## HOMEOWNERS' ENERGY POLICY ACT (EXCERPT) Act 68 of 2024

## 559.309 Adoption of written solar energy policy statement; content requirements and restrictions; homeowners' association duties.

- Sec. 9. (1) Within 1 year after the effective date of this act, each homeowners' association in this state shall adopt a written solar energy policy statement. A policy adopted under this subsection must not conflict with an existing local, state, or federal law. All of the following apply to a policy adopted in accordance with this subsection:
- (a) The policy must include the standards established under this act to be enforced by the homeowners' association.
  - (b) The policy may not prohibit elements of the solar energy system from being installed on a roof face.
- (c) The policy may not require that a specific technology be utilized for the installation of a solar energy system, including, but not limited to, solar shingles rather than traditional solar panels.
- (d) Any standards enforced under the policy may not result in a reduction in the production of electricity by the solar energy system by more than 10% or increase the total cost of the installation of the solar energy system to the member by more than \$1,000.00. As used in this subdivision, "production" means the estimated annual electrical production of the solar energy system.
  - (e) The policy must not include a provision that contradicts this act.
  - (f) The policy must include the following statements:
- (i) That the approval of an adjacent home or unit owner is not required to approve a member's application to install a solar energy system on the member's home or unit.
  - (ii) That the homeowners' association will not do any of the following:
  - (A) Inquire into a member's energy usage.
  - (B) Impose conditions that impair the operation of a solar energy system.
  - (C) Impose conditions that negatively impact any component industry standard warranty.
  - (D) Require postinstallation reporting.
- (E) Require a fee for submitting an application to install a solar energy system above that which it assesses for other applications related to a change to the property.
- (F) Prohibit a member from resubmitting a written application to install a solar energy system after a written application submitted after the effective date of this act was denied by the homeowners' association.
- (iii) That the homeowners' association will not deny a member's application to install a solar energy system because of the identity of the entity that owns the solar energy system or financing method chosen by the member.
- (iv) That a homeowners' association may deny an application to install a solar energy system or require the removal of a solar energy system if 1 or more of the following apply:
  - (A) A court has found that the installation of the solar energy system violates a law.
- (B) The installed solar energy system does not substantially conform with the member's application to install the solar energy system as approved by the homeowners' association.
- (C) The homeowners' association has determined that the solar energy system will be installed on the roof of a home or unit of the member requesting installation and 1 or more of the following apply:
- (I) The solar energy system will extend above or beyond the roof of that home or unit by more than 6 inches.
- (II) The solar energy system does not conform to the slope of the roof and has a top edge that is not parallel to the roof line.
- (III) The solar energy system has a frame, support bracket, or visible conduit or wiring that is not silver, bronze, or black tone that are commonly available in the marketplace.
  - (D) The homeowners' association has determined that both of the following apply:
- (I) The solar energy system will be installed in a fenced yard or patio rather than on the roof of a home or unit.
  - (II) The solar energy system will be taller than the fence line.
- (v) That a member shall comply with state and local building codes and permit requirements in the replacement, maintenance, installation, or operation of an energy-saving improvement or modification or the installation of a solar energy system.
  - (vi) That both of the following apply:
- (A) A member who wants to install a solar energy system in the member's home or unit shall comply with the application requirements under section 11(1).
- (B) A member may resubmit a written application to install a solar energy system in accordance with Rendered Monday, July 7, 2025

section 11(4).

- (g) The policy may impose reasonable conditions concerning the maintenance, repair, replacement, or removal of a damaged or inoperable solar energy system provided that the conditions are not more burdensome than the conditions imposed on nonsolar energy projects.
  - (2) A homeowners' association shall do both of the following:
- (a) Make a copy of the policy available to a member within 30 days after the adoption of the policy, or on request.
  - (b) If the homeowners' association maintains an internet website, post a copy of the policy on its website.
  - (3) Any provision in a policy that conflicts with this act is void and unenforceable.
