

**ANIMAL INDUSTRY ACT (EXCERPT)**  
**Act 466 of 1988**

**287.742 Official test, vaccination, or diagnosis; identification of livestock; reporting results of official test, sample submission, or official vaccination; form; official brucellosis calfhooed vaccination; tattoo; testing and surveillance for brucellosis and tuberculosis; participation in programs; collection of blood or tissue samples.**

Sec. 42. (1) Whenever an official test is conducted, an official vaccination is administered, or a United States department of agriculture accredited laboratory has diagnosed a reportable disease, the animals shall, unless exempted by the director, be identified by an official identification.

(2) The result of an official test shall be reported on a form supplied by the department. If a tissue sample is submitted for analysis, a properly completed sample submission form supplied by the department shall accompany the sample. The official test tissue sample shall be obtained and submitted only by an accredited veterinarian except under special permission of the director. The form used to document the results of an official test, sample submission, or official vaccination shall be properly prepared and completed.

(3) An official brucellosis calfhooed vaccination shall be performed by an accredited veterinarian in compliance with the method outlined in title 9 C.F.R. part 78 and the brucellosis eradication: uniform methods and rules, effective February 1, 1998, approved by veterinary services of the animal and plant health inspection service of the United States department of agriculture, and all amendments to those publications thereafter adopted pursuant to rules that the director may promulgate.

(4) Except upon special permission from the director, official brucellosis calfhooed vaccination shall be performed only on female cattle between the ages of 4 and 8 months.

(5) A person shall not tattoo any animal with the official brucellosis vaccination tattoo unless the animal is an official brucellosis calfhooed vaccinate.

(6) Testing and surveillance for brucellosis and tuberculosis shall be as follows:

(a) A brucellosis ring test shall be conducted on each herd shipping milk to a dairy plant in this state. The test shall be conducted as outlined in title 9 C.F.R. part 78 and the brucellosis eradication: uniform methods and rules, effective February 1, 1998, approved by veterinary services of the animal and plant health inspection service of the United States department of agriculture, and all amendments to those publications thereafter adopted pursuant to rules that the director may promulgate.

(b) Disease surveillance for tuberculosis and brucellosis shall be conducted through the market cattle identification program as set forth in title 9 C.F.R. part 78 and the brucellosis eradication: uniform methods and rules, effective February 1, 1998, approved by veterinary services of the animal and plant health inspection service of the United States department of agriculture, and all amendments to those publications thereafter adopted pursuant to rules that the director may promulgate and the bovine tuberculosis eradication: uniform methods and rules, effective January 22, 1999, approved by veterinary services of the animal and plant health inspection service of the United States department of agriculture, and all amendments to those publications thereafter adopted pursuant to rules that the director may promulgate.

(7) The department may participate in the programs described in subsection (6) and programs for other reportable diseases and may test for reportable diseases in any sample of livestock blood or tissue collected at a United States department or department-approved slaughter facility, any livestock collection or market facility, or any sample of livestock blood or tissue submitted for diagnostic purposes to a United States department of agriculture officially approved laboratory. The slaughter facility, livestock collection or market facility, or laboratory shall provide adequate room, time, and safe conditions for the collection of blood or tissue samples.
