

MODEL ROCKETS (EXCERPT)
Act 333 of 1965

259.781 Model rockets; definitions.

Sec. 1. As used in this act:

(a) "Model rocket" means an aero-model that ascends into the air without use of aerodynamic lifting forces against gravity and is propelled by means of a model rocket engine.

(b) "Model rocket engine" or "engine" means a device or combination of devices which provide the necessary force or motive power to cause the model rocket to move through the air.

History: 1965, Act 333, Imd. Eff. July 23, 1965.
