs of prosecution. In addition, a permit issued by the department under this part must be revoked pursuant to the administrative procedures act of 1969, 1969 PA 306, MCL 24.201 to 24.328.

(2) An individual who violates a provision of this part or an order or interim order issued under this part regarding the possession or taking of any game, except deer, bear, wild turkey, wolf, waterfowl, moose, or elk, is guilty of a misdemeanor punishable by imprisonment for not more than 90 days or a fine of not less than $100.00 or more than $1,000.00, or both, and the costs of prosecution.

(3) Except as otherwise provided in this subsection or subsection (19), an individual who violates a provision of this part or an order or interim order issued under this part regarding the possession or taking of deer, bear, wild turkey, or wolf is guilty of a misdemeanor and may be imprisoned for not more than 90 days, shall be fined not less than $200.00 or more than $1,000.00, and shall be ordered to pay the costs of prosecution. An individual shall not be punished under this subsection for lawfully removing, capturing, or destroying a wolf under 2008 PA 290, MCL 324.95151 to 324.95155, or 2008 PA 318, MCL 324.95161 to 324.95167.

(4) An individual who violates a provision of this part or an order or interim order issued under this part regarding the possession or taking of elk is guilty of a misdemeanor punishable by imprisonment for not more than 180 days or a fine of not less than $500.00 or more than $2,000.00, or both, and the costs of prosecution.

(5) An individual who violates a provision of this part or an order or interim order issued under this part regarding the possession or taking of moose is guilty of a misdemeanor punishable by imprisonment for not more than 1 year and a fine of not less than $1,000.00 or more than $5,000.00, and the costs of prosecution.

(6) An individual who violates a provision of this part or an order or interim order issued under this part regarding the possession or taking of waterfowl is guilty of a misdemeanor punishable by imprisonment for not more than 90 days or a fine of not less than $250.00 or more than $500.00, or both, and the costs of prosecution. An individual who violates a provision of this part or an order or interim order issued under this part regarding the possession or taking of waterfowl a second or subsequent time is guilty of a misdemeanor punishable by imprisonment for not more than 90 days or a fine of $500.00, or both, and the costs of prosecution.

(7) An individual sentenced under subsection (3), (14), or (15) shall not secure or possess a license of any kind to hunt during the remainder of the year in which convicted and the next 3 succeeding calendar years. An individual sentenced under subsection (11) shall not secure or possess a license to hunt during the remainder of the year in which convicted and the next succeeding calendar year, or longer in the discretion of the court.

(8) In addition to the penalties provided for violating this part or an order issued under this part, an individual convicted of the illegal killing, possessing, purchasing, or selling of a bear or an antlered white-tailed deer is subject to the following penalties:

(a) For a first offense, the individual shall not secure or possess a license of any kind to hunt for an additional 2 calendar years after the penalties imposed under subsection (7).

(b) For a second or subsequent offense, the individual shall not secure or possess a license of any kind to hunt for an additional 7 calendar years after the penalties imposed under subsection (7).

(9) In addition to the penalties provided for violating this part or an order issued under this part, an individual convicted of the illegal killing, possessing, purchasing, or selling of a wild turkey shall not secure or possess a license of any kind to hunt for an additional 2 calendar years after the penalties imposed under subsection (7).

(10) An individual sentenced under subsection (4) or (5) is subject to the following penalties:

(a) For a first offense, the individual shall not secure or possess a license of any kind to hunt for the remainder of the year in which convicted and the next 15 succeeding calendar years.

(b) For a second offense, the individual shall not secure or possess a license of any kind to hunt for the remainder of that individual's life.

(11) An individual who violates section 40113(1) is guilty of a misdemeanor punishable by imprisonment for not more than 90 days or a fine of not less than $100.00 or more than $500.00, or both, and the costs of prosecution.

(12) An individual who violates section 40113(2) is guilty of a misdemeanor punishable by imprisonment for not more than 90 days or a fine of not less than $50.00 or more than $500.00, or both, and the costs of prosecution.

(13) An individual who violates section 40113(3) is guilty of a misdemeanor punishable by imprisonment for not more than 90 days or a fine of not less than $100.00 or more than $500.00, or both, and the costs of prosecution.

(14) An individual who violates a provision of this part or an order or interim order issued under this part regarding the taking or possession of an animal that has been designated by the department to be a protected animal, other than an animal that appears on a list prepared under section 36505, is guilty of a misdemeanor punishable by imprisonment for not more than 90 days or a fine of not less than $100.00 or more than $1,000.00, or both, and the costs of prosecution.

(15) An individual who buys or sells game or a protected animal in violation of this part or an order or interim order issued under this part is guilty of a misdemeanor punishable by imprisonment for not more than 90 days or a fine of not more than $1,000.00, or both, for the first offense, and is guilty of a felony for each subsequent offense.

(16) An individual who willfully violates a provision of this part or an order or interim order issued under this part by using an illegally constructed snare or cable restraint is guilty of a misdemeanor punishable by imprisonment for not more than 90 days or a fine of $1,000.00 for the first illegally constructed snare or cable restraint and $250.00 for each subsequent illegally constructed snare or cable restraint, or both, and the costs of prosecution.

(17) An individual who violates a provision of this part or an order or interim order issued under this part regarding the importation of a cervid carcass or parts of a cervid carcass, other than hides, deboned meat, quarters or other parts of a cervid that do not have any part of the spinal column or head attached, finished taxidermy products, cleaned teeth, antlers, or antlers attached to a skullcap cleaned of brain and muscle tissue, from another state or province is guilty of a misdemeanor punishable by imprisonment for not more than 90 days or a fine of not less than $500.00 or more than $2,000.00, or both, and the costs of prosecution.

(18) If an individual is convicted of a violation of this part or an order or interim order issued under this part and it is alleged in the complaint and proved or admitted at trial or ascertained by the court after conviction that the individual had been previously convicted 2 times within the preceding 5 years for a violation of this part or an order or interim order issued under this part, the individual is guilty of a misdemeanor punishable by imprisonment for not more than 180 days or a fine of not less than $500.00 or more than $2,000.00, or both, and the costs of prosecution.

(19) An individual who violates a provision of this part or an order or interim order issued under this part regarding any of the following is responsible for a state civil infraction and may be ordered to pay a civil fine of not more than $150.00:

(a) Attaching that individual's name, driver license number, or sportcard number to a ground blind.

(b) Attaching that individual's name, driver license number, or sportcard number to a tree stand, scaffold, or raised platform.

(c) Supplemental feeding of deer.

(d) Reporting of a deer harvest or retention of a deer harvest confirmation number.

Compiler's note: Enacting section 2 of Act 124 of 2017 provides:
"Enacting section 2. This amendatory act may be referred to as the "John Kivela amendatory act"."

Popular name: Act 451

Popular name: NREPA

324.40119 Reimbursement of state for value of game or protected animal; restitution for illegal killing, possessing, purchasing, or selling antlered white-tailed deer, antlered elk, antlered moose, and turkey with beard; forfeiture; default as civil contempt; additional time for payment; reduction of amount forfeited; revocation of forfeiture; collection of default in payment; disposition of forfeiture damages; "point" defined.

Sec. 40119. (1) In addition to the penalties provided for violating this part or an order issued under this part, and the penalty provided in section 36507, an individual convicted of the illegal killing, possessing, purchasing, or selling of game or protected animals, in whole or in part, shall reimburse the state for the value of the game or protected animal as follows:

(a) Elk, $5,000.00 per animal.
(b) Moose, $5,000.00 per animal.
(c) Bear, $3,500.00 per animal.
(d) Eagle, $1,500.00 per animal.
(e) Hawk or any animal that appears on a list specified in section 36505, $1,500.00 per animal.
(f) Deer, owl, and wild turkey, $1,000.00 per animal.
(g) Waterfowl, $500.00 per animal.
(h) Other game not listed in subdivisions (a) to (g), not less than $100.00 or more than $500.00 per animal.
(i) Other protected animals, $100.00 per animal.

(2) In addition to the restitution value established in subsection (1), an individual convicted of the illegal killing, possessing, purchasing, or selling of an antlered white-tailed deer also shall pay an additional restitution value that is equal to $1,000.00 plus 1 of the following:

(a) For an antlered white-tailed deer with at least 8 but not more than 10 points, $500.00 for each point.
(b) For an antlered white-tailed deer with 11 or more points, $750.00 for each point.

(3) In addition to the restitution value established in subsection (1), an individual convicted of the illegal killing, possessing, purchasing, or selling of an antlered elk shall pay an additional restitution value that is equal to 1 of the following:

(a) For an antlered elk with at least 8 but not more than 10 points, $250.00 for each point.
(b) For an antlered elk with 11 or more points, $500.00 for each point.

(4) In addition to the restitution value established in subsection (1), an individual convicted of the illegal killing, possessing, purchasing, or selling of an antlered moose shall pay an additional restitution value that is equal to $5,000.00.

(5) In addition to the restitution value established in subsection (1), an individual convicted of the illegal killing, possessing, purchasing, or selling of a turkey with a beard shall pay an additional restitution value of $1,000.00.

(6) The court in which a conviction for a violation described in subsections (1) to (5) is obtained shall order the defendant to forfeit to the state a sum as set forth in subsections (1) to (5). If 2 or more defendants are convicted of the illegal killing, possessing, purchasing, or selling, in whole or in part, of game or protected animals listed in subsections (1) to (5), the forfeiture prescribed shall be declared against them jointly.

(7) If a defendant fails to pay upon conviction the sum ordered by the court to be forfeited, the court shall either impose a sentence and, as a condition of the sentence, require the defendant to satisfy the forfeiture in the amount prescribed and fix the manner and time of payment, or make a written order permitting the defendant to pay the sum to be forfeited in installments at those times and in those amounts that, in the opinion of the court, the defendant is able to pay.

(8) If a defendant defaults in payment of the sum forfeited or of an installment, the court on motion of the department or upon its own motion may require the defendant to show cause why the default should not be treated as a civil contempt, and the court may issue a summons or warrant of arrest for his or her appearance. Unless the defendant shows that the default was not due to an intentional refusal to obey the order of the court or to a failure to make a good-faith effort to obtain the funds required for the payment, the court shall find that the default constitutes a civil contempt.

(9) If it appears that the defendant's default in the payment of the forfeiture does not constitute civil contempt, the court may enter an order allowing the defendant additional time for payment, reducing the amount of the forfeiture or of each installment, or revoking the forfeiture or the unpaid portion of the forfeiture, in whole or in part.

(10) A default in the payment of the forfeiture or an installment payment may be collected by any means authorized for the enforcement of a judgment under chapter 60 of the revised judicature act of 1961, 1961 PA 236, MCL 600.6001 to 600.6098.

(11) A court receiving forfeiture damages shall remit the damages to the county treasurer, who shall deposit the damages with the state treasurer, who shall deposit the damages in the game and fish protection account established in section 2010.

(12) As used in this section, "point" means a projection on the antler of a white-tailed deer or elk that is at least 1 inch long as measured from its tip to the nearest edge of the antler beam.

History: Add. 1995, Act 57, Imd. Eff. May 24, 1995;—Am. 2004, Act 587, Eff. Dec. 23, 2006;—Am. 2013, Act 175, Eff. Feb. 25, 2014;—Am. 2015, Act 187, Eff. Feb. 14, 2016.

Compiler's note: Enacting section 2 of Act 587 of 2004 provides:

"Enacting section 2. This amendatory act does not take effect unless House Joint Resolution Z of the 92nd Legislature becomes a part of the state constitution of 1963 as provided in section 1 of article XII of the state constitution of 1963."

Popular name: NREPA

324.40120 Michigan big game trophy records; official keeper; recognition.

Sec. 40120. The department shall recognize commemorative bucks of Michigan, inc., as the official keeper of Michigan big game trophy records for deer, bear, elk, and turkey.

History: Add. 2006, Act 145, Imd. Eff. May 22, 2006.

Popular name: Act 451

Popular name: NREPA

PART 403
WILDLIFE PRESERVATION

324.40301 Sale of items signifying interest in wildlife preservation.

Sec. 40301. The department may issue for sale to the public a stamp, decal, medallion, or other item of personal property intended to signify the interest of the purchaser in contributing to wildlife preservation.

History: Add. 1995, Act 57, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.40302 Use of net proceeds.

Sec. 40302. Net proceeds from the sale of an item authorized by this part shall be used by the department exclusively for wildlife research and habitat improvement for nongame wild animals or designated endangered species or designated plant species.

History: Add. 1995, Act 57, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.40303 Rights and privileges; marketing items.

Sec. 40303. The department may attach such rights and privileges to the items sold as will best serve the interests of wildlife preservation and shall market the items without the use of general fund appropriation.

History: Add. 1995, Act 57, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

PART 405
WILDLIFE RESTORATION, MANAGEMENT, AND RESEARCH

324.40501 Wildlife restoration, management, and research projects; authority of department to cooperate with federal government; use of hunters' license fees; expenditures for game and fish habitat.

Sec. 40501. The department shall perform such acts as may be necessary to conduct and establish wildlife restoration, management, and research projects and areas in cooperation with the federal government under the Pittman-Robertson wildlife restoration act, 16 USC 669 to 669i, and regulations promulgated by the United States secretary of the interior under that act. In compliance with that act, funds accruing to this state from license fees paid by hunters shall not be used for any purpose other than game and fish activities under the administration of the department. The department shall manage land acquired with money received under the Pittman-Robertson wildlife restoration act, 16 USC 669 to 669i, to manage game and fish habitat or to increase recreational hunting, fishing, and shooting opportunities. Expenditures to enhance game and fish habitat must be primarily for the management of game species, but may benefit nongame species.

History: Add. 1995, Act 57, Imd. Eff. May 24, 1995;—Am. 2008, Act 416, Imd. Eff. Jan. 6, 2009;—Am. 2018, Act 238, Eff. Sept. 25, 2018.

PART 409
HOMING PIGEONS

324.40901 Homing pigeons; prohibited acts.

Sec. 40901. A person shall not at any time of the year or in any manner, hunt, take, pursue, capture,

wound, kill, maim, or disfigure the homing pigeons of another person.

History: Add. 1995, Act 57, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.40902 Homing pigeons; use of certain devices prohibited.

Sec. 40902. A person shall not at any time make use of any pit, pitfalls, deadfall, scaffold, cage, snarl, trap, net, baited hook, or any similar device, or any drug poison, chemical, or explosive for the purpose of injuring, capturing, or killing a homing pigeon of another person.

History: Add. 1995, Act 57, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.40903 Violation of part as misdemeanor; penalty.

Sec. 40903. A person who violates this part, upon conviction of a first offense, is guilty of a misdemeanor, punishable by imprisonment for not more than 90 days, or a fine of not less than $25.00 or more than $100.00 and the cost of prosecution, or both.

History: Add. 1995, Act 57, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

PART 411
PROTECTION AND PRESERVATION OF FISH, GAME, AND BIRDS

324.41101 Definitions.

Sec. 41101. As used in this part:

(a) "Area" means the whole of the state and the whole or any designated portion of any township or townships or county or counties within the state.

(b) "Waters" means any inland lake, stream, river, pond, or other body of water including the Great Lakes and connecting waters, any part or portion of such waters, and any and all chains, systems, or combinations of such waters, in any township or townships or county or counties, within this state, and in which any species of fish or waterfowl are protected by the laws of this state.

History: Add. 1995, Act 57, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.41102 Regulatory powers of department; exception.

Sec. 41102. (1) The department, in accordance with this part, may regulate the taking or killing of all fish, game and fur-bearing animals, and game birds protected by the laws of this state, and may suspend or abridge the open season provided by law for the taking or killing of such fish, animals, or game birds in any designated waters or area of this state, if in the opinion of the department it is necessary to assist in the increased or better protection of the fish, game or fur-bearing animals, or game birds, or any particular kinds or species of fish, game or fur-bearing animals, or game birds, which may in the opinion of the department be threatened from any cause or causes with depletion or extermination in the waters or area. The department may promulgate rules and orders necessary to implement this part after a thorough investigation has been made by the department.

(2) This section does not apply to privately owned cervidae species located on a registered cervidae livestock facility or involved in a registered cervidae livestock operation under the privately owned cervidae producers marketing act.

History: Add. 1995, Act 57, Imd. Eff. May 24, 1995;—Am. 2000, Act 191, Eff. June 1, 2001.

Popular name: Act 451

Popular name: NREPA

324.41103 Orders protecting fish, animals, or birds; provisions; duration; notice; newspaper publication; filing; printing order in Michigan fish and game laws; fisheries research; experimental game management areas; notice of availability of annual sports fishing handbook and amendments, corrections, or additions thereto.

Sec. 41103. (1) If the department determines that any fish, game or fur-bearing animals, or game birds of

any kind or species are in danger of depletion or extermination and require additional protection in any designated waters or area within the state, the department may issue an order suspending or abridging the open season on fish, game or fur-bearing animals, or game birds, or may regulate their taking or killing in the waters or area as the department considers necessary for the further protection of fish, game or fur-bearing animals, or game birds in those waters or areas. The orders shall clearly specify the manner and condition relative to the taking or killing. The orders shall clearly and distinctly describe and set forth the waters or area affected by each order, and whether the order is applicable to all fish, game or fur-bearing animals, or game birds, or only to certain kinds or species designated in the order, and shall also clearly specify and set forth the length of time during which the order shall remain in effect. However, an order shall not remain in effect for more than 5 years. The public shall be notified of orders changing the rules pertaining to hunting, fishing, or trapping in the annual hunting, fishing, and trapping guides available by licensed agents of the department and field offices of the department or the department may publish the orders at least 21 days but not more than 60 days prior to taking effect, and at least once annually while in force, in at least 1 newspaper in each county, if a newspaper is published in a county, the whole or any portion of which is affected by the order. The first newspaper publication shall appear at least once each week for 3 successive weeks. A copy of the order as printed in the newspaper shall be filed with the clerk of each county. Proof by affidavit of the newspaper publication or other form of publication allowed in this section shall be filed with the department, and a copy of the order, while it is in force and effect, shall be included and printed in the authorized biennial compilation of the Michigan fish and game laws. The original of all orders on file in the Lansing office of the department shall be under the seal of the department and shall bear the signatures of the chairperson and secretary of the commission and shall be countersigned by the department. The department shall establish the seasons, size limits, creel limits, and methods of taking fish in certain designated inland lakes not to exceed 20 in number at any 1 time and in certain designated streams or portions of streams not to exceed 10 in number at any 1 time for the purpose of fisheries research. The department may establish not more than 1 experimental game management area that shall not exceed 40,000 acres in size, 4 experimental game management areas not to exceed 5,000 acres each in size, and 1 experimental game management area that shall include Beaver island in its entirety and the 4 islands that comprise the Little Beaver islands state game area. The department shall establish rules and orders governing the kind of game that may be taken in the areas designated in this subsection and the time, place, and manner or method of the taking.

(2) The department shall publish annually in 1 or more newspapers of general circulation in this state notice of the availability of the annual sports fishing handbook. The published notice shall inform the public of when, where, and how the annual sports fishing handbook may be obtained.

(3) The department shall notify the public of an amendment, correction, or addition to the annual sports fishing handbook in the same manner as provided for newspaper publication in subsection (1).

History: Add. 1995, Act 57, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.41104 Suspended open season; rescission or modification; exception.

Sec. 41104. If the open season during which any species of fish, game or fur-bearing animals, or game birds may be taken or killed has been suspended or abridged in any waters or area by an order of the department as provided in this part, if that order is still in force, and if it appears to the department that the conditions existing in the waters or area affected by the order no longer require that additional protection for those species, then the department shall cause a thorough investigation to be made of the waters or area and the conditions prevailing in the waters or area. If after the investigation the department is satisfied that because of the increase of the fish, game or fur-bearing animals, or game birds protected by the order in the waters or area, or because of the removal of the cause threatening those species with depletion or extermination, the additional protection afforded by the order is no longer needed, the department may rescind or modify the original order. Notices of the rescinding or modifying of the order shall be published in the same manner as notice of the original order and filed in the same manner in the office of the clerk of each county. This part does not suspend, abridge, or regulate the open seasons established by law for the taking of fish for commercial purposes from the waters of Lakes Superior, Michigan, Huron, and Erie, and the bays of those waters.

History: Add. 1995, Act 57, Imd. Eff. May 24, 1995.

Popular name: Act 451

Popular name: NREPA

324.41105 Violation as misdemeanor; penalty.

Sec. 41105. A person who takes or kills any fish, game, fur-bearing animal, or game bird, contrary to an order issued or rule promulgated under this part, or who violates this part, is guilty of a misdemeanor, punishable for the first offense by imprisonment for not more than 60 days or a fine of not more than $100.00. For each offense that is charged as a second or subsequent offense, the person is guilty of a misdemeanor, punishable by imprisonment for not more than 90 days or a fine of not less than $50.00 or more than $250.00.

History: Add. 1995, Act 57, Imd. Eff. May 24, 1995;—Am. 2020, Act 385, Eff. Mar. 24, 2021.

Popular name: Act 451

Popular name: NREPA

PART 413

TRANSGENIC AND NONNATIVE ORGANISMS

324.41301 Definitions; possession of live organism.

Sec. 41301. (1) As used in this part:

(a) "Amphibian" means any frog, toad, or salamander of the class Amphibia.

(b) "Aquatic", except as used in subdivision (q), describes an amphibian, crustacean, fish, mollusk, reptile, wiggler, or aquatic plant.

(c) "Aquatic plant" means a submergent, emergent, obligate wetland, facultative wetland, or floating-leaf plant or a fragment thereof, including a seed or other propagule. Aquatic plant does not include wild rice (*Zizania aquatica* or *Zizania palustris*).

(d) "Crustacean" means freshwater crayfish, shrimp, or prawn of the order Decapoda.

(e) "Genetically engineered" refers to an organism whose genome, chromosomal or extrachromosomal, is modified permanently and heritably, using recombinant nucleic acid techniques, or the progeny of such an organism.

(f) "Introduce", with reference to an organism, means to knowingly and willfully stock, place, plant, release, or allow the release of the organism in this state at any specific location where the organism is not already naturalized.

(g) "Mollusk" means any mollusk of the classes Bivalvia and Gastropoda.

(h) "Native" means indigenous to any location in this state.

(i) "Nonaquatic" describes a bird, insect other than a wiggler, or mammal.

(j) "Nonnative" means not native.

(k) "Prohibited species", subject to section 41302, means any of the following:

(*i*) Any of the following prohibited species of aquatic plant, including a hybrid or genetically engineered variant of the species:

(A) African oxygen weed (*Lagarosiphon major*).

(B) Brazilian elodea (*Egeria densa*).

(C) Cylindro (*Cylindrospermopsis raciborskii*).

(D) European frogbit (*Hydrocharis morsus-ranae*).

(E) Fanwort (*Cabomba caroliniana*).

(F) Giant salvinia (*Salvinia molesta*, *auriculata*, *biloba*, or *herzogii*).

(G) Hydrilla (*Hydrilla verticillata*).

(H) Parrot's feather (*Myriophyllum aquaticum*).

(I) Starry stonewort (*Nitellopsis obtusa*).

(J) Water chestnut (*Trapa natans*).

(K) Yellow floating heart (*Nymphoides peltata*).

(*ii*) Any of the following prohibited species of terrestrial plant, including a hybrid or genetically engineered variant of the species or a fragment, including a seed or other propagule, of the species or of a hybrid or genetically engineered variant:

(A) Giant hogweed (*Heracleum mantegazzianum*).

(B) Japanese knotweed (*Fallopia japonica*).

(*iii*) The following prohibited bird species, including a hybrid or genetically engineered variant of the species or an egg of the species or of a hybrid or genetically engineered variant: Eurasian collared dove (*Streptopelia decaocto*).

(*iv*) The following prohibited crustacean species, including a hybrid or genetically engineered variant of the species or an egg of the species or of a hybrid or genetically engineered variant: rusty crayfish (*Faxonious resticus*, formerly *Orconectes rusticus*).

(*v*) Any of the following prohibited fish species, including a hybrid or genetically engineered variant of the species or an egg of the species or of a hybrid or genetically engineered variant:

(A) Bighead carp (*Hypophthalmichthys nobilis*).
(B) Bitterling (*Rhodeus sericeus*).
(C) Black carp (*Mylopharyngodon piceus*).
(D) Eurasian ruffe (*Gymnocephalus cernuus*).
(E) Grass carp (*Ctenopharyngodon idellus*).
(F) Ide (*Leuciscus idus*).
(G) Japanese weatherfish (*Misgurnus anguillicaudatus*).
(H) Round goby (*Neogobius melanostomus*).
(I) Rudd (*Scardinius erythrophthalmus*).
(J) Silver carp (*Hypophthalmichthys molitrix*).
(K) A fish of the snakehead family (family *Channidae*).
(L) Tench (*Tinca tinca*).
(M) Tubenose goby (*Proterorhinus marmoratus*).

(*vi*) Any of the following prohibited insect species, including a hybrid or genetically engineered variant of the species or an egg of the species or of a hybrid or genetically engineered variant:
(A) Asian longhorned beetle (*Anoplophora glabripennis*).
(B) Emerald ash borer (*Agrilus planipennis*).

(*vii*) The following prohibited mammal species, including a hybrid or genetically engineered variant: nutria (*Myocastor coypus*).

(*viii*) Any of the following prohibited mollusk species, including a hybrid or genetically engineered variant of the species or an egg of the species or of a hybrid or genetically engineered variant:
(A) Brown garden snail (*Helix aspersa*).
(B) Carthusian snail (*Monacha cartusiana*).
(C) Giant African snail (*Achatina fulica*).
(D) Girdled snail (*Hygromia cinctella*).
(E) Heath snail (*Xerolenta obvia*).
(F) Wrinkled dune snail (*Candidula intersecta*).

(*l*) "Recombinant nucleic acid techniques" means laboratory techniques through which genetic material is isolated and manipulated in vitro and then inserted into an organism.

(m) "Relevant commission", "relevant department", or "relevant director" means the following:

(*i*) With respect to a species other than a plant or insect, but including a wiggler, the natural resources commission, department of natural resources, or the director of the department of natural resources, respectively.

(*ii*) With respect to a plant species or insect species, other than a wiggler, the commission of agriculture and rural development, the department of agriculture and rural development, or the director of the department of agriculture and rural development, respectively.

(n) "Reptile" means any turtle, snake, or lizard of the class Reptilia.

(o) "Restricted species", subject to section 41302, means any of the following:

(*i*) Any of the following restricted species of aquatic plant, including a hybrid or genetically engineered variant of the species:
(A) Curly leaf pondweed (*Potamogeton crispus*).
(B) Eurasian watermilfoil (*Myriophyllum spicatum*).
(C) Flowering rush (*Butomus umbellatus*).
(D) Phragmites or common reed (*Phragmites australis*).
(E) Purple loosestrife (*Lythrum salicaria*), except that cultivars of purple loosestrife developed and recognized to be sterile and approved by the director of the department of agriculture and rural development under section 16a of the insect pest and plant disease act, 1931 PA 189, MCL 286.216a, are not a restricted species.

(*ii*) The following restricted species of terrestrial plant, including a hybrid or genetically engineered variant of the species or a fragment, including a seed or other propagule, of the species or of a hybrid or genetically engineered variant: autumn olive (*Elaeagnus umbellata*).

(*iii*) Any of the following restricted mollusk species, including a hybrid or genetically engineered variant of the species or an egg of the species or of a hybrid or genetically engineered variant:
(A) Quagga mussel (*Dreissena bugensis*).
(B) Zebra mussel (*Dreissena polymorpha*).

(p) "Watercraft" means any conveyance used or designed for navigation on water, including, but not limited to, any vessel, ship, boat, motor vessel, steam vessel, vessel operated by machinery, motorboat, sailboat, barge, scow, tugboat, and rowboat.

(q) "Wiggler" means an aquatic egg, nymph, or larva of an insect.

(2) For the purposes of this part:

(a) A person is not considered to possess a live organism simply because the organism is present on land or in waters owned by that person unless the person has knowingly introduced that live organism on that land or in those waters.

(b) A person is not considered to possess a live organism if the organism was obtained from the environment and the person only possesses the organism at the specific location at which it was obtained from the environment.

(c) A person is not considered to possess a live organism if the possession is for the purpose of promptly destroying the organism.

History: Add. 2003, Act 270, Eff. Mar. 30, 2004;—Am. 2005, Act 77, Imd. Eff. July 19, 2005;—Am. 2009, Act 51, Eff. Sept. 21, 2009;—Am. 2014, Act 358, Imd. Eff. Dec. 9, 2014;—Am. 2014, Act 537, Eff. Apr. 15, 2015;—Am. 2018, Act 451, Eff. Mar. 21, 2019.

Popular name: NREPA

324.41302 Adding or deleting from list of prohibited species or restricted species; consultation; procedure; determination; review; emergency order; order setting conditions for harvesting, possessing, and transporting naturalized organism of aquatic restricted species.

Sec. 41302. (1) The relevant commission may by order add to or delete a species from the list of prohibited species or restricted species under section 41301. Before the natural resources commission issues an order under this subsection, it shall consult with the department of agriculture and rural development. Before the commission of agriculture and rural development issues an order under this subsection, it shall consult with the department of natural resources. After the consultation, and at least 30 days before the relevant commission issues the order, the relevant department shall post a copy of the proposed order on the relevant department's website and shall submit a copy of the proposed order to all of the following:

(a) The legislature.

(b) The standing committees of the senate and house of representatives with primary responsibility for any of the following:

(*i*) Agricultural issues.

(*ii*) Environmental issues.

(*iii*) Natural resources issues.

(2) The relevant commission shall list a nonaquatic species as a prohibited species or restricted species if the relevant commission determines the following:

(a) For a nonaquatic prohibited species, all of the following requirements are met:

(*i*) The organism is not native.

(*ii*) The organism is not naturalized in this state or, if naturalized, is not widely distributed in this state.

(*iii*) Based on a risk assessment, any of the following apply:

(A) The organism has the potential to harm human health or to harm natural, agricultural, or silvicultural resources.

(B) Effective management or control techniques for the organism are not available.

(b) For a nonaquatic restricted species, all of the following requirements are met:

(*i*) The organism is not native.

(*ii*) The organism is naturalized and widely distributed in this state.

(*iii*) Based on a risk assessment, any of the following apply:

(A) The organism has the potential to harm human health or to harm natural, agricultural, or silvicultural resources.

(B) Effective management or control techniques for the organism are available.

(3) The relevant commission shall list an aquatic species as a prohibited species or restricted species if the relevant commission determines the following based on a review by the relevant department:

(a) For an aquatic prohibited species, all of the following requirements are met:

(*i*) The organism is not native or is genetically engineered.

(*ii*) The organism is not naturalized in this state or, if naturalized, is not widely distributed.

(*iii*) Based on a risk assessment, any of the following apply:

(A) The organism has the potential to harm human health or to severely harm natural, agricultural, or silvicultural resources.

(B) Effective management or control techniques for the organism are not available.

(b) For an aquatic restricted species, all of the following requirements are met:

(*i*) The organism is not native.

(*ii*) The organism is naturalized in this state.

(*iii*) Based on a risk assessment, any of the following apply:

(A) The organism has the potential to harm human health or to harm natural, agricultural, or silvicultural resources.

(B) Effective management or control techniques for the organism are available.

(4) The following apply to a review by the relevant department of an aquatic species for listing as a prohibited species or restricted species under subsection (3):

(a) The relevant department shall review each aquatic animal listed or delisted as injurious wildlife under the Lacey act, 16 USC 3371 to 3378, and each aquatic plant designated or removed from designation as a noxious weed under the plant protection act, title IV of Public Law 106-224, for listing or delisting as a prohibited species or restricted species within 180 days after the change in federal listing or designation.

(b) The relevant department shall review each aquatic species that has the potential to harm human health or natural, agricultural, or silvicultural resources for listing as a prohibited species or restricted species even if the species is not currently on either federal list described in subdivision (a).

(c) The relevant department may review other aquatic species for listing as prohibited or restricted species.

(5) The relevant director may issue an emergency order designating an organism as a prohibited species or restricted species if the organism has the potential to harm human health or to severely harm natural, agriculture, or silvicultural resources. An emergency order is effective for 90 days or a shorter period if specified in the order. The relevant department shall do all of the following:

(a) Post a proposed emergency order on its website and otherwise publicize the proposed emergency order in a manner that ensures that interested persons are provided notice of the proposed emergency order, the reasons for the emergency order, and the proposed effective date of the order.

(b) Provide a copy of the proposed emergency order to each member of the standing committees of the senate and the house of representatives that consider legislation pertaining to conservation, the environment, recreation, tourism, or natural resources.

(c) Post the final emergency order on its website.

(6) The relevant department may issue an order setting forth the conditions under which naturalized organisms of an aquatic restricted species may be harvested, possessed, and transported.

324.41303 Possession of live prohibited or restricted organism; prohibition; exceptions; notification of location where found.

Sec. 41303. (1) A person shall not knowingly possess a live organism if the organism is a prohibited species or restricted species, except under 1 or more of the following circumstances:

(a) The person intends to present a specimen of the prohibited species or restricted species, for identification or similar purposes, to a person who is a certified applicator or registered applicator under part 83, to a public or private institution of higher education, or to the department of natural resources, the department of agriculture and rural development, or any other state, local, or federal agency with responsibility for the environment, natural resources, or agriculture.

(b) The person has been presented with a specimen of a prohibited species or restricted species for identification or similar purposes under subdivision (a).

(c) The person possesses the prohibited species or restricted species in conjunction with otherwise lawful activity to eradicate or control the prohibited species or restricted species.

(d) The possession is pursuant to a permit issued for education or research purposes by the relevant department under section 41306 or, if the prohibited species or restricted species is a plant species or an insect other than a wiggler, by the United States Department of Agriculture.

(e) The species is an aquatic restricted species and the person possesses the species in compliance with an order under section 41302(6).

(2) A person described in subsection (1)(b) or (c) shall notify the department of natural resources, the department of agriculture and rural development, or the department of environmental quality if the prohibited species or restricted species was found at a location where it was not previously known to be present.

324.41305 Introduction of prohibited or restricted species, or genetically engineered or nonnative bird, crustacean, fish, insect, mammal, or mollusk, or aquatic plant; prohibition; exceptions.

Sec. 41305. A person shall not introduce a prohibited species, a restricted species, a genetically engineered or nonnative bird, crustacean, fish, insect, mammal, mollusk, or aquatic plant unless the introduction is authorized by 1 of the following, as applicable:

(a) For a fish, by a permit issued by the department of natural resources under section 48735.

(b) For a plant or an insect other than a wiggler, by a permit issued by the department of agriculture and rural development under section 41306.

(c) For any other species, by a permit issued by the department of natural resources under section 41306.

History: Add. 2003, Act 270, Eff. Mar. 30, 2004;—Am. 2005, Act 79, Imd. Eff. July 19, 2005;—Am. 2009, Act 52, Eff. Sept. 21, 2009;—Am. 2014, Act 537, Eff. Apr. 15, 2015.

324.41306 Permit; application; fee; granting or denying; revocation; modification; hearing; administration; enforcement.

Sec. 41306. (1) A person shall apply to the relevant department for a permit that section 41303 or 41305 describes as being issued under this section. The application shall be submitted on a form developed by the relevant department. The application shall be accompanied by a fee based on the cost of administering this part. The relevant department shall either grant an administratively complete application and issue a permit or deny the application.

(2) In determining whether to grant or deny an application for a permit for introduction of a genetically engineered organism required by section 41305, the relevant department shall consider whether any application for a federal permit or approval for the genetically engineered organism has been granted or denied.

(3) The relevant department may revoke or modify a permit it has issued under subsection (1) after providing an opportunity for a hearing under the administrative procedures act of 1969, 1969 PA 306, MCL 24.201 to 24.328.

(4) The relevant department shall administer and enforce sections 41302 to 41310. In addition, any peace officer may enforce the criminal provisions of this part.

History: Add. 2005, Act 79, Imd. Eff. July 19, 2005;—Am. 2009, Act 52, Eff. Sept. 21, 2009;—Am. 2014, Act 537, Eff. Apr. 15, 2015;—Am. 2018, Act 451, Eff. Mar. 21, 2019.

324.41307 Rules.

Sec. 41307. The department shall promulgate rules under the administrative procedures act of 1969, 1969 PA 306, MCL 24.201 to 24.328, necessary to implement this part.

History: Add. 2003, Act 270, Eff. Mar. 30, 2004.

Popular name: Act 451

Popular name: NREPA

324.41309 Violation; penalties; suspension or revocation of permit or license; order; liability for damages to natural resources; exceptions.

Sec. 41309. (1) A person who violates section 41303(2) is subject to a civil fine of not more than $100.00.

(2) A person who violates section 41303(1), or a condition of a permit issued under this part, with respect to a restricted species is subject to a civil fine of not more than $5,000.00. A person who violates section 41303(1), or a condition of a permit issued under this part, with respect to a prohibited species is subject to a

civil fine of not more than $10,000.00.

(3) A person who violates section 41303(1) knowing the possession is unlawful or who willfully or in a grossly negligent manner violates a condition of a permit issued under this part is guilty as follows:

(a) For a violation involving a restricted species, the person is guilty of a misdemeanor and may be imprisoned for not more than 1 year and shall be fined not less than $1,000.00 or more than $10,000.00.

(b) For a violation involving a prohibited species that is not an aquatic species, the person is guilty of a felony and may be imprisoned for not more than 2 years and shall be fined not less than $2,000.00 or more than $20,000.00.

(c) For a violation involving a prohibited species that is an aquatic species, the person is guilty of a felony and may be imprisoned for not more than 3 years and shall be fined not less than $2,000.00 or more than $100,000.00.

(4) A person who, with intent to damage natural, agricultural, or silvicultural resources or human health:

(a) Violates section 41303(1) with respect to a restricted species or possesses a nonnative bird, crustacean, fish, insect, mammal, mollusk, or aquatic plant is guilty of a felony and may be imprisoned for not more than 2 years and shall be fined not less than $1,000.00 or more than $250,000.00.

(b) Violates section 41303(1) with respect to a prohibited species or possesses a genetically engineered bird, crustacean, fish, insect, mammal, mollusk, or aquatic plant is guilty of a felony and may be imprisoned for not more than 4 years and shall be fined not less than $2,000.00 or more than $500,000.00.

(5) A person who sells or offers to sell a restricted species is subject to a civil fine of not less than $1,000.00 or more than $10,000.00. A person who sells or offers to sell a prohibited species or who violates section 41303(3) is subject to a civil fine of not less than $2,000.00 or more than $20,000.00.

(6) A person who violates section 41305 is guilty as follows:

(a) For a violation involving a restricted species or a nonnative bird, crustacean, fish, insect, mammal, mollusk, or aquatic plant, the person is guilty of a misdemeanor and may be imprisoned for not more than 6 months and shall be fined not less than $500.00 or more than $5,000.00.

(b) For a violation involving a prohibited species or a genetically engineered bird, crustacean, fish, insect, mammal, mollusk, or aquatic plant, the person is guilty of a misdemeanor and may be imprisoned for not more than 1 year and shall be fined not less than $1,000.00 or more than $10,000.00.

(7) A person who violates section 41305 with respect to a restricted species or nonnative bird, crustacean, fish, insect, mammal, mollusk, or aquatic plant and who has actual or constructive knowledge of the identity of the restricted species or that the organism, whether a restricted species or other bird, crustacean, fish, insect, mammal, mollusk, or aquatic plant, is nonnative is guilty of a misdemeanor and may be imprisoned for not more than 1 year and shall be fined not less than $1,000.00 or more than $10,000.00.

(8) A person who violates section 41305 with respect to a prohibited species that is not an aquatic species or with respect to a genetically engineered bird, crustacean, fish, insect, mammal, mollusk, or aquatic plant and who has actual or constructive knowledge of the identity of the prohibited species or that the bird, crustacean, fish, insect, mammal, mollusk, or aquatic plant is genetically engineered, respectively, is guilty of a felony and may be imprisoned for not more than 2 years and shall be fined not less than $2,000.00 or more than $20,000.00.

(9) A person who violates section 41305 with respect to a prohibited species that is an aquatic species and who has actual or constructive knowledge of the identity of the prohibited species is guilty of a felony and may be imprisoned for not more than 3 years and shall be fined not less than $2,000.00 or more than $100,000.00.

(10) A person who violates section 41305 knowing the introduction is unlawful, is guilty as follows:

(a) For a violation involving a restricted species or nonnative bird, crustacean, fish, insect, mammal, mollusk, or aquatic plant, the person is guilty of a felony and may be imprisoned for not more than 2 years and shall be fined not less than $1,000.00 or more than $250,000.00.

(b) For a violation involving a prohibited species or a genetically engineered bird, crustacean, fish, insect, mammal, mollusk, or aquatic plant, the person is guilty of a felony and may be imprisoned for not more than 4 years and shall be fined not less than $2,000.00 or more than $500,000.00.

(11) A person who, with intent to damage natural, agricultural, or silvicultural resources or human health, violates section 41305 is guilty as follows:

(a) For a violation involving a restricted species or nonnative bird, crustacean, fish, insect, mammal, mollusk, or aquatic plant, the person is guilty of a felony and may be imprisoned for not more than 3 years and shall be fined not less than $1,000.00 or more than $500,000.00.

(b) For a violation involving a prohibited species or a genetically engineered bird, crustacean, fish, insect, mammal, mollusk, or aquatic plant, the person is guilty of a felony and may be imprisoned for not more than 5 years and shall be fined not less than $2,000.00 or more than $1,000,000.00.

(12) If a person commits a criminal violation of this part or a rule promulgated or permit issued under this part or knowingly commits a violation described in subsection (5) and if the violation involves a prohibited species that is an aquatic species, the court shall order that any permit or license issued to the person under part 473 or 487 be suspended for 1 year, and that the person is not eligible to be issued any permit or license under part 473 or 487 for 1 year. If the remaining term of an existing permit or license under part 473 or 487 is less than 1 year, the court shall order that the permit or license be revoked and that the person is not eligible to be issued any permit or license under part 473 or 487 for 1 year. For a second violation described in this subsection, the court shall order that any permit or license issued to the person under part 473 or 487 be revoked and that the person is permanently ineligible to be issued any permit or license under part 473 or 487. An order under this subsection is self-effectuating. The clerk of the court shall send a copy of the order to the department of natural resources.

(13) In addition to any other civil or criminal sanction imposed under this section, a person who violates this part is liable for any damages to natural resources resulting from the violation, including, but not limited to, costs incurred to prevent or minimize such damages.

(14) This part does not apply to activities authorized under the Michigan aquaculture development act, 1996 PA 199, MCL 286.871 to 286.884.

History: Add. 2003, Act 270, Eff. Mar. 30, 2004;—Am. 2005, Act 76, Imd. Eff. July 19, 2005;—Am. 2009, Act 52, Eff. Sept. 21, 2009;—Am. 2014, Act 541, Eff. Apr. 15, 2015.

Compiler's note: In subsection (5), the phrase "or who violates section 41303(3)" evidently should have been removed when section 41303(3) was removed by Act 451 of 2018.

324.41311 Invasive species fund; creation; disposition of funds; money remaining in fund; expenditures; purposes.

Sec. 41311. (1) The invasive species fund is created within the state treasury.

(2) The department of natural resources and the department of agriculture shall forward to the state treasurer and the state treasurer shall deposit into the fund civil fines collected under section 41309 and permit fees collected under section 41306. The state treasurer may receive money or other assets from any source for deposit into the fund. The state treasurer shall direct the investment of the fund. The state treasurer shall credit to the fund interest and earnings from fund investments.

(3) Money in the fund at the close of the fiscal year shall remain in the fund and shall not lapse to the general fund.

(4) The department of natural resources and the department of agriculture shall expend money from the fund, upon appropriation, only for 1 or more of the following purposes:

(a) The administration of this part, consistent with section 41306(4).

(b) Public education about preventing the introduction of, controlling, or eradicating prohibited species, restricted species, and other nonnative species and genetically engineered aquatic plants, birds, crustaceans, fish, insects, mammals, and mollusks.

324.41323 Duties of department.

Sec. 41323. (1) The department of natural resources shall do all of the following:

(a) By March 1 of each year, submit to the governor and the legislature a report that makes recommendations on all of the following:

(*i*) Additions to or deletions from the classes of genetically engineered or nonnative organisms covered by this part.

(*ii*) The status of various prohibited species and other problematic invasive species in this state, including, but not limited to, a list of infested waterbodies by species.

(*iii*) Preventing the introduction of and controlling or eradicating invasive species or genetically engineered aquatic plants, birds, crustaceans, fish, insects, mammals, or mollusks.

(*iv*) Restoration or remediation of habitats or species damaged by invasive species or genetically engineered organisms.

(*v*) Prioritizing efforts to prevent violations of and otherwise further the purposes of this part.

(*vi*) The specific areas of responsibility for various state departments under this part and the sharing of information on permits under this part among responsible state departments.

(*vii*) Educating citizens about their responsibilities under this part and their role in preventing the introduction of and controlling or eradicating prohibited species, restricted species, invasive species, and genetically engineered aquatic plants, birds, crustaceans, fish, insects, mammals, or mollusks.

(*viii*) Simplifying citizen access to state government for compliance with this part.

(*ix*) Legislation and funding to carry out the recommendations of the department of natural resources and otherwise further the purposes of this part.

(*x*) Other matters that the department of natural resources considers pertinent to the purposes of this part.

(b) Establish criteria for identifying waterbodies infested by prohibited species.

(c) Monitor and promote efforts to rescind the exemption under 40 CFR 122.3(a) for ballast water discharges.

(2) The department of natural resources shall carry out its reporting and other duties under this section in cooperation with the aquatic nuisance species council created under Executive Order No. 2002-21 and the department of agriculture.

History: Add. 2005, Act 75, Imd. Eff. July 19, 2005;—Am. 2009, Act 52, Eff. Sept. 21, 2009.

324.41325 Watercraft, watercraft equipment, or watercraft trailer with aquatic plant attached; placement in state waters prohibited; transport over land; order to remove aquatic organisms; release of baitfish prohibited; release of fish limited; notice; posting; violation as civil infraction; penalty.

Sec. 41325. (1) A person shall not do any of the following:

(a) Place a watercraft, watercraft equipment, or a watercraft trailer in the waters of this state if the watercraft, watercraft equipment, or watercraft trailer has an aquatic plant attached.

(b) Transport any watercraft over land without first doing all of the following:

(*i*) Removing all drain plugs from bilges, ballast tanks, and live wells.

(*ii*) Draining all water from any live wells and bilge.

(*iii*) Ensuring that the watercraft, trailer, and any conveyance used to transport the watercraft or trailer are free of aquatic organisms, including plants.

(2) A law enforcement officer may order the owner or operator of a watercraft, watercraft equipment, watercraft trailer, or any conveyance used to transport the watercraft or trailer to comply with subsection

(1)(b). The owner or operator shall obey the order.

(3) A person shall not release baitfish in any waters of this state. A person who collects fish shall not use the fish as bait or cut bait except in the inland lake, stream, or Great Lake where the fish was caught, or in a connecting waterway of the inland lake, stream, or Great Lake where the fish was caught if the fish could freely move between the original location of capture and the location of release.

(4) A person, who catches fish other than baitfish in a lake, stream, Great Lake, or connecting waterway shall only release the fish in the lake, stream, or Great Lake where the fish was caught, or in a connecting waterway of the lake, stream, or Great Lake where the fish was caught if the fish could freely move between the original location of capture and the location of release.

(5) The department shall prepare a notice that contains a summary of subsections (1) to (4), (6), and (7) and the definition of aquatic plant in section 41301 and shall make copies of the notice available to owners of public boating access sites. The department shall include the notice in relevant department publications and post the notice on its website.

(6) The owner of a public boating access site shall post and maintain the notice described in subsection (5) at the public boating access site.

(7) A person who violates subsection (1), (2), (3), (4), or (6) is responsible for a state civil infraction and may be ordered to pay a civil fine of not more than $100.00.

324.41329 Sale or possession of nonnative aquatic species without registration prohibited; exceptions; applicability of section.

Sec. 41329. (1) A person shall not sell or offer for sale or possess for the purpose of sale or offering for sale a live, nonnative aquatic species except as authorized by a registration issued by the department of natural resources pursuant to part 13. A registration is nontransferable and expires on December 31 of the year for which issued. A separate registration is required for each place where an activity described in this subsection occurs.

(2) In addition to the exemption provided in section 41309(14), this section and section 41335 do not apply to any of the following:

(a) Activities authorized under part 459.

(b) The sale or offering for sale of aquatic species, other than prohibited species or restricted species, for human consumption.

(c) The 1-time sale or offering for sale of aquatic species if the sale or offering for sale involves not more than 20 organisms of a single species.

Popular name: Act 451

Popular name: NREPA

324.41333 Person registered to sell or possess nonnative aquatic species; duties.

Sec. 41333. A registrant under section 41329 shall do all of the following:

(a) Maintain the registration certificate conspicuously posted at the registered location at all times.

(b) Maintain, until submission under subdivision (c), electronic records of all of the following:

(*i*) The species and number of individuals of each aquatic species purchased. This subparagraph does not apply to species that are unable to survive in freshwater or in this state's climate as determined based on guidance developed by the relevant department.

(*ii*) The date of purchase or sale.

(*iii*) Other relevant information as required by the department.

(c) By March 1 each year, beginning in 2020, submit to the department of natural resources a report consolidating the electronic records maintained under subdivision (b) for the prior calendar year. However, the first submission shall cover records maintained since the effective date of the 2018 amendatory act that added this section.

(d) Notify the department if the registrant sells or offers for sale a live aquatic species not previously listed in a submission under subdivision (c). The department shall conduct a risk assessment of the aquatic species and take appropriate action. This subdivision does not apply to species that are unable to survive in freshwater or in this state's climate as determined based on guidance developed by the relevant department.

324.41337 Violation; penalties; suspension or revocation of registration; disposal of aquatic species.

Sec. 41337. (1) A person who violates sections 41329 to 41335 or rules promulgated under this part to implement those sections may be ordered to pay a civil fine of not more than $1,000.00.

(2) A person who violates sections 41329 to 41335 or rules promulgated under this part to implement those sections a second or subsequent time is guilty of a misdemeanor punishable by imprisonment for not more than 90 days or a fine of not more than $1,000.00, or both.

(3) In addition to the sanctions under subsections (1) or (2), the court may suspend or revoke any registration issued to the person under section 41329.

(4) If a person violates sections 41329 to 41335 or rules promulgated under this part to implement those sections, the department of natural resources may suspend or revoke the person's registration required under section 41329 or refuse to register the person after providing an opportunity for a hearing under the administrative procedures act of 1969, 1969 PA 306, MCL 24.201 to 24.328.

(5) If a registration is suspended or revoked under this section, the aquatic species held under the registration shall be disposed of only in a manner approved by the department of natural resources.
