

MICHIGAN STRATEGIC FUND ACT (EXCERPT)
Act 270 of 1984

CHAPTER 1

125.2001 Legislative finding and declaration.

Sec. 1. The legislature hereby finds and declares the following problems and objectives:

(a) The economy of the state of Michigan is at present recovering from a recession and action is needed to encourage increased employment and business expansion in this state.

(b) The economy of the state of Michigan is undergoing a long-term transition requiring new and innovative policies from state government and greater coordination of existing policies and programs related to jobs and economic development.

(c) It is necessary to provide a mechanism to foster greater coordination of state policies and to make available public and private development finance opportunities to agriculture, forestry, business, and industry, and to communities within the state, in order to expand the number of jobs in the state and to help agriculture, forestry, business, and industry prosper in the state.

(d) There exists a need to leverage private sector investment in new and innovative products, in entrepreneurial activity, and in economic development finance; therefore, state assistance for development finance should reflect a leveraging investment strategy.

(e) There is a statewide pressing need for programs to alleviate and prevent conditions of unemployment; to preserve existing jobs and create new jobs to meet the employment demands of population growth and population shifts; to promote the development of existing business enterprises and to meet the growing competition among states and nations for business enterprises; to revitalize and diversify the Michigan economy in general to achieve the goals of long-term economic growth and full employment, and to provide a solid tax base for the state and its local units of government to provide funds for needed public services.

(f) The goals of long-term economic growth and full employment can best be provided by the promotion, attraction, stimulation, retention, rehabilitation, and revitalization of business enterprises and worker-owned enterprises and by actions to lower the costs of business and production.

(g) The retention, promotion, diversification, and development of business enterprises and the lowering of costs of business and production require additional means of financing, including economic development finance mechanisms that support private capital resources, to help existing business enterprises expand more rapidly, and to promote the location of additional business enterprises in Michigan.

(h) It is necessary to provide means and methods for the encouragement and assistance of industrial and commercial development projects, including but not limited to providing aid to development enterprises utilizing new or experimental technologies in locating, purchasing, constructing, reconstructing, modernizing, improving, maintaining, repairing, furnishing, equipping, and expanding in this state and its local units of government.

(i) The retention and expansion of existing business enterprise and the acquiring of new business enterprises to Michigan requires the availability of energy supplies and that, to this end, known sources of energy in Michigan should be developed to the fullest extent possible consistent with environmental protection and ecological preservation.

(j) To conserve the public benefits of nonrenewable oil, gas, and mineral resources which are now subject to increasing development and depletion it is necessary to apply the proceeds of such resources to the encouragement of capital growth and the financing of self-sustaining sources of economic activity.

(k) It is necessary to promote economic activity in the forestry and agricultural sectors by providing incentives to reduce energy consumption, to retain agricultural and forestry enterprises, to reduce the rate at which urban sprawl has been devouring productive farm and forestry lands, and to provide our farmers and foresters with a more favorable export market. It is also necessary to encourage the development of facilities designed to produce energy from renewable resources.

(l) For the preservation and betterment of the health, safety, and general welfare of the people of Michigan, it is necessary to promote and develop new and adequate water and air pollution control and solid waste disposal facilities for business enterprises and public utilities located in this state, which equipment or facilities need not be incidental to an industrial building, but may serve the general public.

(m) It is necessary for a sound economy of the state for the local units of government of the state to provide quality services and this requires an adequate and modern infrastructure in the local units of government which makes it necessary for such units to finance local improvements in an economical manner which in many cases can be best done through assistance by the state.

(n) The lending and investment of funds to develop and improve the economy of the state requires

specialized and unique knowledge, skills, and experience.

125.2004 Definitions.

Sec. 4. As used in this act:

(a) "Board" means the board of directors of the Michigan strategic fund, except where the context clearly requires a different definition.

(b) "Economic development project" means an endeavor related to industrial, commercial, or agricultural enterprise. Economic development project includes, but is not limited to, a theme or recreation park; agricultural or forestry production, harvesting, storage, or processing facilities or equipment; port facilities; and the use of equipment or facilities designed to produce energy from renewable resources. Economic development project does not include that portion of an endeavor devoted to the sale of goods at retail, except that, as used in relation to the fund insuring a transaction entered into by a depository institution, and as used in relation to a loan by the fund to a minority owned business, an economic development project may include that portion of an endeavor devoted to the sale of goods at retail. Economic development project does not include that portion of an endeavor devoted to housing or a program or activity authorized under chapter 8A.

(c) "Financial institution" means a state or nationally chartered bank or a state or federally chartered savings and loan association, savings bank, or credit union whose deposits are insured by an agency of the

United States government and that maintains a principal office or branch office in this state under the laws of this state or the United States.

(d) "Fund" means the Michigan strategic fund created under section 5, except where the context clearly requires a different definition.

(e) "FWC Qualified Settlement Fund" means the FWC Qualified Settlement Fund described in the settlement agreement approved by the court in *In re Flint Water Cases*, No. 5:16-cv-10444-JEL-MKM (ED Mich).

(f) "Green chemistry" means chemistry and chemical engineering to design chemical products or processes that reduce or eliminate the use or generation of hazardous substances, while producing high-quality products through safe and efficient manufacturing processes. Green chemistry is guided by the following 12 principles:

(i) Prevent waste: Design chemical syntheses to prevent waste, leaving no waste to treat or clean up.

(ii) Design safer chemicals and products: Design chemical products to be fully effective, yet have little or no toxicity.

(iii) Design less hazardous chemical syntheses: Design syntheses to use and generate substances with little or no toxicity to humans and the environment.

(iv) Use renewable feedstocks: Use raw materials and feedstocks that are renewable rather than depleting. Renewable feedstocks are often made from agricultural products or are the wastes of other processes; depleting feedstocks are made from fossil fuels, including petroleum, natural gas, or coal, or are mined.

(v) Use catalysts, not stoichiometric reagents: Minimize waste by using catalytic reactions. Catalysts are used in small amounts and can carry out a single reaction many times. They are preferable to stoichiometric reagents, which are used in excess and work only once.

(vi) Avoid chemical derivatives: Avoid using blocking or protecting groups or any temporary modifications if possible. Derivatives use additional reagents and generate waste.

(vii) Maximize atom economy: Design syntheses so that the final product contains the maximum proportion of the starting materials. There should be few, if any, wasted atoms.

(viii) Use safer solvents and reaction conditions: Avoid using solvents, separation agents, or other auxiliary chemicals. If these chemicals are necessary, use innocuous chemicals.

(ix) Increase energy efficiency: Run chemical reactions at ambient temperature and pressure whenever possible.

(x) Design chemicals and products to degrade after use: Design chemical products to break down to innocuous substances after use so that they do not accumulate in the environment.

(xi) Analyze in real-time to prevent pollution: Include in-process real-time monitoring and control during syntheses to minimize or eliminate the formation of by-products.

(xii) Minimize the potential for accidents: Design chemicals and their forms, including solid, liquid, or gas, to minimize the potential for chemical accidents, including explosions, fires, and releases to the environment.

(g) "Michigan economic development corporation" or "MEDC" means the Michigan economic development corporation, the public body corporate created under section 28 of article VII of the state constitution of 1963 and the urban cooperation act of 1967, 1967 (Ex Sess) PA 7, MCL 124.501 to 124.512, by a contractual interlocal agreement effective April 5, 1999, and subsequently amended, between local participating economic development corporations formed under the economic development corporations act, 1974 PA 338, MCL 125.1601 to 125.1636, and the fund.

(h) "Municipality" means a county, city, village, township, port district, development organization, institution of higher education, community or junior college, or subdivision or instrumentality of any of the legal entities listed in this subdivision.

Port facilities do not include an international bridge or international tunnel.

(k) "Project" means an economic development project and, in addition, means the acquisition, construction, reconstruction, conversion, or leasing of an industrial, commercial, retail, agricultural, or

forestry enterprise, or any part of these, to carry out the purposes and objectives of this act and of the fund, including, but not limited to, acquisition of land or interest in land, buildings, structures, or other planned or existing planned improvements to land including leasehold improvements, machinery, equipment, or furnishings which include, but are not limited to, the following: research parks; office facilities; engineering facilities; research and development laboratories; warehousing facilities; parts distribution facilities; depots or storage facilities; port facilities; railroad facilities, including trackage, right of way, and appurtenances; airports; bridges and bridge facilities; water and air pollution control equipment or waste disposal facilities; theme or recreational parks; equipment or facilities designed to produce energy from renewable resources; farms, ranches, forests, and other agricultural or forestry commodity producers; agricultural harvesting, storage, transportation, or processing facilities or equipment; grain elevators; shipping heads and livestock pens; livestock; warehouses; wharves and dock facilities; dredging of recreational or commercial harbors; water, electricity, hydro electric, coal, petroleum, or natural gas provision facilities; dams and irrigation facilities; sewage, liquid, and solid waste collection, disposal treatment, and drainage services and facilities.
